

Active Users List Tool

Active Users List Help

Active Users List utility displays the current active user list of Fourth Shift, Net UI, Engineering, Sales Order Processing, Shop Floor, Shop Calendar, FSTI, and WebUI modules. It shows information of all users who are connected to the Fourth Shift Lock Server, including their Windows account, IP address/session.

This function is useful for identifying users logged in before rebooting or updating the server or for determining license usage and counts.

The Active Users List is intended for system administrators and is available in the Fourth Shift Tools, and as a Windows application as a web page in the Portal Admin group with My Fourth Shift Workplace. It does not require a Fourth Shift license to run.

Using the Active Users List Function

On the Server

Go to: Program Files > Fourth Shift Tools > Active Users List

The file resides in M:\MfgSys\System\ActiveUsers.exe where M: is an example mapped drive letter.

In My FourthShift Workplace

Go to the Fourth Shift Active Users List portal in the Portal Admin group.

The file resides in C:\InetPub\wwwroot\FSPortals\ActiveUsers.aspx where C: is an example drive letter.

On a Client Workstation

To run the Active Users List function on a client workstation, create a shortcut on the Desktop:

1. Copy the shortcut for ActiveUsersList from the server and paste it to the Desktop on the client.
2. Verify that shortcut points to the correct mapped drive on the client.

Fields

The following user information is obtained from the Lock Server defined in the Fourth Shift configuration file (fs.cfg) on the server to which the current Fourth Shift system is attached. This information is grouped by different FS systems.

Fourth Shift System

The system identification of each Fourth Shift system connected to the Lock Server for this server. Each Fourth Shift system is listed in a separate section.

Sequence Number

The generated row number that allows the user to count how many users are logged in.

User

In alphabetical order, the username of the user who is online and consuming a license in the Fourth Shift system.

Windows Account

The Windows account name of the user who is online and consuming a license in the Fourth Shift system.

License Name

The name used to register the Fourth Shift license with the Lock Server.
