Publication Information

Release: Infor Distribution A+ Version Number 10.03.02

Publication Date: April 30, 2023

Contents

CHAPTER 1: Accounts Payable Overview

<i>General Ledger Interface</i>	1-1
<i>Voucher Processing</i>	1-2
Credit/Debit Memos	1-2
Pre-Receipt Invoices.....	1-2
Pre-Paid Invoices.....	1-2
Creating Vouchers from Receipt History (Receipt Validation)	1-3
Creating Vouchers Via Drop-Ship Receipt Validation	1-3
Payment Priorities / Urgency Priorities	1-3
<i>Editing Voucher Groups</i>	1-3
<i>Posting Vouchers</i>	1-4
<i>Payment Processing</i>	1-4
Payees and Assignees	1-4
Standard Check Processing	1-5
<i>Payment Selection</i>	1-5
<i>Payment Selection Report</i>	1-5
<i>Payment Selection Maintenance</i>	1-5
<i>Check Edit List</i>	1-5
<i>Printing Checks</i>	1-5
<i>Recording Checks</i>	1-6
<i>Check Reconciliation</i>	1-6
<i>Payment History</i>	1-6
Check Reversal Processing.....	1-6
Manual Check Processing	1-6
<i>Automatic Clearing House (ACH) Processing</i>	1-6
<i>Credit Card (CC) Payment Processing</i>	1-7
<i>Accounts Payable Inquiry</i>	1-8
<i>Bank Account Inquiry</i>	1-9
Bank Checking Accounts	1-9

<i>Reports</i>	1-10
<i>1099 Processing</i>	1-10
<i>MENU APCHCK</i>	1-11
Standard Check Processing	1-11
Manual Check Processing	1-11
Check Reversal Processing.....	1-12
Check Reconciliation and Voiding Unused Checks.....	1-12

CHAPTER 2: Voucher Processing Overview

<i>Voucher Entry</i>	2-1
Voucher Groups/Template Groups.....	2-2
<i>Voucher Groups</i>	2-2
<i>Template Groups</i>	2-3
Voucher Type	2-3
Credit/Debit Memos.....	2-3
Pre-Receipt Invoices.....	2-4
Invoices	2-4
Voucher Transactions	2-5
<i>Receipt Validation</i>	2-5
<i>Drop Ship Receipt Validation</i>	2-6
Calculating GST for Purchase Orders	2-7
<i>During Receipt Validation</i>	2-8
<i>During Miscellaneous Voucher Entry</i>	2-8
Assignees.....	2-8
Cash Discount	2-8
Force Discount	2-8
Business Unit.....	2-9
Payment Priority.....	2-9
Urgency Priority	2-9
Voucher Accounts.....	2-10
Control and Invoice Amounts.....	2-11
<i>Hold Codes</i>	2-11
<i>Voucher Edit</i>	2-11

CHAPTER 63: Starting Infor A+

Glossary

Index

Accounts Payable is a powerful module designed to help your company manage your open payables, determine which invoices will be paid, print your checks, and keep track of payment history.

This section provides an introduction to the Accounts Payable module, and an overview of Payment Processing, Accounts Payable Inquiry, Bank Account Inquiry, and Accounts Payable Reports.

General Ledger Interface

Accounts Payable interfaces with General Ledger enabling you to post journal entries during voucher and check processing without performing additional steps. By using default General Ledger accounts, Accounts Payable can save you time and reduce your need to manually assign account numbers by automatically assigning them for you as you key your vouchers. Payables, expense, and cash discount accounts can be inserted according to the vendor, vendor class, or business unit (division, department, project, etc.) associated with each voucher. These accounts may be overridden. You may also assign default cash accounts to an “unlimited” number of bank accounts. Using default accounts lets you:

- distribute expenses automatically

Distribution accounts allow you to disburse pre-defined percentages of an expense over as many as 20 different accounts without having to key them individually.

- avoid remembering account numbers

In the event that you do need to key accounts, A/P helps you from having to remember the numbers. You may key 5 character “short names” consisting of a combination of letters and numbers instead of keying the actual number. A/P automatically retrieves the number for you.

- protect account security

You may deny or allow a user’s access to any G/L account for voucher entry, check processing, inquiries, and reports. Alternatively, an account’s description can be suppressed when displaying and printing.

Voucher Processing

Voucher Processing is the means by which vouchers are keyed, edited and posted. Voucher processing is performed on the Accounts Payable Main Menu (MENU APMAIN).

Vouchers are processed in groups, called voucher groups. A voucher group contains one or more vouchers. A single voucher group is keyed, edited, modified, and finally posted. Once vouchers are posted, they become open payables and may be selected for payment.

You may create template voucher groups for recurring vouchers such as rent or utility payments. They are created once and then copied into a regular voucher group to create an open payable. They may then be changed, edited and posted as required.

Vouchers may be created in several ways to fulfill various functional needs as described next.

Credit/Debit Memos

Voucher Entry enables you to apply debits or credits to existing open payables.

You may use automatic credit/debit memos to easily reverse the original open payable without having to re-key the voucher. Credit memo dollar amounts are recorded as negative amounts since they are “negative invoices.” Debit memo dollar amounts are recorded as positive amounts.

Pre-Receipt Invoices

Voucher Entry allows for the payment of goods before they are received with the use of the pre-receipt invoice voucher type. This function allows you to track your vendors who occasionally require that you pay for merchandise before you receive it. This is often the case when importing goods from a foreign vendor. Pre-receipt invoices generated through Voucher Entry cause additional information to be retained (if selected). This information is later used to facilitate matching pre-paid items to the receipt and landing cost history transactions created when the goods arrive. This process is known as “Pre-Receipt Validation.”

Also, pre-receipt invoices debit the Pre-paid Inventory Account instead of the Purchase Clearing Account. This allows for the tracking of pre-paid items separately in General Ledger.

Pre-Paid Invoices

Voucher entry allows you to key vouchers for pre-paid invoices. A pre-paid invoice is one that has been paid with a manually written check prior to keying the voucher. That is, payment is made for an “invoice” for which no open payable exists. When pre-paid invoices are posted, your cash and payables accounts are automatically credited and debited without having to perform payment processing.

Creating Vouchers from Receipt History (Receipt Validation)

If Purchasing is installed, voucher entry has a powerful on-line receipt validation utility that allows you to create voucher entries directly from your received line items. Received cost and quantity can be verified as the voucher is entered. Variances between the received and invoiced costs are recorded. Line items selected are marked to prevent you from paying them twice. You can also use receipt validation to calculate GST for purchase orders with taxable line items. Refer to Calculating GST for Purchase Orders in the A/P Voucher Processing section of this user guide for specific information.

Posting vouchers that were generated through receipt validation allows for the reconciliation of the purchase clearing accounts in General Ledger as well as updating the purchase price variance account if there are any discrepancies between the receipt value and the invoice value.

Creating Vouchers Via Drop-Ship Receipt Validation

If Purchasing is installed, several processes may be accomplished through Voucher Entry to complete the cycle of drop shipments (drop shipments are those that the vendor sends directly to your customer). Since the receipt of a vendor's invoice generally serves as the only notification that a customer's order has been shipped, drop ship receipt validation allows for the entry of drop ship receipts from within the Voucher Entry process. Any variances between the receipt values and the invoice values may be automatically placed on a charge back voucher. The posting of the receipts and the voucher(s) occurs virtually simultaneously. Additionally, options are available to have the customer's original order automatically released when these postings are complete.

Payment Priorities / Urgency Priorities

Each voucher may be assigned a payment priority, urgency priority, or urgency date. These factors may be used during payment selection when selecting vouchers for payment.

Editing Voucher Groups

Once you have entered a voucher group, you must edit it to ensure that it contains no errors. A voucher group must be free of errors before it may be posted. There are three reports which may be printed for the voucher edit:

- A/P Voucher Error List
- A/P Voucher Edit List
- Duplicate Invoice Report

Posting Vouchers

After you have entered and edited a voucher group, the group is ready to be posted. Posting creates open invoices from your vouchers and updates your General Ledger expense and payables accounts (if interfaced). Depending on the vouchers posted, additional activities may be performed.

1. Vouchers that were created with split terms enable you to split invoice amounts and assign pay days and split payments over a set period of time. You will be able to define up to 12 splits per term defined, including split urgency days and split discounts. When posting this type of voucher, you will affect Accounts Payable as though separate vouchers were created manually, each with its own due date and, if applicable, discount date. For a detailed explanation, refer to Split Terms Code (MENU APFIL2).

NOTE: Split terms may not be applied to prepaid credit memos and debit or memos.

2. For vouchers that were created as pre-pays, your cash and Accounts Payable liability accounts are credited and debited, respectively, without having to perform payment processing.
3. Posting pre-receipt vouchers creates pre-receipt entries which are used later in the verification process of what was paid for and what was received, since the receipts were posted after the voucher was created.
4. Conversely, posting vouchers that were generated via receipt validation allows for the reconciliation of the purchases clearing accounts as well as for the updating of the purchase price variance account, if there are any discrepancies between the receipt value and the invoice value.
5. Posting vouchers that were created via the drop ship receipt validation process will also ensure the posting of the drop ship receipts themselves. Discrepancies between receipt values and invoice values may be adjusted off, posted to the miscellaneous expense account, or used to automatically create a charge back voucher. Additionally, if purchasing warehouse options (MENU XAFIL2) are set, the sales orders from which the drop ships originated, if any, may be automatically released.

Payment Processing

After vouchers have been posted, the open payables are ready for payment processing. This includes selecting open vouchers for payment, making changes in the selected group, printing the checks, and recording the check numbers on the printed checks. Payment processing is performed on the A/P Check Processing Menu (MENU APCHCK).

Payees and Assignees

When creating vendors, the vendor name normally becomes the payee name. You have the ability to always keep these fields the same by specifying a **N** to the **Different Payee Name/Address** field within Vendors Maintenance (MENU APFILE or MENU POFILE) or allow them to be different by specifying a **Y** in that field. During check processing, when multiple vendors with no assignee exist with vouchers, and these vendors have exactly the same payee name and address information, only one check will generate since the same address exists for both the vendor and payee name. To generate separate checks for this example, you can either enter the vendor as assignee to vouchers (if multiple),

or use the print on separate check flag (if only one voucher), or simply change the name or address slightly so that these vendors can be differentiated and will be sorted to separate checks per vendor.

An **Assignee** is a separate vendor to whom remittance will be made during check processing and can be assigned to vendors through Vendors Maintenance (MENU APFILE or MENU POFILE). You will determine the availability of assignee logic for each company with the **Use Assignees** field set to **Y** or **N** in AP Options Maintenance (MENU APFIL2). If available, an **Assignee** can be added to a specific vendor during Voucher Entry (MENU APMAIN). During check processing, as long as a separate check is not specified for each vendor or invoice, for the different vendors that are all assigned the same assignee, if the assignee number and address are the same for each vendor, only one check will be provided for payables to the **Assignee**.

Standard Check Processing

Payment Selection

Like voucher processing, payment processing is performed using groups. Each group consists of one or more vouchers to be paid. You may select vouchers for a range of vendors or for a list of up to 20 vendors based on due date, payment priority and voucher number.

Payment Selection Report

The Payment Selection Report prints in either payment priority order or in vendor number order. Use it to determine which invoices will be paid.

If you find that some invoices you want to pay do not appear on the report, you may use Payment Selection Maintenance to add more invoices to the same group.

Payment Selection Maintenance

Once you have determined which of the selected invoices will be paid, you may remove the invoices that will not be paid, or change the payment amounts for invoices you wish to partially pay.

Check Edit List

When you are finished selecting invoices, print the Check Edit List for a listing of all checks to be printed along with the invoices being paid. If you need to make changes, you may do so using Payment Selection Maintenance.

Printing Checks

Once payments have passed the check edit process, the checks may be printed. You may optionally hold your printed checks to ensure that they have printed correctly before deleting the spool file. Since A/P records your check numbers after your checks have been printed, you may start printing on any check number.

Recording Checks

To ensure your check numbers always match your OCR number on the bottom of the check, A/P allows you to use pre-printed check numbers. After each check print, you simply inform Distribution A+ which check numbers were used and voided. Distribution A+ will automatically assign the check numbers in your Check History File.

Check Reconciliation

Through A/P, printed checks can be easily reconciled with your bank statement via an on-line check reconciliation program.

Payment History

Once invoices have been paid, they are added to the history file and are available for inquiring, reporting, and reconciling.

Check Reversal Processing

Check reversals are simple to perform since all invoice information is stored in the history files. When checks are reversed, fully paid vouchers are extracted from history and placed back into open payables; partially paid vouchers will have the payments reversed and the partial amounts added back into the open amounts.

Manual Check Processing

Menu options for manually written checks enable you to post these payments for existing open payables without having to perform an entire Standard Check Processing cycle.

Automatic Clearing House (ACH) Processing

Automatic Clearing House (ACH) functionality allows you to process vendor payments as ACH transactions. ACH is a nationwide electronic network for financial transactions. ACH processes large volumes of credit and debit transactions in batches. Electronic ACH payments provide better cash management capabilities, lower costs and faster processing than traditional paper payments. Typically, ACH works similar to the Standard Check Processing work flow:

1. A company/individual (Receiver) authorizes a company/individual (Originator) to initiate a transaction to their financial institution account.
2. The Originator prepares information about the transactions that are to be automated for its vendors or employees and passes it along to an Originating Depository Financial Institution (ODFI).

3. Financial transactions are transmitted via an ACH file that conforms to the rules of The National Automated Clearing House Association (NACHA).
4. The ODFI collects ACH transactions from participating companies, consolidates the information and presents it to the ACH Operator.
5. ACH Operator processes transaction files from submitting ODFIs and distributes it to Receiving Depository Financial Institutions (RDFIs).
6. The RDFI receives entries for its customer accounts and posts entries on the settlement date. Transactions are also reported on account statements.

This Standard Check Processing work flow (described above) will remain the same for ACH Processing. The differences will occur during the Print Check and Record Check Numbers menu options (MENU APCHCK). For ACH Payment Processing, the system will be assigning check numbers and will be using the next consecutive unused check numbers in the reserved ACH check range to keep track of each payment detail record. An ACH template also needs to be defined for each selected bank so that the ACH file with the payment can be assembled correctly. For ACH Post Payments, there is no difference in the Posting process for ACH and non-ACH (regular check) payments. The difference is that for ACH payments, users are not prompted for check number ranges, since the system already knows the check numbers that are being used. These check numbers are from the Reserved ACH Check Range used in the particular ACH Check run. During the post, ACH payment fields are display only.

The following menu options include ACH information to allow you to process vendor payments as ACH transactions:

- Vendors Maintenance (MENU APFILE)
- Bank Account Maintenance (MENU APFIL2)
- A/P Check History Report (MENU APREPT)
- Voucher Entry, Open Payables Maintenance, A/P Inquiry, and Bank Account Inquiry (MENU APMAIN)
- Payment Selection, Payment Selection Maintenance, Payment Selection Report, and Check Edit List (MENU APCHCK)
- Print Checks / Process ACH or CC Payments (MENU APCHCK)
- Record Check Numbers / Post ACH or CC Payments (MENU APCHCK)
- Processed ACH Payments (MENU APCHCK)
- Check Reconciliation (MENU APCHCK)
- Application Action Authorities (MENU XASCTY)

Credit Card (CC) Payment Processing

Credit card payment functionality allows you to flag a vendor invoice (voucher) as being paid by a particular credit card. The AP Payment Selection process (MENU APCHCK) will indicate that the original vendor has been paid. Meanwhile, an open payable due on the credit card is created so that it could be used to reconcile the credit card statement. This ensures the accuracy of vendor performance

and eliminates the need for manual adjustments, as well as allow for easier reconciliation of credit card statements. When the new credit card voucher is created, it will be posted interactively at the conclusion of the Record Check Numbers / Post ACH or CC Payments process (MENU APCHCK). At this point, it will be your responsibility to select these open CC vouchers for payment (prior to the credit card statement due date) via the Payment Selection menu option (MENU APCHCK).

The following menu options include CC information to allow you to process vendor payments using a particular credit card:

- Vendors Maintenance (MENU APFILE/MENU POFILE)
- Bank Account Maintenance (MENU APFIL2)
- Payment Selection (MENU APCHCK)
- Print Checks / Process ACH or CC Payments (MENU APCHCK)
- Record Check Numbers / Post ACH or CC Payments (MENU APCHCK)
- Bank Account Transaction Entry (MENU APMAIN)
- Accounts Payable Inquiry (MENU APMAIN)
- Bank Account Inquiry (MENU APMAIN)

NOTE: A credit card transfer bank account needs to be established in order to pay vouchers by credit card. Once established, it is suggested that you set up one bank account for each credit card used (recommended), or one bank account for all credit cards. Then, you can use the GL Transfer Definition (MENU GLXFER) for bank accounts to assign the appropriate GL account to the respective bank. In this situation, this GL account can be looked upon as a “voucher clearing account,” rather than the typical cash account. Basically, this voucher clearing account will be used as the cash account for the payment transaction and as the expense account for the new voucher that will be created for the credit card vendor.

Accounts Payable Inquiry

Through this one menu option (MENU APMAIN), you can display the following information or perform the following tasks via the use of function keys:

- The ability to view both open and paid invoices for a vendor. Information such as invoice number, invoice date, due date, invoice amount, age of invoice, check number, and check date are displayed. The age of the invoice is a tailorable calculation value for open invoices based on the invoice date or the entry date; the number of days to pay is a tailorable calculation with 3 choices for how to compute this value.
- The ability to view vendor information and to add comments associated either with the vendor or with a particular invoice from that vendor.
- The ability to view vendor performance information, such as the total open amount with an aging summary of open invoices. A summary of all monthly voucher amounts for as many different years as you want may also be displayed.

- The ability to access detail transactions for any open or paid invoice, such as payments, credit memos, or debit memos. You may also add comments associated with any open or paid invoice.
- The ability to make adjustments to selected posted vouchers, if you are authorized to enter a General Ledger transaction group, and the ability to review all voucher adjustment details that may already exist for a voucher.

The check source is also displayed to distinguish the actual source in which the payment was processed (sources are: ACH, Manual Check, Prepaid Check, System Check, or Credit Card Transfer).

Bank Account Inquiry

The Bank Account Inquiry allows you to access information about any bank account. Through this inquiry you may display such information as:

- The current balance of a bank account
- The bank name; bank description; account type
- Whether or not checks are allowed to be used from the bank account
- The general ledger account affected
- The status of the account
- The check source (ACH, Manual Check, Prepaid Check, System Check, or Credit Card Transfer)

You may also gain access into transaction history, open/paid invoice information, and so forth.

Bank Checking Accounts

Distribution A+ allows for an unlimited number of bank checking accounts. Checking accounts are maintained through the use of a function key in A/P Options Maintenance (MENU APFIL2) and Accounts Receivable Options Maintenance (MENU XAFIL2).

Miscellaneous transactions which affect the bank account balances are allowed through Bank Acct Trn Entry (MENU APMAIN). The bank account transactions supported include:

- Deposits
- Withdrawals
- Transfers

In addition to the bank account transaction entry and post, bank account transaction history will also be generated to provide an audit trail of all transactions that affect the bank account's balance.

Bank account transaction history will include the following information and will be generated in the following areas:

- All Transactions

- Transaction date
- Transaction type
- Transaction amount
- Journal number
- General ledger posting date
- Transaction description
- A/P Check Processing (normal, manual or pre-paid) and Check Reversal Processing
 - Additional information retained includes the check number and check amount of each check processed
- A/R Cash Receipts
 - Additional information retained includes the customer number, bank ABA number, the customer's check number, and the check amount for each check processed

Reports

A/P has a variety of reports to help you track your open payables, review vendor performance information, and print receipt history and check history. Reports are printed from the A/P Reports Menu (MENU APREPT), and are as follows:

- Open Payables by Vendor Report
- Open Payables by Due Date Report
- Cash Requirements Report
- Aged Open Payables Report
- Check History Report
- Comment Action Report
- Vendor Performance Report
- Receipt History Report

You can also print Vendor Labels in zip code or sort word order for mailing purposes.

1099 Processing

In A+, vouchers (invoices) may be flagged for 1099 processing, indicating that the voucher's value should be included in either a 1099-NEC form or a 1099-MISC form (depending on the selected IRS 1099 amount type, such as Nonemployee Compensation, Rents, Royalties, etc.). A company level default IRS 1099 amount type may be identified in AP Options Maintenance (MENU APFIL2). In Vendors Maintenance (MENU APFILE/MENU POFIL), a default IRS 1099 amount type for the specific vendor may be identified and a default setting can be made as to whether 1099 processing is required; additionally, default information related to the vendor's federal tax id may be provided.

During the creation of new vouchers in Voucher Entry (MENU APMAIN), these default 1099 related values will be used, but you may override those fields on individual vouchers, on a per-voucher basis. Once the voucher has been created, maintenance to these fields may be accomplished via Open Payables Maintenance (MENU APMAIN) and via Maintain 1099 Information (MENU APMAS).

For year-end processing, the A/P Master Menu APMAS may be used to edit and print (and/or export) 1099s. Values from vouchers reflecting Nonemployee Compensation will be included on 1099-NEC forms while values from vouchers reflecting any other available IRS 1099 amount type will be included on 1099-MISC forms. If a voucher is flagged to require 1099 processing but it doesn't have a specific IRS 1099 amount type assigned and no default has been provided, that voucher's value will be assumed as Nonemployee Compensation.

When printing or exporting 1099 forms, there can be only one 1099 MISC and one 1099 NEC per company, vendor, federal tax id, or name-and-address match. Printed 1099 forms use the format selected in AP Company Options Maintenance (MENU APFIL2): Continuous feed printer forms (one form per sheet) or Laser/Inkjet printer paper forms (portrait mode, two MISC forms per 8.5 x 11 sheet in a 2 UP format and three NEC forms per sheet in a 3 UP format). In addition to the forms being generated, a separate IRS 1096 Information Summary Report will also be generated to summarize the data from those forms; data from this report can then be used to quickly and easily complete any needed IRS 1096 Annual Summary and Transmittal of U.S. Information Returns form.

MENU APCHCK

This menu is used for payment processing. There are three means of payment processing that can be performed through this menu, these include:

- Standard Check Processing
- Manual Check Processing
- Check Reversal Processing

This menu also provides for Check Reconciliation and Voiding Unused Checks.

Standard Check Processing

This includes selecting open vouchers for payment in a payment group, editing the selected group, optionally modifying the group, printing checks for the vouchers in the group, and recording the numbers of the printed checks. Use options 1 through 7 to select and print checks for open payables which are created after posting vouchers through Post Vouchers (MENU APMAIN).

Options 1, 6, and 7 are required for standard check processing; options 2 through 5 are not required.

Manual Check Processing

This is used to indicate that checks have been issued for an existing open payable through a means other than standard check processing (e.g., the check has been hand written). Use options 10 through 12 to indicate the open payables that have been paid with a manual check. This ensures that Distribution A+ will not print a check through standard check processing, avoiding the potential duplication of payment.

Check Reversal Processing

Check reversals are performed if a check has been printed (through standard or manual processing) and is not sent to a vendor. Use options 15 through 17 to select and reverse checks.

Check Reconciliation and Voiding Unused Checks

This menu also provides the option to reconcile checks (MENU APCHCK), and to void unprinted checks (MENU APCHCK). These options may be selected regardless of the type of check processing.

Voucher Processing is the means by which vouchers are keyed, edited and posted in A/P. Vouchers are processed in groups, called voucher groups. A voucher group must contain at least one voucher. A single voucher group is keyed, edited, modified, and finally posted. Once vouchers are posted, they become open payables and may be selected for payment.

Additionally, you may create a template group. This type of group is created and edited in the same manner, then copied to a new voucher group. Template groups are useful for recurring voucher entries.

Voucher processing is performed through the A/P Main Menu (MENU APMAIN). If EDI is installed, AP voucher groups can be created automatically from incoming EDI invoices. Refer to the EDI manual for additional information.

There are three main steps to processing vouchers.

1. Voucher Entry. Vouchers are keyed into a voucher group; voucher transactions are keyed for each voucher. This is performed through Voucher Entry (MENU APMAIN).
2. Voucher Edit. A voucher group is verified (prints a listing of your entries) and validated (indicates errors made during voucher entry). This is performed through Voucher Edit List (MENU APMAIN). A voucher group cannot be posted until it has successfully passed this edit.
3. Voucher Post. G/L Accounts are updated accordingly based on the voucher transactions in a voucher group. The vouchers become open payables and may be selected for payment through payment processing occurring via MENU APCHCK. The voucher post is performed through Post Vouchers (MENU APMAIN).

NOTE: The Voucher Edit is automatically run when you attempt to post a transaction group to ensure that no errors exist.

Voucher Entry

Voucher Entry (MENU APMAIN) is the process of creating voucher groups, and the actual vouchers which comprise those groups. A voucher group, depending on the file allocation, may contain an indefinite number of vouchers (with the minimum of one in each group).

Voucher numbers may be assigned by the user or by the system [determined via A/P Options Maintenance (MENU APFIL2)].

If you select to have voucher numbers assigned by the system, you are not required to key a voucher number. The next sequential voucher number for a company is assigned. If you select to have voucher numbers assigned by the user, you must key in a unique voucher number for each voucher created.

If **Check for duplicate invoices** is set to **I**, **D**, or **B** in AP Options Maintenance (MENU APFIL2), an interactive process will run when you enter or maintain vouchers in Accounts Payable. Based on your selection, this process checks the Voucher Header File, the Open Payables File, and the History Payables File for duplication based on some or all of the following values:

- Vendor number
- Invoice number
- Invoice date
- Invoice amount

This check functions from the following options:

- Voucher Entry (MENU APMMAIN)
- Create Vouchers From Templates (MENU APMMAIN)
- Open Payables Maintenance (MENU APMMAIN)

If a duplicate is found, a warning message will appear with information about the location of the duplicate.

NOTE: You may create pre-defined split terms for a vendor, enabling you to split invoice amounts. If done, the split invoices will be created for you and each will be automatically system assigned a unique voucher number. The same is true for charge back vouchers automatically created through the Accounts Payable drop ship receipt validation process, (i.e., regardless of the Accounts Payable option, automatically created vouchers are system assigned the next available voucher number).

Voucher Groups/Template Groups

A voucher group, created through Voucher Entry (MENU APMMAIN), may be one of two types:

- Voucher Groups (VCH), or
- Template Groups (TMP).

Voucher Groups

Voucher processing is performed using voucher groups. Voucher groups do not have to be processed independently. That is, you may enter several different voucher groups and edit and post them at any time, regardless of the sequence in which they were keyed. To help manage voucher groups, all

unposted groups may be displayed through the Voucher Group Search when keying, editing, or posting.

Unposted voucher groups fall into one of four categories:

- **ACTIVE:** The group is in process and has not been edited.
- **EDITED:** The group has been edited successfully.
- **POSTING:** The group is in the process of being posted.
- **IN USE-ws:** The group is currently being used at another workstation, identified with Workstation ID ws.

Template Groups

A template group is a voucher group which has been defined specifically for the purpose of copying to create a new group. The template group is created and edited in the same manner and then copied to a new voucher group through Create Vouchers from Templates (MENU APMAIN). The voucher group to which the template group has been copied may be modified, edited and posted. Template groups cannot be posted.

Template groups are useful for those voucher entries which are standard or recurring. Standard entries are routine transactions for which the dollar amounts are unknown; recurring entries are those routine entries for which the dollar amounts are known (e.g., rent or utility payments). In either case, the use of a voucher template spares you from having to key new vouchers in a voucher group each time.

Voucher Type

The voucher type represents the type of voucher being entered. This may be one of the following:

- **Credit/Debit Memos:** Credit memos reverse an open payable in part or in full; whereas, the debit memo increases an open payable.
- **Pre-Receipt Invoices:** Reduces (debits) the Pre-Receipt Inventory Account.
- **Invoice:** A voucher indicating liability to a vendor.

Credit/Debit Memos

Voucher Entry enables you to apply debits or credits to existing open payables.

You may use automatic credit/debit memos to easily reverse the original open payable without having to re-key the voucher. Credit memo dollar amounts are recorded as negative amounts since they are “negative invoices.” Debit memo dollar amounts are recorded as positive amounts.

An Automatic Credit Memo feature is available to generate an automatic credit memo for an open payable voucher and reverses the original transaction in full. For example, this option may be used if you debit accounts payable for an item you are returning or if reduced payment is agreed upon with your vendor. Split terms do not apply to credit memos.

NOTE: The invoice must have no activity (i.e., payments, debits, credits, or discounts taken) for it to be selected for this function.

Pre-Receipt Invoices

Voucher Entry (MENU APMAIN) allows you to enter a pre-receipt voucher type. A pre-receipt invoice allows you to pay for merchandise prior to receiving it. A pre-receipt invoice debits the Pre-Receipt Inventory Account instead of the Purchase Clearing Account, so you can track pre-paid items separately in General Ledger. On the Voucher Detail Screen, you may optionally record the PO number or receiver number, for the paid items.

Once pre-receipt invoices are posted, pre-receipt validation may occur. Pre-Receipt Invoice Validation Entry (MENU APMAIN) allows you to review pre-paid items and match them with the receipt and landing-cost history transactions after you receive the merchandise. You can use this option to mark the affected receipt, in turn posting the transactions to General Ledger. These actions clear or credit the Pre-Receipt Inventory Account for the amount of the original voucher, and clear or debit the Purchases Clearing Account for the amount of the receipt.

Similar to normal voucher entry, an edit and post is available for this pre-receipt invoice validation process through MENU APMAIN and Option 14.

The following functions also are performed when you run option 14:

- Validation work transactions are used to generate G/L transactions; these transactions are placed into a G/L posting group and the group is submitted for posting. This causes any pre-paid inventory amounts to be backed out (the Pre-Receipt Inventory Account is credited) and any Purchasing Clearing accounts to be cleared (debited). All work files are therefore cleared and the pre-receipt inventory records are updated to reflect the validation.

Invoices

Voucher Entry (MENU APMAIN) allows you to create vouchers to indicate liability to vendors. Vouchers may be keyed or generated. One particular type of invoice is the pre-paid invoice. A pre-paid invoice is one that has been paid with a check prior to keying a voucher. That is, payment is made for an invoice for which no open payable exists.

To enter pre-paid invoices into a voucher group, key **Y** in the **Pre-paid Invoices** field on the Voucher Group Information Screen. Next, specify the bank account that is used when making payment. You also must enter, for the specific voucher, the check number and check date on the Voucher Header Screen.

Pre-paid invoices that were paid using different bank accounts cannot be keyed in the same voucher group. In this case, create a different voucher group for pre-paid invoices using different bank accounts. When pre-paid invoices are posted, your Cash and A/P Liability accounts are credited and debited respectively, without having to perform payment processing. Split terms do not apply to pre-paid invoices.

Whether pre-paid or not, all vouchers require that the voucher transactions be identified to indicate General Ledger activity to occur.

Voucher Transactions

For each voucher, you may key voucher transactions. Voucher transactions allow you to select which expense accounts are updated for the voucher. When the voucher group is posted, voucher transactions are printed on the Purchase Journal, and pre-paid invoice voucher transactions are printed on the Cash Disbursements Report.

For each voucher transaction, you must indicate the expense account, amount, activity (debit or credit), applicable cash discounts, purchase order number, project ID, and description.

There are ways by which the transactions may be generated by the system:

- **Voucher Templates:** By allowing the creation of template voucher groups, you may one time key a set of transactions that are normally recurring and then copy them to true vouchers whenever needed.
- **Split Terms:** By assigning a voucher split terms, the creation of the first voucher with its transactions actually results in the creation of all other needed vouchers to split the invoice amount over the desired number of days.
- and, if Distribution A+ Purchasing is installed, there are two methods by which voucher processing may be linked to purchasing receipt processing: Receipt Validation and Drop Ship Receipt Validation.

Receipt Validation

Voucher Entry has an on-line receipt validation utility that allows you to create voucher entries directly from your received line items. Received cost and quantity can be verified as the voucher is entered. Variances between the received and invoiced costs are posted to the purchase price variance account. Items selected are marked to prevent you from paying them twice. You can also use receipt validation to calculate GST for purchase orders with taxable line items. Refer to “Calculating GST for Purchase Orders” on page 2-7 for specific information.

If EDI is installed and the **Allow Off-Line Validation** field is set to **Y** through Vendor Master Maintenance (MENU POFIELD), receipt validation will be performed automatically for incoming EDI invoices from that vendor. If the **Allow Off-Line Validation** field is set to **N**, receipt validation must be performed manually through Voucher Entry (MENU APMAN).

- **Cost Variances**

You can set up a **Cost Variance Warning Percent** or **Cost Variance Warning Value** through Purchasing Options Maintenance (MENU XAFIELD). If these fields have been set up and the variance exceeds either of these, a warning message will be issued to verify the cost. You can also set up a variance voucher hold code in Purchasing Options Maintenance to put the voucher on hold automatically. If a hold code has been set up, the voucher can only be released by the authorized users specified in Purchasing Options Maintenance.

- **Quantity Variances**

Any variances between the received quantity and the invoice quantity may also result in two types of actions:

- If the line item is validated as received complete, the variance between the two quantity values causes the generation of the Quantity Variance Report. Any time this report is generated, it should be kept for history.
- If the line item is not validated as received complete, the remaining items not received will be removed from the current record and incorporated into another record so that future processing on those outstanding items may occur.
- Receipt Comments

You also are provided with the ability (via a function key) to enter receipt comments associated with a line item on a PO. You will access I/A Comments Maintenance (when you press the **F2=RECEIPTS CMNTS** function key) where you may add, change, or delete comments for inventory transactions. During receipt validation, you can display and change the keyed comments. This is useful for all types of receipts, and particularly for returns as it enables you to review important information about the return as well as enter information pertaining to the status of a credit.

- Landing Costs

Landing costs included in Purchasing activities also are included in the receipt validation process. Landing costs are defined, assigned to items (per warehouse or across-the-board), and used in the determination of invoice and receipt values. Since estimated landing costs are usually included when the requisition or purchase order is created, the validation of the actual invoiced landing costs is imperative.

- Marking Previously Vouchered PO Receipts

To ensure that receipts, received prior to the installation of Accounts Payable (A/P), do not display for payment during receipt validation, you may mark previously vouchered PO receipts. You have the option to mark individual receipts or all receipts “previously vouchered” for a receipt date associated with a vendor. Once receipts are marked, they do not appear in A/P Receipt Validation and cannot be selected for transfer from PO to A/P.

Drop Ship Receipt Validation

Voucher Entry has a drop ship receipt validation process that allows you to enter drop ship purchase order receipts, and create voucher entries directly from these receipts, all via this same process. When the voucher is posted, the purchase order receipts will also be posted.

When entering in the amount of the invoice, and then the receipt data, if there is a difference between the invoice amount and the receipt amount, you will be presented with an End Drop Shipment Receipt Validation Screen where you will be able to enter and validate miscellaneous charges, if any. From this screen you may also not only create a voucher to pay the vendor for the drop shipment, but also create a charge back voucher to indicate to the vendor any charges for which you will not be paying. If a charge back is desired, it will be created automatically when the original voucher is created. If you do not create a charge back, the voucher may be put on hold automatically, depending on the amount of the variance and whether you have defined a PO-AP Hold Code in Purchasing Options Maintenance (MENU XAFILE).

Additionally, purchase order options are available so that when these postings occur, any originating sales orders for the drop ship’s may be automatically released.

NOTE: No landing cost validation occurs through this drop ship receipt validation process.

While the purpose of drop ship receipt validation is to combine the receipt entry and voucher entry processes required to complete the cycle of a drop ship, there may be times when a decision is made to stop or break the process. To allow for this, once the drop ship receipts have been entered, they may be saved without having to continue with the actual creation of the voucher. The user's workstation ID and a sequential three-digit number beginning with 501 (and incremented by one until a unique number is found) is used to save the receipts to a normal purchase order receipt group. This group may then be used in a drop ship receipt validation process.

When a purchase order is selected during the drop ship receipt validation process, if that purchase order is in a normal purchase order receipt group, it will be removed from that group and brought into a drop ship receipt validation group (signified by the user's workstation ID and a sequential three-digit number beginning with 001 and incremented by one until a unique number is found). If the purchase order was the only purchase order in that normal purchase order receipt group, that group will automatically be deleted. A unique group is created for each warehouse represented by the purchase order selected, (i.e., if two purchase orders were processed, and each purchase order belonged to a different warehouse, then you would have two Accounts Payable receipt validation groups: XX001 and XX002, where XX indicates your workstation ID).

Again, if after the drop ship receipt is entered, but before the voucher is created, you select to save the receipt, or if anytime after the voucher is created you delete the voucher, any drop ship receipts entered will be saved back to a normal purchase order receipt group. Following the above example, if the vouchers were then deleted, you would have two normal purchase order receipt groups: XX501 and XX502).

Calculating GST for Purchase Orders

The system will calculate GST during receipt validation and miscellaneous voucher entry. To use this feature you must:

- Key **Y** in the **Use GST/PST Taxing** field in System Options Maintenance (MENU XAFIL).
- Provide a federal tax ID number and description for your company through Company Name Maintenance (MENU XAFIL).
- Key **Y** in the **Calculate GST for Purchases (Inputs)** field through AP Options Maintenance (MENU APFIL2).
- Specify the General Ledger Transfer Options for Credited and Non-Credited Purchase Tax Accounts and assign account numbers through G/L Transfer Definition (MENU GLXFER, sub-option T and G).
- Create tax bodies with the **Goods/Services Tax** field set to **Y** and specify a GST rate through Tax Body Maintenance (MENU OEFILE).
- Use Vendors Maintenance (MENU APFILE or MENU POFILE) and Vendor/Warehouse Assignments (MENU POFILE) to assign tax bodies to vendors and vendor/warehouse combinations for which you want GST to be calculated.

During Receipt Validation

During Voucher Entry (MENU APMMAIN), the system calculates and displays the GST amount for receipt validation performed for vendors and vendor/warehouse combinations with GST tax bodies. Tax is calculated for taxable purchase order line items. Tax is not calculated for landing costs or special charges, or during drop ship receipt validation. You can then create, edit, and post the voucher for the receipt. The calculated GST amounts will post to the appropriate Credited and Non-Credited Purchase Tax Accounts in General Ledger when the voucher is posted.

During Miscellaneous Voucher Entry

During Voucher Entry (MENU APMMAIN), the system calculates and displays the credited and non-credited tax amounts for miscellaneous vouchers for vendors with a GST tax body. Tax can be calculated for both the credited and non-credited taxable amount and displays on the GST Tax Information Screen (p. 4-98) where you can review and/or change the taxable amounts or override the tax amounts before ending the voucher. Ending the voucher creates the GST transaction. The calculated GST amounts will post to the appropriate Credited and Non-Credited Purchase Tax Accounts in General Ledger when the voucher is posted.

Assignees

When creating a voucher, it is common that payment is made to a party other than the vendor, such as a third party collection bureau. Using an assignee number during voucher entry allows you to assign payment to another vendor. Assignees that are specified for a vendor display during voucher entry and may be overridden or accepted.

Cash Discount

You may automatically calculate cash discount amounts during voucher entry based on either the vendor invoice date or voucher entry date. If you key the cash discount date, Distribution A+ will calculate the cash discount days. Likewise, if you key the cash discount days (days remaining), the cash discount date is calculated.

When creating vouchers, the default discount set up for a vendor through Vendors Maintenance (MENU APFILE) is displayed. This value may be overridden or accepted. For split terms, a cash discount is available for each voucher based on each voucher's discount date.

Force Discount

You may force discounts using the Force Discount Code to indicate if cash discounts will be applied regardless if payment is made after the discount date. This allows you to take advantage of a cash discount even if the discount period has passed. If cash discounts are not forced, the discount is obliged only for payments made before or on the discount date.

Business Unit

The business unit is a two character code assigned to each voucher during Voucher Entry (MENU APMAIN). This business unit is used by Distribution A+ to select A/P Liability and Expense accounts and Purchase Tax Accounts if GST is being used. The use of this code is optional.

Use business units if the information from a vendor's invoice determines which accounts are updated.

Example:

If you have three branches that share vendors and you want to track payables by branch, create a business unit for each branch. Then, when keying a voucher, key the business unit for the appropriate branch.

Payment Priority

A payment priority is assigned to a voucher during Voucher Entry (MENU APMAIN) to indicate the priority level for making payments. The default priority for the vendor is displayed when creating a voucher and may be overridden or accepted. Payment priority may be used during Payment Selection (MENU APCHCK) to select groups of vouchers to be paid.

Payment priorities may be one of the following:

- 1 if the payment or urgency priority is high
- 2 if the payment or urgency priority is medium
- 3 if the payment or urgency priority is low

Urgency Priority

In addition to assigning a payment priority to a voucher, you have the option of assigning an urgency priority. It differs, however, in that its value (1, 2, or 3) will replace the payment priority on the urgency date.

Example:

During Voucher Entry, assume that you assign to a voucher a payment priority of 2 and an urgency priority of 1 with an urgency date of February 1.

When selecting vouchers with a payment priority of 1 before February 1, this voucher is not selected. This is because the payment priority assigned to the voucher is 2.

If you select vouchers with a payment priority of 1 after February 1, this voucher is selected. This is because the urgency priority of 1 replaces the payment priority of 2 on the urgency date (February 1).

NOTE: For split terms, the urgency date is based on the split urgency date entered in Split Terms Maintenance (MENU APFIL2).

Voucher Accounts

When creating a voucher, you must specify an accounts payable liability account, and cash discount account (if discounts are applied). A default expense account is optional.

If you specify a default expense account, you will not have to specify an expense account for each voucher transaction (if desired, you may override the default expense account). Expense accounts are debited when the voucher is posted and the accounts payable account is credited. One accounts payable account is used for one voucher. The cash discount account is credited if a discount is taken when paying this voucher.

Each of the voucher accounts are specified on the Voucher Header Entry Screen. If you are keying a single voucher transaction for a voucher, you may press **F10=END VOUCHER** to end the voucher after you have keyed the appropriate account numbers. This will create the voucher transaction for you, based on the account and total dollar amounts specified for the voucher. The voucher is created and summary information is displayed on the End Voucher Entry Screen.

For split invoices, the A/P Clearing Int. Account is used for the value of split invoices, as they are updated to Accounts Payable.

For charge back vouchers created during drop ship receipt validation, the Purchase Price Variance account is used (as a default) for the value of any difference between the receipt value and the invoice value that was not adjusted or marked as miscellaneous.

Control and Invoice Amounts

When you create a voucher, the system prompts you for the invoice amount associated with this voucher. While keying voucher transactions, a running total of payments made for the invoice is calculated based on each voucher transaction.

The control and invoice amount totals are compared and displayed during and after keying voucher transactions. If they do not match, a warning message is displayed when you end voucher entry. The voucher group cannot be posted until the totals match. Totals may not match due to a keying error for a voucher transaction, or incorrect accounting for cash discounts. You may override the calculated cash discount on the End Voucher Entry Screen.

For a drop ship receipt validation process, differences may be determined as vendor issues and may be charged back to the vendor. In this case, one voucher will be created to become an open payable that you are going to pay, and another voucher will be automatically created to become a negative open payable.

Hold Codes

Vouchers may contain hold codes - a user defined code to identify invoices in question. These vouchers are held and may not be paid until the hold code is removed. Hold codes are maintained through Hold Codes Maintenance (MENU APFILE).

When posting vouchers, the field **Post Held Vouchers** is displayed on the G/L Transaction Post Report (p. 7-7). The default for this value is set up through A/P Options Maintenance (MENU APFIL2). If you answer **Y**, any vouchers on hold will still be posted to the open payable files, but the open payable will be on hold. If you answer **N**, only the vouchers not containing hold codes will be posted.

NOTE: When posting drop ship receipt validation vouchers, no held vouchers will be posted.

Voucher Edit

Once you have entered a voucher group, you must edit it to ensure that it contains no errors. A voucher group must be free of errors prior to posting. There are three reports which may be printed:

- A/P Voucher Error List
- A/P Voucher Edit List
- Duplicate Invoice Report

A/P Voucher Error List

The A/P Voucher Error List identifies errors, such as invalid account numbers. Since a voucher group must be free of errors before it can be posted, no errors can be indicated on this report. If no errors exist, you may post this voucher group.

A/P Voucher Edit List

The A/P Voucher Edit List is used to verify that transactions keyed for each voucher in a voucher group have been keyed correctly. Verification involves comparing this report to the source document or documents used when keying the voucher group. You are not required to print this report.

Duplicate Invoice Report

The Duplicate Invoice Report is used to identify those invoices which have been reported more than once. You may print the report for duplicates of matching invoice numbers and vendors; for duplicates of matching vendors, invoice dates, and amounts; or for duplicates of matching invoice numbers, vendors, invoice dates, and amounts.

If you have selected to check for duplicate invoices during voucher entry in AP Options Maintenance (MENU APFIL2), it is recommended that you still run this report when you edit vouchers.

Voucher Post

Posting vouchers is the final step of voucher processing. After you have entered and optionally edited a voucher group, the group is ready to be posted through Post Vouchers (MENU APMAIN). To ensure data integrity, the posting procedure runs in the Transaction Processor. See the Cross Applications User Guide for information on the Transaction Processor.

Posting creates open invoices from your vouchers and updates your general ledger expense and payable accounts.

When posting vouchers for pre-paid invoices, your A/P cash discount account is updated.

When a pre-receipt voucher is posted, a pre-receipt entry is created and awaiting validation through Pre-Receipt Invoice Validation Entry (MENU APMAIN), Pre-Receipt Invoice Validation Edit List (MENU APMAIN), and Post Pre-Receipt Invoice Validation Group (MENU APMAIN).

If you are using split terms, split information will be used to create separate vouchers for each split defined during Voucher Post (MENU APMAIN).

When posting drop ship receipt validation vouchers, all related purchase order receipts will also be posted.

NOTE: Through the Accounts Payable Inquiry (MENU APMAIN), you also will be able to make an adjustment to a posted Accounts Payable open/paid voucher. Depending on authorization, you will be able to create a General Ledger transaction group that will “reverse” the existing line and make account adjustments accordingly. The Account Payable Inquiry will then display both the original and adjusted entries, since the General Journal (GJ) number will be linked to the original voucher number.

Accounts Payable Accounts Updated

A voucher group must be posted to update the Open Payable Files. The following accounts may be updated when vouchers are posted:

- A/P Liability Account: Credited for net invoice amount of the voucher.
- A/P Expense Account: Debited for the line item amount of the voucher.
- A/P Clearing Int. Account: Debited and credited for pre-receipt validation process.
- Purchases Clearing/Purchase Price Variance Account: Debited and credited for receipt validation process.
- Landing Cost Expense and Variance Accounts: Debited and credited for landing costs during receipt validation process.

Posting Reports

- A/P Voucher Error List. Use this report to detect errors in the voucher group. If errors exist, correct the errors through Voucher Entry (MENU APMAIN) prior to posting the group.
- A/P Voucher Edit List. Use this report to verify that transactions keyed for each voucher in a voucher group have been keyed correctly.
- A/P Purchase Journal. Use this report as your record of the voucher transactions posted in A/P. This report is assigned an audit number. Retain all purchase journals in sequence by audit number; this number allows you to maintain sequential records of your A/P voucher transactions. This report is primarily sorted by vendor sort word and secondarily sorted by voucher number.
- Cash Disbursements Report. Use this report as your record of the pre-paid invoice voucher transactions posted in A/P. Each report is assigned an audit number so all cash disbursement journals can be retained in sequence by audit number. This report is sequenced primarily by vendor sort word, and secondarily by voucher number.
- G/L Transaction Post Journal. Use this report as your general journal record of the voucher transactions posted to G/L. A second G/L Transaction Post Journal is printed if pre-paid invoices have been posted in a voucher group to G/L (these voucher transactions are also printed on the Cash Disbursements Report.)

The Journal-Reference Numbers are assigned the prefix PJ for purchase journal transactions posted through A/P (e.g., non-pre-paid invoice transactions). Journal-Reference Numbers are assigned the prefix CD for pre-paid invoice transactions posted through A/P. This report is sorted by Journal-Reference Number (i.e., the order in which voucher transactions were keyed).

- **G/L Account Distribution Edit.** This report is printed if at least one distribution account has been specified in a voucher transaction or voucher group. For each distribution account, the accounts contained in the distribution account and their respective percentages are printed on this listing.

If drop ship receipt validation was processed, the following additional reports/output may be produced:

- **Drop Ship Shipment Notification.** Use this report to identify any drop ships that have been received during the Accounts Payable drop ship receipt validation process.
- **B/O Release Report.** Use this report to identify sales orders whose ship quantities have been updated due to the Accounts Payable drop ship receipt validation process so that invoicing of those orders may occur.
- **G/L Transaction Post Journal.** The Journal-Reference Numbers are assigned the prefix IJ for inventory journal transactions due to the purchase order receipts (i.e., non-inventory, landing costs, purchases clearing).

Voucher Entry Steps

The following steps summarize the points of Voucher Processing:

1. Manually prepare your new invoices, pre-paid invoices, credit memos, debit memos, and pre-receipt invoices for entry.
2. Enter a voucher group through Voucher Entry (MENU APMMAIN) or proceed to step 3.
3. Copy a template group to a voucher group through Create Vouchers from Templates (MENU APMMAIN).
4. Edit the voucher group through Voucher Edit List (MENU APMMAIN).
5. If errors are detected, correct the voucher group through Voucher Entry (MENU APMMAIN). Return to step 4.
6. Post the voucher group through Post Vouchers (MENU APMMAIN). Retain printed journals for audit logs.

If you created any pre-receipt invoices, also perform the following steps:

7. Run Pre-Receipt Invoice Validation Entry (MENU APMMAIN) to review pre-paid items and match them with the receipt and landing-cost history transactions after you receive the merchandise.
8. Verify the G/L transactions through Pre-Receipt Invoice Validation Edit List (MENU APMMAIN).
9. Post pre-receipt transactions for the selected validation group through Pre-Receipt Invoice Validation Group (MENU APMMAIN).

Automatic Creation of Vouchers during Credit Card Processing

This section provides a summary of the automated voucher creation process that results when an Account Payable (AP) payment group has been paid by a credit card. A Credit Card Vendor Voucher is entered and posted via an automated process that occurs. When an AP payment group is paid by credit card, those open vouchers (based on the actual vendor number) are updated accordingly as paid. Since the form of payment was by a credit card, a new voucher group will be created and posted by the system automatically in order for the vouchers to be assigned to the credit card vendor specified during that payment group entry. During this automated voucher creation process, an unused voucher Group ID will be automatically determined based on a newly generated 4-digit number which is prefixed with a C (for example, Cxxxx, where xxxx is the next sequential number). This particular voucher creation/assignment process occurs in a non-user interactive mode whereby the number of new vouchers cannot be determined beforehand; therefore, you will not be able to specifically define the actual voucher number range (regardless of system or user-defined voucher number settings). Because of this, the voucher numbers will continue to be systematically assigned based on this explanation.

A few key aspects of the voucher header (APVHD) creation is:

- The invoice number value per vendor will be assigned as CC#xxxxxxxx, where xxxxxxxx represents the check number.
- The invoice date of the new voucher will be today's date.
- The due date will reflect the credit card due date entered during the record check number process.
- The urgency date and cash discount date will be determined based on the credit card vendor information stored in the AP Vendor Master File (APVEN).
- The invoice amount per vendor is based on the total check amount that was previously determined (which has already taken into account any original discounts, etc.).
- The default expense account will reflect the voucher clearing account.
- The IC Header Extension File (ICVHD) will also be created, if necessary.

A few key aspects of the new voucher detail (APVDT) creation is:

- The transaction amount determined at the detail level will include any original discounts applied when the check was initially created. This will help avoid any GL out-of-balance situation that may occur when the new voucher is posted.
- The IC detail extension file (ICVDT) will also be created, if necessary.

Once the new credit card vouchers are created, they will be posted interactively at the conclusion of the record check number process. If multiple vouchers need to be posted, this will be performed one at a time. At this point, for each voucher posted, the Purchase Journal (PJ) will be generated. But instead of a debit to an expense account, the "Voucher Clearing Account" from the original payment group will be debited.

When the Voucher Process completes, the original vendor will reflect a payment from the credit card bank account. The "phantom" checks used can be viewed in a Check History Report or via the Bank Account Inquiry (MENU APMAIN). The credit card vendor will now have open vouchers (one per

vendor check per payment group) that can be matched up with their credit card statement at the end of the month. At this point, it will be your responsibility to select the open CC vouchers for payment (prior to the credit card statement due date) via the Payment Selection menu option (MENU APCHCK).

Once vouchers are posted through Post Vouchers (MENU APMAIN), they become open payables (also called open payable invoices). The process of selecting, reversing, recording, and printing checks is called payment processing. Three methods of payment processing are:

- Check Processing
- Manual Check Processing
- Check Reversal Processing

A fourth method of cash disbursement is using prepaid invoices. Prepaid invoices are processed through Voucher Entry. Refer to CHAPTER 2: *Voucher Processing Overview* for more information.

Additional payment processing functions are reconciling checks and voiding groups of unused checks.

Payment processing is performed in A/P through the A/P Check Processing Menu (MENU APCHCK).

Check Processing

Check processing is the primary method used to select open payables and to print checks in A/P. Open payables are included in payment groups for which checks are printed.

Menu Options

The menu options for performing check processing are listed below and summarized in the chart following:

1. Payment Selection (MENU APCHCK)
 2. Payment Selection Maintenance (MENU APCHCK)
 3. Payment Selection Report (MENU APCHCK)
 4. Clear Payment Selections (MENU APCHCK)
 5. Check Edit List (MENU APCHCK)
 6. Print Checks / Process ACH or CC Payments (MENU APCHCK)
-

7. Record Check Numbers / Post ACH or CC Payments (MENU APCHCK)

Check Processing Summary

Opt #	Option Name	Purpose	Req'd
1	Payment Selection	To select open payable invoices for payment in a payment group. The Payment Selection Report prints.	Yes
2	Payment Selection Maintenance	To reverse or change selections in a payment group. This includes partial payments.	No
3	Payment Selection Report	To print the Payment Selection Report which summarizes the invoices selected for payment.	No
4	Clear Payments Selections	To remove all or some invoices from a payment group.	No
5	Check Edit List	To print the A/P Check Edit List and A/P Check Error List used to verify and validate payment selections respectively.	No
6	Print Checks / Process ACH or CC Payments	To print the edit/error reports, and to print remittance advice and checks. The G/L Transaction Post Journal and Cash Disbursements Report also print.	Yes
7	Record Check Numbers / Post ACH or CC Payments	To record the check numbers of checks printed and voided.	Yes

Required Steps

These options are required (in this sequence) to successfully complete standard check processing:

- Option 1 - Payment Selection
- Option 6 - Print Checks / Process ACH or CC Payments
- Option 7 - Record Check Numbers / Post ACH or CC Payments

Optional Steps

Any of the following may be performed after a payment group is selected through option 1, and before checks are printed through option 6:

- Option 2 - Payment Selection Maintenance
- Option 3 - Payment Selection Report
- Option 4 - Clear Payment Selections
- Option 5 - Check Edit List

Payment Selection

The first step of check processing is selecting open payable invoices for which checks will be printed. This is called payment selection. Upon successful payment selection (i.e., desired open payable invoices are found), a payment group is created. The payment group may be modified, verified, or cleared. Finally, checks are printed and recorded for a payment group. Payment selection is performed through Payment Selection (MENU APCHCK).

Company Selection

All check processing is company specific. If you use more than one company, independent payment groups may be processed for more than one company at a time.

If any of the following conditions exist for the same company, a payment group may not be selected:

- Check editing [Check Edit List (MENU APCHCK)] has been submitted to the Transaction Processor but has not completed.
- Check printing [Print Checks / Process ACH or CC Payments (MENU APCHCK)] has been submitted to the Transaction Processor but has not completed.
- Checks have been printed for this company, but have not been recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

Payment Group Search

You may display the payment group search by pressing F4 when performing any of the following:

- Payment selection through MENU APCHCK
- Payment selection maintenance through MENU APCHCK
- Printing the Payment Selection Report through MENU APCHCK
- Clearing payment selections through MENU APCHCK
- Printing the A/P Check Edit List through MENU APCHCK
- Printing checks through MENU APCHCK

This search displays the existing payment groups for all companies. This is helpful when selecting an existing payment group if you do not recall the group name.

Forced Discounts

During payment selection, you must specify if discounts will be forced. Forcing a discount results in the discount terms offered by the vendor being obliged regardless if the discount date has passed. Likewise, if discounts are not forced, the discount offered by a vendor is obliged only if the current date is less than or the same as the discount date. Forced discounts are determined by the force discount code which is **Y** (yes) if discounts are forced, and **N** (no) if discounts are not forced.

Throughout A/P, a hierarchy is used to determine the force discount code. This hierarchy is as follows:

1. Vendor: The force discount code may be determined for each vendor. The code may be **Y** to force discounts for this vendor, **N** to not force discounts for this vendor, or blank. Leaving the force discount code blank means that the status of the code will be determined in one of the next levels (Voucher or Payment Selection).
2. Voucher: On a voucher, the force discount code of the vendor for whom the voucher is created is the default. This default code may be overridden or accepted. If the force discount code is left blank, the status of the code is determined in the last level of the hierarchy (Payment Selection).
3. Payment Selection: This is the final level of the force discount hierarchy. If the force discount code for a voucher (now open payable invoice) is **Y** or **N**, the applicable action is taken. For vouchers with a blank force discount code, you must specify the force discount code when creating the payment group through Payment Selection (MENU APCHCK). You may, however, change the force discount code for any selected invoice through Payment Selection Maintenance (MENU APCHCK).

Held Invoices

You must determine if held invoices are to be selected. If a voucher is given a hold code (i.e., the voucher is marked as being held), determine if the open payable should be selected for payment.

If held vouchers are included when creating a payment group through Payment Selection (MENU APCHCK), those open payable invoices may not be paid through Print Checks / Process ACH or CC Payments (MENU APCHCK) if they remain on hold. However, they may be removed from hold through Open Payables Maintenance (MENU APMAIN).

Selecting Invoices

Invoices by Due Date

When selecting invoices for payment, the only required selection criteria is the due date of the invoice. Invoices with a due date before or on the date you specify are selected.

Invoices for a Vendor Class

To further limit the selection of invoices for inclusion into a payment group, your selection criteria can include a vendor class. This would ensure that only those vendors in the same vendor class are included. Vendor classes are defined through Vendor Class Maintenance (MENU APFILE), and assigned to vendors through Vendors Maintenance (MENU APFILE).

Invoices by Vendor

If you do not use vendor classes as selection criteria, or if you do but you want to further limit the invoices, you may select invoices for payment based on the vendor to whom payment is due. You may specify vendors in one of two ways: by range or by list.

- **By Range:** Specifying vendors by range involves keying a FROM/TO range of vendors. Open payables are selected for any vendor in the range of vendor numbers keyed (provided that other selection criteria does not exclude them).
- **By List:** When you choose to specify a list of vendors, you may key up to ten vendor numbers for whom open invoices are selected in the payment group.

Invoices by Payment Priority

Payment and urgency priorities are optional in A/P. If you do not actively use them, you may not select open invoices by priority.

NOTE: Although payment priority is a required field, payment priorities are not actively used if you specify the same payment priority for all vendors and vouchers.

Selecting invoices by payment priority is useful to determine cash disbursement based on the priority and urgency of payment to a vendor. Prompt payment may be demanded of certain vendors over others. To ensure that these vendors are paid in a timely manner, select open invoices by payment priorities.

There are two types of priorities: payment priorities and urgency priorities. Both types of priorities are numerically ranked from 1 through 3, where 1 is the highest priority and 3 is the lowest.

Default payment and urgency priorities are initially assigned to a vendor. The vendor values are used when a voucher is created for that vendor, at which time the defaults may be accepted or overridden. When the voucher is posted, the priorities become subject to payment selection.

Urgency priorities are used to override payment priorities as of a certain date. When an urgency priority is assigned to a vendor, the number of urgency days must also be specified. From this value the urgency date is calculated for an invoice. The urgency date is the invoice date of the voucher plus the number of urgency days. It is on this date that the urgency priority replaces the payment priority of an invoice (this implies that the urgency priority must be greater than the payment priority). Therefore, if invoices are selected by payment priority after the urgency date has passed for a voucher, the voucher is selected based on the urgency priority (since the urgency priority has replaced the payment priority).

If a voucher was not assigned a payment priority of 1 during Voucher Entry, the voucher may have been assigned an urgency date and urgency priority. In this case, the urgency priority is used in place of the payment priority after the urgency date has passed.

Example:

During Voucher Entry, assume that you assign to a voucher a payment priority of 2, an urgency priority of 1, and an urgency date of February 1. When selecting vouchers with a payment priority of 1 before February 1, this voucher is not selected. This is because the payment priority assigned to the voucher is 2. If you select vouchers with a payment priority of 1 after February 1, this voucher is selected. This is because the urgency priority of 1 replaces the payment priority of 2 on the urgency date (February 1).

Invoices by Voucher Number

Invoices may be selected for payment with a FROM/TO range of voucher numbers. If you know the voucher numbers of the individual vouchers to select, you may print checks for those vouchers. If you do not know a voucher number, use the Accounts Payable Inquiry (MENU APMAIN) or the voucher search in Voucher Entry (MENU APMAIN).

Payment Selection Report

The Payment Selection Report prints a summary of invoices that have been selected in a payment group. The report may be printed in sequence by vendor or payment priority.

When Printed

This report is printed automatically after selecting invoices for payment through Payment Selection (MENU APCHCK), or may be optionally printed through Payment Selection Report (MENU APCHCK).

The sort sequence of the report is determined when a payment group is selected through Option 1, or when the report is selected to print through Option 3.

Reference Numbers

Each invoice printed on the report is assigned a reference number. Use this reference number when performing Payment Selection Maintenance (MENU APCHCK) to match the invoice on the report with the invoice to maintain.

Payment Selection Maintenance

Once a payment group is created through Payment Selection (MENU APCHCK), it may be modified through Payment Selection Maintenance (MENU APCHCK). This option allows you to change any attributes of a payment group. Selected invoices may be reversed or changed.

Reversing a Selection

If an invoice selected for payment is reversed, the invoice is no longer part of the payment group. Therefore, a check will not be printed for that invoice. An invoice that has been reversed may be canceled.

Changing an Invoice

Certain attributes of an invoice may be changed. You may make partial payment for an invoice, add or remove a hold code, change the force discount code, and key an internal or remittance advice comment for an invoice.

Partial Payments

By changing the payment amount, an invoice will be partially paid. Please note that this is the only means by which partial payments may be made.

Clear Payment Selections

To remove several invoices from a payment group or to delete a payment group, you may clear payment selections through Clear Payment Selections (MENU APCHCK). The invoices cleared from a payment group resume as open payables and are subject to payment selection.

Options

When clearing payment selections, you may clear a group of invoices for one of the following:

- All selections in the payment group
- Unpaid selections in the payment group (these are invoices with a zero payment amount)
- All invoices for a vendor or for up to ten different vendors
- All negative vouchers with a negative payment amount for a vendor or for up to ten different vendors

Check Edit Reports

The following reports are printed to verify and validate the checks that will print for a payment group:

- A/P Check Error List
Prints errors that will interfere with printing checks.
- A/P Check Edit List
Prints the detail information of the selected groups as they will appear as printed checks.
- Accounts Payable Checks with Amount Less than ____ Report
Prints all checks included in the current check run with amount that is less than the value specified on the Check Edit Options Screen (p. 21-5).

When Printed

Both reports are printed by selecting Check Edit List (MENU APCHCK).

A/P Check Edit List

The A/P Check Edit List prints the information that will be printed on the check for each invoice. The report is sorted by vendor number. Use this report to verify that the correct check information will print.

A/P Check Error List

The A/P Check Error List prints any errors detected in a payment group. These errors indicate invalid accounts, invalid posting periods, negative checks, or if no checks exist in the group. If an error is detected by this report, checks will not be printed for the payment group.

Print Checks

This mandatory step of check processing consolidates the invoice information in a payment group and prints the error report, checks, remittance advice, and general ledger posting reports for a payment group. This is performed through Print Checks / Process ACH or CC Payments (MENU APCHCK).

Multiple Payment Groups

If more than one payment group shares the same check print date, checks for up to ten payment groups may be printed for that company. In this case, the payment groups are combined and processed as one payment group. Therefore, one check is printed per vendor regardless of the original payment group (unless otherwise specified), and general ledger transactions are processed as one transaction group.

How to Print Checks

Checks are printed on continuous pre-numbered check forms. Typically, one check is printed for each vendor in the payment group unless you have indicated that a separate check be printed for a specific voucher.

Once you have lined up your check forms in your printer, select Print Checks / Process ACH or CC Payments (MENU APCHCK) to print checks. The checks and remittance advice for each check will print. Checks will print using form type 1 or form type 2, depending on your selection in System Options Maintenance (MENU XAFILE).

After checks are printed, the only check processing function that may be performed for the same company is that performed through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

Overflow Remittance Advice

When additional remittance advice (called overflow) is required for a check, the overflow prints separately after all checks are printed. When this occurs, you must match the remittance advice for a check with the overflow remittance advice. Use the reference number (printed on the remittance advice and on the overflow) to do this.

Recording Check Numbers

This is the final step of check processing. You record the numbers of the checks that have printed and the numbers of the checks that must be voided (if any).

Recording check numbers is simple, easy to use, allows check numbers to match up for reconciliation, and ensures check forms control.

Starting Check Number

A/P does not require that you key a starting check number. Check numbers are recorded in ranges. You record the check as being used or voided. The quantity of used checks must equal the quantity of printed checks (printed checks are those that have been processed in a payment group or groups).

Used Checks

You must specify ranges of check numbers that were used. Used checks are those that printed successfully.

Voided Checks

Check forms that jam in the printer or are skipped must be voided. When recording check numbers, you must record those checks as being voided.

General Ledger Posting

The payments made are reported and updated in general ledger (if set up to do so). To determine which general ledger accounts are updated in G/L, use Options 20-8, 20-9 and 20-T of the G/L Transfer Menu (MENU GLXFER). If A/P is not interfaced with G/L, use MENU G2XFER. The following accounts are updated when checks are printed:

- A/P Liability: Debited for the total amount of the invoice.
- A/P Cash Account: Credited for the amount of the check.
- A/P Cash Discount: Credited for the amount of the A/P discount.

The individual A/P Liability and A/P Cash Discount accounts updated are determined by the business unit (if any) and vendor G/L code (if any) assigned to the invoice. The A/P Cash Account updated is determined by the bank account selected when printing checks (specified in the G/L Interface.) Refer to the G/L Interface manual for additional information.

Check Posting Journals & Reports

As a record of the general ledger transactions resulting from printing checks, the following reports are printed:

- G/L Transaction Post Journal (if interfaced with G/L)
- A/P Cash Disbursements Report

The G/L Transaction Post Journal prints the transactions that have been posted to G/L. The payment group from which checks are printed is posted as one transaction group in G/L. Journal Reference numbers are assigned as follows:

- The entire group is assigned a three digit journal number with the prefix “CD” (Cash Disbursement). This is the first segment of the journal reference number.
- Each transaction in the group is sequentially assigned a 5 digit sequence number starting with 00001. This is the second segment of the journal reference number.

The A/P Cash Disbursements Report prints the payments made for a payment group, sequenced by vendor number. Each journal is assigned an audit number. Cash disbursement journals should be retained in sequence by the audit number as an internal control mechanism.

Manual Check Processing

When a check is manually written for an existing open payable, that transaction must be recorded through manual check processing. This marks the open payable as being paid. This procedure is necessary to avoid a manual check from being paid through check processing (options 1 through 7.) You may change the check print date at any time, but this will change the posting date for ALL checks in that group. If you want the checks to post with multiple dates, use multiple groups.

Manual check processing consists of the following steps:

- Manual Check Entry: MENU APCHCK
- Manual Check Edit: MENU APCHCK
- Manual Check Post: MENU APCHCK

Manual Check Entry

Enter Manual Checks (MENU APCHCK) is used to key data about manually written checks. You must specify the bank account and the voucher number of the open payable invoice that has been paid. The amount, discount amount (if any), and force discount code is extracted from voucher information for the open payable. However, you must specify the check number and it must be one that has not been previously used.

Unlike check processing, you are not required to key a group name; the name is specific to the workstation at which the checks are keyed.

Different Workstations

If manual check entries are keyed at one workstation and need to be completed at a different workstation, you may move a manual check group from one to another. To do this, go to the workstation where manual check processing will be performed. Key **CALL AP199P** and press **ENTER**. You will be prompted for the company associated with this group and the group will be assigned to your workstation.

Manual Check Edit

The A/Payable Manual Check Edit List may be printed by selecting Manual Check Edit List (MENU APCHCK). This list prints the voucher information for the open payables that have been selected for payment with a manual check. Use this list to verify that you have specified the correct manual check information before posting manual checks.

Manual Check Post

The final step of manual check processing is to post the manual checks. This manual check post is performed through Post Manual Checks (MENU APCHCK).

You simply provide the company number of the manual check group to post (at the same workstation at which the check group was keyed). The manual check group is posted to general ledger and the G/L Transaction Post Journal and the A/P Cash Disbursements Reports are printed.

Posting to G/L

The general ledger transactions performed when posting manual checks are the same as those performed when checks are printed through Print Checks /Process ACH or CC Payments (MENU APCHCK).

Check Reversal Processing

Check reversals are performed if a check has been printed (through check or manual check processing) and recorded (for check processing only), but is not issued to the payee. To change the status of such a check, the check must be removed from paid history and returned as an open payable invoice. This process is called check reversal processing and it consists of the following steps:

- Check Reversal Entry: Enter Check Reversals (MENU APCHCK)
- Check Reversal Edit: Check Reversal Edit List (MENU APCHCK)
- Check Reversal Post: Post Check Reversals (MENU APCHCK)

Check Reversal Entry

The initial steps of check reversal processing include selecting the company, bank account, and range of check numbers to be reversed. This is performed through Enter Check Reversals (MENU APCHCK).

Like manual checks, you are not required to key a group name. A group of check reversals is specific to the workstation at which the reversals are keyed.

Different Workstations

If check reversals are keyed at one workstation and need to be completed at a different workstation, you may move a manual check group from one to another. To do this, go to the workstation where manual check processing will be performed. Key **CALL AP199P** and press **ENTER**. You will be prompted for the company associated with this group and the group will be assigned to your workstation.

Check Reversal Edit

The A/P Check Reversal Edit List and A/P Check Reversal Error List may be printed by selecting Check Reversal Edit List (MENU APCHCK). You are not required to select this option. These reports are used to verify and validate the check reversals keyed through Enter Check Reversals (MENU APCHCK).

Use the A/P Check Reversal Edit List to validate that you have keyed the check reversals as desired. If errors are detected that will cause a check reversal post to fail, they are printed on the A/P Check Reversal Error List. An error occurs if a check is not found or if the voucher is in use.

Check Reversal Post

The final step of check reversal processing is to post the reversed checks. This check reversal post is performed through Post Check Reversals (MENU APCHCK).

You provide the company number of the check reversals to post (at the same workstation at which the reversal group was keyed). The manual check group is posted to general ledger and the G/L Transaction Post Journal and the A/P Cash Disbursements Reports are printed.

To ensure that no check reversal errors exist, the A/P Check Reversal Error List prints. If errors are detected, check reversals are not posted and the procedure is canceled.

Posting to G/L

The general ledger transactions performed when posting check reversals are:

- A/P Liability: Credited for the net amount of the invoice.
- A/P Cash Account: Debited for the amount of the check.
- A/P Cash Discount: Debited for the amount of the A/P discount.

Check Reconciliation

Check reconciliation in A/P is performed for one company and for one bank account. Check reconciliation is a two-step process: marking checks and accepting checks for reconciliation. These steps are performed through Check Reconciliation (MENU APCHCK).

NOTE: The check dates maintained in the Check Reconciliation File are those of the check print dates from the vouchers, as opposed to the invoice dates.

Marking Checks For Reconciliation

After selecting Check Reconciliation (MENU APCHCK), you specify the company and the bank account for which checks will be reconciled. Next, you are presented with the checks not yet reconciled for that company.

Mark the check to reconcile by keying X in the selection field. After you have marked the checks to reconcile, a summary screen displays the total number and total dollar amount of checks to be reconciled. Checks are reconciled when you select the function key to accept check reconciliations.

Accepting Check Reconciliations

When you are satisfied with your reconciliation selections, press F13=ACCEPT. The marked checks are updated in payment history as “reconciled.”

Different Workstations

Check reconciliations for the same company and bank account may be performed simultaneously at different workstations. When check reconciliations are accepted (i.e., F13=ACCEPT is pressed) from one workstation, the checks marked for reconciliation at all workstations (for the same company and account) are reconciled.

Voiding Unused Checks

A periodic internal control function of payment processing is to void groups of checks that are, and will remain, unused. This may include a box of preprinted check forms which are damaged or outdated. If these checks are not voided, they are unaccounted for. Voiding them, however, ensures that they are accounted for. Unused checks may be voided through Void Unprinted Checks (MENU APCHCK). Select the company and bank account, and the range of unused checks to void.

Payment Processing Steps

Standard Check Processing

The following steps summarize the sequence of check processing in A/P (all options are on MENU APCHCK):

1. Select Invoices For Payment through Payment Selection (MENU APCHCK); required.
The Payment Selection Report is printed, indicating those invoices selected. This creates a payment group.
2. Maintain Payment Selections through Payment Selection Maintenance (MENU APCHCK); not required.
Maintain the invoices selected for payment by making partial payments, holding or releasing an invoice, or changing other invoice information.
3. Clear Payment Selections through Clear Payment Selections (MENU APCHCK); not required.
Clear some or all vouchers from a payment group.
4. If desired, print the Payment Selection Report again through Payment Selection Report (MENU APCHCK); not required.
Run and print the A/P Check Edit List to verify and validate the payment group - Check Edit List (MENU APCHCK) (required).
5. Print Checks through Print Checks / Process ACH or CC Payments (MENU APCHCK); required.
Print the A/P Check Error List. If errors are detected, the payment group cannot be posted. Checks and remittance advice are printed for each vendor in the payment group.
6. Record Check Numbers through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK); required.
Record the numbers of the checks that were printed or voided. You cannot perform any other check processing functions for this company after printing checks until this option is run. The Cash Disbursements Report and General Ledger Transaction Post Journal are printed.

Manual Check Processing

1. Enter Manual Checks through Enter Manual Checks (MENU APCHCK); required.
Specify the open payable for which a check has been manually written.
2. Edit Manual Checks through Manual Check Edit List (MENU APCHCK); not required.
Print the A/P Manual Check Edit List to ensure that manual checks have been keyed as desired.
3. Post Manual Checks through Post Manual Checks (MENU APCHCK); required.
The open payable for which a manual check has been written is removed and general ledger is updated accordingly. The Cash Disbursements Report and General Ledger Transaction Post Report are printed.

Check Reversal Processing

1. Enter Check Reversals through Enter Check Reversals (MENU APCHCK); required.
Specify the paid check to reverse.
2. Edit Check Reversals through Check Reversal Edit List (MENU APCHCK); not required.
Print the A/P Check Reversal Edit List and the A/P Check Reversal Error List to verify and validate check reversals.
3. Post Check Reversals through Post Check Reversals (MENU APCHCK); required.
The paid check is reversed to an open payable and general ledger is updated accordingly. The Cash Disbursements Report and General Ledger Transaction Post Journal are printed.

Use the Voucher Entry option on the Accounts Payable Main Menu (MENU APMAIN) to enter a voucher group and create voucher templates. A voucher group consists of one or more vouchers that are to be known by the same Group ID. A voucher may consist of several (at least one) voucher transactions. Each voucher transaction indicates the expense account updated when that voucher is posted.

If Purchasing is installed, you may also use this option for regular receipt validation or drop shipment receipt validation, which links inventory receipts with vendor invoices. Receipt validation can also be used to calculate GST for purchases if the appropriate options are activated. Refer to Calculating GST for Purchase Orders in the A/P Voucher Processing section of this user guide for more information.

Voucher groups may optionally be edited through Voucher Edit List (MENU APMAIN). To create an open payable for a voucher, the voucher must be posted through Post Vouchers (MENU APMAIN).

Several system-assisted methods of entering vouchers include:

- **Voucher Templates.** A voucher template is a voucher group which has been defined specifically for the purpose of copying to create a new group. Refer to “Voucher Groups/Template Groups” within the A/P Voucher Processing User’s Guide section of this manual for further details.
- **Split Terms.** Split terms are available through this menu option for a vendor if the **Allow Split Terms** field in Vendor Maintenance (MENU APFILE) is set to **Y**. The voucher’s amount will automatically be split into separate amounts to be paid in installments. While the user creates the first voucher, all splits will automatically be generated. Split terms do not apply to pre-paid vouchers and/or credit/debit memos.
- **Receipt Validation.** If Purchasing is installed, voucher transactions may be created automatically by selecting the actual purchase order receipts associated with the invoice.
- **Drop Ship Receipt Validation.** If Purchasing is installed, drop ship purchase order receipts may be keyed and then used to automatically create voucher transactions, including charge back transactions for differences between receipt and invoice values.

NOTE: If the vendor uses split terms, the voucher created to pay the vendor will be split, however any charge back voucher created will not be split.

Voucher Entry

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Voucher Entry Group Selection Screen	Use to specify the voucher group.
Accounts Payable Group Selection Screen	Use to search for and select unposted voucher groups.
Voucher Entry Selection Screen	Use to add or remove a voucher from the group.
Voucher Group Information Screen	Use to provide information about the voucher group.
Voucher Search (List) Screen	Lists vouchers currently in the group.
Automatic Credit Memo Header Screen	Use to select the voucher for which an automatic credit memo will be created.
Open Payables Voucher Search Screen	Lists open payables that can be selected for automatic credit memos.
Voucher Header Credit Memo Confirmation Screen	Use to review the selected voucher and create an automatic credit memo against it.
AP-PO Receipt Validation Screen	Use to provide invoice and purchase order and receiver information.
Pending Receipts Search Screen	Lists pending receipts.
Pending Receipts Error Screen	Shows errors when including multiple trading currency purchase orders.
Receipt Validation Screen	Use to modify items on the receipts.
Receipt Validation Line Item Receipt Change Screen	Use to change the information for a receipt line item.
Purchase Order Item/Order Comments Screen	Use to view any order/item comments for the line item you selected.
End Validation Screen	Use to change miscellaneous charges and confirm receipt validations.
Quantity Variance Report	Prints the difference between quantities received and quantities invoiced for validated line items.
AP-PO Landing Validation Screen	Use to validate accrued landing costs.

Title	Purpose
Unvouchered Landing Costs Screen	Use to select receipt transactions for which landing costs will be validated.
Landing Validation Screen	Use to validate landing costs for selected transactions.
Invoice Amount Distribution Screen	Use to distribute the landing cost to items.
End Landing Validation Screen	Use to review total information for landing costs validated for the voucher.
Voucher Header Screen	Use this screen to provide general voucher information.
I/C Currency Information Window	Use to override default currency information for the voucher being created. This shared screen is described in the International Currency User Guide.
Voucher Transaction Entry Screen	Use to maintain voucher transactions.
Insert Transaction Screen	Use to insert a voucher transaction.
Voucher Transaction Review Screen	Use to review a voucher transaction's values.
GST Tax Information Screen	Calculates the goods and services tax (GST) for a voucher.
End Voucher Entry Screen	Use to complete the entry of the voucher.
End Voucher/Split Terms Entry Screen	Use to review and edit split terms for the voucher.
Drop Ship Receipt Validation Screen	Use to enter invoice data for a drop shipment purchase order.
Drop Ship PO List Screen	Use to select the purchase order you want to associate with the invoice being processed.
End Drop Ship Receipt Validation Screen	Use to create the voucher.

How To Restart This Option

If a group has a status of In Use-ws on the Voucher Entry Group Selection Screen (p. 4-4) and is not in use by that workstation, restart as follows:

1. Go to the workstation indicated and select Voucher Entry (MENU APMAIN) from this menu. The Voucher Entry Group Selection Screen (p. 4-4) appears.
2. In the **Function** field, key **C**. Key the company number and group ID.
3. Press **ENTER**. The Voucher Group Information Screen (p. 4-13) appears.
4. Press **F10** to end, or press **ENTER** to return to the Voucher Group Information Screen (p. 4-13).
5. Press **F3** to exit.

This screen appears after pressing **ENTER** from the Voucher Group Information Screen (p. 4-13) if **Prepaid Invoices** is set to **N**, or after the Bank Accounts List Screen (p. 9-13) if **Prepaid Invoices** is set to **Y**. This screen also appears after pressing **F14** on the End Receipts Screen (MENU POMAIN). Use this screen to select a voucher to add to this group, change a voucher already included in this group, or delete a voucher from this group.

Voucher Entry Selection Screen Fields and Function Keys

Field/Function Keys	Description
Group Information	These fields display summary information about the voucher group. The company number and description, voucher Group ID and description, entry date, posting date, and posting period are displayed. Display
Function	Key A to add a new voucher to this voucher group. Key C to change an existing voucher in this group. Key D to delete a voucher from this group. (A 1) Required

Voucher Entry Selection Screen Fields and Function Keys

Field/Function Keys	Description
Voucher	<p>When adding a voucher, if you have selected automatically assigned voucher numbers through A/P Options Maintenance (MENU APFIL2), leave this field blank to automatically assign the next sequential voucher number. You will be required to specify a vendor number and voucher type.</p> <p>If you have selected to assign voucher numbers through A/P Options Maintenance (MENU APFIL2), you must key a voucher number.</p> <p>When changing or deleting a voucher, you must specify the voucher number. The vendor number and voucher type are not required.</p> <p>(A 7) Required</p>
Type	<p>Use this field to enter the voucher type.</p> <p>Key I for an invoice.</p> <p>Key C for a credit memo. A credit memo is used to record a correction to an existing invoice in the Open Payables File. Since credit memos are “negative invoices,” all credit memo dollar amounts must be recorded as negative amounts.</p> <hr/> <p>NOTE: If you are entering a “general” credit memo, not associated with an open invoice, key the voucher type as an invoice (I in this field) with a negative invoice amount.</p> <hr/> <p>Key D for a debit memo. A debit memo is used to record a correction to an existing invoice in the Open Payables File. Debit memos must be recorded as positive amounts.</p> <p>Key P for a pre-receipt invoice. This type of voucher allows for the payment of goods before the goods are received. Pre-receipt invoices must be recorded as positive amounts.</p> <hr/> <p>NOTE: When a pre-receipt invoice is generated, the Pre-Receipt Inventory Account is debited instead of the Purchases Clearing Account so that you may track pre-paid items separately in General Ledger. Also, additional information may be retained which is later needed to facilitate matching the pre-paid items to the receipt and landing cost history transactions created when the goods are received.</p> <p>Additionally, pre-receipt vouchers are allowed for split vouchers. However, pre-receipt validation can only be performed on the original split voucher against the original expense accounts on the voucher.</p> <hr/> <p>Leave this field blank for existing vouchers.</p> <p><i>Default Value:</i> I is assumed if this field is left blank</p> <p>(A 1) Required</p>

Voucher Entry Selection Screen Fields and Function Keys

Field/Function Keys	Description
Vendor	<p>Key the number of the vendor for whom this voucher is being added. Do not key a vendor number when changing or deleting a voucher.</p> <p>If you do not know a vendor number, use the vendor search by keying search words (or beginning characters) in the Find and City fields.</p> <p><i>Valid Values:</i> Any existing vendor specified in Vendors Maintenance (MENU APFILE)</p> <p>(A 6) Required</p>
Find	<p>Use this field to activate the Vendor Search feature when you do not know the vendor's number.</p> <p>Key the vendor's name or the first few characters of one or more words in the vendor's name and press ENTER to display the Vendor Search Screen.</p> <p>To limit the vendor search by city (i.e., search for the specified vendor name within a particular city), key a city in the City field as well.</p> <p>For more information on using searches and for a description of search screens, refer to the Cross Applications User Guide.</p> <p>(A 40) Optional</p>
City	<p>When using the Find field to search for a vendor, you can limit the search to a particular city by keying a partial or complete city name in this field.</p> <p>If you enter characters in this field, the Vendor Search Screen displays only vendors that meet the criteria specified here and in the Find field.</p> <p>For more information on using searches and for a description of search screens, refer to the Cross Applications User Guide.</p> <p>(A 8) Optional</p>
Business Unit	<p>The business unit used when posting to the A/P Liability and the A/P Expense accounts for this voucher.</p> <p><i>Valid Values:</i> Any valid business unit set up through Business Units Maintenance (MENU APFILE).</p> <hr/> <p>NOTE: This field displays only if you selected to use business units A/P Liability and Expense accounts for the G/L Interface through G/L Transfer Definition (MENU GLXFER), sub-option T.</p> <hr/> <p>(A 2) Optional</p>
Ref No	<p>Key the voucher number of an existing open payable for which a debit or credit memo is created through this option.</p> <p>This field is required if the Type is C or D (credit or debit memo); leave this field blank if the Type is I (invoice) or P (pre-receipt invoice).</p> <p>(A 7) Optional</p>
F3=Exit	Press F3=EXIT to exit the option and return to the menu.

Voucher Entry Selection Screen Fields and Function Keys

Field/Function Keys	Description
F4=Voucher List	Press F4=VOUCHER LIST to display the voucher search, which allows you to select a voucher to maintain. The Voucher Search (List) Screen (p. 4-16) will appear.
F5=Automatic CR Memo	Press F5=AUTOMATIC CR MEMO to create an automatic credit memo. This reverses the transactions of a voucher in full. The Automatic Credit Memo Header Screen (p. 4-18) will appear.
F6=Receipt Validation	<p>The F6=RECEIPT VALIDATION function key appears only if Purchasing is installed, and will be allowed only if the PO-AP Transfer field in Vendors Maintenance (MENU APFILE) is defined as Y for the vendor. This function key does not appear if you are creating a Voucher Template Group.</p> <p>A valid vendor number must be keyed in the Vendor field prior to pressing F6=RECEIPT VALIDATION.</p> <p>You may press F6=RECEIPT VALIDATION to activate the A/P - PO interface. The F6=RECEIPT VALIDATION function allows receipt validation which creates a voucher from purchase order receipts posted through MENU POMAIN (or through Warehouse Management's MENU WMMAIN). The AP-PO Receipt Validation Screen (p. 4-28) will appear.</p>
F9=Drop Ship Rcpt	<p>NOTE: The F9=DROP SHIP RCPT function key displays only if Purchasing is installed, and will be allowed only if the PO-AP Transfer field in Vendors Maintenance (MENU APFILE) is defined as Y for the vendor.</p> <p>You must key a valid vendor number in the Vendor field prior to pressing the F9=DROP SHIP RCPT function key.</p> <p>Press F9=DROP SHIP RCPT to activate the PO-AP interface. This function allows for the entering of receipt information for a drop shipment purchase order based upon the invoice you received from the vendor; and also creating the Accounts Payable voucher data. The Drop Ship Receipt Validation Screen (p. 4-129) will appear.</p> <p>From this screen the Receipts Purchase Order Header Screen displays. Refer to the Purchasing User Guide for information regarding the screens presented in the receiving process.</p>
F10=New Group	Press F10=NEW GROUP to complete voucher entry for the current voucher group. The Voucher Entry Group Selection Screen (p. 4-4) will appear.
Enter	<p>Press ENTER to confirm your selections.</p> <p>If you keyed vendor search criteria, the Vendor Search Screen will appear. Refer to the Cross Applications User Guide for an explanation of this screen.</p> <p>If you did not key vendor search criteria, the Voucher Header Screen (p. 4-80) will appear for all voucher types (I, C, D or P) selected.</p>

Voucher Header Credit Memo Confirmation Screen Fields and Function Keys

Field/Function Key	Description
Vendor	This field displays the number and name of the vendor associated with the voucher.
Assign / Payee	The Assign field appears only if the selected company is set to use assignees in AP Options Maintenance (MENU APFIL2); otherwise the field name is Payee . This field indicates to whom the check will be issued.
Co/Voucher (Currency)	The company number and voucher number selected on the previous screen. This field only displays when International Currency is installed. The Currency Description field appears only if the vendor's trading currency is different from the company's local currency. The description of the vendor's trading currency appears in this field.
Addr 1 - Addr 4	These fields are the assignee or payee's four address lines that represent the street address, post office box number or other address information except for the city, state/province, country, and zip/postal code.

Voucher Header Credit Memo Confirmation Screen Fields and Function Keys

Field/Function Key	Description
City	The assignee or payee's city.
St/Prov	The assignee or payee's state or province.
Cntry	The assignee or payee's country code.
Zip/Pstl	The assignee or payee's zip or postal code.
Phone/Extn	The assignee or payee's telephone number, which includes a 3-character country access code followed by the area code and telephone number. For example: 011 (781) 555-1212. The Extn field for the telephone extension of the contact person specified in the AP Contact field is shown on the line below.
Contact	The name of the default contact person or the contact person that was keyed for this voucher.
Inv No	This voucher is created for the invoice number keyed in this field. If this voucher is for a drop ship receipt validation voucher, it is the number keyed in the Invoice No. field on the Drop Ship Receipt Validation Screen (p. 4-129). If this voucher is for a drop ship receipt validation charge back voucher, it is the number keyed in the Charge Back No. field on the End Drop Ship Receipt Validation Screen (p. 4-135).
Inv Desc	A description of the invoice being recorded with this voucher. If this voucher is a drop ship receipt validation voucher, the description keyed from the Invoice Desc field on the Drop Ship Receipt Validation Screen (p. 4-129). If this voucher is a drop ship receipt validation charge back voucher, this field will display the phrase C/B FOR ; followed by the number keyed in the Invoice No. field on the Drop Ship Receipt Validation Screen (p. 4-129) to signify that this is a charge back voucher associated with the vendor's invoice for the drop shipment.
Inv Date	The date of the invoice recorded with this voucher shown in the default date format of the user.
Inv Amt	The amount of the invoice which is being recorded with this voucher. When International Currency is installed, the invoice amount is displayed in the vendor's currency with the company's local currency amount displayed beneath. For type C invoices (credit), the invoice amount is a negative value.
User Area	Additional information added for this voucher.
Due Date	The due date for payment of this voucher calculated as the number of payment days plus either the voucher entry date or the invoice date depending on your selection in A/P Options Maintenance (MENU APFIL2 shown in the default date format of the user.

Voucher Header Credit Memo Confirmation Screen Fields and Function Keys

Field/Function Key	Description
PO No	The number of the purchase order issued when placing the original order being recorded with this voucher.
Cash Dsc %	The cash discount percent offered by this vendor or taken for this voucher.
Terms	The standard payment terms of this vendor. The terms keyed in this field are printed on appropriate documents.
Pmt Pty	The payment priority used to indicate the priority level for making payments to this vendor. Payment priority can be used in Payment Selection (MENU APCHCK) to select groups of vouchers to be paid. Payment priority 1 is high, payment priority 2 is medium, payment priority 3 is low.
Dsc Date	The last date on which the cash discount for this voucher is effective shown in the default date format of the user.
Dsc Days	The number of days for which the cash discount associated with this vendor is effective.
Sep Chk	A N indicates the when this voucher is paid it should be paid on the same check as any other vouchers for this vendor. A Y indicates a separate check is required for this voucher.
Project	The project associated with this voucher.
Urg Pty	The urgency priority is similar to payment priority in that it is used to indicate the priority level for making payment to a vendor. It differs in that its value (1, 2 or 3) replaces the payment priority on the day of the urgency date. When using the urgency priority and urgency date, the payment priority must be lower than the urgency priority. Urgency priority 1 is high, urgency priority 2 is medium, urgency priority 3 is low.
Urg Date	When a payment and urgency priority are specified for a vendor, it is on this date that the value of the urgency priority replaces the payment priority. The urgency date is calculated based on the number of urgency days for this vendor and is shown in the default date format of the user.
Force Dsc	A Y will to force cash discounts to be taken regardless if the discount date has passed. A N will not take cash discounts if the discount date has passed.
Bus Unit	This field appears only if you selected to use business units when selecting A/P Liability and Expense accounts or Purchase Tax Accounts for the G/L Interface through G/L Transfer Definition (MENU GLXFER sub-option T) and represents the business unit that is assigned to the vendor that was used to select the default A/P Liability, A/P Expense, and Purchase Tax Accounts for this voucher.

Voucher Header Credit Memo Confirmation Screen Fields and Function Keys

Field/Function Key	Description
1099 Req	A Y indicated a 1099 is required for this voucher; a N indicates a 1099 is not required for this voucher.
Tax Id	The display of the Tax ID field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display. This field is the Tax ID or social security number for the vendor.
ID Tp	The type of taxpayer identification number the value in the Tax Id field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file. A 1 will print EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type. A 2 will print SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type. A blank indicates the Federal Tax ID Type cannot be determined.
1099 Cde	This code represents IRS 1099 amount type applicable to this voucher. This field will be consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. The code representing Nonemployee Compensation indicates this voucher's value will be included on a 1099-NEC form; a code representing any other amount type indicates this voucher's value will be included on the 1099-MISC form. If this field is blank, the code representing Nonemployee Compensation will be assumed.
Dft Exp	With the company for this voucher, for invoices, the default will be the account number identified as the default expense account through the GL Transfer Definition (MENU GLXFER), Function A . For pre-receipt invoices, the default will be the account number identified as the Pre-Receipt Inventory Account through the GL Transfer Definition (MENU GLXFER), Function A .
AP Acct	With the company for this voucher, the accounts payable account that is credited upon posting this voucher.
CD Acct	With the company for this voucher, the cash discount that is credited when posting this voucher if a discount is taken.
F5=Create Credit Memo	Press F5=CREATE CREDIT MEMO to create an automatic credit memo for the displayed header information. This information is retrieved from an open payable invoice selected on the Automatic Credit Memo Header Screen (p. 4-18) or the Open Payables Voucher Search Screen (p. 4-21) and displayed for viewing on this screen.
F12=Cancel	Press F12=CANCEL to cancel the credit memo invoice for this voucher. entries made for this voucher. The Automatic Credit Memo Header Screen (p. 4-18)

will appear.

AP-PO Receipt Validation Screen

```

AP-PO RECEIPT VALIDATION
Co: 1 A & C Office Supply
Vendor: IC5000 SASKATCHEWAN PRODUCTS
Currency: CAD Canadian Dollars

Business Unit? ..

Tax ID: ..... Invoice Date: 0000000
Invoice Amt: ..... CA$ .00 US$

PO Number: ..... (blank for list)
Receiver: ..... (blank for list)

F5=Landing Costs F10=End F12=Return

```

This screen appears after pressing **F6=RECEIPT VALIDATION** from the Voucher Entry Selection Screen (p. 4-8) in this option, or, for pre-receipt invoice validation, after you press **F10** on the Pre-Receipt Voucher Detail Screen (p. 14-14) in Pre-Receipt Inv Validation (MENU APMAIN).

For ordinary invoices (type **I**), use receipt validation to create vouchers from the original purchase order. This allows you to match the purchase order, invoice, and receiving document to ensure that goods have been received (or services rendered) before creating a voucher. If the **Calculate GST for Purchases (Inputs)** field is set to **Y** through AP Options Maintenance (MENU APFIL2), goods and services tax (GST) can also be calculated during receipt validation, depending on the tax body assigned to the vendor.

For **P** type vouchers, use receipt validation to generate pre-receipt invoices. This allows additional information to be retained so that you may later match pre-paid items to the receipt and landing cost history transactions created when goods are received.

When International Currency is installed:

- The receipt validation process performs validation of processing changes in the currency of the vendor being processed.
- When a voucher is created, it will be given an average exchange rate calculated by the line items selected for validation. Only pending receipts with common currency exchange options* are allowed to be selected onto a single voucher. *Currency exchange options include the same currency, exchange code, lock date, currency contract, or same exchange rate (if overridden). The exchange rate is derived from this information.
- Edits have been included to ensure that only similar entities will be included: same currency, same exchange code and lock date, same currency contract, and same exchange rate (for overridden rates.)

Use this screen to provide invoice information and a purchase order or receiver number.

AP-PO Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Currency	<p>This field only displays when International Currency is installed and only if you are validating foreign currency receipts (that is, you selected a foreign currency vendor.)</p> <p>This field displays the currency code and description for the vendor's currency, if the currency differs from the company's local currency.</p> <p>Display</p>
Business Unit	<p>This field appears only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2).</p> <p>Key the business unit you want associated with this voucher. This screen appears pending receipts meeting criteria keyed on the AP-PO Receipt Validation Screen (p. 4-28). Pending receipts are those that have been posted in Purchasing or, if applicable, Warehouse Management, but not yet vouchered in Accounts Payable.

Pending Receipts Search Screen Fields and Function Keys

Field/Function Key	Description
(Status)	<p>This field indicates the status of the line item receipts that currently display. It may display All Types, Receipts, or Returns. Use F2=ALL TYPES / F2=RETURNS / F2=RECEIPTS to change the status.</p> <p>Display</p>
(Currency)	<p>This field only displays when International Currency is installed and only for those vendors whose trading currencies are different from the company's local currency.</p> <p>This field displays the currency code and description for the vendor's currency, if the currency is not the same as the company's local currency.</p> <p>Display</p>
Opt	<p>Key Y to select receipts for processing. Pressing ENTER will cause the Receipt Validation Screen (p. 4-39) to display for the selected receipts.</p> <p>Any receipt that is not selected with a Y will not be included in further processing.</p> <p><i>Valid Values: Y</i></p> <p>(A 1) Required</p>

Pending Receipts Search Screen Fields and Function Keys

Field/Function Key	Description
Co	The company number associated with the purchase order. Display
PO No	The original purchase order number. Display
WH	The warehouse associated with the purchase order (i.e., the warehouse for which goods were ordered). Display
Rec Date	The date on which the goods/services for the purchase order were received. Display
Lines	The number of line items received for the purchase order. Display
PO Value	The total value of the line items received for the order. <ul style="list-style-type: none"> • A positive invoice amount indicates a PO. • A negative invoice amount indicates a PO Return. <p>To vary the display between PO receipts, PO returns, or both, see the F2=ALL TYPES / F2=RETURNS / F2=RECEIPTS function key description.</p> <p>When International Currency is installed, the PO Value may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the PO value in the vendor's trading currency or in the company's local currency.</p> Display
Receiver	The receiver containing the pending receipt, if applicable. Display
Sel	The selection code: Y displays if the receipt was selected for this voucher. Display
FOB	The FOB code on the purchase order. Display
PO	Key a valid purchase order number to limit the display of receipts on this screen to only those that are affiliated with that purchase order. Leave this field blank to include receipts associated with all purchase orders. (A 6) Optional
Receiver	Key a valid receiver number to limit the display of receipts on this screen to only those that are affiliated with that receiver. Leave this field blank to include receipts associated with all receivers. (A 8) Optional

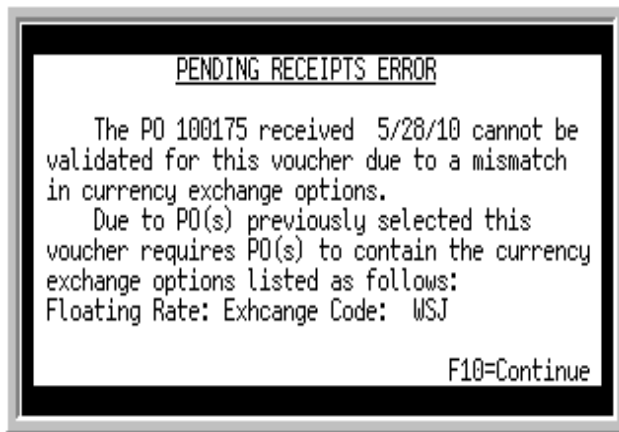

Pending Receipts Search Screen Fields and Function Keys

Field/Function Key	Description
Inv	<p>This field displays the invoice amount for this receipt keyed on the previous screen.</p> <p>When International Currency is installed, the Inv field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount in the vendor's trading currency (with the currency symbol for the vendor's currency displayed to the right) or in the company's local currency (with the local currency symbol displayed to the right).</p> <p>Display</p>
Vch	<p>This field displays the voucher amount, which is, the total amount of the receipt and miscellaneous charges. This amount includes the goods and services tax (GST) for taxable line items if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and GST is being calculated for the vendor.</p> <p>When International Currency is installed, the Vch field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the voucher amount in the vendor's trading currency or in the local currency equivalent of the voucher amount.</p> <p>Display</p>
Diff	<p>This field displays the difference between the invoice and the voucher amount.</p> <p>When International Currency is installed, the Diff field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the difference between the invoice amount and voucher amount in the vendor's trading currency and in the company's local currency.</p> <p>Display</p>

Pending Receipts Search Screen Fields and Function Keys

Field/Function Key	Description
F2=All Types/Returns/Receipts	<p>This function key performs as a 3-way toggle. By pressing this key you can change the display of this screen to view receipts only, returns only, or both. The current display mode appears in the upper right corner of the screen (see the Status field). As you press this function key, the display mode, or status, changes accordingly.</p> <p>If this key displays as:</p> <ul style="list-style-type: none"> • F2=ALL TYPES, receipts only display on this screen and the status in the upper right corner reads “Receipts.” • F2=RETURNS, both receipts and returns display on this screen and the status in the upper right corner reads “All.” • F2=RECEIPTS, returns only display on this screen and the status in the upper right corner reads “Returns.” <hr/> <p>NOTE: The default display mode for this screen is driven by the invoice amount entered on the AP-PO Receipt Validation Screen (p. 4-28). The screen defaults to a “returns” only display mode if a negative invoice amount was entered on the AP-PO Receipt Validation Screen (p. 4-28). Whereas, if a positive invoice amount was entered, the screen defaults to a “receipts” only display mode.</p>
F11=Local Curr/Trading Curr	<p>Press F11=LOCAL CURR / F11=TRADING CURR to display the PO values and invoice, voucher, and difference amounts in the vendor’s trading currency. The symbol for the vendor’s currency will appear to the right of the <i>Inv</i> field.</p> <p>Press F11=LOCAL CURR to display the PO values and invoice, voucher, and difference amounts in the company’s local currency. The symbol for the company’s local currency will appear to the right of the Inv field.</p> <p>Press F11=TRADING CURR to display the PO values and invoice, voucher, and difference amounts in the vendor’s trading currency. The symbol for the vendor’s currency will appear to the right of the Inv field</p>
F12=Return	Press F12=RETURN to return to the AP-PO Receipt Validation Screen (p. 4-28) without selecting a receipt.
F15=Select All	Press F15=SELECT ALL to select all receipts for voucher processing. The Receipt Validation Screen (p. 4-39) will appear presenting all the selected receipts.
F24=Delete Sel	Press F24=DELETE SEL after keying Y in the Opt field next to one or more displayed receipts to delete them from this voucher.
Enter	Press ENTER to confirm your selection. The Receipt Validation Screen (p. 4-39) will appear for the selected receipts.

Pending Receipts Error Screen

NOTE: This window will only display when International Currency is installed.

This window will display after pressing **ENTER** on the Pending Receipts Search Screen (p. 4-33) when a pending receipts line that you selected for validation contains currency exchange options* that differ from the currency exchange options of previously selected lines. This window will display for each pending receipts line that does not match the first one you selected.

NOTE: *The currency exchange options include the same currency, the same exchange code and lock date, same currency contract, or same exchange rate (if overridden). The exchange rate is derived from this information.

Pending Receipts Error Screen Fields and Function Keys

Field/Function Key	Description
(PO Number)	This is the PO number of the rejected pending receipt line. Display
(Receipt Date)	This is the receipt date of the rejected pending receipt line. Display
(Exchange Rate Information)	This is the currency exchange rate data of the pending receipts line previously selected. NOTE: Only pending receipts lines with identical currency exchange information may be included for validation. Currency exchange options include the same currency, same exchange code and lock date, same currency contract, or same exchange rate (if overridden). The exchange rate is derived from this information. Display

Pending Receipts Error Screen Fields and Function Keys

Field/Function Key	Description
F10=Continue	Press F10=CONTINUE to acknowledge each error and return to the Pending Receipts Search Screen (p. 4-33).

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
(Status)	This field indicates the status of the line item receipts that currently display. It may display All , Active , or Deleted . Use F9=ACTIVE / F9=ALL / F9=DELETED to change the status and the matching data.
Currency	This field only displays when International Currency is installed and only for those vendors whose trading currencies are different from the company's local currency. The currency code and description for the vendor's currency, if the currency is not the same as the company's local currency. Display

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Op	<p>Use this field to change (C), delete (D), restore (R), view comments (M), or review history (H) for one of the displayed line items.</p> <p>Key C to change the invoice value of a line item on this receipt. The Receipt Validation Line Item Receipt Change Screen (p. 4-46) will appear.</p> <p>Key D to remove a line item from this voucher validation process. If, after removing an item, you wish to reconsider and include the item again, use the R option.</p> <hr/> <p>NOTE: Lines marked with a D will be available to be vouchered later. The total PO value seen in the voucher is reduced by the amount of the lines previously vouchered.</p> <p>If the status of the display on this screen is ALL, the deleted line item will still display, although the quantity and value of that line item will no longer be included on the screen. If the Status is ACTIVE, the deleted line item will be removed from the screen.</p> <p>Key H to review the history of a line item. The Transaction History Detail Screen [Item Inquiry (MENU IAMAIN)] will appear to present general ledger and I/A transaction comment information.</p> <p>Key R to restore a previously removed line item and include its quantities and values in the display.</p> <p>If the status of the display on this screen (refer to the Status field description) is ALL, any deleted line item will still display on this screen. To restore this line item, simply key an R in this field and press ENTER. The quantity and value of that line item will again be included on the screen.</p> <p>If the Status is ACTIVE, a deleted line item will not display on the screen. Therefore, to restore such a line item, you must use the F9=ACTIVE / F9=ALL / F9=DELETED toggle key to change the status to DELETED or ALL, so that the line item will display. Once displayed, you may key an R in the Op field and press ENTER to restore the line item.</p> <p>Key M to view any order/item comments for the line item you select, if comments were entered for that particular line during Purchase Order Entry. When you press ENTER after selecting this option, the Purchase Order Item/Order Comments Screen (p. 4-50) will appear.</p> <p>(A 1) Optional</p>
Our Item No/Desc	<p>The item number (our item number or that of the manufacturer) and/or item description of the line item on the receipt. How much information displays can be toggled using F2=DESC LEFT / F2=DESC RIGHT / F2=ITEM & DESC, and what type of information displays can be toggled using F5=MFG ITEM NUMBER / F5=OUR ITEM NUMBER.</p> <p>Display</p>

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Quantity	<p>This field displays provides the quantity received (invoiced) and Unit of measure for the displayed line item. This is the quantity to validate and voucher.</p> <p>Display</p>
Value	<p>The total dollar value for the line item received (invoiced). This value is the quantity of items (Qty) multiplied by the cost for the line item. This is the value to validate and voucher.</p> <p>When International Currency is installed, the values in this column default to the vendor's currency. If the vendor's trading currency is different from the company's local currency, these values will display in the vendor's currency; however, if you chose to display local currency equivalents on the Pending Receipts Search Screen (p. 4-33) and accessed this screen while local equivalents were displayed there, these values will default to the local currency. You may toggle between displays of values in trading and local currencies by pressing the F11=LOCAL CURR / F11=TRADING CURR key.</p> <p>Display</p>
C	<p>Indicates if any I/A transaction comments exist for the displayed line item received. I/A transaction comments may be reviewed by using the H option to display the Transaction History Detail Screen [Item Inquiry (MENU IAMAIN)].</p> <p>Display</p>
Our Item Locate / Mfg Item Locate	<p>NOTE: Depending on the use of the F5=MFG ITEM NUMBER / F5=OUR ITEM NUMBER toggle function key, this field displays as either Our Item Locate or Mfg Item Locate.</p> <p>Use this field to locate a specific item received. After you key an item number in this field, press F6=LOCATE. That item number will display at the top of the screen.</p> <p>(A 27) Optional</p>
Co	<p>Key a valid company number to limit the display of receipts on this screen to only those that are affiliated with that company.</p> <p>Leave this field blank to display receipts regardless of company affiliation.</p> <p>(N 2,0) Optional</p>
PO	<p>Key a valid purchase order number to limit the display of receipts on this screen to only those that are affiliated with that purchase order.</p> <p>Leave this field blank to display receipts regardless of purchase order affiliation.</p> <p>(A 6) Optional</p>

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Receiver	<p>Key a valid receiver number to limit the display of receipts on this screen to only those that are affiliated with that receiver.</p> <p>Leave this field blank to display receipts regardless of receiver affiliation.</p> <p>(A 8) Optional</p>
Inv	<p>The invoice amount keyed when creating this receipt validation.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount in the vendor's trading currency (with the currency symbol for the vendor's currency displayed to the right) or in the company's local currency (with the local currency symbol displayed to the right.)</p> <p>Display</p>
Vch	<p>The voucher amount as indicated by the received goods for this purchase order/receiver. This amount includes the goods and services tax (GST) for taxable line items if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and GST is being calculated for the vendor.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the voucher amount in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Diff	<p>The difference between the invoice and voucher amounts.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the difference between the invoice amount and voucher amount in the vendor's trading currency and local currency.</p> <p>Display</p>

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
F2=Desc Left/Desc Right/Item & Desc	<p>The F2=DESC LEFT / F2=DESC RIGHT / F2=ITEM & DESC function key displays only if you selected not to display both description lines [as selected in System Options Maintenance (MENU XAFILE) or as selected with the F24=DOUBLE LINE / F24=SINGLE LINE non-displayed function key].</p> <p>If the key displays as follows:</p> <ul style="list-style-type: none"> • F2=DESC LEFT, press to show the “left window” of the item description starting with the left-most word in the description. • F2=DESC RIGHT, press to show the “right window” of the description so the last word in the description appears at the end of the description field. The left and right windows will be the same if the entire description can fit on the screen. • F2=ITEM & DESC, press to show the complete item number and as much of the description as will fit (two blanks separate the fields.) The item number displays in high intensity.
F4=Cst U/M/Buy UM	<p>This key performs as a 2-way toggle to display either the quantity of the item in the costing unit of measure or buying unit of measure. This allows you to see a direct correlation between the U/M and quantity values in which an item was purchased from a vendor, and the costing values of that item. Quantity values for each item that make up the selected receipt are displayed on this screen in the appropriate U/M.</p> <p>If the key displays as follows:</p> <ul style="list-style-type: none"> • F4=CST U/M, press to display the quantity of the item in its costing unit of measure. • F4=BUY U/M, press to display the quantity of the item in its buying unit of measure.
F5=Mfg/Our Item Number	<p>The F5=MFG ITEM NUMBER / F5=OUR ITEM NUMBER function key performs as a 2-way toggle to display either the manufacturer’s item number or your item number (“our” item number).</p> <p>If the key displays as follows:</p> <ul style="list-style-type: none"> • F5=MFG ITEM, press to display the item number used by the manufacturer for this item (if the item number is displayed). (Refer to the F2 function key description.) • F5=OUR ITEM, press to display the item number used by your organization for each item receipt (if the item number is displayed).
F6=Locate	<p>Press F6=LOCATE after keying an item number in the Mfg Item Locate or Our Item Locate fields to locate the selected item number at the top of the screen.</p>

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
F9=Active/All/Deleted	<p>The F9=ACTIVE / F9=ALL / F9=DELETED function key performs as a 3-way toggle. Press this key to display active, all, or removed line item receipts. The status (active/deleted/all) of the line item receipts shown displays in the (Status) field.</p> <p>If this key displays as follows:</p> <ul style="list-style-type: none"> F9=ACTIVE, all line item receipts display and “All” appears in the upper right corner. F9=ALL, deleted line item receipts only display and “Deleted” appears in the upper right corner. F9=DELETED, active line item receipts only display and “Active” appears in the upper right corner.
F10=End	<p>Press F10=END to end receipt validation. The End Validation Screen (p. 4-52) will appear.</p>
F11=Local Curr/ Trading Curr	<p>This key only displays when International Currency is installed and only if the trading currency of the vendor you have selected is different from the company’s local currency.</p> <p>Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying the total values for the invoiced line items, invoice and voucher amounts, and the amount of the difference between the invoice and voucher amounts in the company’s local currency or in the vendor’s trading currency.</p> <p>Press F11=LOCAL CURR to display the PO values and invoice, voucher, and difference amounts in the company’s local currency. The symbol for the company’s local currency will appear to the right of the Inv field.</p> <p>Press F11=TRADING CURR to display the total values for the invoiced line items and invoice, voucher, and difference amounts in the vendor’s trading currency. The symbol for the vendor’s currency will appear to the right of the Inv field.</p>
F24=Double Line / F24=Single Line	<p>F24=DOUBLE LINE / F24=SINGLE LINE is non-display.</p> <p>Press F24=DOUBLE LINE / F24=SINGLE LINE to toggle between double line mode and single line mode. The default mode of this screen is based on the selection to Show 2nd Desc Line as determined in System Options Maintenance (MENU XAFILE).</p> <p>In single line mode, the initial display shows the item number field based on the Longest Item Length field specified in System Options (MENU XAFILE) followed by the beginning of the item description.</p> <p>In double line mode, the two lines of item description are displayed below the full display of the item number field.</p>

Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Enter	<p>Press ENTER after keying an option in the Op field.</p> <p>If you selected a line item to:</p> <ul style="list-style-type: none">• Delete (D) or Restore (R), pressing ENTER updates the current screen accordingly.• Change (C), pressing ENTER displays the Receipt Validation Line Item Receipt Change Screen (p. 4-46).• Review its history (H), pressing ENTER displays the Transaction History Detail Screen of the Item Inquiry (MENU IAMAIN). Refer to the Inventory Accounting User Guide for more information.• View any order/item comments (M) for the line item you select, if comments were entered for that particular line during Purchase Order Entry, pressing ENTER displays the Purchase Order Item/Order Comments Screen (p. 4-50).

Receipt Validation Line Item Receipt Change Screen Fields and Function Keys

Field/Function Key	Description
Chg	The line number, from the Receipt Validation Screen (p. 4-39), of the line item receipt being changed. Display
Item	The item number and description for the line item receipt being changed. Display
No Chg	Use to indicate if this is a no charge item. A no charge item is simply an item that is received but not billed. Key Y if this item is a no charge item. This marks the pending receipt as “no charge” to ensure that it will not be considered for receipt validation. Leave this field blank if this item is not a “no charge” item. <i>Default Value:</i> Blank <i>Valid Values:</i> Blank, Y (A 1) Optional

Receipt Validation Line Item Receipt Change Screen Fields and Function Keys

Field/Function Key	Description
Inv Qty	<p>Use this field to change the received (invoiced) quantity displayed on the Receipt Validation Screen (p. 4-39). Note that the value in the receipt quantity (Rec Qty) field on this screen will not be updated. Also note that the value keyed in this invoice quantity field cannot be greater than that keyed in the Rec Qty field.</p> <p>Key an invoice quantity in this field if different than the default (the receipt quantity).</p> <p>If the validation is indicated as complete (refer to the Complete field description), and there is a difference between the invoice quantity (Inv Qty) and the receipt quantity (Rec Qty), the difference will be included in the Quantity Variance Report (p. 4-58). This report will print at the end of the validation process, after completing activities on the End Validation Screen (p. 4-52) and pressing F13=CREATE VOUCHER to create a voucher.</p> <p>(N 11,2) Required</p>
Inv Val	<p>Use this field to key the invoice amount for this line item if it is different than the receipt value. The received (invoiced) value displayed on the Receipt Validation Screen (p. 4-39) updates to reflect the value keyed in this field.</p> <p>A cost variance warning is issued when a line item's cost is changed, and the variance between the invoice amount and the receipt amount exceeds either the Cost Variance Warning Percent or the Cost Variance Warning Value set in Purchasing Options Maintenance (MENU XAFILE). Additionally, if there is a PO-AP Hold Code specified in Purchasing Options Maintenance, the voucher you create will automatically be put on hold with that hold code. To release the voucher from hold, you must be authorized as defined for the Allow the Release of Vouchers on Variance Hold action authority through Application Action Authority Maintenance (MENU XASCTY).</p> <hr/> <p>NOTE: If a line item has a negative value, indicating a return, you can only enter a negative invoice amount in this field. Similarly, if the line item has a positive receipt value (PO), you can only enter a positive invoice amount in this field.</p> <hr/> <p>Use this field to key the invoice amount for this line item if it is different from the receipt value.</p> <p>When International Currency is installed, key the invoice amount for this line item in the vendor's currency. The local equivalent field displays only if the trading currency is different from the company's local currency.</p> <p>Key the invoice amount for this line item.</p> <p>(N 13,2) Optional</p>
Rec Qty	<p>This field displays the number of items received.</p> <p>Display</p>

Receipt Validation Line Item Receipt Change Screen Fields and Function Keys

Field/Function Key	Description
Rec Val	<p>This field displays the total value of the items received (cost per item multiplied by the number of items received).</p> <p>When International Currency is installed, the total value of the items received displays, in the vendor's currency. The local equivalent displays only if the trading currency is different from the company's local currency.</p> <p>Display</p>
Cmplt	<p>Use this field to indicate if the validation for the line item is complete, even if only a partial invoice quantity is entered.</p> <p>If the validation is indicated as complete, but there is a difference between the invoice quantity (Inv Qty) and the receipt quantity (Rec Qty), the Quantity Variance Report (p. 4-58) will print. This report will print at the end of the validation process, after completing activities on the End Validation Screen (p. 4-52) and pressing F13=CREATE VOUCHER to create a voucher.</p> <p>Key Y to indicate that this line item is received complete.</p> <p>Leave this field blank to indicate that this line item is not received complete.</p>

Important

If there is a difference between the invoice and receipt quantities, but this field is left blank to indicate that the line item is not validated as complete, the remaining balance of items will be included in a new record so that future validation of the remaining items may be performed.

Default Value: Y

Valid Values: Y, blank

(A 1) Optional

Taxable	<p>This field appears only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2).</p> <p>Use this field to specify whether this item is subject to goods and services tax (GST).</p> <p>Key Y if this item is subject to GST. GST will be calculated for the item based on the GST rate of the tax body assigned to the vendor.</p> <p>Leave this field blank if this item is not subject to GST. F5=Item Comments F12=Return

This screen appears after you select a line item to view order/item comments, if any, from the Receipt Validation Screen (p. 4-39). Use this screen to view any order/item comments for the line item you selected, if comments were entered for that particular line during Purchase Order Entry. This screen initially displays the specific item comments that were associated with that Purchase Order line. To display order comments that exist for the entire Purchase Order, press **F5=ORDER COMMENTS**.

All fields on this screen are display only.

Purchase Order Item/Order Comments Screen Fields and Function Keys

Field/Function Key	Description
Item No	The item number in this purchase order.
Description	The description of the item number.
Quantity	The received quantity of the item.
Print / (Comment)	The print code regarding the specific documents where the order/item comments were output to, followed by the order/item comments.

Purchase Order Item/Order Comments Screen Fields and Function Keys

Field/Function Key	Description
F5=Order Comments/ F5=Item Comments	Press the F5=ORDER COMMENTS / F5=ITEM COMMENTS toggle key to display specific item comments that were associated with the particular Purchase Order line or to display order comments that exist for the entire Purchase Order. The top left of the screen displays ITEM COMMENTS or ORDER COMMENTS in reverse image to notify you what comments you are viewing.
F12=Return	Press F12=RETURN to return to the Receipt Validation Screen (p. 4-39).

End Validation Screen

```

This screen appears after you press F10=END from the Receipt Validation Screen (p. 4-39). Use this screen to change the miscellaneous charges amount, if needed, and to confirm receipt validations.

NOTE: This screen also may be accessed from Pre-Receipt Inv Validation (MENU APMAIN), with minor differences. Those differences are described here.

End Validation Screen Fields and Function Keys

Field/Function Key	Description
Currency	<p>This field only displays when International Currency is installed and only for those vendors whose trading currencies are different from the company's local currency.</p> <p>The currency code and description for the vendor's currency, if the currency is not the same as the company's local currency.</p> <p>Display</p>
Invoice Amt	<p>The amount of the invoice for this receipt validation. This amount was keyed on the AP-PO Landing Validation Screen (p. 4-60).</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount for the receipt in the vendor's trading currency (with the currency symbol for the trading currency displayed to the right) or in the company's local currency (with the local currency symbol displayed to the right.).</p> <p>Display</p>

End Validation Screen Fields and Function Keys

Field/Function Key	Description
GST Amount	<p>This field appears only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/Services Tax field is set to Y through Tax Body Maintenance (MENU OEFILE or MENU ARFILE) for the tax body assigned to the vendor through Vendors Maintenance (MENU POFILE) or the vendor/warehouse through Vendor/Warehouse Assignments Maintenance (MENU POFILE).</p> <p>This field displays the total amount of GST calculated for taxable line items during receipt validation.</p> <p>Display</p>
Receipts	<p>The total amount of receipts selected for this voucher. This amount is determined by the line item receipts for the PO or receiver.</p> <hr/> <p>NOTE: If the receipt value is negative, the Purchases Returns Clearing Account will be retrieved. Otherwise, the Purchases Clearing Account will be retrieved. Accounts are specified in the G/L Interface. Refer to the General Ledger Interface manual for details.</p> <hr/> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of receipts for this voucher in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Landing Cst	<p>The total amount of landing costs identified for this voucher. This is a combination of all landing costs for each line item included in the voucher.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of landing costs identified for this voucher in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Misc Chgs	<p>This field does not display when this screen is accessed from Pre-Receipt Inv Validation (MENU APMAIN).</p> <p>The total amount of miscellaneous charges (i.e., non-item charges) for this voucher. You may change this amount using the Adjust field.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of miscellaneous charges for this voucher in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>

End Validation Screen Fields and Function Keys

Field/Function Key	Description
Adjust	<p>This field does not display when this screen is accessed from Pre-Receipt Inv Validation (MENU APMAIN).</p> <p>To change the amount in the Misc Chgs field, key the new amount in this field and press ENTER.</p> <hr/> <p>NOTE: If you wish to use the F13=CREATE VOUCHER key to create a voucher from this screen, the total amount of the invoice (Invoice Amt) plus any additional charges (for example, GST) must match the voucher (Voucher Amt). When the two are equal, the difference will reflect zero. To make the totals equal and therefore the Difference field reflect 0, key an adjustment amount in this field, negative or positive, as applicable.</p> <hr/> <p>When International Currency is installed, this field will not display if the vendor you selected uses a trading currency different from the company's local currency and you selected to display local equivalent values by pressing the F11=LOCAL CURR / F11=TRADING CURR key. Using the vendor's currency, key the new amount in this field and press ENTER.</p> <p>(N 15,2) Optional</p>
Voucher Amt	<p>The total amount of the voucher to be created (i.e., the value of the receipts plus miscellaneous charges and GST.)</p> <p>One voucher transaction is created for each Purchases Clearing Account updated. Purchases Clearing Accounts are specified in the G/L Interface. Refer to the General Ledger Interface manual for details.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of the voucher to be created in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>

End Validation Screen Fields and Function Keys

Field/Function Key	Description
Difference	<p>The difference between the invoice amount plus any additional charges (for example, GST) and the voucher amount for this voucher.</p> <p>You can resolve the difference by changing the invoice amount or for one or more line items on the Receipt Validation Screen (p. 4-39). You cannot change the calculated GST; however, you can change whether tax should be calculated for the item.</p> <p>If the amount in this field exceeds the Cost Variance Warning Percent or Cost Variance Warning Value set up through Purchasing Options Maintenance (MENU XAFILE), you will see a warning. Additionally, if there is a PO-AP Hold Code specified through Purchasing Options Maintenance, the voucher you create will automatically be put on hold with that hold code. Only the authorized users specified in Purchasing Options Maintenance are allowed to release the voucher from hold.</p> <hr/> <p>NOTE: If you wish to use the F13=CREATE VOUCHER key to create a voucher from this screen, the total amount of the invoice (Invoice Amt) plus any additional charges (for example, GST) must match the voucher (Voucher Amt). When the two are equal, the difference will reflect zero. To make the totals equal and therefore the Difference field reflect 0, key an adjustment amount in the Adjust field, negative or positive, as applicable.</p> <hr/> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the difference between the invoice amount and voucher amount in the vendor's trading currency and in the company's local currency.</p> <p>Display</p>
F2=Receipts	<p>This function key displays only if a PO number was entered on the AP-PO Landing Validation Screen (p. 4-60) or selected from the Pending Receipts Search Screen (p. 4-33).</p> <p>Press F2=RECEIPTS to return to the Receipt Validation Screen (p. 4-39).</p>
F5=Lnd Cst	<hr/> <p>NOTE: Landing costs can be utilized only if Purchasing is installed.</p> <hr/> <p>Press F5=LND CST to display the AP-PO Landing Validation Screen (p. 4-60) to review and validate landing costs.</p>
F10=New PO	<p>Press F10=NEW PO to perform receipt validation for a new purchase order. The AP-PO Landing Validation Screen (p. 4-60) will appear.</p>

End Validation Screen Fields and Function Keys

Field/Function Key	Description
F11=Local Curr / Trading Curr	<p>The F11=LOCAL CURR / F11=TRADING CURR function key only displays when International Currency is installed and only if the trading currency of the vendor whose receipts you are validating is different from the company's local currency.</p> <p>Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying the invoice, receipts, landing costs, miscellaneous charges, voucher and difference amounts in the company's local currency and displaying these amounts in the vendor's trading currency.</p> <p>Press F11=LOCAL CURR to display amounts in the company's local currency. The symbol for the company's local currency will appear to the right of the Invoice Amt field.</p> <p>Press F11=TRADING CURR to display amounts in the vendor's trading currency. The symbol for the vendor's currency will appear to the right of the Invoice Amt field.</p>
F13=Create Voucher/ Next Voucher	<p>If you accessed this screen through this menu option, this function key displays as F13=CREATE VOUCHER. Press F13=CREATE VOUCHER to create a voucher after you have modified and verified the selected receipts. If any differences between the receipt quantity and the inventory quantity exist, and the line items were validated as complete, the Quantity Variance Report (p. 4-58) will print. The Voucher Header Screen (p. 4-80) will appear.</p> <p>The voucher is created in the current voucher group. The receipts from which the voucher is created are marked as being "vouchered" (i.e., a voucher has been created for those receipts) in Purchasing.</p> <p>The Purchase Clearing Account and Purchase Price Variance Account for each item are updated accordingly in General Ledger (G/L). For each account updated, a separate voucher transaction is created; these transactions are posted in G/L when this voucher group is posted (if you are interfaced to G/L). Also, if the receipt value is negative, the Purchases Returns Clearing Account will be retrieved. Refer to the General Ledger Interface manual for details.</p> <p>If you accessed this screen through Pre-Receipt Inv Validation (MENU APMAIN), this function key displays as F13=NEXT VOUCHER. Press F13=NEXT VOUCHER to select another pre-receipt invoice for validation. The Pre-Receipt Invoices List Screen (p. 14-9) will appear.</p>
F24=Cancel	<p>Press F24=CANCEL to cancel this receipt validation process. Press F24=CANCEL a second time to verify the cancellation.</p> <p>If you accessed this screen through this option, the Voucher Entry Selection Screen (p. 4-8) will appear.</p> <p>If you accessed this screen through Pre-Receipt Inv Validation (MENU APMAIN), the AP-PO Receipt Validation Screen (p. 4-28) will appear.</p>

End Validation Screen Fields and Function Keys

Field/Function Key	Description
Enter	If you keyed an amount in the Adjust field, press ENTER to update the Misc Chgs and the Difference fields.

Quantity Variance Report

AP114 3/22/93 12.07.37				QUANTITY VARIANCE REPORT				AX/APDEMO		PAGE 1

This report prints for all differences between quantities received and quantities invoiced, if the applicable line items have been validated as “complete” on the Receipt Validation Line Item Receipt Change Screen (p. 4-46). All Quantity Variance Reports should be kept as a record of partial receipts flagged as completely validated.

For a description of the fields on this screen, review the Receipt Validation Line Item Receipt Change Screen (p. 4-46).

Quantity Variance Report

Report/Listing Fields	Description
Co	The company associated with this voucher.
Voucher	The voucher number assigned for this receipt’s invoice.
Vendor	The vendor from whom the item was purchased.
PO No	The purchase order number who’s receipt is being validated.
Item / Description	The item number and description in this purchase order.
Receipt Qty	The received quantity being vouchered.
Receipt Value	The extended cost of the received quantity.
Override Qty	The override quantity being vouchered as keyed in the invoice quantity (Inv Qty) field on the Receipt Validation Line Item Receipt Change Screen (p. 4-46).
Override Value	The extended cost of the override quantity as keyed in the invoice value (Inv Val) field on the Receipt Validation Line Item Receipt Change Screen (p. 4-46).
Variance Qty	The difference between the receipt quantity and the override quantity.

Quantity Variance Report

Report/Listing Fields	Description
Variance Value	The difference between the receipt value and the override value.

```

This screen appears after you press **F5=LND CST** on the End Validation Screen (p. 4-52). Use this screen to validate accrued landing costs incorporated in this voucher against the voucher amounts.

Using this screen determines which landing costs (which landing type and for which warehouse) will be validated by this voucher. Selecting a specific type of landing cost will display all unvouchered landing costs of that type for this voucher.

NOTE: When International Currency is installed, the landing validation process will perform all validation processing changes in the currency of the vendor being processed.

AP-PO Landing Validation Screen Fields and Function Keys

Field/Function Keys	Description
Co	The company number and name associated with this voucher.
Vendor	The vendor number and name for the invoice being validated.
Currency	This field only displays when International Currency is installed and only for those vendors whose trading currencies are different from the company's local currency. The currency code and description for the trading currency, if the vendor's currency differs from the company's local currency. Display

AP-PO Landing Validation Screen Fields and Function Keys

Field/Function Keys	Description
Invoice Amt	<p>The invoice amount for this receipt, as identified on the End Validation Screen (p. 4-52).</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount for the receipt in the vendor's trading currency or in the company's local currency with the local currency symbol displayed to the right.</p> <p>Display</p>
Voucher Amt	<p>The voucher amount (the total amount of the receipt and miscellaneous charges) as identified on the End Validation Screen (p. 4-52). One voucher transaction is created for each purchase account updated. Purchase accounts are specified in the G/L Interface. Refer to the General Ledger Interface manual for details.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of the voucher in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Difference	<p>The difference between the invoice and the voucher amount are also displayed as identified on the End Validation Screen (p. 4-52).</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the difference between the invoice amount and voucher amount in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
WH	<p>Key the Warehouse ID to indicate the warehouse for which landing costs are to be validated.</p> <p>(N 2,0) Required</p>
Lnd Cst No	<p>Use this field to indicate the landing costs which will be validated (landing cost 1 through landing cost 6, as applicable).</p> <p>Key the number associated with the desired landing cost and press ENTER to display a list of currently unvouchered landing costs of that type. The Unvouchered Unvouchered Landing Costs Screen (p. 4-63) will appear.</p> <p>(N 1,0) Required</p>

AP-PO Landing Validation Screen Fields and Function Keys

Field/Function Keys	Description
Lnd Ref No	<p>Use this field to specify a landing cost reference to limit the display on the Quantity Variance Report (p. 4-58) to those costs associated with that reference.</p> <p>For example, if, for Receiver 100100, you keyed a reference of UPS (to indicate United Parcel Service) next to a freight landing cost while performing Enter or Change Receivers or PO Receipts (MENU POMAIN), you could key UPS in this field. This would limit the display on the Unvouchered Landing Costs Screen to only those associated with UPS, such as Receiver 100100. The use of references assists when matching landing cost amounts to the correct landing cost invoices by helping to associate the two.</p> <p>(A 10) Optional</p>
F10=End	<p>Press F10=END to display the End Landing Validation Screen (p. 4-77).</p>
F11=Local Curr/ Trading Curr	<p>The F11=LOCAL CURR / F11=TRADING CURR function key only displays when International Currency is installed and only if the trading currency of the vendor whose landing costs you are validating is different from the company's local currency.</p> <p>Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying the invoice, voucher and difference amounts in the company's local currency and displaying these amounts in the vendor's trading currency.</p> <p>Press F11=LOCAL CURR to display amounts in the company's local currency. The symbol for the company's local currency will appear to the right of the Invoice Amt field.</p> <p>Press F11=TRADING CURR to display amounts in the vendor's trading currency. The symbol for the vendor's currency will appear to the right of the Invoice Amt field.</p>
F12=Return	<p>Press F12=RETURN to return to the previous screen without making any selections on this screen.</p>
Enter	<p>Keying a landing cost number in the Lnd Cst No field and pressing ENTER will display the Unvouchered Landing Costs Screen (p. 4-63).</p>

This screen appears after you make a landing cost selection and press **ENTER** on the AP-PO Landing Validation Screen (p. 4-60). Each transaction that displays is a summary of all line items in that transaction. Use this screen to select receipt transactions for which landing costs are to be validated. Or, use this screen to remove a receipt transaction from the voucher being entered.

When International Currency is installed, the purchase orders will only display when the currency of the vendor matches the landing cost currency code.

Unvouchered Landing Cost Screen Fields and Function Keys

Field/Function Key	Description
(Landing Cost)	This field indicates the landing cost selected in the Lnd Cst No field on the previous screen. Landing costs being used are determined through Warehouse Numbers Maintenance (MENU IAFILE) in Inventory Accounting. Related account information for landing costs is defined through G/L Transfer Definition (MENU GLXFER) in General Ledger. The formulas for calculating landing costs are defined for a vendor (and optionally a warehouse) through Landing Factors Maintenance (MENU POFIE). Finally, landing costs are assigned to an item through Vendor/Item Information Maintenance (MENU POFIE) in Purchasing. Display

Unvouchered Landing Cost Screen Fields and Function Keys

Field/Function Key	Description
Currency	<p>This field only displays when International Currency is installed and only for those vendors whose trading currencies differ from the company's local currency.</p> <p>The currency code and description for the trading currency, if the vendor's currency differs from the company's local currency.</p> <p>Display</p>
Opt	<p>Use this field to select (or remove) one of the displayed receipt transactions to validate its landing costs. If a receipt transaction is selected, all line items belonging to that receipt transaction will be selected as complete, and added to the total landing cost to be validated.</p> <p>Key S next to one or more receipt transactions to validate the landing costs for all the line items within those transactions. The Landing Validation Screen (p. 4-67) will appear.</p> <p>Key R to remove a transaction from this landing cost validation process.</p> <hr/> <p>NOTE: Lines marked with R will be removed from the current processing activities, but may again be selected for voucher processing at another time. The Tot LC Amt displayed is reduced by the amount removed.</p> <hr/> <p><i>Valid Values:</i> S or R (A 1) Optional</p>
Co	<p>The company number associated with the purchase order.</p> <p>Display</p>

This screen appears after you select receipt transactions from the AP-PO Landing Validation Screen (p. 4-60). Use this screen to validate landing costs for the selected transaction line items. From this screen, you can

- delete a line from the screen to omit it from further processing (and, if you make a mistake, you can restore it to this screen)
- display inventory transaction history for a specific transaction
- change the status and landing cost amount for a specific transaction
- provide an override landing cost amount to distribute to several transaction lines

Landing Validation Screen Fields and Function Keys

Field/Function Key	Description
Currency	This field only displays when International Currency is installed and only for those vendors whose trading currency differ from the company's local currency. The currency code and description for the trading currency, if the vendor's currency differs from the company's local currency. Display

Landing Validation Screen Fields and Function Keys

Field/Function Key	Description
Invoice Amt	<p>The invoice amount for this receipt, previously keyed.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount for the receipt in the vendor's trading currency or in the company's local currency with the local currency symbol displayed to the right.</p> <p>Display</p>
Voucher Amt	<p>The voucher amount (the total amount of the receipt and miscellaneous charges).</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the total amount of the voucher in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Difference	<p>The difference between the invoice and the voucher amount.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the difference between the invoice amount and voucher amount in the vendor's trading currency or in the company's local currency.</p> <p>Display</p>
Opt	<p>Use this field to select one or more line items to delete (and optionally restore again), review history for, or select for landing cost distribution activities.</p> <p>Key D to remove a line item from this receipt. The total value seen in the bottom right of the screen is reduced by the amount of the line removed.</p> <p>Key H to review the history of a line item in this receipt. The Transaction History Detail Screen of the Item Inquiry (MENU IAMAIN) will appear to present general ledger and I/A transaction comment information. Refer to the Inventory Accounting User Guide for more information.</p> <p>Key R to restore a previously removed line item from this receipt. The total value seen in the bottom right of the screen is increased by the amount of the line removed.</p> <p>Key X to select several line items to which an overriding landing cost amount will be distributed. After selecting several items with an X and pressing ENTER, the Invoice Amount Distribution Screen (p. 4-71) will appear. From there, you will decide upon the distribution method to be used.</p> <p><i>Valid Values:</i> D, H, R, or X</p> <p>(A 1) Optional</p>
Our Item No/Mfg Item No	<p>Our item number (or that of the manufacturer), for the line item on the receipt. Toggle between these two numbers using the F5 function key. Refer to the field description for that function key for details.</p> <p>Display</p>

Landing Validation Screen Fields and Function Keys

Field/Function Key	Description
Qty	The quantity received of the line item displayed. Display
LC Amt	The total landing cost dollar value for the line displayed. Display
Inv Amt	The total invoice dollar value for the line displayed. Display
F2=Dtl/F2=Sum	This key is used to toggle the display of the item information. Press F2=SUM to display summary one line or press F2=DTL to display three lines of detail to provide more data about the displayed line items.
F5=Mfg/F5=Our Itm	The F5=MFG ITM / F5=OUR ITM key is used as a toggle to display either the manufacturer's item number or your item number ("our" item number). Press F5=MFG ITM to display the item number used by the manufacturer for this item. Press F5=OUR ITM to display the item number used by your organization for each item receipt.
F9=New PO	Press F9=NEW PO to return to the AP-PO Receipt Validation Screen (p. 4-28) to allow selection of additional receipt transactions.
F10=End	Press F10=END to end landing cost validation. The End Landing Validation Screen (p. 4-77) will appear.
F11=Local Curr/ F11=Trading Curr	This function key only displays when International Currency is installed and if the trading currency of the vendor whose landing costs you are validating is different from the company's local currency. Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying the invoice total, voucher total, difference, landing cost amount, invoice amount, and hash total amounts in the company's local currency or in the vendor's trading currency. Press F11=LOCAL CURR to display amounts in the company's local currency. The symbol for the company's local currency will appear to the right of the Inv field. Press F11=TRADING CURR to display amounts in the vendor's trading currency.
F15=Sel All	Press F15=SEL ALL to mark all items on the screen for selection. You can then optionally decide to remove one or more of the selection marks to omit desired items from further processing.
F16=Del All	Press F16=DEL ALL to mark all items on the screen for deletion. You can then optionally decide to remove one or more of the deletion marks to include desired items in further processing.

Landing Validation Screen Fields and Function Keys

Field/Function Key	Description
Enter	<p>Press ENTER after keying an option in the Opt field.</p> <p>If you selected a line item to D to delete or R to restore, the screen will be updated to reflect the changes.</p> <p>If you selected a line item with H to review its history, the The Transaction History Detail Screen of the Item Inquiry (MENU IAMAIN) will appear. Refer to the Inventory Accounting User Guide for more information.</p> <p>If you selected to distribute a landing cost amount to one or more line items with X, the Invoice Amount Distribution Screen (p. 4-71) will appear.</p>

This screen appears after you select to distribute a landing cost amount to one or more line items (**Opt** was marked with **X**) from the Landing Validation Screen (p. 4-67). This screen allows you to key an override value to be assigned to those items on the screen display.

If only one line was selected for inclusion in this screen, only the **F2=DTL / F2=SUM** toggle and the **F10=UPDATE** function keys will appear. These are the only functions needed to update one item.

If more than one line was selected for inclusion in this screen, the **F2=DTL / F2=SUM** and the **F10=CONTINUE** function keys will appear instead.

Additionally, two function keys used to determine distribution method will appear: the **F6=DIST PROP** and the **F9=DIST EVEN** function keys. Refer to the applicable function key field descriptions for details.

NOTE: When International Currency is installed, distribution processing is performed using the trading currency amounts.

Invoice Amount Distribution Screen Fields and Function Keys

Field/Function Key	Description

Tot Selected	<p>The total dollar invoice amount for those items included on this screen.</p> <p>Display</p>

Invoice Amount Distribution Screen Fields and Function Keys

Field/Function Key	Description
Tot Invoice	<p>The total dollar amount of the invoice to be assigned to those items included on this screen. Use this field to review or change the amount in the Inv Amt field. The value you key in this field updates the invoice amount in the line or items on this screen.</p> <p>If only one line item is on this screen, then any difference between this value and the Tot Selected amount value will be assigned to the invoice amount for that line item.</p> <p>If more than one line item is included, then any difference between this value and the Tot Selected amount value will be distributed to the invoice amounts for all those line items displayed, according to the distribution method selected on this screen.</p> <hr/> <p>NOTE: Refer to the F6=DIST PROP and F9=DIST EVEN function key field descriptions for details about the available distribution methods. If the Tot Invoice amount is different from the Tot Selected amount, you must press F6=DIST PROP or F9=DIST EVEN to distribute the difference. If you press F10=UPDATE or F10=CONTINUE, no values will be changed.</p> <hr/> <p>When International Currency is installed, this field may not be accessed if F11=TRADING CURR is shown and local equivalent amounts are displayed. Amounts must be displayed in the trading currency and the F11=LOCAL CURR must be shown in order to access this field.</p> <p>When changing the invoice amount, BE SURE to enter the new amount in the trading currency.</p> <p>Key the new amount or accept the default.</p> <p><i>Default Value:</i> The total invoice amount of the items included on this screen</p> <p>(N 15,2) Display/Required</p>

Invoice Amount Distribution Screen Fields and Function Keys

Field/Function Key	Description
Complete	<p>This field is used to update the status of the line(s) displayed on the screen.</p> <p>Key Y to mark all line(s) as validated complete. If there is a difference between the landing cost amount and the invoice amount for that line, a Landing Variance transaction will be created. This transaction will utilize the general ledger account number provided for the applicable landing cost [done via G/L Transfer Definition (MENU GLXFER)]. Refer to the General Ledger Interface manual for details.</p> <p>Key N to mark the line(s) as partially validated. The remaining amount will be retained for validation at a later time.</p> <hr/> <p>NOTE: If the landing cost amount is greater than or equal to the invoice amount for that line, then the landing cost history for this line item will reflect 0. This entry will also remain available for later validation at which time the invoice amount must be provided.</p> <hr/> <p><i>Default Value:</i> If all of the lines in the display are Y, then the default is Y; if any one of the lines is N, then the default is N.</p> <p>(A 1) Required</p>
F2=Dtl/F2=Sum	<p>The F2=DTL / F2=SUM function key is used to toggle the display of the item information from one line (summary) to three lines (detail) to provide more data about the displayed line items.</p>

Invoice Amount Distribution Screen Fields and Function Keys

Field/Function Key	Description
F6=Dist Prop	<p>The F6=DIST PROP function key displays only if more than one line item is displayed on this screen.</p> <p>Press F6=DIST PROP after keying a value in the Tot Invoice field to distribute the value proportionately to all line items on the screen. The amount for each line item is calculated as described in the following example:</p> <p>Example: :</p> <p>Assumption:</p> <p>Line item 1 = A120 5.000 CAS @ 40.00 Line item 2 = A130 5.000 CAS @ 60.00 Total 100.00</p> <p>Process:</p> <p>Change the Tot Invoice to 110.00. Press F6=DIST PROP. The calculations to modify the line item totals to attain this new total are as follows:</p> <p>$(40.00 * 110.00) / 100.00 = 44.00$ $(60.00 * 110.00) / 100.00 = 66.00$</p> <p>Results:</p> <p>Line item 1 = A120 5.000 CAS @ 44.00 Line item 2 = A130 5.000 CAS @ 66.00 Total 110.00</p> <hr/> <p>NOTE: The data will not actually be updated until you confirm your selections with the F10=UPDATE function key which appear specifically for that purpose.</p> <hr/>

Invoice Amount Distribution Screen Fields and Function Keys

Field/Function Key	Description
F9=Dist Even	<p>The F9=DIST EVEN function key displays only if more than one line item is displayed on this screen.</p> <p>Press F9=DIST EVEN after keying a value in the Tot Invoice field to distribute the value evenly to all line items on the screen. The amount for each line item is calculated using the new invoice total and the number of lines displayed, as described in the following example:</p> <p>Example: :</p> <p>Assumption:</p> <p>Line item 1 = A120 5.000 CAS @ 40.00 Line item 2 = A130 5.000 CAS @ 60.00 Total 100.00</p> <p>Process:</p> <p>Change the Tot Invoice to 110.00. Press F9=DIST EVEN. The calculations to modify the line item totals to attain this new total are as follows:</p> <p>$110.00 / 2(\text{line items}) = 55.00(\text{for each line item})$</p> <p>Results:</p> <p>Line item 1 = A120 5.000 CAS @ 55.00 Line item 2 = A130 5.000 CAS @ 55.00 Total 110.00</p> <hr/> <p>NOTE: The data will not actually be updated until you confirm your selections with the F10=UPDATE function key which appears specifically for that purpose.</p>
F10=Continue/ F10=Update	<p>If more than one line item has been included in this group, this function key is labeled F10=UPDATE. If only one line item has been included in this group, this function key is labeled F10=CONTINUE. Press F10=UPDATE to display distribution values to be entered into the system, ends landing cost distribution activities, and displays the Landing Validation Screen (p. 4-67). Press F10=CONTINUE to ends landing cost distribution activities and displays the Landing Validation Screen (p. 4-67).</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Inv No	<p>This voucher is created for the invoice number keyed in this field.</p> <p><i>Default Value:</i> If viewing a drop ship receipt validation voucher, the number keyed in the Invoice No. field on the Drop Ship Receipt Validation Screen (p. 4-129). If viewing a drop ship receipt validation charge back voucher, the number keyed in the Charge Back No. field on the End Drop Ship Receipt Validation Screen (p. 4-135).</p> <p>(A 15) Required</p>
Inv Desc	<p>A description of the invoice being recorded with this voucher.</p> <p><i>Default Value:</i> If viewing a drop ship receipt validation voucher, the description keyed from the Invoice Desc field on the Drop Ship Receipt Validation Screen (p. 4-129). If viewing a drop ship receipt validation charge back voucher, this field will display the phrase C/B FOR; followed by the number keyed in the Invoice No. field on the Drop Ship Receipt Validation Screen (p. 4-129) to signify that this is a charge back voucher associated with the vendor's invoice for the drop shipment.</p> <p>(A 25) Optional</p>
Inv Amt	<p>The amount of the invoice which is being recorded with this voucher.</p> <p>Key the invoice input dollar amount. If you do not key a decimal point, the system assumes whole dollars. Therefore, you must key a decimal point to distinguish between dollars and cents. The system will transpose the amount keyed For example, to enter an amount of</p> <ul style="list-style-type: none"> • \$5000.00, key: 5000 • \$100.00, key: 100 • \$50.00, key: 50 • \$50.25, key: 50.25 <p>For type C invoices (credit), the invoice amount must be a negative value. For type P invoices (pre-receipt), the invoice amount must be a positive value.</p> <p>When International Currency is installed, key the invoice amount in the vendor's currency. After you press ENTER, the company's local currency amount will appear beneath this invoice amount and the Currency Symbol for the local currency will appear to the right of the local currency amount.</p> <p><i>Default Value:</i> If viewing a drop ship receipt validation voucher, the amount keyed in the Invoice Amt field on the Drop Ship Receipt Validation Screen (p. 4-129). If viewing a drop ship receipt validation charge back voucher, the amount displayed in the Charge Back field on the End Drop Ship Receipt Validation Screen (p. 4-135).</p> <p>(N 15,2) Required</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Inv Date	<p>This field is display-only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/Services Tax field is set to Y through Tax Body Maintenance (MENU OEFIELD or MENU ARFIELD) for the tax body assigned to the vendor through Vendors Maintenance (MENU POFIELD) or the vendor/warehouse through Vendor/Warehouse Assignments Maintenance (MENU POFIELD).</p> <p>Key the date of the invoice being recorded with this voucher.</p> <p><i>Default Value:</i> If viewing a drop ship receipt validation voucher or a drop ship receipt validation charge back voucher, the date keyed in the Invoice Date field on the Drop Ship Receipt Validation Screen (p. 4-129). If the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and this voucher is being created following receipt validation, the date keyed in the Invoice Date field on the AP-PO Receipt Validation Screen (p. 4-28).</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIELD).</p> <p>(N 6,0) Required/Display</p>
User Area	<p>Key additional information about this voucher.</p> <p>(A 10) Optional</p>
PO No	<p>This field is required if a purchase order number is required when creating a voucher for this vendor. This is determined in Vendors Maintenance (MENU APFIELD). Otherwise, this field is optional.</p> <p>Key the number of the purchase order issued when placing the original order being recorded with this voucher.</p> <p><i>Default Value:</i> If you are creating the voucher following receipt validation, the purchase order number keyed on the AP-PO Receipt Validation Screen (p. 4-28) or selected on the Pending Receipts Search Screen (p. 4-33) appears in this field.</p> <p>(A 25) Required/Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Due Date	<p>This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <p>Key the due date for payment of this voucher calculated as the number of payment days plus either the voucher entry date or the invoice date depending on your selection in A/P Options Maintenance (MENU APFIL2). Accept the default, or key a different due date.</p> <p><i>Default Value:</i> The due date as calculated based on the Pay Days field in Vendors Maintenance (MENU APFILE).</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE)</p> <p>(N 6,0) Required</p>
Dsc Date	<p>This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <p>Key the last date on which the cash discount for this voucher is effective. If you leave this field blank and key the number of discount days (Dsc Days), the discount date is calculated and displayed in this field.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Optional</p>
Dsc Days	<p>This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <p>Key the number of days remaining for which the cash discount associated with this vendor is effective. If this field is blank and you key the discount date (Dsc Date), the discount days is calculated and displayed in this field.</p> <p><i>Default Value:</i> The number of discount days for this vendor as keyed in Vendors Maintenance (MENU APFILE)</p> <p>(N 3,0) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Terms	<p>This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <p>The standard payment terms of this vendor. The terms keyed in this field are printed on appropriate documents. Discount calculations are not made from this field.</p> <p><i>Default Value:</i> The terms on the Purchase Order, if you are performing receipt validation and there is only 1 PO for the voucher, or there are multiple POs but they all have the same terms. If there are multiple POs with different terms, or if you are entering miscellaneous vouchers, then this field defaults to the terms for this vendor or assignee as keyed in Vendors Maintenance (MENU APFILE).</p> <p>(A 20) Optional</p>
Urg Pty	<p>The urgency priority is similar to payment priority in that it is used to indicate the priority level for making payment to a vendor. It differs in that its value (1,2 or 3) replaces the payment priority on the day of the urgency date.</p> <p>For example, assume you have decided to enter a voucher with a payment priority of 2 (medium). Payment is due on March 31st, so you decide to assign the urgency date to April 1st to indicate the voucher is past due. A voucher that is past due should be a higher priority than one that is not. Therefore, an urgency priority of 1 (high) should be chosen to indicate this as a higher priority.</p> <p>You may accept the default urgency priority or key a new urgency priority.</p> <p>Key 1 if the urgency priority for this vendor is high.</p> <p>Key 2 if the urgency priority for this vendor is medium.</p> <p>Key 3 if the urgency priority for this vendor is low.</p> <p><i>Default Value:</i> The urgency priority keyed for this vendor through Vendors Maintenance (MENU APFILE).</p> <p><i>Valid Values:</i> 1, 2 or 3</p> <p>(N 1,0) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Urg Date	<p>This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <p>When a payment and urgency priority are specified for a vendor, it is on this date that the value of the urgency priority replaces the payment priority. The urgency date is calculated based on the number of urgency days for this vendor. You may accept the default urgency date or key a new urgency date for this voucher.</p> <p><i>Default Value:</i> The urgency date calculated from the Urgency Days keyed in Vendors Maintenance (MENU APFILE)</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE)/</p> <p>(N 6,0) Required</p>
Cash Dsc %	<p>The cash discount percent offered by this vendor. Three decimal places are assumed. This value is used to calculate the discount amount when applicable.</p> <p><i>Default Value:</i> The cash discount percentage keyed in Vendors Maintenance (MENU AFPPFILE) for this vendor.</p> <hr/> <p>NOTE: This field does not display if a split terms code is entered in the Split Terms Code field on this screen. Additionally, this field will redisplay if the Split Terms Code field on this screen is left blank.</p> <hr/> <p>(N 5,3) Optional</p>
Project	<p>The project associated with this voucher. This may be used for job accounting.</p> <p>(A 10) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Split Terms Code	<p>If you are using split terms, this field represents the split terms that will be used for splitting this voucher as defined through Split Terms Code (MENU APFIL2). Split terms allow you to split invoice amounts and assign pay days and split payments over a set period of time. Additionally, this field may be changed to another split terms code, if desired. You may also leave this field blank to remove split terms from the voucher being processed.</p> <p>Assume the default split terms code.</p> <p>Key a new split terms code.</p> <p>Leave this field blank to remove split terms from the voucher being processed. The screen will redisplay as normal and split terms will be removed from this voucher.</p> <p><i>Default Value:</i> The default split terms code entered in Vendors Maintenance (MENU APFILE).</p> <p><i>Valid Values:</i> A valid split terms code entered in Split Terms Code Maintenance (MENU APFIL2).</p> <hr/> <p>NOTE: This field displays only if this vendor allows split terms as determined through Vendor Maintenance (MENU APFILE). Additionally, if the Allow Split Terms field is left blank in Vendors Maintenance (MENU APFILE), will assume that the vendor does not allow split terms and this field will not display on this screen.</p> <hr/>
(A 2) Optional	
Sep Chk	<p>Used to specify if this voucher, when paid, should be paid on the same check as any other vouchers for this vendor or on its own check. Accept the default, or key a different value.</p> <p>Key Y if a separate check is required for this voucher.</p> <p>Key N if a separate check is not required for this voucher.</p> <p><i>Default Value:</i> The separate check code keyed in Vendors Maintenance (MENU APFILE). However, if the vendor is defined as the one time vendor (MENU APFILE), then this field will default to Y and you will not be able to change it.</p> <p>(A 1) Required</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Pmt Pty	<p>The payment priority used to indicate the priority level for making payments to this vendor. Payment priority can be used in Payment Selection (MENU APCHCK) to select groups of vouchers to be paid.</p> <p>If you are using urgency priority (Urg Pty) and urgency date (Urg Date), you must select a lower payment priority than the urgency priority.</p> <p>For example, if you select an urgency priority of 1 (high), you must select a payment priority of 2 (medium) or 3 (low).</p> <p>You may accept the default payment priority or key a different payment priority:</p> <p>Key 1 if the payment priority for this vendor is high.</p> <p>Key 2 if the payment priority for this vendor is medium.</p> <p>Key 3 if the payment priority for this vendor is low.</p> <p><i>Default Value:</i> The payment priority for this vendor keyed in Vendors Maintenance (MENU APFILE).</p> <p><i>Valid Values:</i> 1, 2 or 3</p> <p>(N 1,0) Required</p>
Prepaid/Check No/ Check Dt	<p>These fields display only if prepaid invoices are allowed for the identified voucher indicated on the Voucher Group Information Screen (p. 4-13).</p> <p>These fields identify whether a check has already been issued for the payment of the displayed invoice.</p> <p>If a check has already been issued for this invoice, key Y in the Prepaid field and key the applicable check number and date. This date must fall in the same fiscal period as the cash disbursement date entered for this voucher group. This will process the payable and the cash disbursement at the same time (i.e. the voucher will be paid when the group is posted).</p> <p>If a check has not already been issued for this invoice, key N in the Prepaid field. This voucher is posted as an open payable.</p> <p><i>Valid Values:</i> Key the check date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(A 1/A 9/N 6,0) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Force Dsc	<p>This field displays only when the type of voucher is an INVOICE.</p> <p>Use this field to force a cash discount. This means that cash discounts will be assumed even if the cash discount date has passed when payment is made. This is the default for this voucher and may be overridden during Payment Selection Maintenance (MENU APCHCK).</p> <p>Key Y to force cash discounts. Cash discounts are taken regardless if the discount date has passed.</p> <p>Key N if you do not want to force a cash discount for vouchers in this voucher group. Cash discounts are not taken if the discount date has passed.</p> <p>Leave blank if you do not want to force a discount for this voucher. Discounts may be forced during Payment Selection (MENU APCHCK).</p> <p>(A 1) Optional</p>
FOB Desc	<p>This field displays the description of the FOB code on the Purchase Order, if you are performing receipt validation and there is only 1 PO for the voucher, or there are multiple POs but they all have the same FOB code</p> <p>If there are multiple POs with different FOB codes, or if you are entering miscellaneous vouchers (that is, you are not using receipt validation), then this field displays the description of the FOB code assigned to the vendor through Vendors Maintenance (MENU APFILE).</p> <p>Display</p>
Bus Unit	<p>This field appears only if you selected to use business units when selecting A/P Liability and Expense accounts or Purchase Tax Accounts for the G/L Interface through G/L Transfer Definition (MENU GLXFER sub-option T).</p> <p>This field is display-only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/ Services Tax field is set to Y through Tax Body Maintenance (MENU OEFIL2 or MENU ARFILE) for the tax body assigned to the vendor for whom the voucher is being created.</p> <p>Key the business unit to be used when posting to the A/P Liability, A/P Expense, and Purchase Tax Accounts for this voucher.</p> <p><i>Default Value:</i> If the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and this voucher is being created following receipt validation, the business unit keyed in the Business Unit field on the AP-PO Receipt Validation Screen (p. 4-39) appears in this field.</p> <p><i>Valid Values:</i> A business unit defined through Business Units Maintenance (MENU APFILE or MENU GLXFER).</p> <p>(A 2) Optional/Display</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
1099 Req	<p>Use this field to determine if a 1099 is required for this voucher.</p> <p>Key Y if a 1099 is required for this voucher.</p> <p>Key N if a 1099 is not required for this voucher.</p> <p><i>Default Value:</i> The value defined in Vendors Maintenance (MENU APFILE).</p> <p>(A 1) Optional</p>
Tax Id	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>This field is display-only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/Services Tax field is set to Y through Tax Body Maintenance (MENU OEFIL2 or MENU ARFILE) for the tax body assigned to the vendor or vendor/warehouse for whom the voucher is being created.</p> <p>Key the Tax ID or social security number for the vendor.</p> <p>Use this field to determine if a 1099 is required for this voucher.</p> <hr/> <p>NOTE: If you originally leave this field blank in the Vendor Master File, the Tax ID # will need to be keyed for every voucher transaction. At this point in the process, it will not fill in from the Vendor Master File.</p> <hr/> <p><i>Default Value:</i> The FED Tax ID specified for this vendor through Vendors Maintenance (MENU APFILE or MENU POFIL2). If the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and this voucher is being created following receipt validation, the ID keyed in the Federal Tax ID field on the AP-PO Receipt Validation Screen (p. 4-28).</p> <p>(A 15) Optional/Display</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
ID Tp	<p>Use this field to identify the Federal Tax ID Type.</p> <p>This field defines the type of taxpayer identification number the value in the Tax Id field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>Key 1 to print EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type.</p> <p>Key 2 to print SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type.</p> <p>Leave blank if the Federal Tax ID Type cannot be determined.</p> <p>When adding a new voucher, if there is an assignee defined on the vendor for this voucher, then the ID Type value from the assignee's vendor record will be defaulted in this field. If there is not an assignee defined on the vendor for this voucher, then the ID Type value from the vendor record will be defaulted in this field.</p> <p>When maintaining a voucher, the ID Type value in the AP Voucher Entry Header File (Federal Tax ID Type) will be defaulted in this field.</p> <p><i>Default Value:</i> See above if adding or maintaining a voucher.</p> <p><i>Valid Values:</i> blank, 1 or 2</p> <p>(A 1) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
1099 Cde	<p>This code represents the IRS 1099 amount type applicable to this voucher. A question mark list provides the available codes and their associated IRS 1099 amount types.</p> <p>This field will be consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. If the code representing Nonemployee Compensation is selected, this voucher's value will be included on the 1099-NEC form; if the code representing any other amount type is selected, this voucher's value will be included on the 1099-MISC form. If this field is blank, the code representing Nonemployee Compensation will be assumed.</p> <p>Key the 1099 code representing the applicable IRS 1099 amount type for this voucher.</p> <p><i>Default Value:</i> The value defined as the Dft 1099 Cde for the vendor (or assignee) in the AP Vendor Master File (APVEN), if any; if none, the Default 1099 Amount Cde value defined in Accounts Payable Company Options for the voucher's company (ORCTL), if any. If neither the vendor (or assignee) nor the AP Company Options record has a default code specified, this field will default to blank (if this field is blank, the code representing nonemployee compensation will be assumed).</p> <p><i>Valid Values:</i> Blank, or one of the values in the Order Control File (ORCTL) representing the valid IRS 1099 amount types (these values are presented when you key a ? in this field).</p> <p>(N 2,0) Optional</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Dft Exp	<p>For ordering invoices, the default will be the account number identified as the default expense account through the GL Transfer Definition (MENU GLXFER), Function A. For pre-receipt invoices, the default will be the account number identified as the Pre-Receipt Inventory Account through the GL Transfer Definition (MENU GLXFER), Function A.</p> <p>If you specify a default expense account, you do not need to key an account number for each voucher transaction on the Voucher Transaction Entry Screen (p. 4-101).</p> <hr/> <p>NOTE: The description for the account will not display if you are set up to be a restricted voucher entry user in Authority Profile Maintenance (MENU XASCTY).</p> <hr/> <p><i>Default Value:</i> The account defined in the G/L Transfer Definition (MENU GLXFER).</p> <p><i>Valid Values:</i> Any valid G/L Account Number (expense)</p> <p>(A 25) Optional</p>
AP Acct	<p>The accounts payable account that is credited upon posting this voucher.</p> <hr/> <p>NOTE: The description for the account will not display if you are set up to be a restricted voucher entry user in Authority Profile Maintenance (MENU XASCTY).</p> <hr/> <p><i>Default Value:</i> Account defined in the G/L Transfer Definition (MENU GLXFER).</p> <p><i>Valid Values:</i> Any valid G/L Account Number (liability) that is not a distribution account.</p> <p>(A 25) Required</p>
CD Acct	<p>The cash discount that is credited when posting this voucher if a discount is taken.</p> <hr/> <p>NOTE: The description for the account will not display if you are set up to be a restricted voucher entry user in Authority Profile Maintenance (MENU XASCTY).</p> <hr/> <p><i>Default Value:</i> The account defined in the G/L Transfer Definition (MENU GLXFER).</p> <p><i>Valid Values:</i> Any valid G/L Account Number (income) that is not a distribution account</p> <p>(A 25) Required, if Csh Dsc %</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
F10=End Voucher	<p>The F10=END VOUCHER function key displays only when in Add or Change voucher modes.</p> <p>Press F10=END VOUCHER instead of ENTER to create a voucher for the invoice amount and the default expense account keyed on this screen. The Voucher Transaction Entry Screen (p. 4-101) will not be shown.</p> <p>If Check for duplicate invoices = I, D, or B in AP Options Maintenance (MENU APFIL2), pressing F10=END VOUCHER will activate the interactive check for duplicate invoices. This process checks the Voucher Header File, the Open Payables File, and the History Payables File for duplicate invoices based on the criteria specified in the company options. When International Currency is installed, if the vendor is a foreign currency vendor, this process will check the IC Voucher Entry Header Extension File, the IC Open Payables Header Extension File, and the IC Payables History Extension File for duplicates based on the criteria specified in the company options. This process will run every time you add a voucher. When you change a voucher, it will only run if you change the invoice number, invoice amount, or invoice date.</p> <p>If the voucher is a split terms voucher, the check for duplicate invoices process will run only if the invoice number or invoice date field have been changed. In this situation, this process will also check the split terms code.</p> <p>If a duplicate invoice is found, a warning message will appear on this screen with information about the location of the duplicate. You can proceed with entering or changing the voucher by pressing ENTER or F10=END VOUCHER. The Voucher Transaction Entry Screen (p. 4-101) or the End Voucher Entry Screen (p. 4-117) will appear. If you do not want to continue creating the voucher, press F12=RETURN to cancel it.</p> <p>If there are no duplicate invoices or if Check for duplicate invoices is N in AP Options Maintenance (MENU APFIL2), the End Voucher Entry Screen (p. 4-117) will appear.</p> <p>If the vendor has a GST tax body assigned, the GST Tax Information Screen (p. 4-98) displays.</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
F12=Cancel	<p>When adding a voucher, press F12=CANCEL to cancel entries made for this voucher. The Voucher Entry Selection Screen (p. 4-8) or the 1099 Code Maintenance Screen (p. 58-2) will appear, depending upon how you arrived at this screen.</p> <p>If you are performing drop ship receipt validation processing and the vouchers have just been created, when you press F12=CANCEL the drop ship voucher and the charge back voucher, if there is one, will be cancelled and the receipt information that you entered will be saved.</p> <p>The saved receipt group name will be created by using your two-character workstation ID and appending a three-digit sequence number starting with 501. The sequence number will be incremented until a unique receipt group name is found. This saved receipt group will no longer be linked with a voucher and may therefore be processed as a normal receipt group. If desired however, the receipts may again be associated with a voucher by selecting the drop ship receipt validation process again and re-keying the same purchase order numbers.</p>
F15=IC Info	<p>F15=IC INFO only displays when International Currency is installed and if the vendor's trading currency is different from the local currency.</p> <p>Press F15=IC INFO to access data pertaining to the vendor's currency, where you may enter or change the vendor's default exchange code, override the vendor's default exchange rate, enter a lock date for the exchange rate, or specify a currency contract to be used for the transaction. The I/C Currency Information Window will appear. This is a shared screen and is described in the International Currency User Guide.</p>
F24=Delete	<p>The F24=DELETE function key displays only when in voucher delete mode.</p> <p>Press F24=DELETE to delete this voucher. The Voucher Entry Selection Screen (p. 4-8) will appear.</p>

Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Enter	<p>Press ENTER to confirm your selections.</p> <p>If you keyed an Assignee vendor number, the Payee name, address, and telephone fields are updated to reflect the values from that vendor number.</p> <p>If Check for duplicate invoices is set to I, D, or B in AP Options Maintenance (MENU APFIL2), pressing ENTER will activate the interactive check for duplicate invoices. This process checks the Voucher Header File, the Open Payables File, and the History Payables File for duplicate invoices based on the criteria specified in the company options. If the vendor is a foreign currency vendor, this process will check the IC Voucher Entry Header Extension File, the IC Open Payables Header Extension File, and the IC Payables History Extension File for duplicates based on the criteria specified in the company options. This process will run every time you add a voucher. When you change a voucher, it will only run if you change the invoice number, invoice amount, or invoice date.</p> <p>If the voucher is a split terms voucher, the check for duplicate invoices process will run only if the invoice number or invoice date field have been changed. In this situation, this process will also check the split terms code.</p> <p>If a duplicate invoice is found, a warning message will appear on this screen with information about the location of the duplicate. You can proceed with entering or changing the voucher by pressing ENTER or F10=CONTINUE. The Voucher Transaction Entry Screen (p. 4-101) or the End End Voucher Entry Screen (p. 4-117) will appear. If you do not want to continue creating the voucher, press F12=RETURN to cancel it.</p> <p>If there are no duplicate invoices or if Check for duplicate invoices is set to N in AP Options Maintenance (MENU APFIL2), the Voucher Transaction Entry Screen (p. 4-101) or the 1099 Code Maintenance Screen (p. 58-2) will appear, depending upon how you arrived at this screen.</p> <p>If you have left the Split Terms Code field blank, this screen will redisplay as normal (without split terms) and split terms will not be allowed on the voucher being processed.</p>

GST Tax Information Screen

<u>TAX INFORMATION</u>		
Invoice Amount:	1200.00	CA\$
Credited Taxable Amount:	- 1200.00	CA\$
Non-Credited Taxable Amount:	CA\$
Tax Rate:	5.000	%
Credited Tax Amount:	57.14	CA\$
Non-Credited Tax Amount:		CA\$

F10=Override F12=Return

This screen appears after you press F10=END VOUCHER on the Voucher Header Screen (p. 4-80) if

- you are entering a new miscellaneous voucher for a vendor with a tax body that is defined to calculate GST
- system options (MENU XAFILE) are set to use GST
- accounts payable options (MENU APFIL2) are set to calculate GST for purchases.

This screen displays the invoice amount, taxable amounts, tax rate, and the calculated tax amounts. The tax amount is calculated as: **Taxable Amount x Tax Factor**.

The tax factor is calculated as: **$1000 \times (\text{Tax Rate}/100) / (1000 + (1000 \times \text{Tax Rate}/100))$**

For example, if you have a taxable amount of \$100 on an invoice and a GST tax rate of 5.000, the tax factor will be: **$1000 \times (5.000/100) / (1000 + (1000 \times (5.000/100)))$** or .047619, and the GST tax amount will be **$\$100 \times .047619$** or \$4.76. The system uses the credited taxable amount to calculate the credited tax amount and the non-credited taxable amount to calculate the non-credit tax amount.

You can accept the taxable amounts and the calculated tax amounts, enter new taxable amounts, or override the calculation and enter the tax amounts.

This screen displays one time from the Voucher Header Screen (p. 4-80) and will not display if expense lines were manually added to the voucher.

NOTE: If you are using International Currency, the values on this screen are in the vendor's currency.

GST Tax Information Screen Fields and Function Keys

Field/Function Key	Description
Invoice Amount:	The invoice amount specified on the Voucher Header Screen (p. 4-80) displays in this field. Display
Credited Taxable Amount	The amount used to calculate the tax amount for which you can claim credit. To change the credited taxable amount, enter the new value in this field. <i>Default Value:</i> The invoice amount specified on the Voucher Header Screen (p. 4-80). (N 15,2) Required/Display
Non-Credited Taxable Amount	The amount used to calculate the tax amount for which you cannot claim credit. To change the non-credited tax amount, enter the new value in this field. (N 15,2) Required/Display
GST Tax Rate	The current base rate specified for the tax body defined through Tax Body Maintenance (MENU OEFIELD) assigned to the vendor through Vendors Maintenance (MENU POFIELD). Display
Credited Tax Amount	The GST amount for which you can claim credit. This amount posts to the Credited Purchase Tax Account in General Ledger. Press F10=OVERRIDE to override the amount in this field and then key a new credited tax amount. Key 0 if the voucher is not eligible for a credited tax amount. To remove the override amount and have the system calculate the amount, press F5=REFRESH. <i>Default Value:</i> The amount calculated by the system using the credited taxable amount and tax factor. <i>Valid Values:</i> For a positive invoice amount, a positive value where the sum of this field and the Non-Credited Tax Amount field is less than the invoice amount. For a negative invoice amount, a negative value where the sum of this field and the Non-Credited Tax Amount field is greater than the invoice amount. (N 15,2) Required/Display

GST Tax Information Screen Fields and Function Keys

Field/Function Key	Description
Non-Credited Tax Amount	<p>The GST amount for which you cannot claim credit. This amount posts to the Non-Credited Purchase Tax Account in General Ledger.</p> <p>Press F10=OVERRIDE to override the amount in this field and then key the override non-credited tax amount. Key 0 if the voucher is not eligible for a non-credited tax amount.</p> <p>To remove the override amount and have the system calculate the amount, press F5=REFRESH.</p> <p><i>Default Value:</i> The amount calculated by the system using the non-credited taxable amount and tax factor.</p> <p><i>Valid Values:</i> For a positive invoice amount, a positive value where the sum of the this field and the Credited Tax Amount field is less than the invoice amount. For a negative invoice amount, a negative value where the sum of the this field and the Credited Tax Amount field is greater than the invoice amount.</p> <p>(N 15,2) Required/Display</p>
F5=Refresh	<p>The F5=REFRESH function key appears after you press the F10=OVERRIDE function key to override the tax amounts.</p> <p>Press F5=REFRESH if you want to revert to the calculated tax amounts. The system will recalculate the tax, the Credited Tax Amount and Non-Credited Tax Amount fields will display the calculated values, and the Credited Taxable Amount and Non-Credited Taxable Amount fields become available.</p>
F10=Override	<p>Press F10=OVERRIDE to override the values in the Credited Tax Amount and Non-Credited Tax Amount fields. When you press F10=OVERRIDE, those fields become available and this function key no longer appears.</p>
F12=Return	<p>Press F12=RETURN to return to the previous screen.</p>
Enter	<p>Press ENTER to confirm the GST tax amounts. If either tax amount is a value other than zero, the system creates a transaction for the Credited and/or Non-Credited Purchase Tax Accounts for the tax amounts. However, if the Purchase Tax Accounts are not defined, not active, or you are not authorized to them, no transaction will be created. The End Voucher Entry Screen (p. 4-117) appears.</p>

This screen appears after you press **ENTER** from the Voucher Header Screen (p. 4-80). Use this screen to add, change, or delete voucher transactions for the current voucher in the selected voucher group.

This screen is a split display. The top half displays the individual voucher transactions that have been entered. The bottom half is used to enter or update voucher transactions. You also may display the Insert Transaction Screen (p. 4-110) and Voucher Transaction Review Screen (p. 4-113).

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
Co/Voucher	The company number and voucher number for this voucher. Display
Csh Dsc	The cash discount amount associated with this vendor. This discount percent is displayed if one has been specified on the Voucher Header Screen (p. 4-80). Display
Ctl	The control value specified on the Voucher Header Screen (p. 4-80) as the invoice amount. The total of all voucher transactions must equal this amount to ensure that the voucher is not in error. Display
Vendor Number/Name	The number and name of the vendor/assignee for whom this voucher transaction is being entered. Display

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
Inv	The invoice amount calculated for this voucher. This value is calculated from the voucher transactions keyed on this screen. Display
(Currency)	This field only displays when International Currency is installed. This field displays the description of the vendor's trading currency when the toggle key displays as F11=LOCAL CURR. Display
Reference Number	The reference number of the detail transaction. Use this to determine which function key should be pressed to change or delete a transaction. Display
Account/Trns Desc	The expense account number and transaction description for the account updated with this voucher transaction. Up to 38 characters of the combined account number and transaction description, and up to 8 transactions for the current voucher are displayed in the top half of the screen. NOTE: The description for the account will not display if you are set up to be a restricted voucher entry user in Authority Profile Maintenance (MENU XASCTY). Press F2 to display the following: <ul style="list-style-type: none"> F2=ACCT/DESC - the Account number/account description F2=DESC ONLY - the Account description only F2=TR DESC ONLY - the Transaction description only F2=ACCT/TR DESC - the Account number/transaction description Display
Amount	The amount debited/credited to the specified expense account in the voucher transaction. Display
D/C	Indicates if the expense account is debited or credited. D displays if the amount specified is debited to the selected expense account. C displays if the amount specified is credited to the selected expense account. Display
PO No	The number of the purchase order issued when placing the order for this voucher. If a purchase order number was entered on the Voucher Header Screen (p. 4-80), this field displays that value. Display
Line	The line number of the voucher transaction. The line number indicates the sequence of this voucher transaction. Display

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
D/C	<p>Used to indicate if the expense account is debited or credited. If this code is left blank, the system will use the normal balance of the account.</p> <p><i>Default Value:</i> If left blank, the normal balance of the account is assumed as the default</p> <p><i>Valid Values:</i> D, C, or blank</p> <p>(A 1) Optional</p>
Co	<p>The company to which this voucher transaction is applied.</p> <p>Display</p>
Account Number	<p>An account number may be entered in one of two ways:</p> <ol style="list-style-type: none"> Enter the entire account number using the Data Entry Separator (usually a period) to separate segments. Leading zeros for any segment do not need to be keyed. For example, to enter account number 001.0002.0003.00000004, key 1.2.3.4. After you press ENTER, the screen will display the following: 001.0002.0003.00000004 <hr/> <p>NOTE: If you are unsure of the number of segments and size of each segment in your G/L account number, use the heading above the account number for reference as it is sized to the field length.</p> <hr/> <ol style="list-style-type: none"> Enter the short name for the account. For example, if the short name for the Division 1 Phone Expense Account is PHON1, then key the following: PHON1 <p><i>Default Value:</i> If left blank, the default expense account (Dft Exp) specified on the Voucher Header Screen (p. 4-80).</p> <p><i>Valid Values:</i> Any valid account number or short name. You cannot leave this field blank (the default will be used). The number of digits in the segment cannot exceed the segment length. The value of a segment cannot be 0 (zero) and cannot contain embedded blanks.</p> <p>When G/L Options - Company Options Maintenance (MENU GLFIL2) are set to use either Account Security by Level or Account Security by User Group, this account will be edited based on your General Ledger Options: Security Levels (1-9) setup in Authority Profile Maintenance (MENU XASCTY).</p> <p>(N 25,0) Required</p>

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
Amount	<p>This is the amount of the debit or credit to the specified expense account.</p> <p>Key the invoice input dollar amount. If you do not key a decimal point, the system assumes whole dollars. Therefore, you must key a decimal point to distinguish between dollars and cents. The system will transpose the amount keyed, for example:</p> <ul style="list-style-type: none"> • To enter an amount of \$5000.00, key: 5000 • To enter an amount of \$100.00, key: 100 • To enter an amount of \$50.00, key: 50 • To enter an amount of \$50.25, key: 50.25 <p>Even if no decimal was keyed, the amount value will still display in decimal format on the Voucher Transaction Review Screen (p. 4-113).</p> <p>When International Currency is installed, this field is entered in the vendor's trading currency. The symbol for the vendor's currency will display to the right of the amount, and the local currency amount will display below this amount with the local currency symbol displayed to the right after you press ENTER.</p> <hr/> <p>NOTE: The amount in the upper portion of this screen may be displayed in both the trading and local currency with the use of the F11=LOCAL CURR / F11=TRADING CURR function key.</p> <hr/> <p>(N 15,2) Required</p>
Desc	<p>A description of the voucher transaction.</p> <p>(A 15) Optional</p>
Csh Dsc	<p>Used when a cash discount is applicable for specific voucher transactions. If you do not key a value in this field, Y is assumed if a cash discount exists for this voucher.</p> <p>Key Y if a cash discount is used in this voucher transaction.</p> <p>Key N if a cash discount is not used in this voucher transaction.</p> <p><i>Valid Values:</i> Y, N or blank</p> <p>(A 1) Optional</p>
Csh Dsc %	<p>The cash discount percent for this voucher transaction. A cash discount percent is applicable only if a Y is keyed in the Csh Dsc field. Otherwise, this field must be zero.</p> <p>If you do not key a value in this field, the value keyed on the Voucher Header Screen (p. 4-80) is assumed.</p> <p><i>Valid Values:</i> Zero or any number up to 99.999 if Csh Dsc is Y</p> <p>(N 5,3) Optional</p>

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
Project	<p>The project associated with this voucher transaction. May be used for job accounting.</p> <p>If you do not key a value in this field, the value keyed on the Voucher Header Screen (p. 4-80), if any, is assumed.</p> <p>(A 10) Optional</p>
PO No.	<p>The number of the purchase order which was issued when placing the original order for which the expense is being recorded with this voucher transaction. For pre-receipt invoices, you indicate in the PO/Rcvr field whether the number you are entering is a purchase order number or receiver number.</p> <p>If you do not key a value in this field, the value keyed on the Voucher Header Screen (p. 4-80) is assumed.</p> <p>(A 25) Optional</p>
PO/Rcvr	<hr/> <p>NOTE: This field displays only for pre-receipt invoices (where the Type field is P).</p> <hr/> <p>Use this field when entering transactions in a pre-receipt invoice to indicate whether the number entered in the PO No. field is a purchase order or receiver number. If the Validate field has a value of Y, the PO or receiver number will be used to match the receipt transaction to this pre-receipt invoice.</p> <p>Leave this field blank if you do not want to retain pre-receipt invoice information for future validation. The Validate field requires a value of N.</p> <p>Key P if the number entered in the PO No. field is a PO number and you want to retain pre-receipt invoice information for future validation. The Validate field requires a value of Y.</p> <p>Key R if the number entered in the PO No. field is a receiver number and you want to retain pre-receipt invoice information for future validation. The Validate field requires a value of Y.</p> <hr/> <p>NOTE: If this field is P or R, and the Validate field is Y, a PO number or receiver number is required in the PO No. field on this screen.</p> <hr/> <p><i>Valid Values:</i> Blank, P or R</p> <p>(A 1) Blank/Required</p>

Voucher Transaction Entry Screen Fields and Function Keys

Field/Function Key	Description
Validate	<p>NOTE: This field displays only for pre-receipt invoices (Type is P).</p> <p>This field determines whether or not pre-receipt invoice information will be retained for future validation. If you select to retain information, a general ledger group will be generated to credit the Pre-Receipt Inventory Account and debit the Purchases Clearing Account.</p> <p>Accept the default of Y to retain invoice information.</p> <p>Key N if you do not want to retain invoice information for future validation.</p> <p>NOTE: If this field is Y and the PO/Rcvr field is P or R, a PO number or receiver is required in the PO No. field on this screen.</p> <p><i>Default Value: Y</i></p> <p>(A 1) Required</p>
User Area	<p>Used to key additional information regarding this voucher transaction.</p> <p>If you do not key a value in this field, the value keyed on the Voucher Header Screen (p. 4-80) is assumed.</p> <p>(A 10) Optional</p>
Find	<p>NOTE: This field will not display if you are set up to be an Accounts Payable Options: Restrict Voucher Entry user in Authority Profile Maintenance (MENU XASCTY).</p> <p>Search words help you to find accounts without knowing the account number.</p> <p>Key in a partial or complete account description and press ENTER. If search words are keyed when segment defaults are active, the search routine will automatically construct a mask to further limit the number of accounts displayed by the search.</p> <p>A list of G/L Accounts whose descriptions contain the keyed text is displayed. When G/L Options - Company Options Maintenance (MENU GLFIL2) are set to use either Account Security by Level or Account Security by User Group, this list will be edited based on your General Ledger Options: Security Levels (1-9) setup in Authority Profile Maintenance (MENU XASCTY).</p> <p>(A 40) Optional</p>

Voucher Transaction Entry Screen Fields and Function Keys

This screen appears after you press **F9=DROP SHIP RCPT** in the Voucher Entry Selection Screen (p. 4-8). Use this screen to enter invoice data regarding a drop shipment purchase order that was placed with the vendor.

Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Company	The company number selected on the Voucher Entry Selection Screen (p. 4-8). Display
Vendor	The number and name of the vendor for whom this voucher has been created. Display
Currency	This field only displays when International Currency is installed and only for those vendors whose trading currencies differ from the company's local currency. This field displays the currency code and description for the trading currency, if the vendor's currency differs from the company's local currency. Display

Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
PO Number	<p>Key the number of the drop ship purchase order for which the invoice has been received. To search for a purchase order, use the F4=D/S PO LIST function key.</p> <p><i>Valid Values:</i> Any valid purchase order that was created with the Drop Ship field set to Y on the Requisition Header Screen (MENU POMAIN).</p> <p>(A 6) Required</p>
Invoice Amt	<p>Key the amount of the invoice from this vendor for the drop shipment. This amount signifies the amount for the specified purchase order only.</p> <p>The amount entered in this field will be carried forward and displayed in the Inv Amt field on the Voucher Header Screen (p. 4-80) when creating the voucher to pay the vendor for the drop shipment.</p> <p>When International Currency is installed, enter the invoice amount for the drop ship receipt in the vendor's currency. The currency symbol for the trading currency will display to the right of the amount. The local currency equivalent displays only after entering an amount in the Invoice Amt field and pressing ENTER. The company's local currency symbol will display to the right of the equivalent value.</p> <p>Key the appropriate invoice amount.</p> <p>(N 15,5) Required</p>
Invoice No	<p>Key the invoice number of the invoice from this vendor for the drop shipment.</p> <p>The number entered in this field will be carried forward and displayed in the Inv No field on the Voucher Header Screen (p. 4-80) when creating the voucher to pay the vendor for the drop shipment. The number entered in this field will also be carried forward and displayed as part of the description in the Inv Desc field on the Voucher Header Screen (p. 4-80) when creating the charge back voucher to the vendor for the drop shipment, (i.e., the description will read C/B FOR; followed by the invoice number).</p> <p>(A 15) Required</p>
Invoice Date	<p>Key the date of the invoice from this vendor for the drop shipment.</p> <p>The date entered in this field will be carried forward and displayed in the Inv Date field on the Voucher Header Screen (p. 4-80) when creating the voucher to pay the vendor for the drop shipment. This date will also be carried forward and displayed in the Inv Date field on the Voucher Header Screen (p. 4-80) when creating the charge back voucher to the vendor for the drop shipment.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>

Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Invoice Desc	<p>Key a description of the invoice from this vendor for the drop shipment. If entered, the description entered in this field will be carried forward and displayed in the Inv Desc field on the Voucher Header Screen (p. 4-80) when creating the voucher to pay the vendor for the drop shipment.</p> <p>(A 25) Optional</p>
F4=D/S PO List	<p>If you do not know the purchase order number, press the F4=D/S PO LIST function key to display a list of drop shipment purchase orders for the company and vendor. The Drop Ship PO List Screen (p. 4-132) appears.</p>
F12=Return	<p>Press the F12=RETURN key to return to the Voucher Entry Selection Screen (p. 4-8).</p>
Enter	<p>Press the ENTER key to confirm your selections. The PO Header Screen (MENU POMAIN) will appear to allow entry of purchase order drop ship receipt information.</p> <p>If the PO that you keyed in the PO Number field is already in a PO receipt group, and that group is not in use, then that PO information will be removed from that group and placed in a new Accounts Payable drop ship receipt validation group. If this causes the original PO receipt group to now be empty, it will be deleted. The group ID assigned to the new Accounts Payable drop ship receipt validation group will be created by using your two-character workstation ID and appending a three-digit sequence number starting with 001. The sequence number will be incremented until a unique receipt group name is found.</p> <p>If this is not the first drop ship purchase order that you have identified for this Accounts Payable receipt group, then the new purchase order will be brought into the already created/opened group, unless it has a different warehouse (i.e., a voucher group may be affiliated with as many Accounts Payable drop ship receipt validation groups as you have warehouses identified on the purchase order selected).</p>

Co:	01	Vendor:	100	SHARP INTERNATIONAL		
<u>PO Num</u>	<u>WH</u>	<u>PO Due Dt</u>	<u>Order</u>	<u>Customer Name</u>	<u>Items</u>	<u>PO Value US\$</u>
1	100175	1 8/11/09			2	1586.84
Selection: _ .						Last
F2=Req No		F4=PO Ord Dt		F6=Customer No		F11=Trd Currency
						F12=Return

This screen appears after you press F4=D/S PO LIST on the Drop Ship Receipt Validation Screen (p. 4-129). Use this screen to select the purchase order you want to associate with the invoice being processed.

For each purchase order, this screen displays the

- number of the purchase order or the requisition, depending on your selection with the F2=REQ No / F2=PO NUM function key.
- warehouse.
- purchase order due date or order date, depending on your selection with the F4=PO DUE DT / F4=PO ORD DT function key.
- number of the sales order associated with the purchase order.
- name or number of the customer, depending on your selection with the F6=CUSTOMER NAME / F6=CUSTOMER NO function key.
- number of items on the purchase order.
- total value of the purchase order. If you are using International Currency, you can display this value in either the company's local currency or the vendor's trading currency, depending on your selection with the F11=TRD CURRENCY / F11=LCL CURRENCY function key.

NOTE: All dates will display in the **Default Date Format** for this user, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, the date using the system's **Default Date Format** specified through System Options Maintenance (MENU XAFIILE).

Drop Ship PO List Screen Fields and Function Keys

Field/Function Key	Description
Co	The company number associated with the purchase order. Display
Vendor	The vendor number and name where the items were ordered. Display
(Reference Number)	The reference number of the detail transaction. Use this to determine which function key should be pressed to select a purchase order for processing. Display
PO Num / Req No	Use the F2=REQ No / F2=PO NUM function key to toggle this field between the PO number assigned when the purchase order was printed and the requisition number assigned when the requisition was created. Display
WH	The warehouse from which the items were ordered. Display
PO Due Dt / PO Ord Dt	Use the F4=PO DUE DT / F4=PO ORD DT function key to toggle this field between the date the items are due to be delivered to the ordering customer location or the date the purchase order was created. Display
Order	The sales order number for the customer's order. Display
Customer Name / Customer No	Use the F6=CUSTOMER NAME / F6=CUSTOMER NO function key to toggle this field between the name of the customer placing the sales order and the customer number. Display
Items	The number of drop ship items on the purchase order. Display
PO Value	The value of the drop ship items on the purchase order. Display
Selection	Key the reference number for a purchase order in this field to select the associated purchase order for drop ship receipt validation processing. (N 2,0) Optional
F2=Req No / F2=PO Num	Press the F2=REQ No / F2=PO NUM function key to toggle between displaying either the purchase order number or the requisition number.
F4=PO Due Dt / F4=PO Ord Dt	Press the F4=PO DUE DT / F4=PO ORD DT function key to toggle between displaying either the purchase order due date or order date.

Drop Ship PO List Screen Fields and Function Keys

Field/Function Key	Description
F6=Customer Name/ F6=Customer No	Press the F6=CUSTOMER NAME / F6=CUSTOMER NO function key to toggle between displaying either the name of the customer or the number of the customer.
F11=Trd Currency / F11=Lcl Currency	The F11=TRD CURRENCY / F11=LCL CURRENCY function key appears only if International Currency is installed and activated. Press the F11=TRD CURRENCY / F11=LCL CURRENCY function key to display the purchase order value in either the company's local currency or the trading currency. The local currency symbol displays at the column heading.
F12=Return	Press the F12=RETURN function key to return to the previous screen without making a selection.
Enter	After you enter a reference number in the Selection field, press the ENTER key to confirm your entry and return to the Drop Ship Receipt Validation Screen (p. 4-129).

End Drop Ship Receipt Validation Screen

```

                END DROP SHIP RECEIPT VALIDATION
Company:        1      A & C Office Supply
Vendor:        IC3000 SAUERKRAUT PRODUCTS
Currency:      GDM    German Deutschemark

Invoice Amt:           1,000.00   DM#
Receipts:              48.79
Misc Chgs:             .00   <-- Adjust: _.....
Voucher Amt:          _____ 48.79

Charge Back:           951.21

                F11=Local Curr   F12=Return   F13=Create Charge Back Voucher
    
```

This screen appears after you press F13=CRT VCH on the End Receipts Screen of Enter or Change Receivers or PO Receipts (MENU POMAIN) if there is a difference between the invoice amount and the receipt amount. Use this screen to rectify this difference and to create the voucher to pay this vendor for the drop shipment.

The difference may be rectified in one of the following ways:

- Correct any mistakes by returning to the purchase order receipt screens as described through Enter or Change Receivers or PO Receipts (MENU POMAIN) or the Drop Ship Receipt Validation Screen (p. 4-129).
- Key adjusting values to affect the miscellaneous charges.
- Create a charge back voucher to the vendor which will appear as a negative open payable.

End Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Co	The company number associated with the purchase order. Display
Vendor	The vendor number and name where the items were ordered. Display

End Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Currency	<p>This field only displays when International Currency is installed and only for those vendors whose trading currencies differ from the company's local currency.</p> <p>This field displays the currency code and description for the trading currency, if the vendor's currency differs from the company's local currency.</p> <p>Display</p>
Invoice Amt	<p>This field displays the amount of the invoice from this vendor that you keyed on the Drop Ship Receipt Validation Screen (p. 4-129).</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display the invoice amount for the drop ship receipt in the vendor's trading currency (with the trading currency symbol displayed to the right) or in the company's local currency (with the local currency symbol displayed to the right).</p> <p>Display</p>
Receipts	<p>This field displays the total value of the received purchase order from this vendor.</p> <p>Display</p>
Misc Chgs	<p>This field displays the total amount of miscellaneous charges (i.e., non-item charges such as sales tax) for this voucher. You may change this amount by using the Adjust field.</p> <p>Display</p>
Adjust	<p>Use this field to change the amount in the Misc Chgs field. The amount keyed here will be added to (for positive adjustments) or subtracted from (for negative adjustments) the Misc Chgs field.</p> <p>Key the amount to adjust the miscellaneous charges.</p> <hr/> <p>NOTE: In order to create your drop ship receipt validation voucher, there must be no difference between the Invoice Amt and the Receipts amount that has not been identified as a miscellaneous charge, or as the charge back amount.</p> <hr/> <p>When International Currency is installed, this field will not display if the vendor you selected uses a trading currency different from the company's local currency and you selected to display local equivalent values by pressing the F11=LOCAL CURR / F11=TRADING CURR function key.</p> <p>(N 15,2) Optional</p>

End Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
Voucher Amt	<p>This field displays a working sum of the Receipts and Misc Chgs fields. The amount displayed in this field will be the net amount of the voucher that you are creating for this vendor.</p> <p>If you make the Voucher Amt equal to the Invoice Amt, the Charge Back No. field and the F13=CREATE CHARGE BACK VOUCHER function key will be cleared from this screen.</p> <p>Display</p>
Charge Back	<p>This field displays the difference between the Invoice Amt and the Voucher Amt fields. This amount will be charged back to the vendor unless the Adjust field is used to change the Misc Chgs field such that the difference no longer exists.</p> <p>If the variance between the invoice amount and the voucher amount exceeds the Cost Variance Warning Percent or Cost Variance Warning Value set up through Purchasing Options Maintenance (MENU XAFILE) and there is a PO-AP Hold Code set up in Purchasing Options Maintenance, the voucher will be put on hold automatically unless the amount is charged back to the vendor. If there is a variance, and you use the Adjust field to account for the difference, the voucher will go on hold.</p> <p>Display</p>
Charge Back No	<p>NOTE: This field will not appear if the Voucher Amt equals the Invoice Amt.</p> <p>The value keyed in this field will be used as the invoice number of the charge back voucher.</p> <p>(A15) Required</p>
F11=Local Curr/ Trading Curr	<p>This key only displays when International Currency is installed and only if the trading currency of the vendor whose receipts you are validating is different from the company's local currency.</p> <p>Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying the invoice, receipts, miscellaneous charges, voucher and charge back amounts in the company's local currency and displaying these amounts in the vendor's trading currency.</p> <p>Press F11=LOCAL CURR to display amounts in the company's local currency. The symbol for the company's local currency will appear to the right of the Invoice Amt field. The Adjust field will also be cleared from the display.</p> <p>Press F11=TRADING CURR to display amounts in the vendor's trading currency. The symbol for the vendor's currency will appear to the right of the Invoice Amt field. The Adjust field will also redisplay.</p>
F12=Return	<p>Press the F12=RETURN function key to return to the PO Header Screen (MENU POMAIN) without creating the voucher.</p>

End Drop Ship Receipt Validation Screen Fields and Function Keys

Field/Function Key	Description
F13=Create Charge Back Voucher	<p>If the F13=CREATE CHARGE BACK VOUCHER key is displayed, then the Voucher Amt does not match the Invoice Amt. Two vouchers will be created when you press the F13=CREATE CHARGE BACK VOUCHER key. One voucher will be created for the Invoice Amt and a second voucher will be created for the Charge Back amount. The charge back voucher will use the number keyed in the Charge Back No. field as its invoice number.</p> <p>If the Check for duplicate invoices field is set to I, D, or B in AP Options Maintenance (MENU APFIL2), pressing the F13=CREATE CHARGE BACK VOUCHER function key to create a charge back voucher will activate the interactive check for duplicate invoices. This process checks the Voucher Header File, the Open Payables File, and the History Payables File for duplicate invoices based on the criteria specified in the company options.</p> <p>If a duplicate invoice is found, a warning message will appear on this screen with information about the location of the duplicate. You can proceed with entering or changing the charge back voucher by pressing ENTER or F13=CREATE CHARGE BACK VOUCHER. The Voucher Header Screen (p. 4-80) will appear. If you do not want to continue creating the voucher, press F12=RETURN to cancel it.</p> <p>If there are no duplicate invoices or if Check for duplicate invoices is set to N in AP Options Maintenance (MENU APFIL2), the Voucher Header Screen (p. 4-80) will appear for the original voucher. The charge back voucher will already have been automatically created and may be viewed/maintained by selecting it from the Voucher Search (List) Screen (p. 4-16).</p>
Enter	<p>If the F13=CREATE CHARGE BACK VOUCHER function key is displayed, press the ENTER key to add or subtract the Adjust amount to the Misc Chgs amount and clear the Adjust field.</p> <p>If the F13=CREATE CHARGE BACK VOUCHER function key is not displayed, then the Voucher Amt matches the Invoice Amt. Press the ENTER key to create one voucher for this vendor. The Voucher Header Screen (p. 4-80) will appear.</p>

A voucher group template is a voucher group which has been defined specifically for the purpose of copying when processing a new voucher group. Voucher group templates are defined in Voucher Entry (MENU APMAIN) by keying **T** (for template) in the **Group Type** field on the Voucher Group Information Screen (p. 4-13). The voucher group template will then be available to be copied to a new voucher group when needed.

Use this option to copy a voucher group template to a new voucher group.

The new voucher group to which the template group has been copied to may be modified, edited, and posted (template groups cannot be posted). After editing through Voucher Edit List (MENU APMAIN), proceed with posting the voucher group in the typical manner through Post Vouchers (MENU APMAIN).

Template groups are useful for those voucher entries which are standard or recurring. Standard entries are routine transactions for which the dollar amounts are unknown; recurring entries are those routine entries for which the dollar amounts are known (such as rent or utility payments). In either case, the use of a voucher template spares you from having to key new vouchers in a voucher group each time.

Create Vouchers From Templates

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Copy Vouchers from Template Group Screen	Use to add or change a template group of vouchers.
Create Vouchers From Template Screen	Use to define the new voucher group.

When To Run This Option

Run this option when processing a voucher group for which a template has been defined. The template may be similar or identical to the group of vouchers to be processed. You may add, delete, or change as many voucher transactions and/or vouchers in the new voucher group as needed.

If a voucher group template does not exist, create the voucher group template through Voucher Entry (MENU APMAN).

Voucher	Line	Vendor	Div-Account-Sub	01-A & C Office Supply Group-TUESD Tuesday		
			Entered Inv Amt	Calc Inv Amt	Voucher Ref	Check # Error
504	1	1400	001-0004600-000	INVALID #		INVALID TRANSACTION ACCOUNT NUMBER

This report prints errors associated with vouchers in the selected voucher group. This report is always printed through this option, and Post Vouchers (MENU APMAIN). The G/L Account description field will not display if you are set up to be an **Accounts Payable Options: Restrict Voucher Entry** user in Authority Profile Maintenance (MENU XASCTY).

A/P Voucher Error List

Report/Listing Fields	Description
Group Type	The type of voucher group. The group type is <i>Voucher</i> or <i>Template</i> .
Posting Date	The posting date for this voucher group.
Voucher	The number of the voucher which is in error.
Line	The line number of the voucher transaction which is in error. A number is printed in this column only if the error applies to an individual voucher transaction. If an error applies to an entire voucher, this column is blank.
Vendor	The vendor number associated with this voucher. If an assignee is used, this is the number of the assignee.
G/L Account Number	This is the number of the G/L account in a voucher transaction which is in error. An account number is printed only if the voucher transaction is in error. If an error applies to the entire voucher, the account number is not printed.
Calc Inv Amt	The calculated invoice amount for this voucher. This value is calculated based on the debit and credit voucher transactions made for this voucher. A value is printed in this column if an error applies to a voucher, not a voucher transaction.
Entered Inv Amt	The amount entered as the invoice amount for this voucher on the Voucher Transaction Entry Screen (p. 4-101). A value is printed in this column if an error applies to a voucher, not a voucher transaction.

A/P Voucher Error List

Report/Listing Fields	Description
Voucher Ref	The voucher for which a debit or credit memo has been issued. This column is blank unless the indicated voucher is a debit memo or a credit memo.
Check #	The number of the check used. A check number is printed only if the voucher transaction was a prepaid invoice transaction.
Error	<p>The error associated with the voucher or the voucher transaction. The errors which apply to voucher transactions are:</p> <ul style="list-style-type: none"> • INVALID # • SUSPENDED # • VOUCHER NUMBER IN USE • INVALID VENDOR NUMBER • AP ACCOUNT CANNOT BE DISTRIBUTION ACCOUNT • CASH DSC ACCOUNT CANNOT BE DIST ACCOUNT • ERRORS FOUND IN DISTRIBUTION ACCOUNT - SEE EDIT LIST • CALCULATED INV AMT NOT = ENTERED INVOICE AMT • WARNING: THIS CHECK EXISTS • THIS CHECK NUMBER HAS BEEN VOIDED • THIS CHECK NUMBER HAS BEEN RECONCILED • INVALID A/P TO G/L ACCOUNT NUMBERS • INVALID CASH DISCOUNT ACCOUNT NUMBER • INVALID TRANSACTION ACCOUNT NUMBER • ACCOUNT NUMBER HAS BEEN SUSPENDED • VOUCHER REFERENCE NOT ON FILE • A/P CLEARING ACCOUNT IS INVALID • A/P VOUCHER SPLITTING ERRORS <p>The errors which apply for the voucher group are:</p> <ul style="list-style-type: none"> • INVALID CASH ACCOUNT FOR CHECKING ACCOUNT • CASH ACCT FOR CHECKING ACCT SUSPENDED • BANK ACCOUNT G/L ACCOUNT CANNOT BE A DIST ACCT

Posting Date	The posting date for this voucher group.
Voucher	The number of the voucher which was assigned during the entry process.
Type	The type of voucher: <ul style="list-style-type: none"> • INV is printed if this voucher is for an invoice. • PIV is printed if the voucher is for a pre-receipt invoice. • DRM is printed if this voucher is for a debit memo. • CRM is printed if this voucher is for a credit memo.
Vendor Name	The vendor name associated with this voucher. If an assignee is used, this is the name of the assignee. <p>NOTE: If a voucher is to be split, a message “***VOUCHER WILL BE SPLIT***” will print on this report below this field.</p>
Invoice Number	The number of the invoice which is recorded using this voucher.
Invoice Date	The date of the invoice which is recorded using this voucher.

A/P Voucher Edit List

Report Fields	Description
Invoice Description	The description of the invoice which is recorded using this voucher.
Gross	The gross amount payable for the voucher. This value is calculated based on the voucher transactions keyed for the voucher. The dollar amount printed is the total amount payable for this voucher before consideration of any applicable vendor discounts.
Discount	The discount amount applicable for the voucher. This value is calculated based on the voucher transactions keyed for the voucher. The dollar amount printed is the total of all applicable vendor discounts.
Net	The net amount payable for the voucher. This value is calculated based on the voucher transactions keyed for the voucher. The dollar amount printed is the total amount payable for this voucher with consideration of any applicable vendor discounts.
Prepaid Check No	If the voucher identified is for a prepaid invoice, the number of the check entered during Voucher Entry (MENU APMAIN) is printed in this field.
Check Date	If the voucher identified is for a prepaid invoice, the date of the check entered during Voucher Entry (MENU APMAIN) is printed in this field. This is the date of the check used to pay the invoice.
Held	If the voucher is on hold, the hold code for the voucher is printed in this field shown below the Vendor Name .
(General Ledger Accounts)	<p>When the A/P Voucher Edit List is printed in Detail format, the accounts that were selected for posting to General Ledger will also be printed.</p> <ul style="list-style-type: none"> • Accounts Payable: the full gross amount of the invoice will charged to this payables liability account when the voucher is posted to Accounts Payable and General Ledger. • A/P Cash Discount Taken: the account that will be used when the invoice is paid and a cash discount is taken during check processing. • A/P Expense Account(s): the amount of the invoice that will charged to the payables expense account(s) when the voucher is posted to Accounts Payable and General Ledger. Debit and credit transactions are distinguished by a D (for debit transactions) or a C (for credit transactions) which prints next to the transaction amount.
Voucher Count	The total number of vouchers included in this voucher group.
Totals	<p>The totals for the Gross, Discount, and Net columns. These values reflect the totals for this voucher group.</p> <p>When International Currency is installed, the company's currency symbol displays as part of the field heading.</p>

A/P Duplicate Invoice Report

Group Type - Voucher		Posting Date - 09/13/11		Print All Duplicate Invoices		Dup	Group/	
Vendor	Name	Invoice Number	Voucher	Inv Dte	Invoice Amount	Status	Check #	Chk Dte
1400	THE PAPER SUPPLY HOUSE	8123	504	01/08/11	1,273.83	US\$		
		8123	505	09/05/11	165.87	ENTRY TUESD		
1400	THE PAPER SUPPLY HOUSE	8123	505	09/05/11	165.87	US\$		
		8123	504	01/08/11	1,273.83	ENTRY TUESD		

This report prints duplicate invoices for the conditions specified on the A/P Voucher Edit Screen (p. 6-5). This report is optionally printed through the voucher group edit for all duplicate invoices, vendor/invoice matches, or date/amount matches.

You may also set your company options to check for duplicate invoices interactively. Refer to AP Options Maintenance (MENU APFIL2) for more information about this option.

A/P Duplicate Invoice Report

Report/Listing Fields	Description
Group Type	The type of voucher group. The group type is <i>Voucher</i> or <i>Template</i> .
Posting Date	The posting date for this voucher group.
Duplicates Printed	The type of duplicates printed on this report. This field will indicate if all duplicate invoices are printed, if vendor/invoice matches are printed, or if vendor/invoice date/amount matches are printed.
Vendor	The vendor number associated with this voucher. If an assignee is used, this is the number of the assignee.
Name	The name of the vendor associated with this voucher. If an assignee is used, the name of the assignee is printed.
Invoice Number	The number of the invoice which is duplicated.
Voucher	The number of the voucher which contains the duplicate invoice.
Inv Dte	The date of the duplicate invoice.
Invoice Amount	The amount of the invoice which is duplicated.

A/P Duplicate Invoice Report

Report/Listing Fields	Description
Dup Status	Indicates where the duplicate invoice presently exists: <ul style="list-style-type: none"> • Open is printed if the invoice is duplicated in open payables (i.e., in a voucher group that has been posted but not paid) • Paid is printed if the invoice is duplicated in A/P History (i.e., a voucher has been paid). • Entry is printed if the invoice is duplicated in any other voucher groups (i.e., a voucher which has not yet been posted).
Group/Check #	The voucher group and/or check number associated with the duplicate invoice.
Chk Dte	The date of the check used to pay the invoice.

Use the Voucher Post option on the Accounts Payable Main Menu to post a voucher group. A voucher group must be posted to update the open payables files, distribute voucher transactions to G/L accounts (if you have selected the option to do so), print the Purchase Journal, and to print the Cash Disbursements Report (if prepaid invoices have been processed).

When this option is run, vendor/item activity is tracked when PO vendor/item/price file records are updated, if **Days to Keep Vendor/Item Audit Activity** is greater than 0 in Purchasing System Options Maintenance (MENU XAFILE).

When International Currency is installed:

- For foreign trading currency vouchers, open payable extension records will be generated.
- Debit memo and credit memo vouchers processed against a foreign trading currency vouchers, will generate a revaluation of the voucher as part of the posting process.
- A generated open payable will be revalued during the Voucher Post process if the currency information of a validated voucher has been changed using the I/C Currency Information Window during voucher entry. The I/C Currency Information Window is a shared screen found in the International Currency user Guide. This, however, only occurs for vouchers generated by receipt validation.

NOTE: When you perform the pre-receipt post, PO receipt post, and then the pre-receipt validation process, any differences detected are posted to the pre-receipt gain/loss account and the Currency Revaluation Detail Report will be generated.

- If the exchange rate has changed and revaluation occurs, a second G/L Transaction Post Journal will be generated when gains/losses are accrued. In order to link the gain/loss transactions generated as IC journal transactions to the Purchases Journal, the Purchases Journal number is placed into the transaction source of IC transactions. A Currency Revaluation Detail Report also will print a detailed breakdown of the G/L gain/loss transactions.

Refer to Revalue Open Payables (MENU ICRVAL) in the International Currency User Guide for details about the Currency Revaluation Detail Report.

Post Vouchers

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Accounts Payable Voucher Post Screen	Use to select a job template, if desired, and specify the voucher group to post.
G/L Transaction Post Report	Use to specify the printing/reporting options.
G/L Transaction Post Report (AP685Z)	Prints total debits and credits for the posting.
A/P Purchase Journal	Audit report for the posted voucher group.
Cash Disbursements Report	Prints when cash disbursements are made in Accounts Payable.

When to Run This Option

Run this option to post vouchers in A/P. Post vouchers after a voucher group has been keyed through Post Vouchers (MENU APMAIN) and after optionally editing a voucher group with the Voucher Edit List (MENU APMAIN).

Accounts Payable Voucher Post Screen

```
ACCOUNTS PAYABLE VOUCHER POST

Job Template: ..... Modify Selections: N

Company?   01
Group ID:  - ....

F3=Exit  F4=Group Search  F9=Job Template List
```

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is AP100FM_STARTG.

This screen appears after selecting option 4 - Post Vouchers from the Accounts Payable Main Menu (MENU APMAIN):

This screen view also appears after selecting any of the following options from the Accounts Payable Main Menu (MENU APMAIN):

- Voucher Entry
- Create Vouchers from Templates
- Voucher Edit List

Use this screen to specify a voucher group. Select a group by specifying the group identification code (**Group ID**).

Accounts Payable Voucher Post Screen Fields and Function Keys

Field/Function Keys	Description
Job Template	<p>This field appears only for the Voucher Post option.</p> <p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the Modify Selections field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the Modify Selections field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p>NOTE: To review a list of existing job templates that have been created, press F9=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for a Voucher Post job (that is, AP130PP) through Job Template Maintenance (MENU XAFILE). (A 10) Optional</p>

Accounts Payable Voucher Post Screen Fields and Function Keys

Field/Function Keys	Description
Modify Selections	<p>This field appears only for the Voucher Post option.</p> <p>If using a job template (you keyed a job template name in the Job Template field on this screen or selected one with F9=JOB TEMPLATE LIST), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this AP Voucher Post will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the Job Template field is blank.</p> <p>(A1) Optional</p>
Function	<p>This field appears only when you select the Voucher Entry option.</p> <p>Key A to add a new voucher group.</p> <p>Key C to change an existing voucher group.</p> <p>(A 1) Required</p>
Company	<p>Key the number of the company associated with the voucher group.</p> <p><i>Default Value:</i> The default company defined in Authority Profile Maintenance (MENU XASCTY) if one has been defined; otherwise, this is the default company defined through System Options Maintenance (MENU XAFILE)</p> <p><i>Valid Values:</i> A valid company number defined through Company Name Maintenance (MENU XAFILE) which you are authorized to access through Authority Profile Maintenance (MENU XASCTY).</p> <p>(N 2,0) Required</p>
Group ID	<p>Key the identifier of the voucher group</p> <hr/> <p>NOTE: Do not use special characters (i.e. &, %, etc.); use letters and numbers only.</p> <hr/> <p>If you do not know the voucher group template name, press F4=GROUP SEARCH to display the Accounts Payable Group Selection Screen (p. 4-6).</p> <p>(A 5) Required</p>

Accounts Payable Voucher Post Screen Fields and Function Keys

Field/Function Keys	Description
Post Held Vouchers	<p>This field will display if you are posting vouchers and any vouchers are held. The field displays after you press ENTER once. It will not display for groups that include drop shipments. The value is assumed to be N.</p> <p>Use this field to indicate whether or not held vouchers will be included in the post. Once processing has begun for the selected voucher group, the appropriate reports will print.</p> <p>(A 1) Required</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
F4=Group Search	<p>Press F4=GROUP SEARCH to display the Accounts Payable Group Selection Screen (p. 4-6), from which you may select a group to change.</p>
F9=Job Template List	<p>The F9=JOB TEMPLATE LIST function key appears for the Voucher Post option. Press F9=JOB TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for an AP Voucher Post job.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>
Enter	<p>Press ENTER to confirm your selections.</p> <p>Depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <hr/> <p>NOTE: Vouchers assigned split terms will not be included in the posting if that voucher does not pass the posting edit. The Drop Ship Receipt Validation process will not allow held vouchers to be posted.</p>

G/L Transaction Post Report

GL1300 10/03/12 20.35.48		G/L TRANSACTION POST REPORT			\$\$/APDEMO	PAGE 1
		01-A & C Office Supply			AUDIT NO.	296
		Posting Date - 10/03/12

PJ056-00002	001-0005500-000	Miscell. expense acc	J 10/03/12	82,584.03	L01	454
Regular Entry Totals:		2 Transactions		82,584.03		
					82,584.03	

This journal is for Accounts Payable postings, and prints if you selected to update G/L accounts through the G/L Transfer Menu (MENU GLXFER). Refer to the G/L Interface User Guide for more information.

This report always prints when a transaction group is posted in G/L.

NOTE: The **Jrnl#-Ref#** field on this report for voucher posts starts with the prefix **PJ** for all voucher groups. This indicates that the transaction group posted in G/L is from a voucher group and is posted as the Purchase Journal.

G/L Transaction Post Journal Fields

Report/Listing Fields	Description
AUDIT NO.	The Audit Number for this G/L Transaction Post Journal. The Audit Number is assigned to this journal to indicate the sequence in which transactions were posted. Since this journal serves as the formal document of journal entries made into G/L, retain these journals in sequence by Audit Number.

G/L Transaction Post Journal Fields

Report/Listing Fields	Description
Jrnl#-Ref#	<p>Journal Reference numbers are automatically assigned at posting time. They consist of two 5 character segments, as such: GJ001-00001. The first segment is called the journal number; the second segment is called the sequence number.</p> <p>The journal number is a combination of the journal type and a sequential number from 001 to 999. A separate G/L Transaction Post Journal is generated for each journal type and the sequential number is incremented for each transaction group posted. (A separate sequential number is assigned to reversing entries generated from a transaction group.)</p> <p>The sequence number is incremented by 1 for each transaction in the group (i.e., for the same journal number). If there are 20 transactions, each will be assigned a sequence number of 1 through 20. This number is always 00001 for the first detail transaction in a transaction group.</p> <p>Each type of transaction affecting G/L results in a specific journal type entry. The accounts payable entries are Distribution A+:</p> <ul style="list-style-type: none"> • CD - Cash Disbursements Report • GJ - General Journal • IC - International Currency Journal • PJ - Purchase Journal
Jrnl#-Ref#: CD	<p>If the A/P to G/L interface is turned on through Company Name Maintenance (MENU XAFILE), A/P Cash Disbursement (CD) transactions are posted to G/L. Cash disbursement transactions are posted in A/P for voucher groups containing prepaid invoices through Post Vouchers (MENU APMAIN). Cash disbursement transactions are also posted in A/P when checks are posted (recorded) through Record Check Numbers (MENU APCHCK); when manual checks are posted through Post Manual Checks (MENU APCHCK); and when check reversals are posted through Post Check Reversals (MENU APCHCK). The resulting G/L Transaction Post Journal for cash disbursement transactions will contain Journal Reference numbers reflecting the cash disbursement report type of CD.</p>
Jrnl#-Ref#: GJ	<p>This field is applicable for Voucher Redistribution only.</p> <p>General Journal (GJ) transactions are posted to G/L through Post Transactions (MENU GLMAIN). The resulting G/L Transaction Post Journal for general journal transactions will contain Journal Reference numbers reflecting the general journal type of GJ.</p>

G/L Transaction Post Journal Fields

Report/Listing Fields	Description
Jrnl#-Ref#: IC	When foreign currency transactions are posted and a difference exists between the exchange rate in effect when the transaction was created and the rate in effect when the transactions are posted, a revaluation will automatically occur with the resulting gains/losses posted to the G/L Gain/Loss Account. A second G/L Transaction Post Journal listing the resulting gain/loss transactions will print in addition to the usual G/L Transaction Post Journal. The Currency Revaluation Detail Reports also will print a detailed breakdown of the G/L gain/loss transactions generated as a result of the revaluation. Refer to the International Currency User Guide for samples of these reports.
Jrnl#-Ref#: PJ	If the A/P to G/L interface is turned on through Company Name Maintenance (MENU XAFIL), Purchase Journal (PJ) transactions are posted to G/L. Purchase journal transactions are created for vouchers. Vouchers are posted through Post Vouchers (MENU APMAIN). The resulting G/L Transaction Post Journal for purchase journal transactions will contain Journal Reference numbers reflecting the purchase journal type of PJ .
G/L Account	The G/L account number entered for this detail transaction. It is displayed in the format specified in G/L Options Maintenance (MENU GLFIL2). The account description is printed following the G/L account number.
Trans Desc	The description of this detail transaction. If an extended transaction description has been entered during Transaction Entry (MENU GLMAIN), the extended transaction description is printed below this detail line in the G/L Account and Trans Desc columns.
Type/Date	The transaction type and the general ledger transaction date for this detail transaction. The transaction type is J for a journal entry, R for the first half of a reversing entry, X for the second half of a reversing entry, A for an adjusting entry, and Y for a year-end adjusting entry.
Debit	The debit dollar amount entered for this detail transaction. The total debit amount for this transaction group is printed after the last detail transaction.
Credit	The credit dollar amount entered for this detail transaction. The total credit amount for this transaction group is printed after the last detail transaction.
Source: CD	The source keyed for this detail transaction. The values displayed in this field change depending on the specific journal type. CD - Cash Disbursements Report

G/L Transaction Post Journal Fields

Report/Listing Fields	Description
Source: GJ	<p>This field is applicable for Voucher Redistribution only. The source keyed for this detail transaction will display and will change depending on the specific journal type.</p> <p>GJ - General Journal</p> <p>For this source, the line number of the expense account in the voucher transaction, and the voucher number are displayed.</p> <p>For additional information, refer to this report in the Post Transactions option (MENU GLMAIN) of the General Ledger User Guide.</p>
Source: IC	<p>The source keyed for this detail transaction. The values displayed in this field change depending on the specific journal type.</p> <p>IC - International Currency Journal</p>
Source: PJ	<p>The source keyed for this detail transaction. The values displayed in this field change depending on the specific journal type.</p> <p>PJ - Purchase Journal</p>
Project	<p>The project ID keyed for this detail transaction. This field is defined by the user and can be used to attach additional information to the transaction.</p>
Entry Totals	<p>The heading Regular Entry Totals indicates that the values that follow apply to all regular detail transaction entries that were entered in the transaction group.</p> <p>The heading Reversing Entry Totals indicates that the values that follow apply to all reversing detail transaction entries that were entered in the transaction group.</p>
Count	<p>This is the number of transaction entered in this transaction group for all regular entries or for all reversing entries.</p>

G/L Transaction Post Report (AP685Z)

AP685Z 10/03/11 10.53.52		*** REPORT ONLY ***		G/L TRANSACTION POST REPORT		I1/APDEMO	PAGE 1

PJ	00001 001-0002000-000		J 09/20/11		93.19 A/P INV +		
PJ	00002 001-0002600-000		J 09/20/11	87.50	L01 1081		
PJ	00003 001-0005500-000		J 09/20/11	5.69	L01 1081		
Company Totals:				93.19	93.19		
Final Totals:				93.19	93.19		

This report is printed when you press **ENTER** on the Report Options Screen if the **A/P to G/L** field is set to **R** through Company Name Maintenance (MENU XAMAST). Refer to the Cross Applications User Guide for information about the Report Options Screen.

The total debits and credits at the end of the report on the line marked **Company Totals**. For a description of the fields on this report, refer to the G/L Transaction Post Report (p. 7-7).

If the **A/P to G/L** field is set to **Y** and debits and credits are not equal for the transactions, the following message is printed on the report:

DEBITS AND CREDITS ARE NOT EQUAL

Out of Balance has been retained as GL Transaction group XXxxx

XXxxx is the group ID that you can use to correct the transaction group through Transaction Entry (MENU GLMAIN). A journal number is also assigned to the group at this time, however, only the journal type will print on this report. This journal number will be used when the corrected group is posted.

If the **A/P to G/L** field is set to **R** through Company Name Maintenance (MENU XAMAST), the message will print for out-of-balance transactions, however, the data for the out-of-balance transactions will not be retained for correction.

This report prints the voucher and transaction information for the posted voucher group. Retain Purchase Journals in sequential order by audit number; this allows you to maintain sequential records of your A/P voucher transactions.

A/P Purchase Journal

Report/Listing Field	Description
AUDIT #	The audit number of this A/P Purchase Journal. The Audit Number is assigned to this report to indicate the sequence in which this voucher group was posted. Retain these reports in sequence by audit number for auditing purposes.
Vendor Number/Name	The name and number of the vendor for whom a voucher has been posted. This report is primarily sequenced by the vendor number.
Invoice No	The invoice number for which payment is recorded with the posted voucher. If more than one voucher for the same vendor has been posted, invoice numbers are printed sequentially.
HC	The hold code, if one has been used, for the posted vouchers. Vouchers with hold codes cannot be paid until the codes are removed. Hold codes are maintained through Hold Codes Maintenance (MENU APFILE). If this field is blank, a hold code is not assigned to the voucher.

A/P Purchase Journal

Report/Listing Field	Description
Ref	<p>Use this field to reference transactions. The Journal Reference Number which is assigned during the G/L Transaction Post. The Journal Reference Number consists of two segments: the Journal Number, and the Segment Number.</p> <p>The Journal Number is the same for all transactions within a transaction group. The first two characters are "PJ," which represent the Purchase Journal; the last three characters are a sequentially assigned number for the voucher group.</p> <p>The Segment Number is incremented by 1 for each transaction within the Journal Reference Number. If there are 20 voucher transactions, transactions are assigned Segment Numbers of 1 through 20.</p> <p>The G/L Transaction Post Report (p. 7-7) prints sequentially by Journal Number.</p>
Voucher No	<p>The voucher number associated with the transaction. A five digit sequence number printed to the right of the voucher number indicates the sequence in which this voucher transaction was keyed. The first sequence number is 00000.</p>
Project Description	<p>The project ID that was entered through Voucher Entry (MENU APMAIN).</p>
G/L Account Number	<p>The number of the G/L Account that has been specified for this voucher transaction.</p>
Debit	<p>The debit amount of the voucher transaction.</p>
Credit	<p>The credit amount of the voucher transaction.</p>

This report prints when cash disbursements are made in A/P. This includes the following:

- When a voucher group that contains prepaid invoices has been successfully posted through Post Vouchers (MENU APMAIN).
- Checks are printed through Print Checks / Process ACH or CC Payments (MENU APCHCK).
- Manual checks are posted through Post Manual Checks (MENU APCHCK).
- Check reversals are posted through Post Check Reversals (MENU APCHCK).

Cash Disbursements Report

Report/Listing Field	Description
AUDIT #	The audit number of this Cash Disbursements Report. The audit number is assigned to indicate the sequence in which the report is printed. Retain these reports in sequence by audit number for auditing purposes.
Vendor	The number of the vendor to whom payment was made. If a vendor has an assignee, this field displays the vendor number of the assignee.
Invoice Number	The number of the original invoice for which payment has been made and recorded with the respective voucher.
Voucher	The number of the voucher for which payment has been made.

Cash Disbursements Report

Report/Listing Field	Description
Ref	<p>The Journal Reference Number which is assigned during the G/L Transaction Post. The Journal Reference Number consists of two segments: the Journal Number, and the Segment Number.</p> <p>The Journal Number is the same for all transactions within a transaction group. The first two characters are "CD," which represent the Cash Disbursements Report; the last three characters are a sequentially assigned number for the voucher group.</p> <p>The Segment Number is incremented by 1 for each transaction within the journal reference number. If there are 20 voucher transactions, transactions are assigned segment numbers of 1 through 20.</p>
Amount	The amount of the cash payment.
G/L Account Number	The A/P Expense account that is updated when payment is made for this voucher transaction.
Check No	The number of the check used to pay the invoice. This report is sequenced by check number.

Use this option to maintain vouchers that have been posted (open payables). You cannot change the default expense account, A/P Account, or accounts specified in voucher transactions. You may, however, change the cash discount account and cash discount information.

Open Payables Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Open Payables Maintenance Selection Screen	Use to select the open payable to maintain.
Open Payables Voucher Transaction Selection Screen	Use to select the voucher transaction to change

Field/Function Key	Description
Inv Date	<p>This field is display-only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/ Services Tax field is set to Y through Tax Body Maintenance (MENU OEFIL2 or MENU ARFILE) for the tax body assigned to the vendor through Vendors Maintenance (MENU POFIL2) or the vendor/warehouse through Vendor/Warehouse Assignments Maintenance (MENU POFIL2) and the receipt records for the items that were validated have GST tax charged to them.</p> <p>Key the date of the invoice being recorded with this voucher.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIL2), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIL2).</p> <p>(N 6,0) Required/Display</p>
Inv Amt	<p>The amount of the invoice which is being recorded with this voucher.</p> <p>For type C invoices (credit), the invoice amount must be a negative value. For type D invoices (debit), the invoice amount must be a positive value. For type P invoices (pre-receipt), the invoice amount must be a positive value. For type I invoices, the invoice amount may be negative or positive value.</p> <p>When International Currency is installed, the vendor's trading currency and currency symbol is displayed with the company's local currency equivalent and local currency symbol shown below.</p> <p>You cannot change the amount of the invoice. To correct this value, process a credit or debit invoice against the original voucher number through Voucher Entry (MENU APMAIN).</p> <p>Display</p>
(Currency)	<p>This field only displays when International Currency is installed.</p> <p>The currency description field appears only if the vendor's trading currency is different from the company's local currency.</p> <p>Display</p>
User Area	<p>Key additional information about this voucher.</p> <p>(A 10) Optional</p>
PO No	<p>This field is required if a purchase order number is required when creating a voucher for this vendor. This is determined in Vendors Maintenance (MENU APFIL2). Otherwise, this field is optional.</p> <p>Key the number of the purchase order issued when placing the original order being recorded with this voucher.</p> <p>(A 25) Required/Optional</p>

Open Payables Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Due Date	<p>This field displays the due date for payment of this voucher calculated as the number of payment days plus either the voucher entry date or the invoice date depending on your selection in A/P Options Maintenance (MENU APFIL2).</p> <p>Accept the default, or key a different due date.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIL).</p> <p>(N 6,0) Required</p>
Terms	<p>The standard payment terms of this vendor. The terms description keyed in this field are printed on appropriate documents. Discount calculations are not made from this field.</p> <p>(A 20) Optional</p>
Cash Dsc %	<p>The cash discount percent offered by this vendor. Three decimal places are assumed. This value is used to calculate the discount amount when applicable.</p> <p>Key the cash discount percentage offered for this invoice from the vendor.</p> <p>(N 5,3) Optional</p>
Dsc Date	<p>Key the last date on which the cash discount for this voucher is effective. If you leave this field blank and key the number of discount days (Dsc Days), the discount date is calculated and displayed in this field.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIL).</p> <p>(N 6,0) Optional</p>
Dsc Days	<p>Key the number of days remaining for which the cash discount associated with this vendor is effective. If this field is blank and you key the discount date (Dsc Date), the discount days is calculated and displayed in this field.</p> <p>(N 3,0) Optional</p>

Open Payables Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Pmt Pty	<p>The payment priority used to indicate the priority level for making payments to this vendor. Payment priority can be used in Payment Selection (MENU APCHCK) to select groups of vouchers to be paid.</p> <p>If you are using urgency priority (Urg Pty) and urgency date (Urg Date), you must select a lower payment priority than the urgency priority.</p> <p>For example, if you select an urgency priority of 1 (high), you must select a payment priority of 2 (medium) or 3 (low).</p> <p>You may accept the default payment priority or key a different payment priority:</p> <p>Key 1 if the payment priority for this vendor is high.</p> <p>Key 2 if the payment priority for this vendor is medium.</p> <p>Key 3 if the payment priority for this vendor is low.</p> <p><i>Valid Values:</i> 1, 2 or 3</p> <p>(N 1,0) Required</p>
Urg Pty	<p>The urgency priority is similar to payment priority in that it is used to indicate the priority level for making payment to a vendor. It differs in that its value (1,2 or 3) replaces the payment priority on the day of the urgency date.</p> <p>For example, assume you have decided to enter a voucher with a payment priority of 2 (medium). Payment is due on March 31st, so you decide to assign the urgency date to April 1st to indicate the voucher is past due. A voucher that is past due should be a higher priority than one that is not. Therefore, an urgency priority of 1 (high) should be chosen to indicate this as a higher priority.</p> <p>You may accept the default urgency priority or key a new urgency priority.</p> <p>Key 1 if the urgency priority for this vendor is high.</p> <p>Key 2 if the urgency priority for this vendor is medium.</p> <p>Key 3 if the urgency priority for this vendor is low.</p> <p><i>Valid Values:</i> 1, 2 or 3</p> <p>(N 1,0) Optional</p>
Urg Date	<p>When a payment and urgency priority are specified for a vendor, it is on this date that the value of the urgency priority replaces the payment priority. The urgency date is calculated based on the number of urgency days for this vendor. You may accept the default urgency date or key a new urgency date for this voucher.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE)</p> <p>(N 6,0) Required</p>

Open Payables Voucher Header Screen Fields and Function Keys

Field/Function Key	Description
Sep Chk	<p>Used to specify if this voucher, when paid, should be paid on the same check as any other vouchers for this vendor or on its own check. Accept the default, or key a different value. However, if the vendor is defined as the one time vendor (MENU APFILE), then this field will default to Y and you will not be able to change it</p> <p>Key Y if a separate check is required for this voucher.</p> <p>Key N if a separate check is not required for this voucher.</p> <p>(A 1) Required</p>
Project	<p>The project associated with this voucher. This may be used for job accounting.</p> <p>(A 10) Optional</p>
Force Dsc	<p>This field displays only when the type of voucher is an INVOICE.</p> <p>Use this field to force a cash discount. This means that cash discounts will be assumed even if the cash discount date has passed when payment is made. This is the default for this voucher and may be overridden during Payment Selection Maintenance (MENU APCHCK).</p> <p>Key Y to force cash discounts. Cash discounts are taken regardless if the discount date has passed.</p> <p>Key N if you do not want to force a cash discount for vouchers in this voucher group. Cash discounts are not taken if the discount date has passed.</p> <p>Leave blank if you do not want to force a discount for this voucher. Discounts may be forced during Payment Selection (MENU APCHCK).</p> <p>(A 1) Optional</p>
Bus Unit	<p>This field appears only if you selected to use business units when selecting A/P Liability and Expense accounts or Purchase Tax Accounts for the G/L Interface through G/L Transfer Definition (MENU GLXFER sub-option T).</p> <p>This field is display-only if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and the Goods/ Services Tax field is set to Y through Tax Body Maintenance (MENU OEFILE or MENU ARFILE) for the tax body assigned to the vendor for whom the voucher is being created.</p> <p>Key the business unit to be used when posting to the A/P Liability , A/P Expense, and Purchase Tax Accounts for this voucher.</p> <p><i>Valid Values:</i> A business unit defined through Business Units Maintenance (MENU APFILE or MENU GLXFER).</p> <p>(A 2) Optional/Display</p>

The appropriate currency symbol will appear to the right of the Invoice Amt field.</p>
Enter	<p>Press ENTER to confirm your selections. The Open Payables Voucher Search Screen (p. 8-4) will appear.</p>

Use the Bank Acct Trn Entry option to enter or maintain miscellaneous bank account transactions. You may enter or maintain transactions for deposits, withdrawals, and transfers. After a transaction type has been entered, it is stored and processed in a group; you will be able to select the group you want the transaction processed in. A group search is available to assist you.

The transactions entered through this option will be used to:

- generate the necessary general ledger transactions into a cash journal (CJ);
- increase or decrease the bank account's balance;
- generate the bank transaction history records.

After executing this option, you may run the Bank Acct Trn Edit List (MENU APMAIN/MENU ARMAIN) to print a report showing all bank transactions within a selected group, or Post Bank Acct Trn (MENU APMAIN/MENU ARMAIN) to post bank account transactions and update various Distribution A+ files.

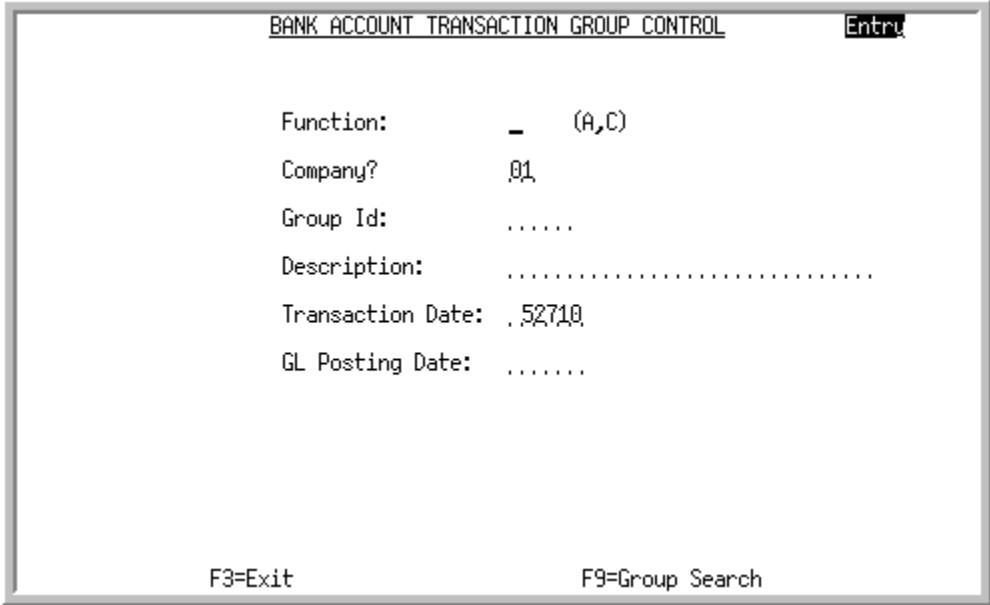

Bank Account Transaction Entry

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Account Transaction Group Control Entry Screen	Use to add or maintain a transaction.
Bank Account Transaction Groups Screen	Use to select an existing transaction group from the list of existing groups by company.
Bank Transactions Selection Screen	Use to add or maintain transaction group information.
Bank Accounts List Screen	Use to select a specific bank account for the transaction.

Title	Purpose
Bank Transactions Detail Screen	Use to add or maintain transaction information.
Bank Transactions Group Totals Screen	Use to review the transactions in the group.

Bank Account Transaction Group Control Entry Screen

This screen appears after selecting option 6 - Bank Account Transaction Entry from the Accounts Payable Main Menu (MENU APMAIN) or the Accounts Receivable Main Menu (MENU ARMAIN). Use this screen to add a new transaction group or maintain an existing one.

Bank Account Transaction Group Control Entry Screen Fields and Function Keys

Field/Function Key	Description
Mode Status	Entry displays as the status of the process selected displays in this field. Display
Function	Use to select the type of function to perform. Key A to add a new transaction group. Key C to change an existing transaction group. (A 1) Required

Bank Account Transaction Group Control Entry Screen Fields and Function Keys

Field/Function Key	Description

```

This screen appears after you press **ENTER** on the Bank Account Transaction Group Control Entry Screen (p. 9-3). Use this screen to enter or maintain information about the bank transaction group being added or changed. The top portion of this screen displays group identification information and transactions previously entered for this group; these transactions are displayed in entry sequence.

When International Currency is installed:

- Transfer transactions must be performed between bank accounts of the same currency.
- Bank account transaction groups may contain transactions in more than one currency. Note that if you create groups containing transactions in mixed currencies, the amounts displayed in the **Total Amt** field on the Bank Transactions Group Totals Screen will not accurately reflect group totals.

Bank Transactions Selection Screen Fields and Function Keys

Field/Function Key	Description
Group	The group ID and description for transaction being added/maintained. Display
Company	The company number and name associated with the group ID. Display

This screen displays after keying a question mark on the Bank Transactions Selection Screen (p. 9-9), after selecting option **5** - Bank Account Maintenance (Menu APFIL2), or after pressing **F4=BANK ACCOUNTS** on several other screens.

This screen lists all bank accounts that have been defined through Bank Account Maintenance (MENU APFIL2) and allows you to select the bank account you desire. The top line is positioned to the default bank account for the company. Use the **PAGE DOWN** / **PAGE UP** keys to position the screen to find the correct bank account needed. In addition to selecting a bank account, you may:

- Change the company to review other bank accounts for a different company, if a company was not previously selected when you accessed this screen
- Select the bank ID of the bank account that you want to display on the top portion of this screen

NOTE: Because you can access this screen from different places within Distribution A+, the selected default bank account may display in the top portion of this screen and its reference number is positioned in the **Selection** field awaiting your response.

- Select the type of bank accounts that you want to display on this screen
- Add a new bank account
- Update the default bank account on the Accounts Receivable Options Screen within Accounts Receivable Options Maintenance (MENU XAFIL2) or the A/P Company Options Maintenance Screen within AP Options Maintenance (MENU APFIL2)

NOTE: This is a roll screen. **More...** appears at the bottom of a roll screen to indicate that more data is available for viewing. **Last** appears at the bottom of the last screen of data. To scroll through information on roll screens press:

* **PAGE DOWN** or **SHIFT-ROLL FWD** or **F7=PAGE DOWN** to display the next screen

* **PAGE DOWN** or **SHIFT-ROLL BACK** or **F8=PAGE UP** to display the previous screen.

Furthermore, you may access this screen through the following menu options within Distribution A+ (any differences that exist will be noted):

- Voucher Entry (MENU APMAIN) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Accounts Payable Inquiry (MENU APMAIN) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Bank Account Inquiry (MENU APMAIN) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- A/P Options Maintenance (MENU APFIL2) from within the Accounts Payable module
 - Allows you to add a new bank account and update the default bank account. No default line.
- A/R Options Maintenance (MENU XAFIL) from within the Cross Applications module.
 - Allows you to add a new bank account. No default line.
- Check History Report (MENU APREPT) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Print Checks / Process ACH or CC Payments (MENU APCHCK) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Enter Manual Checks (MENU APCHCK) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Enter Check Reversals (MENU APCHCK) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Void Unprinted Checks (MENU APCHCK) from within the Accounts Payable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Bank Accounts Maintenance (MENU APFIL2) from within the Accounts Receivable module.
 - Allows you to add a new bank account. No default line.
- Cash & Adjustment Entry/Edit (MENU ARMAIN) from within the Accounts Receivable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Bank Account Inquiry (MENU ARMAIN) from within the Accounts Receivable module
 - Does not allow you to add a new bank account or update the default bank account. The default bank account will be positioned in the **Selection** field.
- Currency Contract Maintenance (MENU ICFIL) from within the International Currency module.
 - Allows you to add a new bank account and update the default bank account. No default line.

Bank Accounts List Screen Fields and Function Keys

Field/Function Key	Description
(Reference Number)	The reference number of the bank account. Use this number to select a bank account in the Selection field on the lower portion of this screen. Display
Co	The company number associated with the accounts that are displayed. NOTE: Depending on where this screen was accessed from and also if a Company Selection Screen displayed previous to this screen, you may be able to display accounts for a different company (refer to the Co field on the lower portion of this screen). Display
Account No	The bank accounts that are available for all companies or for the company you selected in the Co field on the lower portion of this screen. To select the account number you want to maintain, key the reference number corresponding to this account in the Selection field on the lower portion of this screen. Display
Description	The description of the bank account, as defined when the bank account was created or maintained with Bank Names Maintenance(MENU APFIL2/MENU ARFIL2). Display
Bank	The Bank ID associated with the bank account as defined through Bank Names Maintenance (MENU APFIL2). Display
Name	The name (description) of the Bank ID as defined through Bank Names Maintenance (MENU APFIL2). Display
Typ	The type of bank account: C for checking, S for savings, L for line of credit, O for other, or T for a credit card transfer. Display
Selection	Use this field to select the bank account you want to maintain or select for further processing. Key the reference number of the desired bank account and press ENTER . (N 2,0) Required

Bank Accounts List Screen Fields and Function Keys

Field/Function Key	Description
Co	<p>This is a display only field if you previously selected a company on a prior screen (a Company Selection Screen may or not display prior to this screen, depending on where this screen is accessed from). The company selected will be displayed.</p> <p>If you did not previously select a company (because a Company Selection Screen did not display, as occurs through the Bank Account Inquiry for example), you may use this field to display bank accounts for a different company.</p> <p>Key the desired company. Only those bank accounts associated with this company will display on the top portion of this screen.</p> <p>(N 2,0) Display/Optional</p>
Bank Id	<p>Use this field to display only the bank account associated with the bank ID you key in this field.</p> <p>Key the desired bank ID. Only the bank account associated with this bank ID will display on the top portion of this screen.</p> <p>(A 5) Optional</p>
Type	<p>Use this field to designate the types of bank accounts that you want to display. Only the bank accounts designated as the type keyed in this field will display on the top portion of this screen.</p> <p>Key C to display checking accounts only.</p> <p>Key S to display saving accounts only.</p> <p>Key L to display line of credit accounts only.</p> <p>Key T to display credit card transfer accounts only.</p> <p>Key O to display all other types of accounts, excluding checking, savings, line of credit accounts, and credit card transfer accounts.</p> <hr/> <p>NOTE: For credit card voucher payment groups, this screen will automatically show only T-type credit card transfer bank accounts, and this Type field will be protected so that no other accounts can be displayed or selected.</p> <p>Additionally, transfer credit card bank accounts do not generate actual checks for printing, but instead generate a remittance advice report which outputs the list of invoices.</p> <hr/> <p>Leave this field blank to display ALL types of accounts.</p> <p>(A 1) Optional</p>

That is, if you are entering a deposit, Deposit Bank Account will display; if entering a withdrawal, Withdrawal Bank Account will display; if entering a transfer, the To Bank Account and From Bank Account will display. Display
Trn Date	Use this field to select the date of the transaction being entered. This date will be used for generating bank transaction history records. <i>Default Value:</i> The transaction date selected on the Bank Account Transaction Group Control Entry Screen (p. 9-3). <i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILF) (N 6,0) Required

Bank Transactions Detail Screen Fields and Function Keys

Field/Function Key	Description
Credit Account/ Debit Account/ Transfer Account	<p>The heading of this field will change depending on the type of transaction being performed. That is, if you are entering a deposit, Credit Account will display; if entering a withdrawal, Debit Account will display; if entering a transfer, Credit Account will display and this field will be automatically filled in with the account number and be protected.</p> <p>Use this field to select the general ledger account number to be credited (deposited) or debited (withdrawn). This account will offset the debit or credit to the bank account's general ledger account number.</p> <p>(A 29) Required</p>
Deposit Amount/ Withdrawal Amount/ Transfer Amount	<p>The heading of this field will change depending on the type of transaction being performed. That is, if you are entering a deposit, Deposit Amount will display; if entering a withdrawal, Withdrawal Amount will display; if entering a transfer, Transfer Amount will display.</p> <p>Use this field to enter the amount of the transaction.</p> <p>Key the amount being deposited, withdrawn, or transferred.</p> <p>When International Currency is installed, key the transaction amount in the appropriate currency for the bank account. The bank account's currency symbol will display to the right.</p> <p>The Local Currency Equivalent of the withdrawal or deposit amount displayed in the Deposit Amount/Withdrawal Amount/Transfer Amount field, is displayed on the line below, minus any applicable exchange fees. This is the actual amount to be credited or debited.</p> <p>(N 13,2) Required</p>
Local Tendered	<p>This field only displays when International Currency is installed and the transaction is a deposit.</p> <p>Use this field to enter the actual local currency amount (including exchange fees) that was tendered to purchase the foreign currencies. This value is used with the trading currency deposit amount and the exchange fee amount to calculate the exchange rate for the transaction. The company's local currency symbol will display to the right of this value.</p> <p>In the company's local currency, key the amount that was required to purchase the foreign currency you are depositing.</p> <p>(N 13,2) Required</p>

Bank Transactions Detail Screen Fields and Function Keys

Field/Function Key	Description
Exchange Rate	<p>This field only displays when International Currency is installed and the transaction is a deposit or a withdrawal.</p> <p>This field displays the exchange rate for the transaction.</p> <p>If you are processing deposits, the transaction's actual exchange rate (calculated through the relationship defined for the currency, the local tendered amount, trading currency deposit amount, and, if applicable, through the subtraction of the exchange fee amount) will display in this field after you have entered amounts in the Deposit Amount, Local Tendered, and, if applicable, Exchange Fees fields and pressed ENTER.</p> <p><i>Default Value:</i> The most current exchange rate for this bank account's currency and/or exchange code</p> <p>Display</p>
Exchange Fees	<p>This field only displays when International Currency is installed and the transaction is a deposit to foreign currency bank accounts.</p> <p>When performing a deposit, this field is provided so you can directly expense a portion of a cost that you incurred for the transaction when exchanging dollars for a foreign currency. The value entered determines the portion of the Local Tendered amount to expense directly, so that the amount of the exchange fee is subtracted and will not affect the actual exchange rate. The company's local currency symbol will display to the right of this value.</p> <p>Key, in the company's local currency, the amount of the exchange fee associated with the deposit.</p> <p>(N 13,2) Optional</p>
Transaction Desc	<p>You may use this field, if desired, to enter a description for the transaction being entered. This description will be stored in Bank Transaction History and the first fifteen characters will be placed into the transaction description of the general ledger detail transaction.</p> <p>(A 30) Optional</p>
F12=Return	<p>Press the F12=RETURN function key to return to the Bank Transactions Selection Screen (p. 9-9) without updating this screen.</p>
F24=Delete	<p>NOTE: The F24=DELETE function key displays only if you selected to change/delete a bank transaction group with the F13-20 TO CHANGE function key on the Bank Transactions Selection Screen (p. 9-9).</p> <p>Press the F24=DELETE function key to delete the bank transaction. The Bank Transactions Selection Screen (p. 9-9) will appear.</p>
Enter	<p>Press the ENTER key to confirm your selections. The Bank Transactions Selection Screen (p. 9-9) will appear.</p>

Bank Transactions Group Totals Screen

This listing prints following your responses on the Report Options Screen. Refer to the Cross Applications User Guide for details about this screen.

Use this listing to review the bank transactions which have been entered within the selected group. If an error has been detected, it will print on this listing so that you may correct the error before posting general ledger transactions. Therefore, be sure to run this report prior to the posting process.

If a suspended General Ledger account is detected during the edit, a message will appear on this report notifying you that the account has been suspended.

NOTE: You will be notified that an account is suspended only if that account is the To account used in a transaction. If the account that funds were transferred from is suspended, a warning message will not appear on this report.

This listing prints alphabetically by bank, and line numbers are as entered on the Bank Transactions Selection Screen (p. 9-9).

When International Currency is installed:

- Transactions for foreign currency bank accounts will print the foreign currency values associated with the transaction.
- Any exchange fee amount associated with the transaction will print in the company's local currency.

Bank Account Transaction Edit List

Report/Listing Fields	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p> <p>When this report is generated from option 7 - Bank Acct Trn Edit List (MENU APMAIN/MENU ARMAIN), the heading will show a message ** Edit Only **.</p>
Bank Acct/Name	The bank account number and its description.
Tran Date	Transaction date specified on Bank Account Transaction Group Control Entry Screen (p. 10-5)
Transaction	Identifies the type of transaction: Deposit , Withdrawal , or Transfer .
Trn Amount	<p>The amount of the deposit, withdrawal, or transfer transaction.</p> <p>When International Currency is installed, transaction amounts for foreign currency bank accounts will print in the applicable currency, with the foreign currency symbol printed to the right of each amount. The local currency equivalent value will print below each amount, with the symbol for the company's local currency printed to the right.</p>
From Bank or Offset GL Acct and Errors	For transfer transactions, the FROM bank account of the transaction. For deposits and withdrawals, the G/L account number and description for the transaction.
Line	The line number of the transaction.
Exchange Fees	When International Currency is installed, the exchange fees associated with each transaction will be posted as general ledger transactions to the exchange fees account and will print on this report below the account number and name.
Exchange Rates	When International Currency is installed, an exchange rate for each bank account transaction will be calculated and will print on this report below the transaction date.

Through the Bank Acct Trn Entry option on the main menu (MENU APMAIN/MENU ARMAIN) miscellaneous bank account transactions may be entered and maintained. Once entered, the transactions can be edited through the Bank Acct Trn Edit List (p. 10-1) option (MENU APMAIN/MENU ARMAIN). This listing will show any errors that were detected. After executing both of those options, you may use this option to post the bank account transactions to Master Files. This posting process will update the following files:

- Bank Account Master File (its balance will be adjusted)
- G/L Summary File
- G/L detail transactions will be generated (if the interface is activated)

Additionally, Bank Account Transaction History records will be generated to link all generated transactions to the appropriate bank account.

If the **AP to GL** field or the **AR to GL** field is set to **Y** through Company Name Maintenance (MENU XAFILE) and debits and credits are not equal for the selected group, an out-of-balance group will automatically be created and the G/L Transaction Post Report will print.

NOTE: Posting bank account transactions will be submitted to the Transaction Processor. Refer to the Overview in the Cross Applications User Guide for details.

When International Currency is installed:

- For deposits involving foreign currency, I/C will post general ledger transactions to the exchange fees account if exchange fees are incurred through the transaction, and will calculate, if applicable, a new exchange rate for each bank account affected by deposits or withdrawals.
 - If adjustments are necessary to correct discrepancies in the account's local currency equivalent balance and foreign currency balance, gain/loss transactions will be generated.
 - When the International Currency revaluation process takes place for this option, the G/L Transaction Post Report (IC680D) may print, when the value specified in the **A/P to G/L** or **A/R to G/L** field is set to **R** through Company Name Maintenance (MENU XAFILE). Refer to Revalue Foreign Bank Accounts (MENU ICRVAL) in the International Currency User Guide for information about this report.
 - If gains/losses have been posted, a second G/L Transaction Post Journal will be generated when gains/losses are accrued. In order to link the gain/loss transactions generated as IC journal transactions to the Cash Journal, the CJ Journal number is placed into the transaction source of IC
-

transactions. A Currency Revaluation Detail Report also will print a detailed breakdown of the G/L gain/loss transactions.

- Refer to the International Currency User Guide and MENU ICRVAL for details about the Currency Revaluation Detail Report.

Post Bank Acct Trn

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Account Transaction Groups Screen	Use to select an existing transaction group from the list of existing groups by company.
Bank Account Transaction Group Control Entry Screen	Use to select a group for posting.
Bank Account Transaction Edit List	Prints bank account transactions in the group and any errors.
Bank Account Transactions Journal	Audit report for the posted bank account transaction group.
G/L Transaction Post Report (AP610D)	Prints total debits and credits for the posting.
G/L Transaction Post Report	Prints each detail transaction that was posted.

Since option 7 - Bank Acct Trn Edit List (MENU APMAIN/MENU ARMAIN) is not a required option, when a posting is submitted to the Transaction Processor, the edit process is always run. If errors are found, the posting is canceled.

Use this listing to review the bank transactions which have been entered within the selected group. If an error has been detected, it will print on this listing so that you may correct the error before posting general ledger transactions. Therefore, be sure to run this report prior to the posting process.

If a suspended General Ledger account is detected during the edit, a message will appear on this report notifying you that the account has been suspended.

NOTE: You will be notified that an account is suspended only if that account is the To account used in a transaction. If the account that funds were transferred from is suspended, a warning message will not appear on this report.

This listing prints alphabetically by bank, and line numbers are as entered on the Bank Transactions Selection Screen (p. 9-9).

When International Currency is installed:

- Transactions for foreign currency bank accounts will print the foreign currency values associated with the transaction.
- Any exchange fee amount associated with the transaction will print in the company's local currency.

Bank Account Transaction Edit List

Report/Listing Fields	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p> <p>When this report is generated from option 8 - Post Bank Acct Trn (MENU APMAIN/MENU ARMAIN), the heading will show the G/L Posting Date selected for this group.</p>
Bank Acct/Name	The bank account number and its description.
Tran Date	Transaction date specified on Bank Account Transaction Group Control Entry Screen (p. 11-6)
Transaction	Identifies the type of transaction: Deposit , Withdrawal , or Transfer .
Trn Amount	<p>The amount of the deposit, withdrawal, or transfer transaction.</p> <p>When International Currency is installed, transaction amounts for foreign currency bank accounts will print in the applicable currency, with the foreign currency symbol printed to the right of each amount. The local currency equivalent value will print below each amount, with the symbol for the company's local currency printed to the right.</p>
From Bank or Offset GL Acct and Errors	For transfer transactions, the FROM bank account of the transaction. For deposits and withdrawals, the G/L account number and description for the transaction.
Line	The line number of the transaction.
Exchange Fees	When International Currency is installed, the exchange fees associated with each transaction will be posted as general ledger transactions to the exchange fees account and will print on this report below the account number and name.
Exchange Rates	When International Currency is installed, an exchange rate for each bank account transaction will be calculated and will print on this report below the transaction date.

Ref	<p>Use this field to reference transactions. This is the Journal Reference Number which is assigned during the G/L Transaction Post. This number consists of two segments:</p> <ul style="list-style-type: none"> • the Journal Number, and • the Segment Number. <p>The Journal Number is the same for all transactions within a transaction group. The first two characters are “CJ,” which represent the Cash Journal; the last three characters are a sequentially assigned number for the bank account transaction group.</p> <p>The Segment Number is incremented by 1 for each transaction within the Journal Reference Number. If there are 20 transactions, transactions are assigned Segment Numbers of 1 through 20.</p> <p>The G/L Transaction Post Journal will print sequentially by Journal Number.</p>
Source	The transaction source in General Ledger: Deposit, Withdrawal or Transfer.
G/L Account Number	The number of the G/L Account that has been specified for this bank account transaction. This is the account that is updated when a transaction occurs.
(Deposit Amount)	This field prints the amount of funds actually deposited into the foreign bank account.
Exchange Fees	This field prints the amount of the exchange fee incurred through the deposit.
(Credit Amount)	This field prints the total amount of the transaction. This amount is credited to an account you select to offset the deposit.
Debit	The debit amount of the bank account transaction.
Credit	The credit amount of the bank account transaction.

Final Totals:							

This report is printed when you press **ENTER** on the Report Options Screen if the **A/P to G/L** field or the **A/R to G/L** field is set to **R** through Company Name Maintenance (MENU XAMAST). Refer to the Cross Applications User Guide for information about the Report Options Screen. For a description of the fields on this report, refer to the G/L Transaction Post Journal in Post Transactions (MENU GLMAIN) of the General Ledger User Guide.

If the **A/P to G/L** or the **A/R to G/L** field is set to **Y** and debits and credits are not equal for the transactions, the following message is printed on the report:

DEBITS AND CREDITS ARE NOT EQUAL

Out of Balance has been retained as GL Transaction group XXxxx

XXxxx is the group ID that you can use to correct the transaction group through Transaction Entry (MENU GLMAIN). A journal number is also assigned to the group at this time, however, only the journal type will print on this report. This journal number will be used when the corrected group is posted.

If the **A/P to G/L** field or the **A/R to G/L** field is set to **R** through Company Name Maintenance (MENU XAMAST), the message will print for out-of-balance transactions, however, the data for the out-of-balance transactions will not be retained for correction.

The total debits and credits print at the end of the report on the line marked **Company Totals**.

					42,852.12	

This journal prints if you selected to update G/L accounts through the G/L Transfer Menu (MENU GLXFER); refer to the G/L Interface User Guide for more information.

This report always prints when a transaction group is posted in G/L, and it lists each detail transaction that was posted. Use this report as your record of the transactions posted to G/L. The report is sorted by journal reference number; meaning, the order in which the transactions were keyed. For further details about this report, refer to it as described for Post Transactions (MENU GLMAIN) in the General Ledger User Guide.

NOTE: The **Jrnl#-Ref#** field on this report for voucher posts starts with the prefix **CJ** for all bank account groups. This indicates that the transaction group posted in G/L is from a bank account group and is posted as the Cash Journal.

The A/P Inquiry option on the Accounts Payable Main Menu (MENU APMAIN) allows you to access information about any invoice and payment that has been processed through A/P. You may key comments for a vendor or invoice. These comments may be printed on the check remittance advice (MENU APREPT), or used for the A/P inquiry only. And you may, with proper authority, select a specific invoice and create, edit and post a G/L transaction redistribution group.

Accounts Payable Inquiry

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Accounts Payable Inquiry Screen	Use to provide limiting criteria for the invoices you want to review.
Open/Paid Invoices Screen Open/Paid Invoices Screen With International Currency and Expanded Fields	Lists open/paid invoices for a vendor. Use to select an invoice to review.
Vendor Information Screen	Displays vendor information. Use to add and review vendor comments.
Vendor Performance Screen	Displays payment history information for a vendor.
Invoice Activity Screen	Displays activity for a specific invoice.
Invoice Comments Entry Screen	Displays invoice comments. Use to add and review comments.
Voucher Header Information Screen	Displays the voucher header information.

Title	Purpose
Voucher Transaction Selection Screen	Use to review summary transactions and select to review for more detail.
Voucher Adjustments Screen	Use to review all voucher adjustment details that currently exist for this voucher.
Voucher Transaction Review Screen	Displays more detail for G/L accounts charged and other transaction specific data for this voucher.
Redistribute Accounts Screen	Use to make adjustments to the selected posted voucher entry.
End Voucher Information Screen	Displays totals, due dates, and discount information.

This screen appears after you press **ENTER** on the Accounts Payable Inquiry Screen (p. 12-3) or Bank Accounts List Screen (p. 9-13).

If you keyed a vendor number in the **Vendor** field on the Accounts Payable Inquiry Screen (p. 12-3), this screen displays the open/paid invoices for the specified vendor.

If you keyed an invoice number in the **Inv No** field but did not key a vendor number in the **Vendor** field on the Accounts Payable Inquiry Screen (p. 12-3), this screen displays a list of invoices associated with that invoice number regardless of the associated vendor. Select a transaction from the list to display specific invoice information for that associated vendor.

If you keyed a vendor number and a check number and the check number keyed is not valid for this vendor, the last check issued to the vendor will display in the fields at the top of the screen with no detail displayed at the bottom.

When you are reviewing the assignee vendor by keying the assignee number in the **Vendor** field on the Accounts Payable Inquiry Screen (p. 12-3), the vouchers that display are only for the assignee vendor and are not multi-vendor check transactions.

When this screen is accessed from AP Payment Detail Screen (p. 13-10), and the selected check is a multi-vendor check, the screen heading will display **Multi-Vendor**.

Open/Paid Invoices Screen Fields and Function Keys

Field/Function Key	Description
(Company Number)	The company number for the invoice transaction. If you keyed an invoice number (or partial invoice number) on the Accounts Payable Inquiry Screen (p. 12-3), that value will be displayed with the company number. Display
(Vendor Number and Name)	The vendor number and name for the invoice transactions. Display
Open/Paid Invoices / Open Invoices / Paid Invoices	The screen title is the invoice status (open or paid) being shown. Use the F2=OPEN / F2=PAID / F2=ALL key to toggle between displaying open invoices, paid invoices, or all invoices. Display
Asg	This field only displays when an assignee has been specified for the vendor; a Y appears in Asg field in the upper left corner of the screen. When F6=VND ADDR is shown, the assignee vendor number and name display. When F6=ASG ADDR is shown, Asg: Y displays. Display

Open/Paid Invoices Screen Fields and Function Keys

Field/Function Key	Description
(Vendor Address)	<p>Vendor's payee name, address, and country code as specified through Vendors Maintenance (MENU APFILE or MENU POFILE) including the zip/postal code and country code.</p> <p>When F6=VND ADDR is shown, the assignee vendor and address are displayed below the vendor payee name.</p> <p>When F6=ASG ADDR is shown, the vendor payee name and address are displayed.</p> <p>Display</p>
Bus Unit	<p>This field displays the business unit code assigned to the voucher.</p> <p>Display</p>
Tot Open	<p>The total amount of open invoices for this vendor.</p> <p>When International Currency is installed, if the vendor's trading currency differs from the company's local currency, use the F11=LOC CURR / F11=TRD CURR to toggle between displaying the total open amount in the vendor's trading currency and the company's local currency.</p> <p>Display</p>
Last Pay	<p>The most recent date on which a payment was made to this vendor, from any of the available bank accounts or by a credit card payment.</p> <p>Display</p>
Check No	<p>The number of the check with which the last payment to this vendor was made.</p> <p>Display</p>
Amount	<p>The amount of the last payment made to this vendor, from any of the available bank accounts or by a credit card payment.</p> <p>When International Currency is installed, if the vendor's trading currency differs from the company's local currency, use the F11=LOC CURR / F11=TRD CURR to toggle between displaying this amount in the vendor's trading currency and the company's local currency. The currency symbol displays and toggles with the Inv/Open Amt field heading.</p> <p>Display</p>
Terms	<p>Standard payment terms for this vendor.</p> <p>Display</p>
Invoice Number	<p>The original invoice number keyed during Voucher Entry.</p> <p>Display</p>
Inv Date	<p>The date of the original invoice.</p> <p>Display</p>

Open/Paid Invoices Screen Fields and Function Keys

Field/Function Key	Description
Due	<p>This field displays the date on which payment is due. This date displays in MM/DD format.</p> <p>If you are using expanded fields [as defined with Expanded Field Use (MENU XAFIL2)], this date displays as xx/xx/xx format using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, the date displays using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>When International Currency is installed, this field appears only when the F11=LOC CURR / F11=TRD CURR key appears as F11=TRD CURR. If you are also using expanded fields, the full date field will display regardless of the F11=LOC CURR / F11=TRD CURR toggle.</p> <p>Display</p>
Inv/Open Amt	<p>This is the invoice amount that is open for payment, or for fully paid invoices it is the amount that has been paid.</p> <p>For open invoices (the P field is blank) or partially paid invoices (the P field displays a P), this field displays the amount remaining to be paid. For fully paid invoices (the P field displays an F), this field displays the total invoice amount that has been paid.</p> <p>When International Currency is installed, if the vendor's trading currency differs from the company's local currency, use the F11=LOC CURR / F11=TRD CURR to toggle between displaying this amount in the trading currency and the local currency. Notice that the appropriate currency symbol displays as part of the Inv/Open field heading replacing the Amt value.</p> <p>If you are making payments with checks drawn upon a local currency bank account, the local currency equivalent is calculated according to the current exchange rate of the payable. If you are making payments with checks drawn upon a foreign currency bank account, the local currency equivalent is calculated according to the current exchange rate of the bank account.</p> <p>Display</p>
P	<p>The type of payment made for this invoice. An F displays in this field when the invoice is paid in full; a P displays in this field if partial payment has been made. This field is blank for open invoices.</p> <p>Display</p>
HC	<p>The hold code, if the invoice is held for payment.</p> <p>Display</p>
C	<p>If a comment has been entered for this invoice, a Y displays in this field; otherwise, this field is blank.</p> <p>Display</p>

Open/Paid Invoices Screen Fields and Function Keys

Field/Function Key	Description
Dys	<p>The number of aging days for this invoice.</p> <p>For open invoices, aging days are calculated based on the option Inquiry aging option on A/P Company Options Maintenance Screen 2 (p. 49-10).</p> <p>The number of days for paid invoices is a calculation that also is based on your selection to Age paid invoices based on invoice date or due date on A/P Company Options Maintenance Screen 2 (p. 49-10).</p> <hr/> <p>NOTE: A - (negative sign) will display after the number of days if this invoice was paid prior to the due date.</p> <hr/> <p>Refer to those screens for details and examples regarding the differences in the calculation of the number of days.</p> <p>Display</p>
Check No	<p>The number of the check that was used to make partial or full payment for this invoice. When multiple payments have been applied, this will be the last check number posted for the bank account selected for that payment.</p> <p>Display</p>
Check Dt	<p>The check date, displayed in MM/DD format for the corresponding check number.</p> <p>If you are using expanded fields [as defined with Expanded Field Use (MENU XAFIL2)], this date displays as xx/xx/xx format using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, the date displays using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>Display</p>
Selection	<p>Key the reference number that displays to the left of the invoice or vendor for which you want to display detail and press ENTER. The Invoice Activity Screen (p. 12-21) will appear.</p> <p>(N 2,0) Optional</p>
F2=Open / F2=Paid / F2=All	<p>F2=OPEN / F2=PAID / F2=ALL is used as a toggle to display open invoices, paid invoices, or both paid and open invoices.</p> <p>Use to change the display as follows:</p> <ul style="list-style-type: none"> • F2=OPEN - Open and paid invoices are currently displayed. Press to display open invoices only. • F2=PAID - Open invoices are currently displayed. Press to display paid invoices only. • F2=ALL - Paid invoices are currently displayed. Press to display open and paid invoices.

Open/Paid Invoices Screen Fields and Function Keys

Field/Function Key	Description
F3=Exit	Press F3=EXIT to exit the option and return to the menu.
F5=Vnd Info	<p>F5=VND INFO appears only if you keyed a vendor number in the Vendor field on the Accounts Payable Inquiry Screen (p. 12-3).</p> <p>Press F5=VND INFO to display detailed vendor information, including comments. The Vendor Information Screen (p. 12-14) will appear.</p>
F6=Asg Addr / F6=Vnd Addr	<p>F6=ASG ADDR appears only if you keyed a vendor number in the Vendor field on the Accounts Payable Inquiry Screen (p. 12-3).</p> <p>If this vendor has an assignee, press F6=ASG ADDR to alternate the display of the address between assignee and vendor.</p>
F9=Vnd Perf	<p>F9=VND PERF appears only if you keyed a vendor number in the Vendor field on the Accounts Payable Inquiry Screen (p. 12-3).</p> <p>Press F9=VND PERF to display payment history information for the selected vendor. The Vendor Performance Screen (p. 12-19) will appear.</p>
F11=Loc Curr / F11=Trd Curr	<p>F11=LOC CURR / F11=TRD CURR only displays when International Currency is installed and only when the trading currency is different from the local currency and you keyed a vendor number in the Vendor field on the Accounts Payable Inquiry (p. 12-1).</p> <p>Press F11=LOC CURR to display all amounts in the local currency. The local currency symbol will appear as part of the Inv/Open field heading and the Due field will appear.</p> <p>Press F11=TRD CURR to display all amounts in the trading currency. The trading currency symbol will appear as part of the Inv/Open field heading and the Due field will disappear.</p>
F12=Return	Press F12=RETURN to exit from this option and return to the menu.
F13=Nxt Vnd	<p>The F13=NXT VND will only display when this screen is accessed from the Bank Account Inquiry Transaction History Screen (p. 13-6) for payment transactions that involve multiple vendors. When an assignee payment has multiple vouchers for multiple vendors, use F13=NXT VND to display the voucher information that was paid for the next vendor in the check processing run.</p> <p>When the last vendor for this check number has been displayed, the F13=NXT VND will loop back to the first vendor displayed.</p>

This screen appears after you press **F5=VND INFO** on the Open/Paid Invoices Screen (p. 12-7). This screen displays detailed information about the selected vendor and allows you to add and review comments for this vendor.

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
Vendor	<p>The Vendor Number followed by the vendor's payee name, address, zip/postal code, and country code as specified through Vendors Maintenance (MENU APFILE or MENU POFILE).</p> <p>The Assign field will only display if the payee vendor has an assignee vendor. Use the F6=ASG ADDR / F6=VND ADDR to toggle the payee vendor information with the assignee vendor, the assignee vendor's name, address, telephone number, fax number and A/P contact person.</p> <p>Display</p>
Assign	<p>The Assign field will only display if the payee vendor has an assignee vendor.</p> <p>Use F6=ASG ADDR / F6=VND ADDR to toggle the payee vendor information with the assignee vendor, the assignee vendor's name, address, telephone number, fax number and A/P contact person.</p> <p>Display</p>

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
(A/P Contact Person)	<p>The name of the A/P Contact and the telephone number with the country access code and the extension and the fax number with the country access code and the extension as specified through Vendors Maintenance (MENU APFILE or MENU POFILE). This field will toggle with the F6=ASG ADDR / F6=VND ADDR key.</p> <p>Display</p>
Sort Wrđ	<p>The characters defined for sorting this vendor.</p> <p>Display</p>
1099 Reqđ	<p>Indicates if a 1099 form is normally required for this vendor.</p> <p>Display</p>
Pay Days/Pty	<p>The vendor's standard payment days and default payment priority.</p> <p>Display</p>
Fed'l ID	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>The vendor's federal tax identification number.</p> <p>Display</p>
Force Dsc	<p>The vendor's default force discount code.</p> <p>Display</p>
Urg Days/Pty	<p>The vendor's urgency payment days and urgency payment priority.</p> <p>Display</p>
State ID	<p>The vendor's state tax identification number.</p> <p>Display</p>
Sep Check	<p>The default separate check code for this vendor.</p> <p>Display</p>

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
Fed ID Type	<p>This field identifies the Federal Tax ID Type, which defines the type of taxpayer identification number the value in the Tax Id field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type, displays for code 1.</p> <p>SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type, displays for code 2.</p> <p>This field is blank if the Federal Tax ID Type cannot be determined.</p> <p><i>Default Value:</i> The value from the AP Vendor Master File (APVEN).</p> <p>Display</p>
Currency	<p>This field only displays when International Currency is installed.</p> <p>This field displays the currency code for the vendor's trading currency as defined in Vendors Maintenance (MENU APFILE and MENU POFILE).</p> <p>Display</p>
Default Exchange Code	<p>This field only displays when International Currency is installed.</p> <p>This field displays the vendor's default exchange code as defined in Vendors Maintenance (MENU APFILE or MENU POFILE).</p> <p>Display</p>
1099 Cde	<p>This field shows the code entered in the Dft 1099 Cde field in Vendor Master Maintenance (Menu APFILE) for the selected vendor. This code represents the IRS 1099 amount type to be used, by default, for this vendor's vouchers. The amount type description (from the Order Control File ORCTL) appears immediately below this field for reference. Note the description will be truncated if it exceeds 32 characters.</p> <p>If a default 1099 Cde is assigned to the vendor, that code will default into vouchers created for this vendor. If no default 1099 Cde is assigned to the vendor, the default 1099 code set in the AP Company Options (Menu APFIL2), if any, will be used for the vouchers created for this vendor instead. If no default is set in either place, and no 1099 code is manually assigned to a voucher, then the code representing the IRS 1099 amount type of Nonemployee Compensation will be assumed.</p> <p>The 1099 Cde assigned to a voucher is consulted when 1099-MISC and/or 1099-NEC forms are generated to determine if that voucher's value will be included on those forms; the code representing Nonemployee Compensation indicates the value will be included on a 1099-NEC form; a code representing any other amount type indicates the value will be included on a 1099-MISC form.</p> <p>Display</p>

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
Terms	The vendor's payment terms in words to display on reports and forms. Display
AP Class	The AP Class in which this vendor is classified. Display
Dsc Pct/Days	The discount percentage and number of discount payment days offered by this vendor (used for calculations). Display
Hold Cd	The default hold code used to hold vouchers for this vendor that cannot be paid until the hold code is removed. Display
User Area	The user area specified for this vendor. Display

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
(Vendor Comments)	<p>Up to four comments keyed for this vendor are displayed. If additional comments exist, More... is displayed on the screen and you may scroll forward to review all the comments. For each comment line, the following are displayed:</p> <ul style="list-style-type: none"> • Reference Number: Use this number to select a comment to update or delete by keying it in the Sel field on this screen. • Type: The type of comment. This may be “Remit” (for remittance), “Commit” (for commit), or blank. • Comment: The 50 character comment text. • Review: The review date of the comment. <p>Display</p>
Sel	<p>Use to select a vendor comment to change or delete. Key the Reference Number corresponding to the applicable comment text.</p> <p><i>Valid Values:</i> 1 through 4</p> <p>(N 1,0) Optional</p>
Type	<p>When keying a comment, you may specify the comment for the remittance advice as a commitment comment, or as a comment used only for the A/P Inquiry.</p> <p>Key R to print the comment on the remittance advice for all checks written to this vendor.</p> <p>Key C to specify the comment as a commitment comment. This indicates that a promise has been made to this vendor. Commitment comments may be printed on the Comment Action Report (MENU APREPT).</p> <p>Leave this field blank to retain the comment for use with the A/P Inquiry only.</p> <p><i>Valid Values:</i> R, C or blank</p> <p>(A 1) Optional</p>
Text	<p>The text of the vendor comment. When adding a vendor comment, you are required to key only the comment text in this field.</p> <p>(A 50) Optional</p>
Rvw	<p>The review date used to classify comments by date. You may print comments (for which a review date is keyed) on the Comment Action Report (MENU APREPT) for a range of review dates.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system’s Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Optional</p>

Vendor Information Screen Fields and Function Keys

Field/Function Key	Description
F6=Asg Addr / F6=Vnd Addr	<p>F6=ASG ADDR appears only if the vendor being inquired on has an assignee vendor keyed in the Assignee field in Vendors Maintenance (MENU APFILE or MENU POFILE).</p> <p>Use F6=ASG ADDR to toggle and display the vendor information for the assignee vendor has an assignee. Press F6=VND ADDR to display the vendor information for the payee vendor.</p>
F12=Return	Press F12=RETURN to return to the Open/Paid Invoices Screen (p. 12-7).
F24=Delete	<p>F24=DELETE appears only after you select a comment to be edited or deleted (using the Sel field).</p> <p>Press F24=DELETE to delete the selected comment.</p>
Enter	<p>The ENTER key serves several purposes:</p> <p>After keying a comment's Reference Number in the Sel field, press ENTER to select the comment to be changed.</p> <p>After keying text in the Text field, press ENTER to refresh the screen. The text appears in the comment column above.</p> <p>When you are done entering comments, press ENTER to save your entries.</p>

Voucher Header Information Screen Fields and Function Keys

Field/Function Keys	Description
Vendor	The number and name of the payee vendor associated with the voucher.
Co/Voucher	The company the voucher is assigned to and the voucher number created.
Ref No	When the voucher shown is a credit memo or a debit memo against another voucher, the reference voucher number of the original voucher is displayed beneath the Co/Voucher field.
Assign	This field appears only if an assignee vendor has been specified for the payee vendor through Vendors Maintenance (MENU APFILE or MENU POFILE).
(Vendor Address)	The payee's address, city, state/province, zip/postal code, and country which are specified in fields below. If an assignee vendor exists, the address information displayed is for the assignee vendor.
Phone/Extn	The payee's telephone number including the country access code and followed by the extension of the contact person specified for the AP Contact field. If an assignee vendor exists, the address information displayed is for the assignee vendor.

Voucher Header Information Screen Fields and Function Keys

Field/Function Keys	Description
Contact	The AP contact person for this vendor is displayed. If an assignee vendor exists, the AP contact person displayed is for the assignee vendor.
Inv No	The invoice number associated with this voucher.
Inv Desc	A description of the invoice created for this voucher.
Inv Date	The date of the invoice being recorded with this voucher.
Inv Amt	The amount of the invoice which is being recorded with this voucher. When International Currency is installed, the company's local currency amount and local currency symbol will display below the vendor's trading currency amount and trading currency symbol.
User Area	Additional information about this voucher.
Foreign Currency Vendor	This field will only display when International Currency is installed and the vendor being displayed has been defined as a foreign currency vendor in Vendors Maintenance (MENU APFILE or MENU POFIL).
PO No	The number of the purchase order issued when placing the original order being recorded for this voucher.
Due Date	The due date for payment of this voucher.
Terms	The payment terms for this voucher in words.
Cash Dsc %	The cash discount percent to be applied to the voucher.
Dsc Date	The last date on which the cash discount for this voucher is effective.
Dsc Days	The number of days for which the cash discount associated with this vendor is effective.
Pmt Pty	The payment priority used to indicate the priority level for making payments to this vendor.
Urg Pty	The urgency priority is similar to payment priority in that it is used to indicate the priority level for making payment to a vendor.
Urg Date	The date that the value of the urgency priority replaces the payment priority.
Sep Chk	Used to specify if this voucher, when paid, should be paid on the same check as any other vouchers for this vendor or on its own check.
Project	The project associated with this voucher.

Voucher Header Information Screen Fields and Function Keys

Field/Function Keys	Description
Force Dsc	<p>This field displays only when the type of voucher is an invoice. It will not display for credit memo or debit memo type vouchers.</p> <p>The Y or N value to force a cash discount for this voucher.</p>
Bus Unit	<p>The business unit used when posting to the A/P Liability, A/P Expense, and Purchase Tax Accounts for this voucher.</p>
1099 Req	<p>This field indicates with a Y (yes) or N (no) value if a 1099 is required for this voucher.</p>
Tax Id	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>The Federal Tax ID or social security number for the vendor.</p>
ID Tp	<p>This field identifies the Federal Tax ID Type, which defines the type of taxpayer identification number the value in the Tax Id field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>1 displays if the ID Type is an EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type.</p> <p>2 displays if the ID Type is an SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type.</p> <p>This field is blank if the Federal Tax ID Type cannot be determined.</p> <p><i>Default Value:</i> The value from the AP Open Payables Header File (APOHD) or the AP History Header File (APHHD).</p>
1099 Cde	<p>This code represents IRS 1099 amount type applicable to this voucher.</p> <p>This field will be consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. The code representing Nonemployee Compensation indicates this voucher's value will be included on a 1099-NEC form; a code representing any other amount type indicates this voucher's value will be included on the 1099-MISC form. If this field is blank, the code representing Nonemployee Compensation will be assumed.</p>

Voucher Header Information Screen Fields and Function Keys

Field/Function Keys	Description
Dft Exp	The initial expense account that was charged for all or a portion of this invoice. Multiple expense entries are allowed and can be see by pressing ENTER to display the G/L expense distribution on the Voucher Transaction Selection Screen (p. 12-34).
AP Acct	The accounts payable G/L account and its description that was credited upon posting this voucher.
CD Acct	The cash discount G/L account that was established when posting this voucher to be credited if a discount is taken when the voucher is paid.
F10=End Voucher	Press F10=END VOUCHER to display the End Voucher Information Screen (p. 12-47).
F12=Return	Press F12=RETURN to return to the Invoice Activity Screen (p. 12-21).
F15=IC Info	<p>F15=IC INFO appears only when International Currency is installed and only if the vendor's trading currency is different from the company's local currency.</p> <p>Press F15=IC INFO to access data pertaining to the vendor's currency, where you may enter or change the vendor's default exchange code, override the vendor's default exchange rate, enter a lock date for the exchange rate, or specify a currency contract to be used for the transaction. The I/C Currency Information Window will appear. This is a shared screen found in the International Currency User Guide.</p>
Enter	Press ENTER to continue your selections. The Voucher Transaction Selection Screen (p. 12-34) appears.

This screen appears after you press F9=ADJUSTMENTS from the Voucher Transaction Selection Screen (p. 12-34).

Use this screen to review all voucher adjustment details that currently exist for this voucher. A tie-back to the original voucher number will be included so that information can be reviewed in this inquiry (keeping the adjustment entries tied to the original entries) when inquired upon.

If any Distribution accounts were entered as redistribution adjustments, after the posting process occurs, the individual accounts that make up the Distribution account will display on this screen. Also, the transaction amounts for each individual account will reflect the appropriate percentage breakdown according to the Distribution account.

All fields on this screen are display-only.

NOTE: This screen will only show the transaction amount in the local currency of the company, since these accounts were posted automatically within a General Ledger group. General Ledger group entries, such as when manually entered through Transaction Entry (MENU GLMAIN), are only specified in the company's local currency.

NOTE: This is a roll screen. More... appears at the bottom of a roll screen to indicate that more data is available for viewing. Last appears at the bottom of the last screen of data. To scroll through information on roll screens press:

- * PAGE DOWN or SHIFT-ROLL FWD or F7=PAGE DOWN to display the next screen
 - * PAGE UP or SHIFT-ROLL BACK or F8=PAGE UP to display the previous screen.

Voucher Adjustments Screen Fields and Function Keys

Field/Function Keys	Description
Co/Voucher	The company number and voucher number for this voucher.
A/P Jrnl #	The specific Accounts Payable Journal number associated with the adjustment(s).
D/C	Indicates if the expense account is debited or credited. D displays if the amount specified was debited to the selected expense account. C displays if the amount specified was credited to the selected expense account.
G/L Account/Trns Desc	The expense account number and transaction description for the account updated with this voucher transaction. Up to 38 characters of the combined account number and transaction description, and up to 8 transactions for the current voucher are displayed.
Amount	The amount debited/credited to the specified expense account in the voucher transaction, in the local currency of the company.
Vch Line	The line number of the expense transaction. This is the original voucher line reference that the adjustments are linked to.
Post Date	The date on which the voucher 'adjustment' transaction was posted.
G/L Jrnl #	The specific General Ledger Journal number associated with the adjustment(s).
F12=Return	Press F12=RETURN to return to the Voucher Transaction Selection Screen (p. 12-34) once you have finished reviewing the adjustment details.

F10=Update F12=Return

This screen appears after you press the F5=ADJ ACCT function key on the Voucher Transaction Review Screen (p. 12-40).

This screen allows you to make adjustments to the selected posted voucher entry. As you first access this screen, the first line will be protected and this first entry will automatically reverse the selected account (i.e., the account you selected will be reversed from debit to credit or credit to debit, depending on what it was previously). The debit, credit and difference values will display in the top right corner of the screen, and in order to create the group and eventually post the adjustments, they will need to net to zero based on the original amount of the line.

Use this screen to review the reversed account shown, and redistribute the amounts to one or several accounts by entering the debit/credit code, account number, and transaction amount.

NOTE: After entering General Ledger adjustment(s) for voucher line(s), if you select to return to the voucher drill-down screen where the invoice was originally selected in the AP Inquiry without pressing F5=CREATE GROUP, you will receive a warning message that adjustments will be removed if the General Ledger group is not created. If you do not select F5=CREATE GROUP on the End Voucher Information Screen (p. 12-47), these redistribution accounts for the particular session will be cleared from the Accounts Payable Voucher Redistribution work file (APVRD).

You will need to create the General Ledger group for these redistributions once you have made all adjustments. To do this, be sure to select F5=CREATE GROUP on the End Voucher Information Screen (p. 12-47).

Redistribute Accounts Screen Fields and Function Keys

Field/Function Keys	Description
Co/Voucher	The company number and voucher number for this voucher. Display
Line	The line number of the expense transaction. Display
Dr / Cr / Dif	The debit, credit and different values. You will need to redistribute the reversed value in order to net the difference to zero. Display
D/C	The first entry will automatically reverse the selected account (i.e., the account you selected will be reversed from debit to credit or credit to debit, depending on what it was previously). Therefore, for the first entry only, D or C displays indicating Debit or Credit for the reversed account. For the remaining accounts, you need to redistribute the accounts that you want on an individual line basis, so that each adjusted line will net to zero. Key D if the expense account is debited (the amount specified was debited to the selected expense account). Key C if the expense account is credited (the amount specified was credited to the selected expense account). (A 1) Required / Display for first entry line only
G/L Account/Trns Desc	Key a valid G/L account number to be used when redistributing the account on the original voucher line. After entering an amount to be debited/credited and press ENTER , the description of the General Ledger account number will display below the account number. (A 29) Required
Amount	The first entry displays the amount of the debit/credit to the specified expense account. Key the amount (in the available fields) to be debited/credited to the specified expense account in the voucher transaction. NOTE: The transaction amount will be shown only in the local currency of the company, since these accounts will be used to automatically create a G/L group and General Ledger group entries (when manually entered through GLMAIN 1) are only specified in the company's local currency. (N 13,2) Required

Redistribute Accounts Screen Fields and Function Keys

Field/Function Keys	Description
F10=Update	Press F10=UPDATE to accept and save your adjustments, and return to the Voucher Transaction Review Screen (p. 12-40). A warning message will appear if the line does not net to zero. Line adjustments must net to zero before the General Ledger group can be created.
F12=Return	Press F12=RETURN to return to the Voucher Transaction Review Screen (p. 12-40), without saving any adjustments made on this screen.
Enter	Press ENTER to confirm your general ledger transaction entry. The debit , credit , and Dif fields on the top right of the screen will be refreshed for the accounts you selected to post to. When satisfied, be sure to press F10=UPDATE to accept and save your adjustments.

This screen displays when you press **F10=END VOUCHER** on the Voucher Header Information Screen (p. 12-30).

Use this screen to display total information about the voucher, hold codes, due dates, and discount overrides. The **F2=LINE ITEMS** function key is also available to access the Voucher Transaction Selection Screen (p. 12-34) for the current voucher, and the **F5=CREATE GROUP** function key allows you to create a General Ledger group for any redistribution adjustments that were made (**F5=CREATE GROUP** will not appear if adjustments were not made).

NOTE: The link from the original voucher to the redistributed general ledger accounts is not completed until the General Ledger group being created with the **F5=CREATE GROUP** function key is posted. It is recommended that the group is immediately posted on the general ledger screens that are presented in the remaining steps of this process.

The fields on this screen are for display only.

End Voucher Information Screen Fields and Function Keys

Field/Function Keys	Description
Vendor	The number and name of the vendor for whom this voucher has been created.
Co/Voucher	The company number and voucher number selected on the Voucher Transaction Entry Screen (p. 4-101).
Inv No	The number of the invoice recorded with this voucher.

End Voucher Information Screen Fields and Function Keys

Field/Function Keys	Description
Desc	The description of the invoice for this voucher.
Inv Dt	The date of the invoice for which expenses are recorded with this voucher.
Terms	The vendor's payment terms as keyed on the Voucher Header Screen (p. 4-80).
Invoice Amt	<p>The amount of payment as calculated from voucher transactions made for this voucher.</p> <p>When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency amount or the vendor's trading currency amount. The applicable currency symbol displays to the right of the amount.</p>
Cash Dsc	<p>The cash discount amount applicable for this voucher.</p> <p>When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency cash discount amount or the vendor's trading currency cash discount amount.</p>
Due (Date/Priority)	The due date and payment priority specified for this invoice.
Urgent (Date/Priority)	The urgency date and urgency priority specified for this invoice.
Csh Dsc (Date)	The date by which payment must be made for this voucher in order to take advantage of the cash discount offered by the vendor.
Total Debits	<p>The total monetary value of the voucher transactions that are from debit memo's applied to the original voucher.</p> <p>When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency debit memo amount or the vendor's trading currency debit memo amount.</p>
Total Credits	<p>The total monetary value of the voucher transactions that are from credit memo's applied to the original voucher.</p> <p>When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency credit memo amount or the vendor's trading currency credit memo amount.</p>
Total Payments	<p>The total monetary value of payments made for the voucher.</p> <p>When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency total payment amount or the vendor's trading currency total payment amount.</p>

End Voucher Information Screen Fields and Function Keys

Field/Function Keys	Description
Discounts Taken	The monetary value of discounts taken, if any. When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency discount amount taken or the vendor's trading currency discount amount taken.
Open Amount	The monetary amount that remains open for the voucher. When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency open amount or the vendor's trading currency open amount.
Ovr Csh Dsc	The monetary amount of the override value for the cash discount amount. When International Currency is installed, use the F11=LOCAL CURRENCY / F11=TRADING CURRENCY to display the company's local currency override cash discount amount or the vendor's trading currency override cash discount amount.
Hold Code	The hold code assigned to this voucher, which indicates that this voucher cannot be paid until the hold code is removed.
F2=Line Items	Press F2=LINE ITEMS to display the Voucher Transaction Selection Screen (p. 12-34) for the current voucher.
F5=Create Group	F5=CREATE GROUP appears only when redistribution adjustments were made on the Redistribute Accounts Screen (p. 12-44). Press F5=CREATE GROUP to create a General Ledger group for any redistribution adjustments that were made. The General Ledger Transaction Entry Selection Screen in Transaction Entry (MENU GLMAIN) will appear, and you will be prompted to assign/add a unique General Ledger group ID. Refer to General Ledger for details. NOTE: A General Ledger group cannot be created until all redistribution adjustments for a particular line(s) net to zero. Any out of balance has to be resolved before you can use the F5=CREATE GROUP function key to create a General Ledger group.
F11=Loc Curr / F11=Trd Curr	F11=LOC CURR / F11=TRD CURR appears only when International Currency is installed and the trading currency is different from the local currency. Press F11=LOC CURR / F11=TRD CURR to toggle the G/L amounts on the top of the screen between displaying amounts in the company's local currency and the vendor's trading currency.
F12=Header	Press F12=HEADER to display the Voucher Header Information Screen (p. 12-30) for the current voucher.

End Voucher Information Screen Fields and Function Keys

Field/Function Keys	Description
Enter	Press ENTER to complete the voucher review. The Invoice Activity Screen (p. 12-21) will appear.

The Bank Account Inquiry option on the Accounts Payable Main Menu (MENU APMAIN) allows you to access information about any bank account. Through this option you may display such information as:

- The current balance of a bank account
- The bank name, description and account type
- Whether or not checks are allowed to be used from the bank account
- The general ledger account affected
- The status of the account

You may also gain access into transaction history, open/paid invoice information, and others.

Bank Account Inquiry

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Accounts List Screen	Use to select a specific bank account for the transaction. Note that this screen is described in CHAPTER 52: <i>Defining Bank Accounts</i> .
Bank Account Inquiry Screen	Use to review bank account information.
Transaction History Screen	Displays transaction history for a bank account.
AP Payment Detail Screen	Displays payment details for a transaction.
AR Receipt Detail Screen	Displays receipt details for a transaction.

Title	Purpose
Open/Paid Invoices Screen	Note that this screen is described in CHAPTER 12: <i>Using the Accounts Payable Inquiry.</i>

						Last
Selection: ...		Position To Date:				
F3=Exit		F6=Position To		F11=Local Curr	F12=Return	

This screen appears after you press F14=TRANS HIST on the Bank Account Inquiry Screen (p. 13-3).

Use this screen to review the bank account transaction history associated with the selected bank account. You may also select a transaction to display in more detail if that transaction is NOT a deposit, withdrawal, or transfer. A reference number will precede the transaction if it may be selected for further detail.

To position a particular transaction to the top of the screen, use the **Position To Date** field in conjunction with the F6=POSITION TO key.

NOTE: The **Balance** amount on the top portion of this screen may be updated through Bank Account Transaction Entry (MENU APFILE/MENUARFILE) for deposits, withdrawals, transfers, and the transactions posted from other modules.

NOTE: All dates will display in the **Default Date Format** for this user, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's **Default Date Format** specified through System Options Maintenance (MENU XAFIELD).

Transaction History Screen Fields and Function Keys

Field/Function Key	Description
Co	The company number and name associated with the bank account. Display

Transaction History Screen Fields and Function Keys

Field/Function Key	Description
Acct	The bank account number and the name of the bank for the selected bank account. Display
Balance	The balance of the account as a result of the last transaction posted. When International Currency is installed, the bank's trading currency balance amount and currency symbol will display above the company's local currency equivalent balance amount and currency symbol. Display
Reference Number	The reference number associated with the transaction. Key this number in this Selection field to display additional detail relating to the transaction. NOTE: This reference number may or may not display, depending on whether or not further details about the transaction are available. If a reference number does not display, you cannot display further detail for that transaction. Display
Trn Date	The date of the bank account transaction. Display
Transaction	The type of transaction performed that updated the bank account. When International Currency is installed, for foreign currency bank accounts, revaluations will be listed in this field as well as deposits, withdrawals, transfers, and the transactions posted from other modules. Display
Ref	The journal reference number used during the transaction. Display
Pst Date	The G/L posing date defined when the transaction was posted. Display
Amount	The monetary amount of the transaction posted against the bank account. When International Currency is installed, for foreign currency bank accounts, this field displays values in the applicable currency, with the currency symbol displayed to the right of the first amount listed. When the toggle key displays as F11=LOCAL CURR, press to view the local currency equivalents of these amounts. When the toggle key displays as F11=TRADING CURR, press to view the vendor's trading currency amounts. Display

Field/Function Key	Description
F11=Local Curr / F11=Trading Curr	<p>The F11=LOCAL CURR / F11=TRADING CURR key only displays when International Currency is installed and only for foreign currency bank accounts.</p> <p>Press F11=LOCAL CURR to display transaction amounts in the company's local currency. The symbol for the company's local currency will appear to the right of the first amount listed in the Amount field.</p> <p>Press F11=TRADING CURR to display transaction amounts in the foreign bank account's currency. The symbol for the foreign currency will appear to the right of the first amount listed in the Amount field.</p>
F12=Return	Press F12=RETURN to return to the Transaction History Screen (p. 13-6).

Since distributors will at times require that you pay for merchandise prior to receiving it, use this option to review those items which have been vouchered and paid for prior to being received. Once you have received the goods, you may then use this option to create a pre-receipt validation group, or select an existing one, containing vouchers to be validated (i.e., through this option you match or validate pre-paid items to the actual receipt and landing cost history transactions that were created when the goods were received.)

Once voucher groups have been validated through the Pre-Receipt Inv Validation option, linking receipt transactions to the voucher transactions, run the Post Pre-Receipt Inv Val Group option (MENU APMAN) to post pre-receipt transactions for the group. Posting pre-receipt transactions for the group generates the necessary G/L transactions to reduce (credit) the Pre-Receipt Inventory Account for the amount of the original voucher, and clear (debit) the Purchasing Clearing Account for the amount of the receipt.

You also may optionally run the Pre-Receipt Inv Val Edit List option (MENU APMAN), after this option and prior to posting, to print a listing of all G/L transactions that will be generated when the group is posted. Error messages are also printed on this listing, so for account number verification purposes it might be beneficial for you to run this listing prior to each post.

NOTE: A voucher type (**Type is P**) exists in Voucher Entry (MENU APMAN) for creating invoices in order to provide payment for goods received at a later date. You also specify if information will be retained to later facilitate the pre-receipt matching process. Refer to Voucher Entry (MENU APMAN) for details regarding this voucher type.

Pre-Receipt Inv Validation

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Pre-Receipt Voucher Validation Groups List Screen	Displays a list of validated groups.
Pre-Receipt Voucher Validation Group Control Screen	Use to add or maintain a pre-receipt validation group.
Pre-Receipt Invoices List Screen	Displays a list of pre-receipt invoices. Use to select an invoice.
Pre-Receipt Voucher Detail Screen	Use to review and/or update accounts affected by pre-receipt invoices.
Pre-Receipt Voucher Change Screen	Use to change the validate amount for a pre-receipt invoice.
End Validation Confirmation Screen	Use to review the number of vouchers validated in the group.

Pre-Receipt Voucher Validation Groups List Screen

PRE-RECEIPT VOUCHER VALIDATION GROUPS					
	Co	Group	Description	Post Dt	Status
1	1	DCF	Thursday's Receipts	9/24/09	Available

Last

Selection: Company? 01 F3=Exit F5=Add

This screen appears after you select option **12** - Pre-Receipt Inv Validation from the Accounts Payable Main Menu (MENU APMAIN), if a pre-receipt voucher group already exists. It will also appear:

- after pressing **ENTER** on the End Validation Confirmation Screen (p. 14-19) if you are adding a group. The groups previously validated through this option, including the groups just validated, are displayed.
- after you select option **13** - Pre-Receipt Inv Val Edit List
- after you select option **14** - Post Pre-Receipt Inv Val Group

Use this screen to select an existing validation group for processing (via the **Selection** field) or to add a new group.

NOTE: All dates will print in the **Default Date Format** for the user that generated the report, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, the dates print using the system's **Default Date Format** specified through System Options Maintenance (MENU XAFIL).

This screen appears after you enter the required data and press **ENTER** on the Pre-Receipt Voucher Validation Group Control Screen (p. 14-6). Use this screen to review a list of all pre-receipt invoices, or a list of pre-receipt invoices for a specific vendor and/or associated with a specific voucher. You also may use this screen to select a pre-receipt invoice for further review (via the **Selection** field), or validate receipt of items listed on the pre-receipt invoice (via the **F5=VALID COMP** function key).

NOTE: You cannot select a pre-received invoice from this screen if any amount of that invoice is in a different group awaiting posting.

Pre-Receipt Invoices List Screen Fields and Function Keys

Field/Function Key	Description
(Status)	This field indicates the status of the pre-receipt invoices that currently display on this screen. It displays All for all pre-receipt invoices, or Receipts for pre-receipt invoices that have receipts recorded against them (as identified with a Y in the Rc field). Use F2= RECEIPTS / F2=ALL to change the status of the pre-receipt invoices to display. Display
(Group Information)	These fields display the group information you entered on the Pre-Receipt Voucher Validation Group Control Screen (p. 14-6). The company, group ID, and posting date for the group display. Display

Pre-Receipt Invoices List Screen Fields and Function Keys

Field/Function Key	Description
(Reference Number)	<p>This field displays the reference number associated with the pre-receipt invoice. Key this number in the Selection field to display further details about a particular pre-receipt invoice.</p> <p>Display</p>
Vendor	<p>This field only displays when F6=VCH INFO displays and toggles with the F6=VEN INFO function key.</p> <p>The number of the vendor associated with each pre-receipt invoice.</p> <p>Display</p>
Name	<p>This field only displays when F6=VCH INFO displays. displays and toggles with the F6=VEN INFO function key.</p> <p>The name of the vendor associated with each pre-receipt invoice.</p> <p>Display</p>
Voucher	<p>This field only displays when F6=VEN INFO displays and toggles with the F6=VCH INFO function key.</p> <p>The number of the voucher assigned by the system when it was created through Voucher Entry (MENU APMAN).</p> <p>Display</p>
Invoice Number	<p>This field only displays when F6=VEN INFO displays and toggles with the F6=VCH INFO function key.</p> <p>The invoice number keyed on the Voucher Header Screen (p. 4-80) when the voucher was created through Voucher Entry (MENU APMAN).</p> <p>Display</p>
Date	<p>This field only displays when F6=VEN INFO displays and toggles with the F6=VCH INFO function key.</p> <p>The date the voucher was entered through Voucher Entry (MENU APMAN).</p> <p>Display</p>
Invoice Amount	<p>This field displays the total dollar amount of the open payable that was entered into as a pre-receipt invoice. The invoice amount equals the amount of the original invoice less any validated amount.</p> <p>When International Currency is installed, this field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display invoice amounts in the applicable trading currency or in the company's local currency.</p> <p>Display</p>

Pre-Receipt Invoices List Screen Fields and Function Keys

Field/Function Key	Description
Validated Amount	<p>This field displays the total dollar amount that has already been validated for the pre-receipt invoice. An amount displays in this field only if an amount has been selected for validation in a group (the St field is V), but that group has not yet been posted.</p> <hr/> <p>NOTE: If partial receipts have been received and posted, you may perform receipt validation on the partial inventory that has been received. The validation amount reflects the dollar amount on which you have validated receipts.</p> <hr/> <p>This field may be toggled with the F11=LOCAL CURR / F11=TRADING CURR key to display validated amounts in the applicable trading currency with the trading currency symbol displayed to the right of each amount or in the company's local currency with the company's local currency symbol displayed to the right of each amount.</p> <p>Display</p>
Rc	<p>This field indicates if receipts have been posted against the PO included in the pre-receipt invoice.</p> <p>A Y displays in this field if some or all of the items associated with the voucher have been received. That is, a PO number or receiver number was assigned to the voucher detail records and a match was found for the number in the Receipt History File (RCPT).</p> <p>If no receipts have been recorded against the pre-receipt invoice, this field is blank.</p> <hr/> <p>NOTE: You may use the F2= RECEIPTS / F2=ALL function key to display only pre-receipt invoices that have receipts recorded against them (i.e., a Y displays in this field for the pre-receipt invoice.) Additionally, you will not be able to select a PO that was previously selected, if no receipts have yet been posted for that PO.</p> <hr/> <p>Display</p>
St	<p>This field displays the status of each pre-receipt invoice.</p> <p>A V displays in this field if the voucher has already been validated.</p> <p>An R displays in this field if the voucher has been selected for receipt validation in another group, but has not yet been validated. To validate the voucher, select the appropriate voucher in the Selection field and press F5=VALID COMP or ENTER.</p> <p>Display</p>

Pre-Receipt Invoices List Screen Fields and Function Keys

Field/Function Key	Description
Selection	<p>Use this field to select a pre-receipt invoice for review.</p> <p>Key the reference number to the left of the desired invoice and press ENTER. The Pre-Receipt Voucher Detail Screen (p. 14-14) will appear, where you may review detailed information regarding the invoice.</p> <p>(N 2,0) Optional</p>
Vendor	<p>Use this field to limit this screen to a display of pre-receipt invoices for a specific vendor.</p> <p>Key a vendor number and press ENTER. A list of pre-receipt invoices for the vendor you select will display.</p> <p>(A 6,0) Optional</p>
Voucher	<p>Use this field to limit this screen to a display of pre-receipt invoices associated with a specific voucher.</p> <p>Key a voucher number and press ENTER. A list of pre-receipt invoices for the voucher you select will display.</p> <p>(A 7,0) Optional</p>
F2= Receipts/All	<p>Press the F2=RECEIPTS / F2=ALL function key to toggle between a display of pre-receipt invoices that have receipts recorded against them, or a display of all pre-receipt invoices. The Status field changes accordingly.</p> <p>If this key displays as:</p> <ul style="list-style-type: none"> • F2=RECEIPTS, press to display only pre-receipt invoices that have receipts recorded against them (a Y displays in the Rc field). • F2=ALL, press to display all pre-receipt invoices (the Rc field displays a Y or is blank).
F5=Valid Comp	<p>The F5=VALID COMP function key allows you to validate receipt of all items listed on the pre-receipt invoice. After keying a reference number in the Selection field, press F5=VALID COMP to display the AP-PO Receipt Validation Screen (p. 4-28).</p>
F6=Vch Info/Ven Info	<p>Press the F6=VCH INFO / F6=VEN INFO function key to toggle between a display of vendor information or voucher information associated with each pre-receipt invoice.</p> <p>If this key displays as:</p> <ul style="list-style-type: none"> • F6=VCH INFO, press to display the Voucher, Invoice Number, and Date fields. • F6=VEN INFO, press to display the Vendor number and vendor Name.
F10=End	<p>After you complete the validation process, press F10=END to display the End Validation Confirmation Screen (p. 14-19).</p>

Pre-Receipt Invoices List Screen Fields and Function Keys

				F10=Update	F12=Return

This screen appears after you press **ENTER** on the Pre-Receipt Voucher Detail Screen (p. 14-14), if you selected to change a G/L transaction generated by the pre-receipt invoice. Use this screen to change the validated amount for the pre-receipt invoice.

NOTE: When International Currency is installed, to review all currency gain/loss transactions that are generated through Pre-Receipt Inv Validation (MENU **APMAIN**) to account for exchange rate fluctuations for foreign currency vendors, run the Pre-Receipt Inv Val Edit List (MENU **APMAIN**).

For details about the fields on the top portion of this screen, refer to the Pre-Receipt Voucher Detail Screen (p. 14-14).

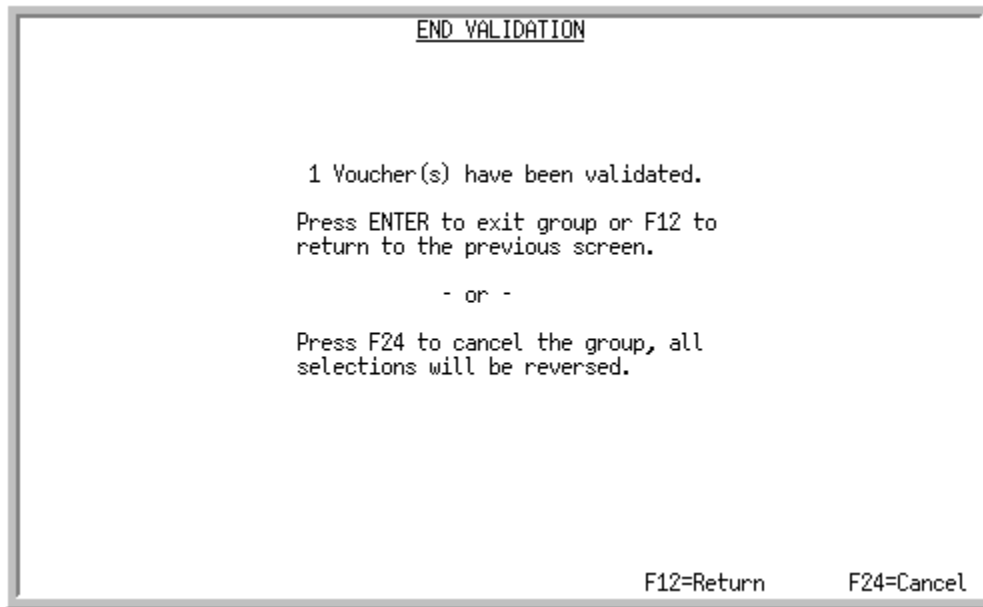

Pre-Receipt Voucher Change Screen Fields and Function Keys

Field/Function Key	Description
(G/L Account Number) / Description	This field displays the number of the G/L account affected by the pre-receipt invoice transaction you have selected to change. The description of the account, as defined through G/L Accounts Maintenance (MENU GLFILE), also displays to the right of the account number.
	Display

Pre-Receipt Voucher Change Screen Fields and Function Keys

Field/Function Key	Description
Invoice Amt	<p>This field displays the total dollar amount involved in the G/L transaction. When International Currency is installed, the invoice amount in the applicable trading currency with the trading currency symbol displayed to the right is shown. The company local currency equivalent value displays below with the local currency symbol to the right.</p> <p>Display</p>
Validate Amt	<p>The validate amount displayed in this field is the same as the dollar amount displayed in the Invoice Amt field, unless it has been changed. To change the validate amount, key the new amount in this field that will be validated for the pre-receipt invoice and press F10=UPDATE to update the selected G/L account.</p> <p>If the value in this field is 0, the Complete field must be Y.</p> <p>If partial receipts have been entered and posted, you may perform receipt validation on the partial inventory that has been received. The validation amount reflects the dollar amount on which you will be validating receipts.</p> <p>When International Currency is installed, the validated amount in the applicable trading currency with the local currency equivalent value displayed below is presented.</p> <p><i>Default Value:</i> The total invoice amount (N 15,2) Optional</p>
Complete	<p>This field determines whether or not the invoice has been completely validated.</p> <p>Key Y for completely validated pre-receipt invoices.</p> <p>Key N for pre-receipt invoices that have not been completely validated.</p> <hr/> <p>NOTE: If the Validate Amt field is 0, the value in this field must be Y.</p> <hr/> <p><i>Default Value:</i> Y (A 1) Required</p>
F10=Update	<p>Press the F10=UPDATE function key to accept your changes and return to the Pre-Receipt Voucher Detail Screen (p. 14-14).</p>
F12=Return	<p>Press the F12=RETURN key to return to the Pre-Receipt Voucher Detail Screen (p. 14-14) without changing any data.</p>

End Validation Confirmation Screen

This confirmation screen appears after you press **F10=UPDATE** on the Pre-Receipt Invoices List Screen. Use this screen to review the number of vouchers that have been validated, or to cancel the entire validated group.

End Validation Confirmation Screen Fields and Function Keys

Field/Function Key	Description
(Confirmation Message)	<p>One of two messages, indicating the following, display on this screen:</p> <ul style="list-style-type: none"> If any vouchers have been selected for validation, the number of vouchers that have been validated is presented. You will be prompted to press ENTER to exit the group, F12=RETURN to return to the previous screen, or F24=CANCEL to cancel the entire validated group. If no vouchers were selected for validation, the message 0 vouchers have been validated is displayed. You will be prompted to press ENTER to exit the group, or F12=RETURN to return to the previous screen. You are not provided with the option to press F24=CANCEL to cancel the entire validated group. <p>Display</p>
F12=Return	Press the F12=RETURN function key to return to the Pre-Receipt Invoices List Screen (p. 14-9).

End Validation Confirmation Screen Fields and Function Keys

Field/Function Key	Description
F24=Cancel	<p>NOTE: The F24=CANCEL function key displays only if at least one voucher has been validated.</p> <p>Press the F24=CANCEL function key to cancel the entire pre-receipt voucher validation group. All selections made previously will be reversed and MENU APMMAIN will appear.</p>
Enter	<p>Press the ENTER key to exit the group and return to MENU APMMAIN. If you are adding a group, pressing ENTER will display the Pre-Receipt Voucher Validation Groups List Screen (p. 14-3).</p>

Use the Pre-Receipt Invoice Validation Edit List option to print the Pre-Receipt Invoice Validation Edit List (p. 15-7). This listing prints all G/L transactions that will be generated when the validation group you created through Pre-Receipt Inv Validation (MENU APMAIN) is posted through Post Pre-Receipt Inv Val Group (MENU APMAIN). You will be able to select the validation group for which the listing will print, as well as the description and the G/L posting date associated with the group.

Additionally, error messages will print on the listing if account errors are detected. Error messages that might occur and print, allowing you to verify account numbers, may be caused from an invalid account, a suspended account, an inter-company account, or an account for a different company than the group's company.

Pre-Receipt Inv Val Edit List

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Pre-Receipt Voucher Validation Groups List Screen	Displays a list of validated groups.
Pre-Receipt Voucher Validation Group Control Screen	Use to select a pre-receipt validation group for editing.
Pre-Receipt Invoice Validation Edit List	Prints all GL transactions that will be generated when the validation group is posted.

Pre-Receipt Voucher Validation Groups List Screen

	001.0002600.000	Purchase Clearing Account		101478	1,155.00	
	001.0001300.000	Purchase Price Variance			143.47	
	001.0005120.000	Pre-Receipt Inventory				1,298.47
			Total for Vendor 100 :		1,298.47	1,298.47
			Total for Group:		1,298.47	1,298.47

This listing prints after you press **ENTER** on the Report Options Screen. This listing prints all G/L transactions that will be generated when the validation group you created through Pre-Receipt Inv Validation (MENU APMAIN) and selected on the Pre-Receipt Voucher Validation Groups List Screen (p. 15-2).

If account errors are detected, error messages also will print on this listing allowing you to use this listing for simple account number verification.

NOTE: This listing is identical to that generated through Post Pre-Receipt Inv Val Group (MENU APMAIN). The only difference, however, is the heading. If this listing prints through this option the heading will indicate **Pre-Receipt Invoice Validation Edit List**. If the listing prints through the post, the heading will indicate **Pre-Receipt Invoice Validation Post List**.

Pre-Receipt Invoice Validation Edit List

Report/Listing Fields	Description
Headings	Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number. Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.
Vendor	The number and name of the vendor for the selected purchase order.
Co	The number of the company.
Voucher	The number of the voucher.
Original Net	The original amount owed to the vendor when the voucher was created.
Current Net	The amount owed to the vendor at the time the listing is printed.
Validated	The amount that was validated during receipt validation.

Pre-Receipt Invoice Validation Edit List

Report/Listing Fields	Description
G/L/Account Number Headings/Description	The accounts affected by this transaction.
PO Number	The number of the purchase order.
Debit	The amount that was debited from each account.
Credit	The amount that was credited to each account.

Use the Post Pre-Receipt Inv Val Group option, once you have run Pre-Receipt Inv Validation (MENU APMAIN) and optionally Pre-Receipt Inv Val Edit List (MENU APMAIN), to post all pre-receipt transactions for the selected group; that is, post receipts that have been vouchered and paid for prior to receiving the goods. You select the validation group to be posted, the description of the voucher group, and the G/L Posting date you want to use for G/L transactions generated by the posting of this group.

When you run this option, the following functions also are performed:

- Validation work transactions are used to generate G/L transactions; these transactions are placed into a G/L posting group and the group is submitted for posting. This causes any pre-paid inventory amounts to be backed out (the Pre-Receipt Inventory Account is credited for the amount of the original voucher), and any Purchasing Clearing Accounts to be cleared (debited) for the amount of the receipt. All work files are therefore cleared and the pre-receipt inventory records are updated to reflect the validation.
- The G/L Transaction Entry Edit - Error Report is generated; this listing indicates the number of entries out of balance, if any. If errors are found, posting is suspended.
- The G/L Transaction Post Journal is generated; this journal indicates each detail transaction that was posted. A separate journal is generated for each journal type.
- The Pre-Receipt Invoice Validation Post List prints indicating the G/L transactions generated for the validation group.

When the International Currency revaluation process takes place for this option, the G/L Transaction Post Report (IC680D) may print, depending on the value specified in the **A/P to G/L** field through Company Name Maintenance (MENU XAFILE). Refer to Revalue Receipts Pending Invoicing (MENU ICRVAL) in the International Currency User Guide for information about this report.

NOTE: This job is submitted to the Transaction Processor.

Post Pre-Receipt Inv Val Group

The screens and/or reports in this option and a brief description are listed in the following table.

Title	Purpose
Pre-Receipt Voucher Validation Groups List Screen	Displays a list of validated groups.
Pre-Receipt Voucher Validation Group Control Screen	Use to submit the pre-receipt validation group to posting.
Pre-Receipt Invoice Validation Post List	Prints the G/L transactions that were generated for this pre-receipt group.

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is AP167FM_GRPLST.

This screen appears after you select option **14** - Post Pre-Receipt Inv Val Group option from the Accounts Payable Main Menu (MENU APMAIN). It will also appear:

- after you select option **12** - Pre-Receipt Inv Validation from the Accounts Payable Main Menu (MENU APMAIN), if a pre-receipt voucher group already exists
- after pressing **ENTER** on the End Validation Confirmation Screen (p. 14-19) if you are adding a group.
- after you select option **13** - Pre-Receipt Inv Val Edit List

Use this screen to select an existing validation group for posting (via the **Selection** field).

NOTE: All dates will print in the **Default Date Format** for the user that generated the report, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, the dates print using the system's **Default Date Format** specified through System Options Maintenance (MENU XAFIELD).

Pre-Receipt Voucher Validation Groups List Screen Fields and Function Keys

Field/Function Key	Description
(Reference Number)	This field displays the reference number of the group. Use this number to select a group for processing by keying this number in the Selection field on this screen.

Current Net	The amount owed to the vendor at the time the listing is printed.
Validated	The amount that was validated during receipt validation.

Pre-Receipt Invoice Validation Post List

Report/Listing Fields	Description
G/L/Account Number Headings/Description	The accounts affected by this transaction.
PO Number	The number of the purchase order.
Debit	The amount that was debited from each account.
Credit	The amount that was credited to each account.

A payment group consists of those open payables for which checks will be printed. Open payables are created when vouchers are posted through Post Vouchers (MENU APMAIN).

Use the Payment Selection option on the Accounts Payable Check Processing Menu (MENU APCHCK) to create a payment group. This is the first step of standard check processing. Once the payment group is created, other options available on this menu allow you to maintain your payment selections (MENU APCHCK), reprint the Payment Selection Report (MENU APCHCK) to review the list of vouchers you currently have selected to pay, or Clear Payment Selections (MENU APCHCK).

To complete standard check processing, you are required to print the following:

- Check Edit List (MENU APCHCK) to check for any errors
- Print Checks / Process ACH or CC Payments (MENU APCHCK)

Checks must also be recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

Payment Selection

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are creating payment selections.
A/P Payment Processing Group Selection Screen	When accessing this screen through Payment Selection (MENU APCHCK), use to select the name of the payment group to create or change.

Title	Purpose
A/P Payment Processing Group Selection List Screen	Displays a list of existing payment groups available for selection.
A/P Payment Group Information Screen	Use to specify criteria for selecting vouchers for the group.
A/P Payment Vendor List Selection Screen	Use to specify vendors for the payment group, and job template to be used, if desired.
A/P Payment Vendor Search Screen	Use to search for vendors to include in the group.
A/P Payment Vendor Range Selection Screen	Use to select a range of vendors to include in the group, and job template to be used, if desired.
A/P Payment Selection Vendor Currency Screen	Use to select the vendor's currency to be used for this group.
A/P Payment Currency Contract Selection Screen	Use to select the vendor, currency contract, vouchers, and priorities for the payment selection group. This only applies if International Currency is installed. You can also use this screen to select a job template, if desired.

This screen appears after selecting a Group ID from the A/P Payment Processing Group Selection Screen (p. 17-5) or the A/P Payment Processing Group Selection List Screen (p. 17-7).

Use this screen to specify the options for selecting vouchers in a payment group.

NOTE: Fields marked with an asterisk (*) may be required when selecting vendor ranges or vendor lists, but are optional when selecting individual vouchers.

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
Company	The company number and name selected on the A/P Payment Processing Company Selection Screen (p. 17-3). Display
Group ID	The Group ID selected on the A/P Payment Processing Group Selection Screen (p. 17-5) or the A/P Payment Processing Group Selection List Screen (p. 17-7). Display
Group Desc	Key a description of the payment group. This description will be carried with this group until the checks are printed and the check numbers are recorded. (A 30) Required

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
Payment Currency	<p>This field only displays if International Currency is installed.</p> <p>Use this field to specify the type of currency you will use for this payment. You may pay any vendor in the company's local currency; however, if you select a currency other than the company's local currency for payments, you may pay only those vendors whose trading currencies are the same as the payment currency you selected.</p> <p>If you are printing checks in the company's local currency, leave this field blank.</p> <p>Key the currency code for the desired payment currency or accept the default.</p> <hr/> <p>NOTE: This field is protected once you have chosen a currency and have selected vouchers payable in that currency. Vouchers payable in different currencies cannot be included in this group.</p> <hr/> <p>The description for the payment currency displays to the right of the currency code. Before a Payment Currency is selected, the Payment Currency Description based on the default local currency for the company is displayed.</p> <p><i>Default Value:</i> Blank, indicating the default currency code for the company selected defined through International Currency Options Maintenance (MENU ICFILE).</p> <p><i>Valid Values:</i> A valid currency code defined through Currency/Exchange Codes Maintenance (MENU ICFILE) for which a bank account exists.</p> <p>(A 3) Required</p>
Check Print Date	<p>The date to be printed on the checks for the invoices selected in this payment group. This date is also used as the posting date in general ledger.</p> <p><i>Valid Values:</i> A valid G/L date, as created through the General Ledger Fiscal Calendar Maintenance (MENU GLFIL2). Key the date using the Default Date Format for this user, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
ACH Payment	<p>Use this field to indicate the voucher payment method. In change mode, you will not have access to this field.</p> <p>Key Y to indicate that this group is for ACH payments. A group consists of one or several vouchers, and each voucher could be for a different vendor.</p> <p>Key N to select paper checks or credit card as the voucher payment method.</p> <hr/> <p>NOTE: All vouchers in a group must have the same ACH flag value.</p> <hr/> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
CC Payment	<p>Use this field to specify if the indicated group will be a credit card payment group.</p> <p>Key Y to indicate that this group is for credit card payments.</p> <p>Key N to select paper checks or ACH as the voucher payment.</p> <hr/> <p>NOTE: All vouchers in a group must have the same CC flag value.</p> <hr/> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
CC Vendor	<p>Once a payment selection group has been created to process a credit card payment, if the CC Payment field is Y, use this field to assign the credit card vendor.</p> <p>Key the vendor's number that represents the credit card used to pay the selected vouchers.</p> <p>Key a ? to launch to the Vendor Search Screen (p. 44-7) and search for the vendor number.</p> <p><i>Default Value:</i> blank</p> <p><i>Valid Values:</i> A vendor that has been flagged as a CC Vendor through Vendors Maintenance (MENU APFILE/MENU POFILE)</p> <p>(A 6) Required, if CC Payment field is Y; otherwise, must be Blank</p>

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
Selection Method	<p>Use this field to determine if vouchers are to be selected by using a range or list of vendors, by individual voucher identification, or by currency contract.</p> <p>Key L to select a list of up to 20 vendors on the A/P Payment Vendor List Selection Screen (p. 17-17).</p> <p>Key R to select a range of vendors on the A/P Payment Vendor Range Selection Screen (p. 17-25). You cannot pay vouchers related to currency contracts with this method. Also, if you selected a foreign payment currency, you can pay only those vendors whose trading currency matches the foreign payment currency.</p> <hr/> <p>NOTE: If you want to select payment for all vendors, key R in this field and leave the from and to vendor fields blank on the A/P Payment Vendor Range Selection Screen (p. 17-25).</p> <hr/> <p>Key V to select individual vouchers on the A/P Payment Selection Maintenance Group Information Screen (p. 18-5).</p> <p>Key C to select payables by currency contract for a particular vendor on the A/P Payment Currency Contract Selection Screen (p. 17-33). Note that if you select to pay by currency contract, only those vouchers associated with the contract you select may be paid in this group. If the payment group already has non-contract payables selected for it, you cannot select to pay by currency contract.</p> <hr/> <p>NOTE: Value C will only display when International Currency is installed.</p> <hr/> <p><i>Valid Values:</i> L, R, V, or C</p> <p>(A 1) Required</p>
Business Unit	<p>To determine if vouchers are to be selected for a single business unit, or for all business units.</p> <p>To select vouchers for a single business unit, enter the business unit here.</p> <p>If the selection is not to be limited by a single business unit, leave this field blank.</p> <hr/> <p>NOTE: This field is not pertinent when selecting individual vouchers.</p> <hr/> <p><i>Valid Values:</i> A business unit defined through Business Units Maintenance (MENU APFILE). For an explanation of the Business Units Maintenance and Listing options, refer to the General Ledger Interface User Guide.</p> <p>(A 2) Optional</p>

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
Pmt Sel Rept Seq	<p>Determines the sequence of the Payment Selection Report By Vendor/By Priority (p. 19-7), printed upon completion of this option.</p> <p>Key P to sequence by payment priority.</p> <p>Key V to sequence by vendor.</p> <hr/> <p>NOTE: This field is not pertinent when selecting individual vouchers.</p> <hr/> <p>(A 1) Optional</p>
Prt Trading Curr	<p>This field only displays when International Currency is installed.</p> <p>This field determines whether or not the vendor's trading currency values will print on the Payment Selection Report.</p> <p>Key Y if you want vendor's trading currency values to print on the Payment Selection Report in addition to the company's local currency values.</p> <p>Key N to accept the default if you do not want these values included in the report.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Force Discounts	<p>Determines if cash discounts should be applied toward payment even if the discount date has passed.</p> <p>Key Y to take cash discounts even if the discount date has passed. Vouchers that have not been assigned a force discount code are assigned a code of Y.</p> <p>Key N to disregard cash discounts for payments made after the discount date. A cash discount is obliged only for payments made before or on the discount date. Vouchers that have not been assigned a force discount code are assigned a code of N.</p> <hr/> <p>NOTE: This field is not pertinent when selecting individual vouchers.</p> <hr/> <p>(A 1) Optional</p>

A/P Payment Group Information Screen Fields and Function Keys

Field/Function Key	Description
Held Invoices	<p>Determines if held invoices should be selected in this payment group. Invoices may have been held in Voucher Entry (MENU APMAIN) with an invoice hold code. Use this field to determine if held invoices should be selected in this payment group.</p> <hr/> <p>NOTE: If you elect to include held invoices in this group, you cannot print checks for a payment group with held invoices. You must reverse payment selection, maintain the voucher, remove the hold code, and then reselect the voucher.</p> <hr/> <p>Key Y if held invoices should be selected in this payment group. Checks cannot be printed for these invoices until they are released from hold through Payment Selection Maintenance (MENU APCHCK).</p> <p>Key N if held invoices should not be selected in this payment group.</p> <hr/> <p>NOTE: This field is not pertinent when selecting individual vouchers.</p> <hr/> <p>(A 1) Optional</p>
Negative Invoices	<p>Determines if negative invoices and credit memos should be selected in this payment group.</p> <hr/> <p>NOTE: Negative invoices can be selected but each check must have a positive total for the group to complete processing.</p> <hr/> <p>Key Y if negative invoices and credit memos should be selected in this payment group.</p> <p>Key N if negative invoices and credit memos should not be selected in this payment group.</p> <hr/> <p>NOTE: This field is not pertinent when selecting individual vouchers.</p> <hr/> <p>(A 1) Optional</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
Enter	<p>Press ENTER to confirm your selections.</p> <ul style="list-style-type: none"> • The A/P Payment Vendor List Selection Screen (p. 17-17) will appear if L was keyed in the Selection Method field. • The A/P Payment Vendor Range Selection Screen (p. 17-25) will appear if R was keyed in the Selection Method field. • The A/P Payment Selection Maintenance Group Information Screen (p. 18-5) will appear if V was keyed in the Selection Method field. • The A/P Payment Currency Contract Selection Screen (p. 17-33) will appear if C was keyed in the Selection Method field.

A/P Payment Vendor List Selection Screen

```

AP PAYMENT SELECTION
Job Template:  _ .....  Modify Selections:  N
Co:      1      A & C Office Supply
Group:  FRIDY  Friday's check run
Vendor Currency?  USD, US Dollars

Through Date:      .....
Vendor Class?      ...
Vendor Number(s):  .....  .....  .....  .....
                  .....  .....  .....  .....
                  .....  .....  .....  .....
                  .....  .....  .....  .....

Payment Priority:  ..      to  ..
Voucher Number:  .....  to  .....

F4=Job Template List  F9=Vendor Search  F12=Return

```

This screen displays if you keyed **L** in the **Selection Method** field on the A/P Payment Group Information Screen (p. 17-11). Use this screen to select vendors for the current payment group, and job template to be used, if desired.

When adding a new group, if there are no open vouchers which meet the criteria keyed on this screen, the voucher group that was specified will not be created.

When maintaining a group and attempting to add additional vouchers to that group, if there are no open vouchers which meet the criteria keyed on this screen, no vouchers are selected for the payment group, and the original group remains unchanged. This is indicated on the Payment Selection Report By Vendor/By Priority (p. 19-7) which is printed after exiting this option.

Additionally, if there are no open vouchers for a particular vendor, the cursor will be positioned on that vendor number and a message will be displayed indicating the lack of open payables.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

A/P Payment Vendor List Selection Screen Fields and Function Keys

Field/Function Key	Description
Job Template	<p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the Modify Selections field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the Modify Selections field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p>NOTE: To review a list of existing job templates that have been created for the Payment Selection job, press F4=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for creating payment groups for a Payment Selection job (that is, AP140P) through Job Template Maintenance (MENU XAFILE).</p> <p>(A 10) Optional</p>

A/P Payment Vendor List Selection Screen Fields and Function Keys

Field/Function Key	Description
Modify Selections	<p>If using a job template (you keyed a job template name in the Job Template field on this screen or selected one with F4=JOB TEMPLATE LIST), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this post run will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the Job Template field is blank.</p> <p>(A 1) Required</p>
Co	<p>The company number and name for which this group is being created.</p> <p>Display</p>
Group	<p>The group and group description assigned/selected on the A/P Payment Processing Group Selection Screen (p. 17-5).</p> <p>Display</p>

A/P Payment Vendor List Selection Screen Fields and Function Keys

Field/Function Key	Description
Vendor Currency	<p>This field only displays when International Currency is installed.</p> <p>Use this field to limit the selection of vouchers for this group to those that are for a specific currency code. If a trading currency code is entered for the payment currency then the vendor currency code will be the same currency. If the payment currency code is the company's local, then the vendor currency can be either local or trading.</p> <p>This field initially displays the selected payment currency code, with the currency description displayed to the right.</p> <p>If you selected a payment currency other than the company default local currency on the A/P Payment Group Information Screen (p. 17-11), this is a display-only field.</p> <p>If you selected the company default local currency as the payment currency, you may key a new currency code in this field to indicate selection of vendor's with a specific currency for this payment group.</p> <p>Key the currency code for the desired trading currency to select vouchers with that trading currency for payment in this group.</p> <p><i>Default Value:</i> The payment currency selected on the A/P Payment Group Information Screen (p. 17-11).</p> <p><i>Valid Values:</i> A valid currency code defined through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A 3) Display/Required</p>

A/P Payment Vendor List Selection Screen Fields and Function Keys

Field/Function Key	Description
Through Date	<p>This date is used in conjunction with either the voucher due date or the voucher discount date and the force discount code to select vouchers for payment. Vouchers meeting all other criteria identified on this screen and meeting one of the following three date criteria will be selected:</p> <ul style="list-style-type: none"> • The Due Date is on or before this date <li style="text-align: center;">OR • The Discount Date is on or before this date AND the Check Print Date is on or before the Discount Date AND there is a discount amount available <li style="text-align: center;">OR • The Discount Date is on or before this date AND there is a discount amount available AND the discount is going to be forced <p>The Discount Date, Due Date, and the Discount Amount are keyed on the Voucher Header Screen (p. 4-80); the Check Print Date and whether or not to force a discount are keyed on the A/P Payment Group Information Screen (p. 17-11)</p> <hr/> <p style="text-align: center;">NOTE: The discount will be forced if the force discount code in the voucher is Y or if the voucher's force discount code is blank and the selection criteria indicates discounts should be forced.</p> <hr/> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
Vendor Class	<p>The vendor A/P class of the vendors whose vouchers are to be selected for payment. Vendor A/P classes are defined through Vendor Class Maintenance (MENU APFILE) and are assigned to vendors through Vendors Maintenance (MENU APFILE).</p> <p>Leave this field blank if you do not wish to select vouchers for payment based on the vendor A/P class.</p> <p>(A 2) Optional</p>
Vendor Number	<p>Key from one to twenty vendor numbers for selection for payment. If you cannot remember the vendor numbers desired, the vendor search function is available with F9=VENDOR SEARCH.</p> <p>(20 @ A 6) Optional</p>

A/P Payment Vendor List Selection Screen Fields and Function Keys

Field/Function Key	Description
Payment Priority	<p>Use this field to select a payment priority or range of payment priorities to be used for payment selection; the vouchers to be selected for payment will be based on the payment priority or range you key in this field. Refer to Invoices by Payment Priority (p. 3-5) for more information.</p> <p>Leave this field blank to have vouchers selected for payment regardless of their payment priority.</p> <p>Key the appropriate payment priority or range of priorities.</p> <p><i>Valid Values:</i> 1 through 3, blank</p> <p>(2 @ A 1) Optional</p>
Voucher Number	<p>The range of voucher numbers to select in the payment group. Voucher numbers are selected or assigned during Voucher Entry (MENU APMAIN).</p> <p>Key the range of voucher numbers.</p> <p>Leave these fields blank if you do not wish to limit your selection based on a range of voucher numbers.</p> <p>(2 @ N 10,0) Optional</p>
F4=Job Template List	<p>Press F4=JOB TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for the Payment Selection job.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>
F9=Vendor Search	<p>Press F9=VENDOR SEARCH to display the A/P Payment Group Information Screen (p. 17-11) from which specific vendors may be chosen for use in determining voucher selection.</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Payment Vendor Search Screen (p. 17-23) without selecting any vouchers for payment.</p>
Enter	<p>Press ENTER after making your selections and to submit the job to the Transaction Processor. The selected Payment Selection will be processed. A message may display indicating that the post job was submitted to the Transaction Processor based on the System Options Maintenance (MENU XAFILE) choice to Suppress Job Submitted to TP message.</p> <p>Additionally, depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p>

A/P Payment Vendor Search Screen

```

AP PAYMENT VENDOR SEARCH

```

This screen appears after pressing F9=VENDOR SEARCH on the A/P Payment Vendor List Selection Screen (p. 17-17)

Use this screen to identify vendors whose vouchers you wish to include in your payment group.

A/P Payment Vendor Search Screen Fields and Function Keys

Field/Function Key	Description
Vendor	To include, in a payment group, all open invoices (that meet all other selection criteria) for a vendor, key the vendor number here. Up to 20 vendors (but at least one) may be entered. If you cannot remember specific vendor numbers, use the Find and City fields to use the search function. (20 @ A 6) Required
Find	Use this field to activate the Vendor Search feature when you do not know the vendor's number. Key the vendor's name or up to 10 characters (the first 10) of one or more words in the vendor's name and press ENTER to display the Vendor Search Screen (p. 44-7). To limit the vendor search by city (i.e., search for the specified vendor name within a particular city), key a city in the City field as well. For more information on using searches and for a description of the search screens, refer to the Cross Applications User Guide. (A 40) Optional

A/P Payment Vendor Search Screen Fields and Function Keys

Field/Function Key	Description
City	<p>When using the Find field to search for a vendor, you can limit the search to a particular city by keying a partial or complete city name in this field.</p> <p>If you enter characters in this field, the Vendor Search Screen (p. 44-7) displays only vendors that meet the criteria specified here and in the Find field.</p> <p>For more information on using search criteria, refer to the Cross Applications User Guide.</p> <p>(A 8) Optional</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Payment Group Information Screen (p. 17-11) or A/P Payment Vendor List Selection Screen (p. 17-17) without selecting any vendors.</p>
Enter	<p>Press ENTER to confirm your selections.</p> <p>If selection criteria was keyed in the Find or Find and City fields, the Vendor Search Screen (p. 44-7) will appear.</p>

A/P Payment Vendor Range Selection Screen

```

      AP PAYMENT SELECTION
Job Template:  _ .....   Modify Selections:  N
Co:          1   A & C Office Supply
Group: FRIDY   Friday's check run

A/P Payment Vendor Range Selection Screen Fields and Function Keys

Field/Function Key	Description
Through Date	<p>This date is used in conjunction with either the voucher due date or the voucher discount date and the discount force code to select vouchers for payment. Vouchers meeting all other criteria identified on this screen and meeting one of the following three date criteria will be selected:</p> <ul style="list-style-type: none"> • The Due Date is on or before this date. <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> • The Discount Date is on or before this date AND the Check Print Date is on or before the Discount Date AND there is a discount amount available. <p style="text-align: center;">OR</p> <ul style="list-style-type: none"> • The Discount Date is on or before this date AND there is a discount amount available AND the discount is going to be forced. <p>The Discount Date, Due Date, and the Discount Amount are keyed on the Voucher Header Screen (p. 4-80); the Check Print Date and whether or not to force a discount are keyed on the A/P Payment Group Information Screen (p. 17-11).</p> <hr/> <p style="text-align: center;">NOTE: The discount will be forced if the Force Dsc in the voucher is Y or if the voucher's force discount is blank and the selection criteria indicates discounts should be forced.</p> <hr/> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
Vendor Class	<p>The vendor A/P class of the vendors whose vouchers are to be selected for payment. Vendor A/P classes are defined through Vendor Class Maintenance (MENU APFILE) and are assigned to vendors through Vendors Maintenance (MENU APFILE).</p> <p>Leave this field blank if you do not wish to select vouchers for payment based on the vendor A/P class.</p> <p>(A 2) Optional</p>
Vendor Number	<p>Key the range of vendor numbers. Vouchers for those vendors in the range are selected for payment.</p> <p>Leave both fields blank to select vouchers for all vendors.</p> <p>(2 @ A 6) Required</p>

A/P Payment Vendor Range Selection Screen Fields and Function Keys

Field/Function Key	Description
Payment Priority	<p>Use this field to select a payment priority or range of payment priorities to be used for payment selection; the vouchers to be selected for payment will be based on the payment priority or range you key in this field. Refer to Invoices by Payment Priority (p. 3-5) for more information.</p> <p>Leave this field blank to have vouchers selected for payment regardless of their payment priority.</p> <p>Key the appropriate payment priority or range of priorities.</p> <p><i>Valid Values:</i> 1 through 3, blank</p> <p>(2 @ A 1) Optional</p>
Voucher Number	<p>The range of voucher numbers to select in the payment group. Voucher numbers are selected or assigned during Voucher Entry (MENU APMAIN).</p> <p>Key the range of voucher numbers.</p> <p>Leave these fields blank if you do not wish to limit your selection based on a range of voucher numbers.</p> <p>(2 @ N 10,0) Optional</p>
F4=Job Template List	<p>Press F4=JOB TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for a Payment Selection job.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Payment Group Information Screen (p. 17-11) without selecting any vouchers for payment.</p>
Enter	<p>Press ENTER after making your selections and to submit the job to the Transaction Processor. The selected Payment Selection will be processed. A message may display indicating that the post job was submitted to the Transaction Processor based on the System Options Maintenance (MENU XAFILE) choice to Suppress Job Submitted to TP message.</p> <p>Additionally, depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p>

A/P Payment Selection Vendor Currency Screen

```
AP PAYMENT SELECTION

Vendor Currency? _.. US Dollars

F12=Return
```

This screen will only display if International Currency is installed.

This screen displays after pressing **ENTER** on the A/P Payment Group Information Screen (p. 17-11) if you selected **V** in the **Selection Method** field. This screen displays only if a vendor currency has not been previously selected for the group. Otherwise, this screen will be bypassed and the A/P Payment Processing Group Selection List Screen (p. 17-7) will display. Use this field to enter the currency code for the trading currency of the vendors you wish to pay.

A/P Payment Selection Vendor Currency Selection Screen Fields and Function Keys

Field/Function Keys	Description
Vendor Currency	<p>This field only displays if International Currency is installed.</p> <p>Use this field to limit the selection of vouchers for this group to those that are for a specific currency code. If a trading currency is entered for the payment currency then the vendor currency will be the same currency. If the payment currency is local then the vendor currency can be either local or trading.</p> <p>This field displays the code for the vendor's trading currency, with the currency description displayed to the right.</p> <p>If you selected a payment currency other than your default local currency on the A/P Payment Group Information Screen (p. 17-11), this is a display-only field.</p> <p>If you selected your default local currency as the payment currency, you may key a new currency code in this field to indicate the vendor's currency.</p> <p>Key the currency code for the desired currency if you wish to change the currency originally selected on the A/P Payment Group Information Screen (p. 17-11)</p> <p><i>Default Value:</i> The payment currency code selected on the A/P Payment Group Information Screen (p. 17-11).</p> <p><i>Valid Values:</i> A valid trading currency code defined through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A 3) Display/Require</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Payment Group Information Screen (p. 17-11).</p>
Enter	<p>Press ENTER to accept the vendor currency you selected. The A/P Payment Selection Maintenance Group Information Screen (p. 18-5) will display.</p>

A/P Payment Currency Contract Selection Screen

```

      AP PAYMENT SELECTION

Job Template:  .....  Modify Selections:  N

Voucher Number:  ..... to .....

F4=Contract List  F5=Job Template List  F9=Vendor Search  F12=Return

```

This screen displays if **C** was entered in the **Selection Method** field on the A/P Payment Group Information Screen (p. 17-11), enabling currency contracts to be selected for a designated vendor.

Use this screen to select the criteria to be used to select vouchers for the payment selection group. Vouchers will be selected based on a specific currency contract for the indicated vendor.

You can also use this screen to select a job template, if desired.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

A/P Payment Currency Contract Selection Screen Fields and Function Keys

Field/Function Keys	Description
Job Template	<p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the Modify Selections field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the Modify Selections field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p>NOTE: To review a list of existing job templates that have been created for the Payment Selection job, press F5=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for creating payment groups for a Payment Selection job (that is, AP140P) through Job Template Maintenance (MENU XAFILE).</p> <p>(A 10) Optional</p>

A/P Payment Currency Contract Selection Screen Fields and Function Keys

Field/Function Keys	Description
Modify Selections	<p>If using a job template (you keyed a job template name in the <i>Job Template</i> field on this screen or selected one with F5=JOB TEMPLATE LIST), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this post run will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the Job Template field is blank.</p> <p>(A1) Optional</p>
Co	<p>The company number and name for which this group is being created.</p> <p>Display</p>
Group	<p>The group and group description assigned/selected on the A/P Payment Processing Group Selection Screen (p. 17-5).</p> <p>Display</p>

A/P Payment Currency Contract Selection Screen Fields and Function Keys

Field/Function Keys	Description
Vendor Currency	<p>This field only displays if International Currency is installed.</p> <p>Use this field to limit the selection of vouchers for this group to those that are for a specific currency code. If a trading currency is entered for the payment currency then the vendor currency will be the same currency. If the payment currency is local then the vendor currency can be either local or trading.</p> <p>This field displays the code for the vendor's trading currency, with the currency description displayed to the right.</p> <p>If you selected a payment currency other than the company default local currency on the A/P Payment Group Information Screen (p. 17-11), this is a display-only field.</p> <p>If you selected the company default local currency as the payment currency, you may key a new currency code in this field to indicate the vendor's currency.</p> <p>Key the currency code for the desired currency if you wish to change the currency originally selected on the A/P Payment Group Information Screen (p. 17-11)</p> <p><i>Default Value:</i> The payment currency code selected on the A/P Payment Group Information Screen (p. 17-11).</p> <p><i>Valid Values:</i> A valid trading currency code defined through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A 3) Display/Required</p>

A/P Payment Currency Contract Selection Screen Fields and Function Keys

Field/Function Keys	Description
Through Date	<p>This date is used in conjunction with either the voucher due date or the voucher discount date and the force discount code to select vouchers for payment. Vouchers meeting all other criteria identified on this screen and meeting one of the following three date criteria will be selected:</p> <ul style="list-style-type: none"> • The Due Date is on or before this date <p>-OR-</p> <ul style="list-style-type: none"> • The Discount Date is on or before this date AND the Check Print Date is on or before the Discount Date AND there is a Discount Amount available <p>-OR-</p> <ul style="list-style-type: none"> • The Discount Date is on or before this date AND there is a Discount Amount available AND the discount is going to be forced <p>The voucher Due Date, Discount Date, Discount Amount, and Force Dsc fields appear on the Voucher Header Screen; the Check Print Date and Force Discounts fields appear on the A/P Payment Group Information Screen (p. 17-11).</p> <hr/> <p>NOTE: The discount will be forced if the force discount code on the Voucher Header Screen is Y, or if the voucher's force discount code is blank and the selection criteria indicates discounts should be forced.</p> <hr/> <p>(N 6,0) Required</p>
Vendor Number	<p>Use this field to select the vendor associated with the currency contract for which vouchers will be selected.</p> <p>Key the appropriate vendor number. If you do not recall the vendor number, press F9=VENDOR SEARCH to activate the vendor search feature.</p> <p>(A 6) Optional</p>
Currency Contract	<p>Use this field to specify the currency contract associated with the vendor keyed in the Vendor Number field.</p> <p>Key the number of the appropriate currency contract; this contract must be of the same currency as the payment currency on the A/P Payment Group Information Screen (p. 17-11). If you do not recall the contract, press F4=CONTRACT LIST to access a list of contracts.</p> <p>(A 7) Required</p>

A/P Payment Currency Contract Selection Screen Fields and Function Keys

Field/Function Keys	Description
Payment Priority	<p>Use this field to select a payment priority or range of payment priorities to be used for payment selection; the vouchers to be selected for payment will be based on the payment priority or range you key in this field. Refer to Invoices by Payment Priority (p. 3-5) for more information.</p> <p>Leave this field blank to have vouchers selected for payment regardless of their payment priority.</p> <p>Key the appropriate payment priority or range of priorities.</p> <p><i>Valid Values:</i> 1 through 3, blank</p> <p>(2 @ N 1,0) Optional</p>
Voucher Number	<p>Use this field to select the voucher number or range of voucher numbers that will be included in the payment group. Voucher numbers are selected or assigned during Voucher Entry.</p> <p>Key the appropriate voucher number or range of voucher numbers.</p> <p>Leave this field blank to select all vouchers matching other criteria on this screen for payment.</p> <p>(2 @ N 10,0) Optional</p>
F4=Contract List	<p>Press F4=CONTRACT LIST to access a list of currency contracts for the vendor keyed in the Vendor Number field. The Currency Contracts List Screen appears. Refer to Currency Contracts Maintenance (MENU ICFILE) of the International Currency User Guide for details about this screen.</p>
F5=Job Template List	<p>Press F5=JOB TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for a Payment Selection job.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>
F9=Vendor Search	<p>Press F9=VENDOR SEARCH to display the Vendor Search Screen (p. 44-7).</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Payment Group Information Screen (p. 17-11) without selecting any vouchers for payment.</p>
Enter	<p>Press ENTER after making your selections and to submit the job to the Transaction Processor. The selected Payment Selection will be processed. A message may display indicating that the post job was submitted to the Transaction Processor based on the System Options Maintenance (MENU XAFILE) choice to Suppress Job Submitted to TP message.</p> <p>Additionally, depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p>

Use the Payment Selection Maintenance option on the Accounts Payable Check Processing Menu (MENU APCHCK) to modify vouchers selected for payment in a payment group keyed through Payment Selection (MENU APCHCK). You may accept or deny payment, make partial payments, and change a voucher.

Payment Selection Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are modifying payment selections.
A/P Payment Processing Group Selection Screen	Use to specify the payment group for maintenance.
A/P Payment Selection Maintenance Group Information Screen	Use to view/change group information for the selected group.
Payment Selection Maintenance Screen	Use to specify criteria for selecting vouchers for the group.
Voucher Selection Screen	Use to specify vendors for the payment group.
Payment / Voucher Selection Maintenance Change Screen	Use to select a range of vendors to include in the group.

A/P Payment Processing Company Selection Screen

```
AP PAYMENT PROCESSING

Company? 01

F3=Exit
```

This screen appears after selecting option 2 - Payment Selection Maintenance from the Accounts Payable Check Menu (MENU APCHCK) and you have System Options (MENU XAFILE) set to Y for **Multi Company** to activate multi-company mode.

Use this screen to select the company for which a payment group will be maintained.

This option may not be processed for a particular company, if any of the following are true for that company:

- Check editing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Check printing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Checks have been printed for this company but the check numbers have not yet been recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is APCMPFM_SELECT.

A/P Payment Processing Company Selection Screen Fields and Function Keys

Field/Function Key	Description

This screen appears after you press **ENTER** on the A/P Payment Selection Maintenance Group Information Screen (p. 18-5).

Use this screen to view and change the vouchers selected in the payment group. You can limit the vendors and/or vouchers to display on this screen using the **Vendor Number** and **Voucher Number** limits fields on the lower portion of this screen.

Vouchers display sequentially by Payment Selection Number. That is, the order in which the voucher was selected through Payment Selection (MENU APCHCK).

You can also use this screen to make partial payments.

NOTE: This is a roll screen. **More...** appears at the bottom of a roll screen to indicate that more data is available for viewing. Last appears at the bottom of the last screen of data. To scroll through information on roll screens press:

* PAGE DOWN or SHIFT-ROLL FWD or F7=PAGE DOWN to display the next screen

* PAGE UP or SHIFT-ROLL BACK or F8=PAGE UP to display the previous screen.

Payment Selection Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Co	The company selected on the A/P Payment Processing Company Selection Screen (p. 18-2) for which payments will be selected for processing. Display
Pay	This field initially displays the total payment amount selected in this payment group. This value is updated immediately when vouchers are selected or unselected, or if a partial payment is made. When International Currency is installed, press F11=LOCAL CURR / F11=TRADING CURR to toggle and view the total amount of vouchers selected in this payment group in the payment/company's local currency or the vendor's trading currency. Display
Disc	The total amount of discounts available to be taken in this payment group. This value is updated immediately when changes are made on this screen. When International Currency is installed, press F11=LOCAL CURR / F11=TRADING CURR to toggle and view the total discount amount for this payment group in the payment/company's local currency or the vendor's trading currency. Display
Pay Curr	This field will only display if International Currency is installed. This field displays the currency code and description for the payment currency selected for this payment group on the A/P Payment Processing Group Selection Screen (p. 18-4). The vouchers you select for this group must be payable in the currency displayed in this field. Display

Voucher Selection Screen Fields and Function Keys

Field/Function Key	Description
Ref	The reference number of an invoice in the payment group. Display
Voucher / Inv No	This column displays the original voucher number associated with the item, or, if toggled with F4=INVOICE / F4=VOUCHER, the invoice number for the voucher displays in the column. Display
ACH	This field appears when the F4=INVOICE / F4=VOUCHER function key is toggled to show the Voucher number on the Payment Selection Maintenance Screen (p. 18-9) screen. This field indicates the group payment method. Y displays if this voucher payment method is designated as ACH payments. N displays if this voucher payment method is designated as paper checks or credit card. All vouchers in a payment group will have the same ACH field assigned. Display
Vendor	The name of the vendor to receive payment for the voucher, or the vendor number, as toggled with the F6=VENDOR NUMBER / F6=VENDOR NAME function key on the Payment Selection Maintenance Screen (p. 18-9) screen. Display
Pay Amt	The total amount of payment for the selected voucher. The initial value for the field is the gross amount of the payment for the voucher. Discounts will be subtracted from this value for the actual payment to the vendor. When International Currency is installed, this column displays, in the vendor's trading currency, the total amounts of the payments applied to the vouchers. The currency symbol displays as part of the Pay Amt column heading. You may press F11=LOCAL CURR / F11=TRADING CURR to view the payment currency/company local currency equivalents of these amounts with the currency symbol as part of the Pay Amt column heading. Display
Pay	Indicates if this voucher may be paid in full, in part, or not at all. One of the following will display: <ul style="list-style-type: none"> F indicates that this voucher is selected to be paid in full. P indicates that this voucher is selected for partial payment. N indicates that this voucher is not selected for payment. Display

Voucher Selection Screen Fields and Function Keys

Field/Function Key	Description
Dsc	<p>Indicates if a discount has been taken on this invoice.</p> <p>Y indicates that a discount has been taken. The Dsc Amt field on the Payment / Voucher Selection Maintenance Change Screen (p. 18-21) contains the discount amount taken.</p> <p>N indicates that a discount has not been taken on this voucher.</p> <p>Display</p>
Hold	<p>Indicates if this voucher is held for payment with an invoice hold code. If an invoice is held, the hold code is displayed in this field.</p> <p>Display</p>
Cmt	<p>Indicates if a comment has been keyed for this voucher on the Payment / Voucher Selection Maintenance Change Screen (p. 18-21).</p> <p>Y indicates that a comment has been keyed for this voucher.</p> <p>N indicates that a comment has not been keyed for this voucher.</p> <p>Display</p>
Voucher	<p>The voucher number to be included in the current payment group. The voucher cannot currently be in use or part of another payment selection run.</p>

Important

When International Currency is installed, the voucher you enter in this field must be payable in the currency displayed in either the **Pay Curr** field or the **Vnd Curr** field on this screen. Vouchers with different currencies will not be available for selection. Also, the payment group must specify a currency contract in order to select a voucher associated with a currency contract.

This screen appears when a voucher is selected for change with **C** in the **Opt** field on the Payment Selection Maintenance Screen (p. 18-9) or when a voucher is selected on the Voucher Selection Screen (p. 18-16) while in Regular Entry mode.

Use this screen to change the detail information for a voucher being included in a payment group. When changing a voucher, you may do the following:

- Make a partial payment for an invoice. This is the only means by which partial payments may be made.
- Remove or add a hold code to an invoice
- Change the discount amount or the force discount code
- Key a comment for the voucher and determine if that comment is for internal use or will print on the remittance advice.

Field/Function Key	Description
Dsc Amt	<p>Use this field to change the discount amount applicable to the voucher. Discount amounts are calculated based on the original invoice amount. When the check containing this voucher is printed, this is the amount of the discount that will be applied to this voucher.</p> <p>If the check date is greater than the cash discount date, this cash discount will not be used unless you force the discount by keying Y in the Force Dsc field.</p> <p>Key the new amount of the cash discount. If making a partial payment, new discount amounts are not automatically calculated for you. You must specify the amount of the cash discount for the partial payment.</p> <p>When International Currency is installed, key the new amount in the trading currency, not exceeding the discount available (Avl Dsc) or the payment amount (Pay Amt). If the payment amount is negative or if the discount date is before the check print date, a discount amount cannot be keyed. A discount will, however, be allowed if the payment amount is positive and the force discounts field is Y. Press F11=LOCAL CURR / F11=TRADING CURR to toggle between the voucher's original discount amount in the trading currency and the company's local currency.</p> <p><i>Default Value:</i> The voucher's original discount amount.</p> <p><i>Valid Values:</i> The value cannot exceed the discount available for the invoice; it cannot exceed the payment amount of the invoice; and it cannot be keyed if the payment amount is negative (credit).</p> <p>(N 13,2) Required</p>
Sep Chk	<p>Indicates if a separate check is printed for this invoice.</p> <p>Key Y to print a check for this invoice only.</p> <p>Key N to print this invoice with other invoices for the same vendor, payee, or assignee.</p> <p><i>Default Value:</i> The separate check code keyed in Vendors Maintenance (MENU APFILE/MENU POFILE). However, if the vendor is defined as the one time vendor (MENU APFIL2), then this field will default to Y and cannot be changed.</p> <p>(A 1) Required</p>

Payment / Voucher Selection Maintenance Change Screen Fields and Function Keys

Field/Function Key	Description
Force Dsc	<p>Used to indicate if the cash discount should be applied to this invoice regardless if payment is made after the discount date.</p> <p>Key Y to force a cash discount for this invoice even if the discount date has passed.</p> <p>Key N if you do not want to force cash discounts if the discount date has passed.</p> <p><i>Default Value:</i> The force discount code keyed for this voucher in Voucher Entry (MENU APMAIN) or keyed for this payment group in Payment Selection (MENU APCHCK).</p> <p>(A 1) Required</p>
Hold Cd	<p>Indicates if this voucher is held for payment with an invoice hold code. If an invoice is held, the hold code is displayed in this field.</p> <p>As long as the voucher is held, you cannot specify a payment amount for the voucher, or reverse a voucher payment selection.</p> <p>Vouchers will be automatically held if both of the following are true:</p> <ul style="list-style-type: none"> • There is a variance between the invoice amount and the voucher amount that exceeds the Cost Variance Warning Percent or Cost Variance Warning Value set up in Purchasing Options Maintenance (MENU XAFILE). • There is an entry in the PO-AP Hold Code field in Purchasing Options Maintenance. <p>Key the voucher hold code, if desired. Remove an existing hold code to allow a voucher to be paid.</p> <p>To release a voucher from this hold, you must be authorized as defined for the Allow the Release of Vouchers on Variance Hold action authority through Application Action Authority Maintenance (MENU XASCTY).</p> <p>(A 2) Optional</p>
Comment	<p>You may optionally key a payment comment for this voucher. The payment comment will be for internal use if Remit is set to N or the payment comment will print on the check remittance advice if Remit is set to Y.</p> <p>(A 50) Optional</p>
Remit	<p>Indicates if a comment will print on the check remittance advice.</p> <p>Key Y if you want the Comment to print on the remittance advice for this invoice.</p> <p>Key N if you do not want the Comment to print on the remittance advice for this invoice. The comment is available for inquiry only.</p> <p>(A 1) Required</p>

Payment / Voucher Selection Maintenance Change Screen Fields and Function Keys

Field/Function Key	Description
F11=Local Curr/ Trading Curr	<p>F11=LOCAL CURR / F11=TRADING CURR displays only if the vendor trading currency is different from the payment/company's local currency.</p> <p>Press F11=LOCAL CURR / F11=TRADING CURR to toggle between displaying open payable and discount amounts in the payment/company's local currency and displaying these amounts in the trading currency.</p> <p>Press F11=LOCAL CURR to display the voucher's open payable and discount amounts in the payment/company's local currency. The symbol for the company's local currency will appear to the right of the Open Amt heading.</p> <p>Press F11=TRADING CURR to display the voucher's open payable and discount amounts in the vendor's trading currency. The symbol for the trading currency will appear to the right of the Open Amt heading.</p>
F12=Previous	<p>Press F12=PREVIOUS to return to the previous screen without making any selections.</p>
Enter	<p>Press ENTER to update any changes made on the screen. Fields that have been changed will redisplay. Press ENTER a second time to return to the Payment Selection Maintenance Screen (p. 18-9).</p>

Use the Payment Selection Report option on the Accounts Payable Check Processing Menu (MENU APCHCK) to print the Payment Selection Report By Vendor/By Priority (p. 19-7). Use this report to list the vouchers selected in a payment group. This report prints immediately after creating a payment group through Payment Selection (MENU APCHCK).

Payment Selection Report

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are printing the Payment Selection Report.
A/P Payment Processing Group Selection Screen	Use to specify the payment group for the edit report.
A/P Payment Selection Report Screen	Use to set the report printing sequence.
Payment Selection Report By Vendor/By Priority	Shows a sample report.

A/P Payment Processing Company Selection Screen

AP PAYMENT PROCESSING

Company? 01

F3=Exit

This screen appears after selecting option **3** - Payment Selection Report from the Accounts Payable Check Menu (MENU APCHCK) and you have System Options (MENU XAFILE) set to **Y** for **Multi Company** to activate multi-company mode.

Use this screen to select the company for which a payment group Selection Report will be printed.

This option may not be processed for a particular company, if any of the following are true for that company:

- Check editing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Check printing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Checks have been printed for this company but the check numbers have not yet been recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is APCMPFM_SELECT.

A/P Payment Processing Company Selection Screen Fields and Function Keys

This report may be printed through this option after you press **ENTER** from the Report Options Screen, and is automatically printed after creating a payment group through Payment Selection (MENU APCHCK). This report prints a summary of the vouchers in the payment group. Use this report to verify that you have accurately selected vouchers for payment.

How This Report is Sequenced

You may print the report in sequence by vendor or by payment priority.

PRINT BY PAYMENT PRIORITY: If you keyed **P** in the **Report Sequence** field on the A/P Payment Processing Group Selection Screen (p. 19-4), the report is sequenced by payment priority. Vouchers with a higher payment priority (highest = 1) are printed before those vouchers with a lower payment priority (lowest = 3); urgency priority is used if applicable.

For each payment priority, vouchers are printed alphabetically by vendor name. Totals are printed for each vendor, each payment priority, and for the payment group.

PRINT BY VENDOR: If you keyed **V** in the **Report Sequence** field on the A/P Payment Processing Group Selection Screen (p. 19-4), the report prints alphabetically by vendor name. Total payments are printed for each vendor and for the payment group.

NOTE: When a voucher is created, a vendor sort word from the vendor 'at that time' and that sort word information is stored with the voucher. Then, when the voucher gets added to a payment selection group, the sort word from the voucher (not the vendor) is used and is stored with the multi-membered AP Payment Selection File (APSEL), with the applicable company member. When this report is printed, the information this report uses for sort word is what is stored in the multi-membered APSEL file (not the voucher or vendor).

Payment Selection Report (By Vendor/By Priority)

Report/Listing Fields	Description
Check Date	<p>The check print date assigned to the payment group when the payment group was created through Payment Selection (MENU APCHCK). This date is printed on the checks for this group.</p> <p>The date is shown in the Default Date Format for this user specified through Register User ID's (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFIELD).</p>
ACH	<p>The Automatic Clearing House (ACH) payment method from the AP Payment Selection Group File (APSGP).</p> <p>Y prints if this voucher group payment method is designated as ACH payments.</p> <p>N prints if this voucher group payment method is designated as paper checks or credit card.</p>
Ref	<p>The reference number of an invoice in this payment selection group. This number is assigned to each voucher in the sequence that the voucher is selected through Payment Selection (MENU APCHCK). Use this number to reference a voucher that requires maintenance in Payment Selection Maintenance (MENU APCHCK).</p>
Vendor	<p>The number and name of the vendor.</p>
Pmt Pty	<p>The payment priority assigned to each voucher. A payment priority is assigned to a voucher during Voucher Entry (MENU APMAIN), as follows:</p> <ul style="list-style-type: none"> • Payment Priority 1 - High priority • Payment Priority 2 - Medium priority • Payment Priority 3 - Low priority <p>The optional urgency priority is used (if specified) after the urgency date has passed.</p>

Payment Selection Report (By Vendor/By Priority)

Report/Listing Fields	Description
Due/Disc	<p>The due date and discount date of a voucher. The due date is always printed. The discount date is printed if a discount is applicable for the voucher.</p> <p>The date is shown in the Default Date Format for this user specified through Register User ID's (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p>
Pmt Amt/Disc Taken	<p>The amount paid and the discount taken for the voucher. based on the selected payment currency. The payment amount of full or partial payment for the voucher. Partial payment is made if this value is less than the open amount. The total amount of the discount is also printed, if applicable. This amount cannot be greater than the discount available amount.</p>
Open Amt/Disc Avail	<p>The total payment amount and discount available for the voucher based on the selected payment currency. The payment amount is the total amount owed for the voucher before discounts are taken.</p> <p>The discount amount available prints if a discount is applicable for the voucher. A discount is applicable for a voucher if a discount amount has been calculated and the discount date has not passed, or if discounts are forced for this voucher (i.e., Force Dsc is Y).</p> <p>When International Currency is installed, the trading currency amounts are printed below the company's local currency amounts.</p>
Inv Amount	<p>The total amount payable of the invoice being paid with this voucher based on the selected payment currency.</p> <p>When International Currency is installed, the trading currency amounts are printed below the company's local currency amounts.</p>
Assignee	<p>If the vendor uses an assignee, this field contains the number of the assignee.</p>
Invoice No / Voucher No	<p>The associated invoice number and voucher number for each voucher.</p>
Inv Desc / Hold Cd	<p>The invoice description and hold code (if any) for the voucher.</p>

Use the Clear Payment Selections option on the Accounts Payable Check Processing Menu (MENU APCHCK) to remove some or all vouchers from a payment group. Vouchers cleared through this option may be selected at a later time in either the same or different payment group through Payment Selection (MENU APCHCK).

Clear Payment Selections

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are clearing payment selections.
A/P Payment Processing Group Selection Screen	Use to specify the payment group for which you are clearing payment selections.
Clear Payment Selections Screen	Use to specify the vouchers to remove from the group.

When To Run This Option

When multiple users are printing checks, run this option to release invoices which were denied payment. They will be made available for another payment selection (MENU APCHCK). To delete a group, remove all payment selections from the group and the group will also be deleted.

Clear Payment Selections Screen Fields and Function Keys

Field/Function Key	Description
Company	The company number selected on the A/P Payment Processing Company Selection Screen (p. 20-2). (Display)
Group ID	The identifier and description of the selected payment group. (Display)

Clear Payment Selections Screen Fields and Function Keys

Field/Function Key	Description
Clear Option	<p>Key one of four options available which allow you to clear vouchers from the selected payment group.</p> <p>Key 1 to remove all vouchers in a payment group; the payment group is deleted.</p> <p>Key 2 to clear only those vouchers with a zero payment amount (defined through Payment Selection Maintenance (MENU APCHCK)). These vouchers are removed from the payment group.</p> <p>Key 3 to clear all vouchers for up to ten vendors specified in the Vendor(s) field. All vouchers for the selected vendors are removed from the payment group.</p> <p>Key 4 to clear all “negative” vouchers with a negative payment amount, or clear all vouchers with a negative payment amount for up to ten vendors specified in the Vendor(s) field. All negative vouchers with a negative payment amount, or all negative vouchers for the selected vendors are removed from the payment group.</p> <p>(A 1) Required</p>
Vendor(s)	<p>This field is valid and allowed only if you entered option 3 or 4 in the Clear Option field.</p> <p>Key up to 10 vendor numbers.</p> <p>If option 3 is entered in the Clear Option field, selections are removed for all payments made to these vendors (in the selected group).</p> <p>If option 4 is entered in the Clear Option field, selections are removed for all “negative” payments made to these vendors (in the selected group).</p> <p>(10 @ A 6) Required</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
Enter	<p>Press ENTER to confirm your selections. The indicated payment selections are cleared.</p>

Use the Check Edit List option to print the check edit reports for a payment group. Use the A/P Check Edit List (p. 21-19) to verify that checks will print as desired. The A/P Check Error List (p. 21-22) prints only if there are errors in a payment group. If you choose not to run this option before running the option to print checks, the A/P Check Error List will still print, notifying you that errors exist. You will not be informed at check print time. Checks will not be printed if errors exist. For a listing of possible errors, see A/P Check Error List (p. 21-22).

You will also have the option to set up check edit options prior to submitting the check edit to the Transaction Processor. These options allow you to:

- Print the Accounts Payable Checks with Amount Less than ____ Report (p. 21-24), which will list checks with amount less than the value specified on the Check Edit Options Screen (p. 21-5), including detail information for each check's vendor and all vouchers included in the check.
- Remove checks with amount less than the value specified on the Check Edit Options Screen (p. 21-5) from the current check run (all vouchers included in such checks will be removed from the payment by reversing the payment status of these vouchers from the current "included in payment" status to the "denied for payment" status).

Check Edit List

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are printing the Check Edit List.
Check Edit Options Screen	Use to set up check edit options prior to submitting the check edit to the Transaction Processor.

Title	Purpose
A/P Payment Processing Group Selection Screen	<p>Use to select a the payment group to be used for the Check Edit List.</p> <p>When accessing this screen through Check Edit List (MENU APCHCK), use to select the name of the payment group to edit and the job template to be used, if desired.</p> <p>When accessing this screen through Print Checks / Process ACH or CC Payments (MENU APCHCK), use to select the name of the payment group for which checks are printed.</p>
A/P Payment Processing Group Selection List Screen	Use to select the payment groups to be included in the Check Edit Listing.
Select Print Option Screen	Use to determine if the local currency will be shown on the Check Edit List.
A/P Check Edit List	Prints the detail information of the selected groups as they will appear as printed checks.
A/P Check Error List	Prints errors that will interfere with printing checks.
Accounts Payable Checks with Amount Less than ____ Report	Prints all checks included in the current check run with amount that is less than the value specified on the Check Edit Options Screen (p. 21-5).

Check Edit Options Screen

```
                CHECK EDIT OPTIONS

For checks with amount less than: , , , , 5,00, , US$

Print on a Separate Report:  Y, (Y/N)

Remove from Check Run:      N, (Y/N)

                                                    F3=Exit
```

This screen appears after you press **ENTER** on the A/P Payment Processing Company Selection Screen (p. 21-3). Use this screen to set up check edit options prior to submitting the check edit to the Transaction Processor.

For checks in the current check run with amount less than the value specified on this screen, you have the option to:

- Print a separate report listing checks with amount less than the value specified on this screen, including detail information for each check's vendor and all vouchers included in this check.
- Remove checks with amount less than the value specified on this screen from the current check run (all vouchers included in such checks will be removed from the payment by reversing the payment status of these vouchers from the current "included in payment" status to the "denied for payment" status).

For example, if you accept the default value of zero in the **For checks with amount less than** field (which means negative checks only are specified), then:

- You can select to print a separate report for all checks with amount less than 0 (negative checks).
- You can select to remove all checks with amount less than 0 (negative checks) from the current check run at check edit time.

If you enter 2.00 US\$ in the **For checks with amount less than** field, then:

- You can select to print a separate report for all checks with amount less than 2.00 US\$ (including negative checks).
- You can select to remove all checks with amount less than 2.00 US\$ (including negative checks) from the current check run at check edit time.

NOTE: Checks with amount less than the value specified on this screen will continue to also print on the A/P Check Edit List (p. 21-19).

Check Edit Options Screen Fields and Function Keys

Field/Function Key	Description
For checks with amount less than ____	<p>For checks in the current check run with amount less than the value you key in this field, you will be able to print a separate report with all checks with amount less than this value and/or remove all checks with amount less than this value from the current check run at check edit time.</p> <p>Key the less than amount for the checks you want to be printed on a separate report and/or remove from the current check run at check edit time.</p> <hr/> <p>NOTE: When International Currency is installed and activated, the company's currency symbol displays to the right of this field.</p> <hr/> <p><i>Default Value:</i> 0</p> <p><i>Valid Values:</i> any value up to 99999.99; cannot be a negative amount</p> <p>(N 5,2) Required</p>
Print on a Separate Report	<p>This field determines if a separate report will print for checks with amount less than the value specified on this screen.</p> <p>Key Y to print a separate report for checks with amount less than value specified. The Accounts Payable Checks with Amount Less than ____ Report (p. 21-24) will print after the Check Edit is submitted to the Transaction Processor as part of the Check Edit process.</p> <p>Key N if you do not want to print a separate report for checks with amount less than value specified. The Accounts Payable Checks with Amount Less than ____ Report (p. 21-24) will not print.</p> <p><i>Default Value:</i> Y</p> <p>(A 1) Required</p>
Remove from Check Run	<p>If the Print on a Separate Report field is Y, use this field to define if checks with an amount less than the value specified on this screen will be removed from the current check run.</p> <p>Key Y to remove all checks with amount less than the value specified from the current check run (all vouchers included in such checks will be removed from the payment by reversing the payment status of these vouchers from the current "included in payment" status to the "denied for payment" status).</p> <p>Key N if you do not want to remove all checks with amount less than the value specified on this screen from the current check run.</p> <hr/> <p>NOTE: This field takes affect only if the Print on a Separate Report field on this screen is Y.</p> <hr/> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>

Check Edit Options Screen Fields and Function Keys

Field/Function Key	Description
F3=Exit	Press F3=EXIT to exit the option and return to the menu.
Enter	Press ENTER to confirm your selections. The A/P Payment Processing Group Selection Screen (p. 21-8) will appear.

A/P Payment Processing Group Selection Screen

```
AP PAYMENT PROCESSING GROUP SELECTION

Job Template: ..... Modify Selections: M
Company: 1 A & C Office Supply

Group ID: _....

F3=Exit F4=Group List F9=Job Template List
```

This screen appears after you press **ENTER** on the A/P Payment Processing Company Selection Screen (p. 21-3). Use this screen to select the name of the payment group to modify.

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is AP145FM_SELECT.

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Key	Description
Job Template	<p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the Modify Selections field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the Modify Selections field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p>NOTE: To review a list of existing job templates that have been created for the Print Checks job, press F9=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for Print Checks jobs (that is, AP150P) through Job Template Maintenance (MENU XAFILE).</p> <p>(A 10) Optional</p>

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Key	Description
Modify Selections	<p>If using a job template (you keyed a job template name in the Job Template field on this screen or select one with F9=JOB TEMPLATE LIST), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this post run will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the Job Template field is blank.</p> <p>(A1) Required</p>
Company	<p>The company selected on the A/P Payment Processing Company Selection Screen (p. 21-3) for which payments will be selected for processing.</p> <p>Display</p>
Group ID	<p>Key the identifier of the payment group to be maintained.</p> <p>If you do not know the Group ID, access the group search by pressing F4=GROUP LIST.</p> <p>(A 5) Required</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
F4=Group List	<p>Press F4=GROUP LIST to display the A/P Payment Processing Group Selection List Screen (p. 21-12).</p>
F9=Template List	<p>Press F9=TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for the Print Checks job that is also used for A/P Check Edit List Processing.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Key	Description
Enter	<p data-bbox="527 310 1414 514">Press ENTER after making your selections and to submit the job to the Transaction Processor. The selected Check Edit List will be processed. A message may display indicating that the post job was submitted to the Transaction Processor based on the System Options Maintenance (MENU XAFILE) choice to Suppress Job Submitted to TP message. The A/P Check Edit List (p. 21-19) will print.</p> <p data-bbox="527 527 1414 695">Additionally, depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. Voucher information for each check prints out on this report for up to 10 payment groups (with the same check date). The listing is primarily sequenced by the check sequence number, and secondarily sequenced by the voucher number.

A/P Check Edit List

Report/Listing Fields	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are printed and also the Automated Clearing House (ACH) selection.</p>
Vendor	<p>The number and name of the payee.</p> <p>If the vendor name is changed or overridden during voucher entry, that specific transaction will be listed separately on the Accounts Payable Check Edit List.</p> <p>If a voucher has been flagged with Y for Separate Check, that specific transaction will be listed separately on the Accounts Payable Check Edit List.</p> <p>If the vendor is an assignee vendor with payee vendors in the check run, the assignee number and name will show on the Accounts Payable Check Edit List with the payee vendor number and name listed on the next line.</p>
Group	<p>The Group ID of the payment group which contains the checks on this listing.</p>
Voucher	<p>The voucher number selected for payment.</p>

A/P Check Edit List

Report/Listing Fields	Description
Ref	The transaction reference number against the voucher.
Invoice No	The original invoice number for the voucher being paid.
Inv Dt	The date of the original invoice.
Gross Amt	The gross monetary amount of the voucher prior to taking discounts. When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).
Dsc Taken	The amount of any discounts taken. If no discount was taken, this column is blank. When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).
Net Amt	The net monetary amount of the voucher. This is the discount amount subtracted from the gross amount. When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).
Description	The description of the voucher as keyed in Voucher Entry (MENU APMAIN).
Check Amt	The total amount of the vouchers being paid with this check. When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values for the Gross Amt, Net Amt, Check Amt, and Total Amt fields based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17). For trading currency groups, the currency symbol will print to the right of the Check Amt field.
Check Date	The date printed on the check.
Number of Checks	The total number of checks in this group.

A/P Check Edit List

Report/Listing Fields	Description
Total Amount	The total currency value of the checks being paid in this group. When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).

A/P Check Error List

AP150G	09/13/11	9.59.21	ACCOUNTS PAYABLE CHECK ERROR LIST	AM/APDEMO	PAGE	1
Group	Voucher	Error	02-B & B Office Supply			

WED			Negative Checks Detected for Vendor 400			
	1		Negative Check(s) Detected			

This report prints only if there are errors in a payment group. Checks cannot be printed. You may correct errors through Payment Selection Maintenance Screen (p. 18-9). The negative check error is shown.

If vouchers for a vendor are splitting onto separate checks, one of the following reasons would apply:

- Vendor is defined as a miscellaneous vendor in the A/P Option
- Separate Check is “Y” in the payment selection group
- Vouchers with the same vendor number have different vendor names and addresses used in the vouchers
- Assignee is being used.

Accounts Payable Check Error List

Report/Listing Fields	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are printed and also the Automated Clearing House (ACH) selection.</p>
Group	The Group ID of the payment group which contains the checks on this listing.
Voucher	The voucher number selected for payment.

Accounts Payable Check Error List

Accounts Payable Checks with Amount Less than ____ Report

Report/Listing Fields	Description
Total Open Amount	<p>The total amount of open invoices for this vendor.</p> <p>When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-14).</p>
Group	<p>The Group ID of the payment group which contains the checks on this report.</p>
Voucher	<p>The voucher number selected for payment.</p>
Ref	<p>The transaction reference number against the voucher.</p>
Invoice No	<p>The original invoice number for the voucher being paid.</p>
Inv Dt	<p>The date of the original invoice.</p>
Net Amt	<p>The net monetary amount of the voucher. This is the discount amount subtracted from the gross amount.</p> <p>When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).</p>
Check Amount	<p>The total amount of the vouchers being paid with this check.</p> <p>When International Currency is installed, the bank's local currency values will print below the vendor's trading currency values for the Gross Amt, Net Amt, Check Amt, and Total Amt fields based on the selection of Y to Print Local Currency on Edit List on the Select Print Option Screen (p. 21-17).</p> <p>For trading currency groups, the currency symbol will print to the right of the Check Amt field.</p>
Footer	<p>At the end of the report, the following message will print:</p> <p># Check(s) with amount less than ____ detected</p> <p>If the Check Edit was submitted with Y in the Remove from Check Run field on the Check Edit Options Screen (p. 21-5), a message will also be printed about vouchers being removed from the payment group. For example:</p> <p>*** All vouchers included in Check(s) with Amount less than: US\$ have been removed from the payment selection group by reversing the payment status of this voucher. ***</p>

Use the Print Checks / Process ACH or CC Payments option on the Accounts Payable Check Processing Menu (MENU APCHCK) to print a group of checks for a payment group, or to process ACH or CC payments. You may print checks for up to ten payment groups if each payment group has the same check print date.

For ACH Payment Processing, the system will be assigning check numbers and will be using the next consecutive unused check numbers in the reserved ACH check range to keep track of each payment detail record. This is why a reserved check range for the bank is required. An ACH template also needs to be defined for each selected bank so that the ACH file with the payment can be assembled correctly.

For CC Payment Processing, the system will automatically assign the next consecutive check number(s) based on the specific credit card transfer bank account. However, rather than generate an actual check(s) for printing, the Remittance Advice (p. 22-12) will instead output a list of invoices.

NOTE: No standard check processing options (options 1 through 6) may be run except Record Check Numbers / Post ACH or CC Payments (MENU APCHCK) after running this option. This is to ensure that check numbers are recorded promptly after printing checks.

Print Checks / Process ACH or CC Payments

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are printing checks or processing ACH or CC payments.
A/P Payment Processing Group Selection Screen	Use to select a the payment group and Job Template to be used for the Check Edit List.

Title	Purpose
A/P Payment Processing Group Selection List Screen	Used to select the payment groups to be included in the check printing. Refer to CHAPTER 21: <i>Printing the Check Edit List</i> for a description of this screen.
Bank Accounts List Screen	Use to select the bank account that the checks will be drawn against. If the invoices are for trading currency vendors, the bank account selected must be the same trading currency or the company's local currency. Refer to CHAPTER 9: <i>Maintaining Bank Account Transactions</i> , Bank Accounts List Screen for more information.
Checks	Shows a sample check.
Remittance Advice	Shows a sample overflow remittance advice report.
A/P Payment Transaction Register	Use to review the Transaction Register which prints for vouchers paid on a currency contract and a physical check was not printed.

A/P Payment Processing Company Selection Screen

```
AP PAYMENT PROCESSING

Company? 01

F3=Exit
```

This screen appears after selecting option **6** - Print Checks / Process ACH or CC Payments from the Accounts Payable Check Menu (MENU APCHCK) and you have System Options (MENU XAFILE) set to **Y** for **Multi Company** to activate multi-company mode.

Use this screen to select the company for which a payment group checks will be printed. This option may not be processed for a particular company, if any of the following are true for that company:

- Check editing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Check printing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Checks have been printed for this company but the check numbers have not yet been recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is APCMPFM_SELECT.

A/P Payment Processing Company Selection Screen Fields and Function Keys

Field/Function Key	Description

F3=Exit F4=Group List F9=Job Template List
```

This screen appears after you press **ENTER** on the A/P Payment Processing Company Selection Screen (p. 22-3). Use this screen to select the name of the payment group to modify.

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is AP145FM_SELECT.

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Keys	Description
Job Template	<p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the Modify Selections field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the Modify Selections field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p>NOTE: To review a list of existing job templates that have been created for the Print Checks job, press F9=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for Print Checks jobs (that is, AP150P) through Job Template Maintenance (MENU XAFILE).</p> <p>(A 10) Optional</p>

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Keys	Description
Modify Selections	<p>If using a job template (you keyed a job template name in the Job Template field on this screen or select one with F9=JOB TEMPLATE LIST), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this post run will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the Job Template field is blank.</p> <p>(A1) Optional</p>
Company	<p>The company number and name selected on the A/P Payment Processing Company Selection Screen (p. 22-3).</p> <p>Display</p>
Group ID	<p>Key the identifier of the payment group to be maintained.</p> <p>If you do not know the Group ID, access the group search by pressing F4=GROUP LIST.</p> <p>(A 5) Required</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
F4=Group List	<p>Press F4=GROUP LIST to display the A/P Payment Processing Group Selection List Screen (p. 21-12).</p>
F9=Template List	<p>Press F9=TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for Printing Checks.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>

A/P Payment Processing Group Selection Screen Fields and Function Keys

Field/Function Keys	Description
Enter	<p>Press ENTER after making your selections and to submit the job to the Transaction Processor. The selected Print Checks will be processed. A message may display indicating that the post job was submitted to the Transaction Processor based on the System Options Maintenance (MENU XAFILE) choice to Suppress Job Submitted to TP message. The A/P Checks will print.</p> <p>Additionally, depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p>

NOTE: The mock-up format depicted here is not true to scale due to space limitation. Contact your sales representative to obtain format specifications. Note that check numbers are not printed on the check stock so be sure to order pre-printed checks from your vendor.

Checks are submitted to the Transaction Processor. Checks will print using form type 1 or form type 2, depending on your selection in System Options Maintenance (MENU XAFIL). For each check, the remittance advice and actual check are printed. The remittance advice prints the detail invoice information for each check.

When International Currency is installed

- The text at the end of the check amount (previously “Dollars”) will now be extracted from the bank account definition.
- Remittance will be printed in the currency of the vendor (gross, discount, and the net invoice amounts.)
- A currency conversion line will print on the remittance below the trading currency remittance totals, as such:

Example:

5000.00 F @ 5.00000 F per \$ = 1000.00 \$

This example indicates that five thousand franc at five francs per dollar equals one thousand dollars. Note that the amounts used in this line will be the total trading net remittance amount and the total local net remittance amount. The exchange rate printed on this line will be calculated using the two net amounts.

- The check amount will be printed in the local currency.
- If the payment and vendor currency is a trading currency, the remittance and check will be printed in the vendor's currency.
- The check print rate will be the exchange rate of the foreign currency bank account from which the check was drawn.

Check Sample

Report/Listing Fields	Description
Check Stub: Vendor Information	The vendor number and vendor name for the vouchers being paid. If this check is to an assignee vendor, the vouchers being paid from the payee vendor(s) will be printed. When International Currency is installed, the vendor's currency symbol and currency code description for this check are also printed.
Check Stub: Invoice No	The original invoice number associated with the voucher being paid.
Check Stub: Date	The original invoice date for the voucher being paid. The date will be printed using the Default Date Format for the vendor's country, specified through Country Name Maintenance (MENU ARFIL2), or if that field is blank, the date will be printed using the system's Default Date Format specified through System Options Maintenance (MENU XAFIL2).
Check Stub: Desc	The description of the voucher as keyed in Voucher Entry (MENU APMAN).
Check Stub: Gross	The gross currency payment amount of the voucher prior to taking discounts.
Check Stub: Disc	The currency amount of any discounts being taken. If no discount was taken, this column is blank.
Check Stub: Net	The net currency amount of the voucher being paid with this check. This is the discount amount subtracted from the gross amount.
Check Stub: Total	The total Gross, Disc, and Net amount of the check.
Pay	The legal transcribed and numeric total amount of the check.
Amount	The corresponding numeric total amount of the check.

Check Sample

Report/Listing Fields	Description
Date	The date printed on the check. This is the check date of the payment group. The date will be printed using the Default Date Format for the vendor's country, specified through Country Name Maintenance (MENU ARFIL2), or if that field is blank, the date will be printed using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).
Payee	The name and address of the party to whom payment is made. This may be the vendor, a payee for the vendor, or an assignee of the vendor.
Check No	The check number should be preprinted on check forms.

Remittance Advice

03/31/10		REMITTANCE ADVICE		1	PAGE	1
Invoice No	Date	Desc	Gross	Disc	Net	
Vendor IC2000	WOODEN CHOPSTICKS	OFFICE POOL	YN>	Japanese Yen		
WEEK07	02/21/10	weekly	1,498.23		1,498.23

If the detail voucher information that prints on the check stub remittance advice requires more space than allowed, this overflow remittance advice will print on stock paper after all checks are printed.

Remittance Advice

Report/Listing Fields	Description
Remittance Advice: Remittance Number	This number is assigned to each remittance in a payment group. If there is an overflow of a remittance advice, use this number to refer to the overflow sheet that prints after all checks are printed.
Vendor Information	The vendor number and vendor name for the vouchers being paid. If this check is to an assignee vendor, the vouchers being paid from the payee vendor(s) will be printed. When International Currency is installed, the vendor's currency symbol and currency code description for this check are also printed.
Invoice No	The original invoice number associated with the voucher being paid.
Date	The original invoice date for the voucher being paid. The date will be printed using the Default Date Format for the vendor's country, specified through Country Name Maintenance (MENU ARFIL2), or if that field is blank, the date will be printed using the system's Default Date Format specified through System Options Maintenance (MENU XAFIL).
Desc	The description of the voucher as keyed in Voucher Entry (MENU APMAIN).
Gross	The gross currency payment amount of the voucher prior to taking discounts.
Disc	The currency amount of any discounts being taken. If no discount was taken, this column is blank.

Remittance Advice

Report/Listing Fields	Description
Net	The net currency amount of the voucher being paid with this check. Calculation: Net Currency Amount = gross amount - discount amount
Total	There are 3 Total amounts shown for the Gross, Disc, and Net amount columns.

A/P Payment Transaction Register

				1,214.62		1,214.62 US\$

This report prints for currency contract payment groups after selecting Print Checks / Process ACH or CC Payments (MENU APCHCK), if the **Print Checks** field is **N** on the Currency Contract Maintenance Screen (MENU ICFILE). This report will print in place of checks and provide a record of your payments.

NOTE: This report prints only if International Currency is installed and active.

A/P Payment Transaction Register

Report/Listing Fields	Description
Headings	Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.
(Payee)	The name and address of the vendor to whom the payment was made.
(Company)	The company number and name responsible for the payment.
(Bank Account)	The bank account number and name from which payment will be drawn.
(Vendor Number)	The number and name of the vendor to whom the payment was made.
(Currency Code)	The currency code and description for the currency specified in the contract.
Transaction #	The number of the transaction. This number takes the place of a check number and must be recorded through Record Used/Voided Check Numbers Screen (p. 23-5).
Invoice	The number of the invoice associated with this payment.
Date	The date the recorded for the invoice.
Description	The description of the transaction as keyed through Voucher Entry (MENU APMAIN).

A/P Payment Transaction Register

Report/Listing Fields	Description
Gross	This is the gross invoice amount of payments made in this group. These values will print in the vendor's trading currency and the company's local currency, if the two differ.
Discount	This is the gross amount of the discounts applicable to this payment group. These values will print in the trading currency and the currency specified for the currency contract, if the two differ. The currency symbols for each will display to the right of the amounts.
Net	This is the net amount of this payment. This amount prints in both the local and trading currency, with the currency symbols printed on the right.
Total	This is the total amount of the payment. This value will print when the payment group currency is the company's local currency.
(Exchange Rate)	<p>This is the rate of exchange for the trading currency. This value will print only if the trading currency is different from the currency specified in the contract. The currency conversion line will print as depicted in the following example:</p> <p>Example:</p> <p>1,066,074 IT{ at 2,220.524890 IT{ per US\$ = 480.10</p> <p>This example indicates that 1,066,074 Italian Lire at 2,220.524890 Lire per US Dollar equals \$ 480.10</p>

Use the Record Check Numbers / Post ACH or CC Payments option on the Accounts Payable Check Processing Menu (MENU APCHCK) to record or void the check numbers of checks printed through Print Checks / Process ACH or CC Payments (MENU APCHCK), or to post the ACH or Credit Card (CC) payments. This option provides a simple means of voiding individual checks without having to re-print an entire group of checks.

When International Currency is installed and the revaluation process takes place for this option, the G/L Transaction Post Journal for Revaluation (p. 23-13) may print, depending on the value specified in the **A/P to G/L** field through Company Name Maintenance (MENU XAFILE). Refer to Revalue Receipts Pending Invoicing (MENU ICRVAL) in the International Currency User Guide for information about this report.

Record Check Numbers / Post ACH or CC Payments

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for the finalization of the check run or ACH payment process.
Record Used/Voiced Check Numbers Screen	Use to record the checks that have been printed for a group, and to select the job template to be used, if desired.
Record Used/Voiced Checks for Contract Payments	Use to confirm the recording of check numbers against the selected currency contracts.
G/L Transaction Post Journal	Printed sample of the General Ledger transactions for check processing.

Title	Purpose
Cash Disbursements Report	Printed sample of the cash disbursements for check processing.
Currency Revaluation Detail Report	Printed sample of the Currency Revaluation Detail report for check processing.

When to Run This Option

Run this option immediately after printing checks through Print Checks / Process ACH or CC Payments (MENU APCHCK). After checks are printed and before this option is selected, no payment selection options (1 through 6) may be selected for the same company.

A/P Payment Processing Company Selection Screen

AP PAYMENT PROCESSING

Company? 01

F3=Exit

This screen appears after selecting option **7** - Record Check Numbers / Post ACH or CC Payments from the Accounts Payable Check Menu (MENU APCHCK) and you have System Options (MENU XAFILE) set to **Y** for **Multi Company** to activate multi-company mode.

Use this screen to select the company for which a payment group check numbers will be recorded. This option may not be processed for a particular company, if any of the following are true for that company:

- Check editing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Check printing (MENU APCHCK) has been submitted to the transaction processor and has not completed.
- Checks have been printed for this company but the check numbers have not yet been recorded through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK).

TECHNICAL NOTE: This is a shared screen that displays in multiple places. The actual screen format name is APCMPFM_SELECT.

A/P Payment Processing Company Selection Screen Fields and Function Keys

Field/Function Key	Description
Company	<p>Key the Company Number for which you wish to process payments.</p> <p><i>Default Value:</i> The default company defined in Authority Profile Maintenance (MENU XASCTY) if one has been defined; otherwise, this is the default company defined through System Options Maintenance (MENU XAFILE)</p> <p><i>Valid Values:</i> A valid company number defined through Company Name Maintenance (MENU XAFILE) which you are authorized to access through Authority Profile Maintenance (MENU XASCTY).</p> <p>(N 2,0) Required</p>
F3=Exit	<p>Press F3=EXIT to exit the option and return to the menu.</p>
Enter	<p>Press ENTER to confirm your selections.</p> <p>The Record Used/Voiced Check Numbers Screen (p. 23-5) will appear.</p>

Check Counts: 0 Voided 1 Printed 0 Used

F3=Exit F9=Job Template List F13=Accept Check Numbers

This screen appears after you press **ENTER** on the A/P Payment Processing Company Selection Screen (p. 23-3).

Use this screen to record the numbers of checks used and checks voided. Up to 15 ranges of check numbers can be entered. Check numbers cannot overlap. A warning will be given when the check numbers issued are not continuous. An asterisk (*) in the warning column denotes that the range of checks entered on that line is not continuous with the previous range entered. The number of checks assigned in each range is calculated and displayed in the count column. The number of checks used must be equal to the number of checks actually printed. If no checks have been printed, then this option can be used only to enter voided check numbers. The last check number assigned by the system is displayed on the top of the screen to be used as a reference for entering new check numbers.

You can also use this screen to select the job template to be used, if desired.

NOTE: If the current Print Check run is for Automatic Clearing House (ACH) payments, indicated by the **ACH** field on this screen, then the check numbers from the reserved ACH check range that were used in the ACH Check Run will be displayed on this screen and all fields will be protected.

NOTE: If the group is flagged as a credit card payment, check numbers will automatically be determined based on the next sequential check number available in association with that T-type (transfer) bank account. The range of CC check numbers assigned (and protected on the screen) is directly proportionate to the number of new vouchers that will be created (based on the number of checks cut per vendor). Also, since this is a credit card payment group, the credit card due date is required so that it can be brought into the new voucher(s) that will be created for the credit card vendor once **F13=ACCEPT CHECK NUMBERS** is pressed.

Record Used/Voided Check Numbers Screen Fields and Function Keys

Field/Function Key	Description
Company	<p>The Company Number for which you are processing payments.</p> <p>Display</p>
Last Check No	<p>The number of the last check that was printed and recorded. The next consecutive number should be the number of the first check used in the current payment group taking into consideration that checks may need to be voided or if you are using new checks.</p> <p>Display</p>
CC Due Date	<p>This field only displays when the checks printed were designated as a credit card method of payment.</p> <p>For Credit Card Payment Groups, use this field to specify the credit card due date associated with the new voucher(s) that will be created for the credit card vendor once F13=ACCEPT CHECK NUMBERS is pressed.</p> <p>Key the credit card due date.</p> <p><i>Valid Values:</i> A date keyed in the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
ACH	<p>This field indicates if the current Print Check run is for Automatic Clearing House (ACH) payments.</p> <p>Y displays if the current Print Check run is for ACH payments. If this field is Y, then the check numbers that are next available for the ACH Check Run will be displayed on this screen and all fields will be protected.</p> <p>N displays if the current Print Check run is not for ACH payments and paper checks or credit card are being used.</p> <p>Display</p>

Record Used/Voided Check Numbers Screen Fields and Function Keys

F13=Accept Check Numbers	<p data-bbox="527 306 1388 436">Press F13=ACCEPT CHECK NUMBERS to save the check numbers you have entered (or that have been automatically assigned with regards to a Credit Card payment group). These numbers will then be assigned to the printed and/or voided checks.</p> <p data-bbox="527 457 1388 621">Depending on your selections in the Job Template and Modify Selections fields on this screen, various job template screens may or may not display once you press ENTER. For details about job template screens, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p data-bbox="527 642 1388 737">The following General Ledger reports may print, based on the value specified in the A/P to G/L field through Company Name Maintenance (MENU XAFILE):</p> <ul data-bbox="527 751 1096 877" style="list-style-type: none">• G/L Transaction Post Journal (p. 23-13)• Cash Disbursements Report (p. 23-15)• Currency Revaluation Detail Report (p. 23-17) <p data-bbox="527 892 1388 1230">For Credit Card payment groups, when F13=ACCEPT CHECK NUMBERS is pressed to automatically assign check number(s), the open voucher(s) based on the actual vendor number(s) will be updated accordingly to reflect the payment as usual. However, instead of a credit to the cash account, the cash disbursement (CD) journal will reflect a credit to the Voucher Clearing Account and these transactions will be written to the credit card transfer (T-type) bank account and to check history. A new voucher group will be created and posted automatically to the assigned credit card vendor specified during payment group entry. This will ultimately tie out to the actual credit card transactions processed on the specified credit card.</p>

Record Used/Voiced Checks for Contract Payments

```

Company: 01          RECORD USED/VOIDED CHECKS
Checking Account: 143-00CAD Bank Of Canada
Vendor: IC5000      SASKATCHEWAN PRODUCTS
Contract Number:   3   Standard Light Bulbs

Recorded Check Range: 900000000 to 900000000
Printed Checks:    1

F3=Exit   F13=Accept Check Numbers

```

This screen displays after selecting the company on the A/P Payment Processing Company Selection Screen (p. 17-3) in Record Check Numbers / Post ACH or CC Payments (MENU APMAIN), if you are recording a currency contract payment group and **N** was selected in the **Print Checks** field on the Currency Contract Maintenance Screen in Currency Contract Maintenance (MENU ICFILE). Otherwise, this screen will not display.

Use this screen to record the transaction numbers of payments made through currency contracts with the use of F13=ACCEPT CHECK NUMBERS.

NOTE: This screen is available only if International Currency is installed.

Record Used/Voiced Checks for Contract Payments Fields and Function Keys

Field/Function Key	Description
Company and Checking Account	The company number with the checking account number and description used for this group of checks. Display
Vendor	This field displays the number and name of the vendor to whom payment was made. Display

Regular Entry Totals:		2 Transactions		6,666,185.81		
				6,666,185.81		

This journal prints when cash disbursement transactions are posted to G/L and a revaluation occurs because of fluctuations in currency.

For additional information about this journal, refer to it as described for Post Transactions (MENU GLMAIN) in the General Ledger manual.

When International Currency is installed:

- If checks payable to foreign currency vendors are posted and a fluctuation in the exchange rate has occurred, a revaluation will automatically occur.
- If payment was made in the company's local currency, the revaluation will be based on the exchange rate of the open payable.
- If payment was made in the trading currency, the revaluation will be based on the exchange rate of the foreign currency bank account upon which the check was drawn.
- If rate fluctuation has occurred, when Record Check Numbers / Post ACH or CC Payments is run, resulting gains/losses are posted to the G/L gain/loss account. A second G/L Transaction Post Journal listing the gain/loss transactions will print in addition to the usual G/L Transaction Post Journal. In order to link the gain/loss transactions generated as IC journal transactions to the cash

disbursements journal, the CD journal number is placed into the transaction source of IC transactions.

- A Currency Revaluation Detail Report (p. 23-17) will print a detailed breakdown of the G/L gain/loss transactions generated as a result of the revaluation.

Cash Disbursements Report

Report/Listing Field	Description
AUDIT #	The audit number of this Cash Disbursements Report. The audit number is assigned to indicate the sequence in which the report is printed. Retain these reports in sequence by audit number for auditing purposes.
Vendor	The number of the vendor to whom payment was made. If a vendor has an assignee, this field displays the vendor number of the assignee.
Invoice Number	The number of the original invoice for which payment has been made and recorded with the respective voucher.
Voucher	The number of the voucher for which payment has been made.

Cash Disbursements Report

Report/Listing Field	Description
Ref	<p>The Journal Reference Number which is assigned during the G/L Transaction Post. The Journal Reference Number consists of two segments: the Journal Number, and the Segment Number.</p> <p>The Journal Number is the same for all transactions within a transaction group. The first two characters are “CD,” which represent the Cash Disbursements Report; the last three characters are a sequentially assigned number for the voucher group.</p> <p>The Segment Number is incremented by 1 for each transaction within the journal reference number. If there are 20 voucher transactions, transactions are assigned segment numbers of 1 through 20.</p>
Amount	The amount of the cash payment.
G/L Account Number	The A/P Expense account that is updated when payment is made for this voucher transaction.
Check No	The number of the check used to pay the invoice. This report is sequenced by check number.

This report is generated if checks are printed in a currency other than the company's local currency are posted through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK), and a difference exists between the exchange rate in effect when the open payable was created and the rate in effect when the check was printed. A system-generated revaluation will occur, resulting in gain/loss G/L entries to the International Currency Journal. This report will print a detailed breakdown of these gain/loss transactions resulting from exchange rate fluctuations.

NOTE: This report prints only if International Currency is installed and active.

Currency Revaluation Detail Report

Report/Listing Fields	Description
(Bank Account)	The foreign currency bank account number.
Posting Date	The posting date of the check(s).
(Account Number)	The G/L Account Number to which the gain/loss transactions are posted. It is displayed in the format specified in G/L Options Maintenance (MENU GLFIL2). The account description is printed following the G/L Account Number.
Check #	The number of the check used for this payment.
Voucher	The number(s) of the voucher(s) that were paid.

Currency Revaluation Detail Report

Report/Listing Fields	Description
Ref	<p>The Journal Reference Number which was assigned to this detail transaction. The journal reference number ties together all detail transactions. The first segment of the Journal Reference Number is assigned to one transaction group. A separate Journal Reference Number is assigned to reversing entries generated from a transaction group. The prefix to the first segment of the Journal Reference Numbers is IC for all international currency transactions.</p> <p>The second segment of the Journal Reference Number is assigned sequentially to each detail transaction in a transaction group. This segment is always 00001 for the first detail transaction in a transaction group.</p>
Trn Source	<p>The source PY will print for all gain/loss transactions resulting from payment reevaluations</p>
Trn Desc	<p>The description PY Revaluation will print for all gain/loss transactions resulting from payment reevaluations.</p>
Debit	<p>The debit dollar amount entered for this detail transaction. The total debit amount for this transaction group is printed after the last detail transaction.</p>
Credit	<p>The credit dollar amount entered for this detail transaction. The total credit amount for this transaction group is printed after the last detail transaction</p>

Use the Processed ACH Payments option on the Accounts Payable Check Processing Menu (MENU APCHCK) to view the content of the ACH files generated during the ACH check runs for the selected bank account. ACH check runs are performed through Print Checks / Process ACH or CC Payments (MENU APCHCK).

This option also allows you to perform re-generation of a file (when needed) to create a new file, and reconciliation of ACH transactions (reconciling all payments associated with the ACH file you selected).

Processed ACH Payments

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Accounts List Screen	Use to select a bank account. Refer to CHAPTER 9: <i>Maintaining Bank Account Transactions</i> , Bank Accounts List Screen for more information.
ACH File Inquiry Screen	Use to view a list of ACH files generated during the ACH Check Runs for the selected bank account.
ACH File Transactions Screen	Use to review detailed information about the ACH file transaction(s).

F2=Completed	F3=Exit	F4=Created Date/Time		F5=Refresh			

Within Processed ACH Payments, this screen appears after you press **ENTER** from the Bank Accounts List Screen (p. 9-13). Use this screen to view a list of ACH files generated during the ACH check runs for the selected bank account. ACH check runs are performed through Print Checks / Process ACH or CC Payments (MENU APCHCK).

You can toggle between displaying new or completed ACH file records using **F2=COMPLETED / F2=NEW**. Initially, all records are created as new. If all ACH Payment transactions within the ACH file have a status of **R** or **V** (Reconciled or Voided), then the ACH Payment Transaction Header File (ACHHED) will be considered completed.

You can also perform re-generation of the .TXT file (when needed), and reconciliation of the ACH file (reconciling all payments associated with the ACH file you selected). An example of when re-generation of a file would be needed is if the ACH template was defined incorrectly and the bank rejected the ACH file. Once the template is corrected, the ACH file would be re-generated and re-submitted to the bank.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

ACH File Inquiry Screen Fields and Function Keys

Field/Function Key	Description
(Status)	<p>On the top right portion of the screen, the status of the records show in reverse image. The status indicates if new or completed (reconciled or voided) ACH file records are displayed on the screen. New or completed records can be toggled with the F2=COMPLETED / F2=NEW function key.</p> <p>Display</p>
Co/Bank Account	<p>This field displays the company and bank account number selected on the Bank Accounts List Screen (p. 9-13), and for which you are inquiring on ACH file information.</p> <p>Display</p>
Output File IFS Path	<p>This field displays the location where the generated ACH file will be placed at the root of the IFS. This path was defined in the ACH template set up through Bank Accounts Maintenance (MENU APFIL2), for the selected bank account.</p> <p>Display</p>
SI	<p>This field displays the reference number associated with the ACH file. Key this number in the Selection field to display additional detail relating to the ACH file, re-generate the ACH file, update the status of the ACH file, or reconcile all payments for the selected ACH file.</p> <p>Display</p>
File ID	<p>This field displays the unique File ID associated with the ACH file.</p> <p>Display</p>
Batch No	<p>This field displays the batch number associated with the ACH file.</p> <p>Display</p>
File Name	<p>This field displays the file name of the ACH.TXT file made up from the bank account, and the date and time the .TXT file was created.</p> <hr/> <p style="text-align: center;">NOTE: The F9=RE-GENERATE function key will change this information to reflect the creation of the new .TXT file.</p> <hr/> <p>Display</p>
Gen Date/Time / Crt Date/Time	<p>This field displays the date and time the ACH file was generated or created, as toggled with the F4=GENERATED DATE/TIME / F4=CRT DATE/TIME function key.</p> <p>Created Date is the date and time the ACH Payment Transaction Group was created during Print Checks / Process ACH or CC Payments (MENU APCHCK).</p> <p>The Generate Date and Time will initially be the same but will change when F4=GENERATED DATE/TIME / F4=CRT DATE/TIME is completed.</p> <p>Display</p>

ACH File Inquiry Screen Fields and Function Keys

Field/Function Key	Description
M	This field displays the File Modifier ID. This code is used by the bank to distinguish among multiple input files created on the same date. The first file is labeled A , and the files continue to be labeled in sequence A through Z. Display
Selection	Use this field to select an ACH payment transaction. Key the reference number associated with the ACH transaction and press: <ul style="list-style-type: none"> • F6=VIEW to review detailed information about the ACH payment transactions • F9=RE-GENERATE to generate a new ACH.TXT file • F10=UPDATE STATUS to update the status of the ACH payment transactions • F13=RECONCILIATION to reconcile all payments within the ACH payment transactions (N 2,0) Optional
Limits: Generate Date / Create Date	Use this field to limit this screen to show only those transactions that fall within the generate or create date range you key in this field. Generate indicates the last date and time the .TXT file was generated. Create indicates the original date and time the file was generated. You can limit by generation or creation date using the F4=CREATED DATE/TIME / F4=GENERATED DATE/TIME function key. Once you key the date range, press F5=REFRESH . (N6,0) Optional
F2=Completed / F2=New	Press F2=COMPLETED / F2=NEW to toggle between showing new or completed (reconciled or voided) records on this screen. The (Status) field will show New or Completed in reverse image, based on this function key.
F3=Exit	Press F3=EXIT to return to MENU APCHCK.
F4=Created Date/Time / F4=Generated Date/Time	Press F4=CREATED DATE/TIME / F4=GENERATED DATE/TIME key to toggle between the date and time the transaction was generated or created. Generated indicates the last date and time the file was generated. Created indicates the original date and time the file was generated. The Limits: Generate Date / Create Date field will also change accordingly and allow you to enter a from and to range for the generation or creation date.
F5=Refresh	Press F5=REFRESH to refresh the screen after entering a date range in the Limits: Generate Date / Create Date field.
F6=View	After entering a reference number in the Selection field, press F6=VIEW to review detailed information about the ACH payment transactions. The ACH File Transactions Screen (p. 24-6) will appear.

ACH File Inquiry Screen Fields and Function Keys

Field/Function Key	Description
F9=Re-generate	After entering a reference number in the Selection field, press F9=RE-GENERATE to generate a new file with a new generation date and time. For example, assume the bank rejected the transaction because the ACH file template was not defined correctly. You would make the correction, re-generate the file using this function key, and re-submit the ACH file to the bank.
F10=Update Status	After entering a reference number in the Selection field, press F10=UPDATE STATUS to update the ACH file. If each ACH payment transaction within the selected ACH file is completed (reconciled or voided), then the ACH file's status will be updated as completed and the list will be re-displayed.
F13=Reconcile	<p>The F13=RECONCILE function key allows you to perform check reconciliation for all ACH payment transactions within the selected ACH file; whereas, the Check Reconciliation option (MENU APCHCK) allows you to perform check reconciliation one check at a time.</p> <p>After entering a reference number in the Selection field, press F13=RECONCILE to reconcile all payments associated with the ACH file you selected. Once you reconcile all payments for the ACH file, the status will then be updated to 'completed' (reconciled).</p> <p>If there are no records to reconcile, an error message will display.</p>

ACH File Transactions Screen Fields and Function Keys

Field/Function Keys	Description
Co/Bank Account	This field displays the company and bank account number selected on the Bank Accounts List Screen (p. 9-13), and for which you are inquiring on ACH payment information. Display
File Name	This field displays the file name of the ACH .TXT file you selected to view in detail on the ACH File Inquiry Screen (p. 24-2). Display
Trace Number	This field displays the unique trace number that is assigned to the transaction. This number is used to trace the transaction in case of a bank inquiry. Display
Payee Name	This field displays the name of the payee vendor to whom payment was transmitted. Display
Payment Amount	This field displays the payment amount of the transaction. Display

ACH File Transactions Screen Fields and Function Keys

Field/Function Keys	Description
Check No	This field displays the system assigned check number for this ACH payment transaction. Display
Status	This field displays the status of the corresponding check for this ACH payment transaction. One of the following statuses will be displayed: <ul style="list-style-type: none">• U - Used Check• V - Voided Check• R - Reconciled Check Display
F12=Return	Press F12=RETURN to return to the ACH File Inquiry Screen (p. 24-2).

Manual checks are used to inform A/P that a checks has been written for an existing open payable. This means that checks have not been processed through standard check processing (options 1 through 6). Use this option to enter or edit your manual checks. This is the first step of manual check processing.

Use the Enter Manual Checks option on the Accounts Payable Check Processing Menu (MENU APCHCK) to enter manual checks.

Enter Manual Checks

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for reversals. Refer to CHAPTER 17: <i>Creating Payment Groups for Payment Selection</i> , A/P Payment Processing Company Selection Screen (p. 17-3) for more information.
Bank Accounts List Screen	Use to select the bank account that the check was processed against. Refer to CHAPTER 9: <i>Maintaining Bank Account Transactions</i> , Bank Accounts List Screen for more information.
Select Currency Screen	When International Currency is installed, use to select the currency to be used for the group of manual checks.
Currency Contracts List Screen	When International Currency is installed, use to select the currency contract to be used for the group of manual checks
Select Check Date Screen	Use to specify the date of check.

Title	Purpose
Manual Check Entry Selection Screen	Use to specify the voucher number of the open payable.
Manual Check Entry Screen	Use to record the manual check information.

This screen displays after pressing F4=LIST from the Currency Contract Maintenance Selection Screen in Contract Maintenance (MENU ICFILE) or from the Select Currency Screen (p. 25-3). This screen displays existing currency contracts defined for the selected vendor. You may use this screen to select an existing contract to change or delete, or to add a new contract.

Currency Contracts List Screen Fields and Function Keys

Field/Function Keys	Description
(Contract Owner Information)	These fields display the Company number and name, Vendor number and name, and Currency code and description associated with the currency contract(s) listed. Display
(Reference Number)	The reference number of the corresponding currency contract. To select one of the contracts displayed, key this number in the Selection field on the lower portion of this screen. Display
Contract	The number manually or automatically assigned to the contract. Display
Description	The description of the currency contract as entered. Display

Currency Contracts List Screen Fields and Function Keys

Field/Function Keys	Description
Ref No	The reference number, if any, that has been assigned to the contract. This number is optional and may be used as an additional identifier or cross-reference for the contract. Display
Contract Amt	The dollar amount of the contract's value, if one has been entered. Display
(Currency Edit Symbol)	The edit symbol (e.g., \$ for U.S. dollars, L for lire, F for francs, etc.) assigned to the currency that was selected. Display
Exp Dt	The contract's expiration date, if one has been entered. Display
Selection	Use this field to select a contract displayed on the top portion of this screen that you want to change or delete. Key the reference number to the left of the desired contract. (N 2,0) Optional
F5=Add	F5=ADD is not available from within Enter Manual Checks (MENU APCHCK). You will be returned to the Select Currency Screen (p. 25-3).
F12=Return	Press F12=RETURN to cancel this operation and return to the Select Currency Screen (p. 25-3).
Enter	After keying a reference number in the Selection field, press ENTER to select the desired contract. The Select Currency Screen (p. 25-3) will display with the selected Contract No. field filled in.

Manual Check Entry Screen Fields and Function Keys

Field/Function Keys	Description
Payment Currency	This field displays only when International Currency is installed. This field displays the code and description of the currency selected in the Payment Currency field on the Select Currency Screen (p. 25-3). Display
Vendor Currency	This field displays only when International Currency is installed. This field displays the code and description of the currency selected in the Vendor Currency field on the Select Currency Screen (p. 25-3). Display
Voucher Information	The voucher number assigned when the invoice was processed through Accounts Payable. Display
Vendor	Vendor number and name to whom the expense was incurred. Display

Manual Check Entry Screen Fields and Function Keys

Field/Function Keys	Description
Assignee	<p>The vendor's assignee, if any.</p> <p>When International Currency is installed, this field displays the assignee, if any, named in the currency contract for the vendor or contract.</p> <p>Display</p>
Invoice	<p>The invoice number assigned during Voucher Entry.</p> <p>Display</p>
Open Amt	<p>The amount of the open payable.</p> <p>When International Currency is installed, and a payment currency other than the company's local currency is used, this value will display in the foreign payment currency with the currency edit symbol displayed to the right. The local equivalent value will display below with the currency symbols for the company's local currency displayed to the right.</p> <p>Display</p>
Avl Dsc	<p>The amount and date of the available discount, if any.</p> <p>When International Currency is installed, if a payment currency other than the company's local currency is used, this value will display in the foreign payment currency with the local equivalent value displayed below.</p> <p>Display</p>
Check No	<p>The number of the manually processed check. This cannot be a check number that has been previously used through standard or manual check processing.</p> <p>When International Currency is installed, if you are making payments through a currency contract and N was selected in the Print Checks field on the Currency Contract Maintenance Screen (MENU ICMAN), this field will not display. Instead, a system-generated transaction number will be assigned to this payment.</p> <p>(N 9,0) Required</p>
Force Disc	<p>Determines if discounts should be taken regardless of the discount date.</p> <p>Key Y to take advantage of the cash discount for this voucher even if the discount date has passed.</p> <p>Key N to disregard the cash discount if the discount date has passed. The cash discount is applied only if the check date is on or before the discount date.</p> <p>(A 1) Optional</p>

Manual Check Entry Screen Fields and Function Keys

Field/Function Keys	Description
Gross Pmt	<p>The amount of the check. You may change the default payment amount to a value less than the default, thus indicating a partial payment made with a manual check.</p> <p>Use this field to review or change the total amount of the open payable.</p> <p>When International Currency is installed, if a payment currency other than the company's local currency is used, this value will display in the foreign payment currency with the currency symbol displayed to the right. The local equivalent of the amount will display below.</p> <p><i>Default Value:</i> The total amount of the open payable.</p> <p>(N 15,2) Required</p>
Cash Disc	<p>The amount of an available cash discount for the open payable. If the check date is greater than the discount date for this voucher, you cannot take advantage of the cash discount unless you key Y in the Force Dsc field on this screen.</p> <p>Use this field to review or change the total discount amount for the open payable.</p> <p>When International Currency is installed, if a payment currency other than the company's local currency is used, this value will display in the foreign payment currency with the currency symbol displayed to the right. The local equivalent of the amount will display below.</p> <p><i>Default Value:</i> The available cash discount, if any, for the open payable.</p> <p>(N 13,2) Optional</p>
Net Pmt	<p>The amount of payment of the manual check. This is the payment amount minus the discount taken for the open payable.</p> <p>When International Currency is installed, if the check was drawn upon a foreign currency bank account, this amount will display in the account's currency with the local currency equivalent displayed below.</p> <p>Display</p>
Check Amt	<p>This field displays only when International Currency is installed.</p> <hr/> <p>NOTE: This field will display only if you are paying a foreign currency invoice in the company's local currency and no currency contract is associated with the payment.</p> <hr/> <p>Use this field to review or change the amount of the check. This value will display in the company's local currency and will be used in conjunction with the payment currency value to calculate the exchange rate for this transaction.</p> <p>Key the check amount in the company's local currency or accept the default.</p> <p><i>Default Value:</i> The actual amount of the check</p> <p>(N 15,2) Optional</p>

Manual Check Entry Screen Fields and Function Keys

Field/Function Keys	Description
Exchange Rate	<p>This field displays only when International Currency is installed.</p> <hr/> <p>NOTE: This field will display only if you are paying a foreign currency invoice in the company's local currency and no currency contract is associated with the payment.</p> <hr/> <p>This field displays the exchange rate used to calculate conversions between the company's local currency and the payment currency.</p> <p>Display</p>
F12=Previous	<p>Press F12=PREVIOUS to return the Select Check Date Screen (p. 25-8) without keying a manual check.</p>
Enter	<p>Press ENTER to confirm your selections and record the manual check. The Manual Check Entry Selection Screen (p. 25-10) will appear.</p>

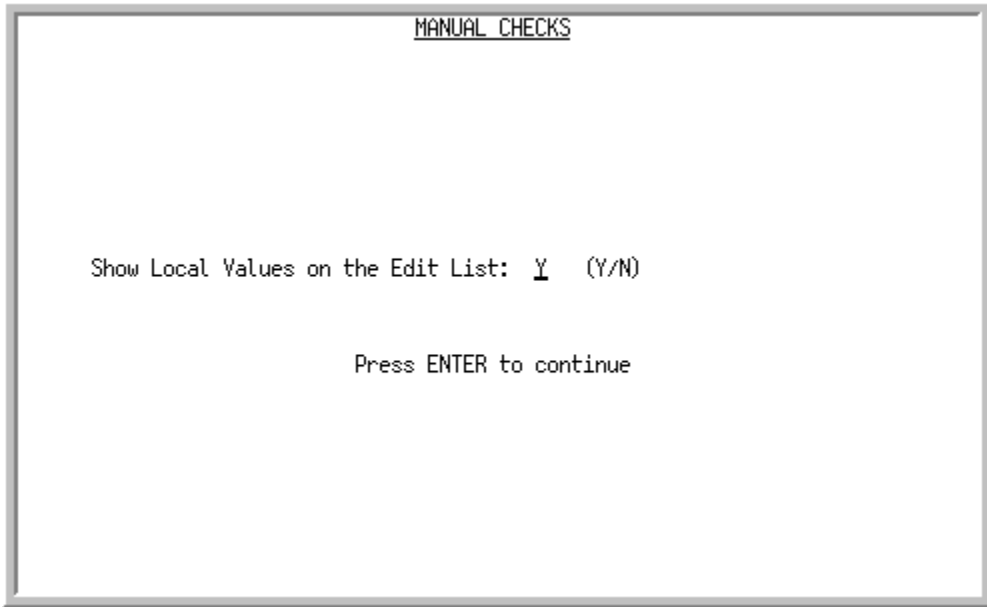

Use the Manual Check Edit List option on the Accounts Payable Check Processing Menu (MENU APCHCK) to print the check edit listing of manual checks entered for a company. These checks were keyed through Enter Manual Checks (MENU APCHCK).

Manual Check Edit List

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for the Manual Check Edit. Refer to CHAPTER 17: <i>Creating Payment Groups for Payment Selection</i> A/P Payment Processing Company Selection Screen (p. 17-3) for more information.
Manual Check Show Local Values Selection Screen	Use to determine if local currency values will print on the Manual Check Edit List.
Accounts Payable Manual Check Edit List	Prints any errors detected during the edit.

Manual Check Show Local Values Selection Screen

Within this Manual Check Edit List option, after the A/P Payment Processing Company Selection Screen, this screen will display only if International Currency is installed.

Manual Check Show Local Values Selection Screen Fields and Function Keys

Field Key	Description
Show Local Values on the Edit List	<p>This field displays only if the manual checks are for a trading currency.</p> <p>Use this field to specify whether or not amounts on the applicable report will print in the company's local currency, or in both the company's local currency and the trading currency; local equivalent amounts will print below the trading currency amounts.</p> <p>Key Y if you want amounts to print in the trading currency as well as the company's local currency.</p> <p>Key N if you want amounts to print only in the company's local currency.</p> <p><i>Default Value: Y</i></p> <p>(A 1) Required</p>
Enter	<p>Press ENTER to continue. The Report Options Screen will display. Refer to the Cross Applications User Guide for details about this screen.</p>

This listing prints the voucher information for open payables that have been paid manually and recorded through CHAPTER 25: *Entering Manual Checks*. Use this report to verify that you have accurately recorded payment with manual checks.

NOTE: All dates will display in the **Default Date Format** for the user that generated the report, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's **Default Date Format** specified through System Options Maintenance (MENU XAFIELD).

Accounts Payable Manual Check Edit List

Report Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p>
Vendor	<p>The vendor number and name of the vendor to whom the check was issued. This may be a payee vendor or it may be the assignee vendor.</p> <p>The assignee vendor will be identified with **ASSIGNEE** printed to the right of the assignee vendor name. The payee vendor number and name for the is check are printed below the assignee vendor information.</p> <p>If the vendor name is overridden, the payee name from Vendors Maintenance (MENU APFILE or MENU POFILE) will print.</p>
Voucher	The voucher number of the open payable.
Invoice No	The original invoice number for the open payable.
Inv Dt	The date of the original invoice.

Accounts Payable Manual Check Edit List

Report Field	Description
Gross Amt	<p>The total amount of payment before taking a discount.</p> <p>When International Currency is installed, the local currency amount will print on the line below the bank's trading currency amount.</p>
Dsc Taken	<p>The discount taken upon payment, if any.</p> <p>When International Currency is installed, the local currency amount will print on the line below the bank's trading currency amount.</p>
Net Amt	<p>The amount paid (gross amount minus discount amount).</p> <p>When International Currency is installed, the local currency amount will print on the line below the bank's trading currency amount.</p>
Check Information	<p>The check number, total check amount, and date of the manual check for which the above voucher(s) is/are paid.</p> <p>When International Currency is installed, the local currency amount and local currency symbol will print on the line below the bank's trading currency amount and trading currency symbol.</p>
Totals	<p>The total number of checks and the total currency amount of manual checks recorded for this company.</p> <p>When International Currency is installed, the local currency amount and local currency symbol will print on the line below the bank's trading currency amount and trading currency symbol.</p>

Use the Post Manual Checks option on the Accounts Payable Check Processing Menu (MENU APCHCK) to post manual checks for the selected company. These checks were keyed through Enter Manual Checks (MENU APCHCK).

When International Currency is installed and the revaluation process takes place for this option, the G/L Transaction Post Report (IC680D) may print, depending on the value specified in the *A/P to G/L* field through Company Name Maintenance (MENU XAFILE). Refer to Revalue Receipts Pending Invoicing (MENU ICRVAL) in the International Currency User Guide for information about this report.

Post Manual Checks

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for the edit. Refer to CHAPTER 17: <i>Creating Payment Groups for Payment Selection</i> , A/P Payment Processing Company Selection Screen (p. 17-3) for details.
Manual Checks Screen	Use to select the job template, if desired, to use for the manual check post process, and to determine if local values will print on the edit list, if this option displays.
G/L Transaction Post Journal	Print the General Ledger transactions for manual checks.

Manual Checks Screen

```
MANUAL CHECKS

Job Template:  _ .....  Modify Selections:  N

Show Local Values on the Edit List:  Y,  (Y/N)

Press ENTER to continue

F9=Job Template List
```

This screen appears after selecting option [12](#) - Post Manual Checks (MENU APCHCK).

Additionally, this screen may be called from Manual Check Edit (MENU APCHCK) and Check Reversal Edit (MENU APCHCK). If called from Post Manual Checks or Check Reversal Edit, this screen always appears. If called from Manual Check Edit, this screen only appears if the manual checks are for a trading currency.

Use this screen to select the job template, if desired, to use for the manual check post process, and to determine if local values will print on the edit list, if this option displays.

Manual Checks Screen Fields and Function Keys

Field/Function Keys	Description
Job Template	<p>This field displays only if this screen is called from the Post Manual Checks option.</p> <p>Job templates are defined through Job Template Maintenance (MENU XAFILE) to allow parameter selections to be pre-defined for a particular process (such as, GL Year End) ahead of time. Once defined, this template can be used repeatedly, eliminating the need to manually provide these parameters for every submission of this job process.</p> <p>For the current job submission, you can enter a pre-defined job template in this field to use the established parameters (with or without any modifications), or you can leave this field blank and the system will prompt you to provide your own parameters.</p> <p>If you enter a pre-defined job template in this field, and do not want to make any changes to the established parameter selections for this current job submission, key N in the <i>Modify Selections</i> field. You will then bypass all the output parameter screens.</p> <p>If you enter a pre-defined job template in this field, but want to review and/or make modifications to the established parameter selections for this current job submission, key Y in the <i>Modify Selections</i> field. You will be presented with the established parameters for that job template and can review/make changes as needed for this job.</p> <p>If you leave this field blank, you will be presented with a series of prompts for you to provide the desired parameters for this current job submission.</p> <hr/> <p style="text-align: center;">NOTE: To review a list of existing job templates that have been created, press F9=JOB TEMPLATE LIST.</p> <hr/> <p><i>Valid Values:</i> A job template defined for manual check posts (that is, AP192P) through Job Template Maintenance (MENU XAFILE).</p> <p>(A 10) Optional</p>

Manual Checks Screen Fields and Function Keys

Field/Function Keys	Description
Modify Selections	<p>This field displays only if this screen is called from the Post Manual Checks option.</p> <p>If using a job template (you keyed a job template name in the <i>Job Template</i> field on this screen or selected one via F9), this field determines if you will be presented with that template's parameters for review and/or modification for this current job submission.</p> <p>Key Y if you want to be able to review and/or modify the selections of the indicated job template. Any changes you make to the template through this post run will not impact the actual predefined template. The changes apply for this run of the job only. If you key Y, a series of selection screens will display allowing you to review and/or make changes. For details about the screens that display, refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide.</p> <p>Key N if you want to use the template as-is and you do not want to make any modifications. If you key N, a series of selections screens will not be displayed.</p> <p><i>Valid Values:</i> Y or N; cannot be Y if the <i>Job Template</i> field is blank.</p> <p>(A1) Optional</p>
Show Local Values on the Edit List	<p>This field displays only if the manual checks are for a trading currency.</p> <p>Use this field to specify whether or not amounts on the applicable report will print in the company's local currency, or in both the company's local currency and the trading currency; local equivalent amounts will print below the trading currency amounts.</p> <p>Key Y if you want amounts to print in the local currency as well as your trading currency.</p> <p>Key N if you want amounts to print only in your trading currency.</p> <p><i>Default Value:</i> Y</p> <p>(A 1) Required</p>
F3=Exit	Press F3=EXIT to exit the option and return to the menu.
F9=Job Template List	<p>Press F9=JOB TEMPLATE LIST to display the Job Template List Screen, where you can review a list of existing job templates that have been created for Post Manual Check processes.</p> <p>Refer to Job Template Maintenance (MENU XAFILE) in the Cross Applications User Guide for further details.</p>
Enter	Press ENTER to confirm your selections.

G/L Transaction Post Journal

Regular Entry Totals: 2 Transactions				83.48	83.48	

This journal prints when transactions are posted to G/L. When manual checks are posted through this option, this report prints the corresponding general ledger transactions.

Refer to this report as explained in Post Transactions (MENU GLMAIN) of the General Ledger manual.

When International Currency is installed:

- If manual checks payable to foreign currency vendors are posted and a fluctuation in the exchange rate has occurred, a revaluation will automatically occur.
- If payment was made in the company's local currency, the revaluation will be based on the exchange rate of the open payable.
- If payment was made in the trading currency, the revaluation will be based on the exchange rate of the foreign currency bank account upon which the check was drawn.
- If rate fluctuation has occurred, when Posting Manual Checks, resulting gains/losses are posted to the G/L gain/loss account. A second G/L Transaction Post Journal listing the gain/loss transactions will print in addition to the usual G/L Transaction Post Journal. In order to link the gain/loss transactions generated as IC journal transactions to the cash disbursements journal, the CD journal number is placed into the transaction source of IC transactions.
- A Currency Revaluation Detail Report (p. 27-6) will print a detailed breakdown of the G/L gain/loss transactions generated as a result of the revaluation.

Company Totals:					17,794.23	17,794.23

This report is generated if manual checks printed in a currency other than the company's local currency are posted through Post Manual Checks (p. 27-1), and a difference exists between the exchange rate in effect when the open payable was created and the rate in effect when the check was printed. A system-generated revaluation will occur, resulting in gain/loss G/L entries to the International Currency Journal. This report will print a detailed breakdown of these gain/loss transactions resulting from exchange rate fluctuations.

NOTE: This report prints only if International Currency is installed and active.

Currency Revaluation Detail Report

Report Field	Description
(Bank Account)	The foreign currency bank account number.
Posting Date:	The posting date of the check(s).
(Account Number):	The G/L Account Number to which the gain/loss transactions are posted. It is displayed in the format specified in G/L Options Maintenance (MENU GLFIL2). The account description is printed following the G/L Account Number.
Check #	The number of the check used for this payment.
Voucher	The number(s) of the voucher(s) that were paid.

Currency Revaluation Detail Report

Report Field	Description
Ref:	<p>The Journal Reference Number which was assigned to this detail transaction. The journal reference number ties together all detail transactions. The first segment of the Journal Reference Number is assigned to one transaction group. A separate Journal Reference Number is assigned to reversing entries generated from a transaction group. The prefix to the first segment of the Journal Reference Numbers is <i>IC</i> for all international currency transactions.</p> <p>The second segment of the Journal Reference Number is assigned sequentially to each detail transaction in a transaction group. This segment is always 00001 for the first detail transaction in a transaction group.</p>
Trn Source	The source PY will print for all gain/loss transactions resulting from payment reevaluations.
Trn Desc	The description PY Revaluation will print for all gain/loss transactions resulting from payment reevaluations.
Debit	The debit dollar amount entered for this detail transaction. The total debit amount for this transaction group is printed after the last detail transaction.
Credit	The credit dollar amount entered for this detail transaction. The total credit amount for this transaction group is printed after the last detail transaction.

Use the Check Reconciliation option on the Accounts Payable Check Processing Menu (MENU APCHCK) to reconcile your check register.

Check Reconciliation

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
AP Check Processing Company Selection Screen	Use to specify the company for reconciliation.
Bank Accounts List Screen	Use to select the bank account to be reconciled. Refer to CHAPTER 9: <i>Maintaining Bank Account Transactions</i> , Bank Accounts List Screen for more information.
A/P Check Reconciliation Screen	Use to specify the numbers of the checks to reconciliations.
End Check Reconciliation Screen	Summarizes the number of checks reconciled, the total, and the reconciliation date.

AP Check Processing Company Selection Screen

The symbol for the company's local currency will appear to the right of the Amount heading.</p> <p>Press F11=TRADING CURR to display check amounts in the trading currency. The symbol for the trading currency will appear to the right of the Amount heading.</p>

End Check Reconciliation Screen

<u>END CHECK RECONCILIATION</u>	
Checks Selected:	1
Check Value:	147.98
Reconciliation Date:	-
F3=Exit F12=Return F13=Accept	

This screen appears after you press **ENTER** from the A/P Check Reconciliation Screen (p. 28-4). This screen summarizes the number of checks and the total check value that has been reconciled on the previous screen. Use this screen to key a reconciliation date, and to confirm using **F13=ACCEPT** to accept the checks that you have marked for reconciliation.

End Check Reconciliation Screen Fields and Function Keys

Field/Function Keys	Description
Checks Selected	The total number of checks selected for reconciliation. Display
Check Value	The total amount of checks that have been reconciled in the bank's currency. Display
Reconciliation Date	The reconciliation date for each check that has been marked for reconciliation. This date is recorded in payment history. <i>Valid Values:</i> A date keyed in the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFIL). (N 6,0) Required
F3=Exit	Press F3=EXIT to exit the option and return to the menu. Any checks that have been marked for reconciliation are unmarked and are not reconciled.

End Check Reconciliation Screen Fields and Function Keys

Field/Function Keys	Description
F12=Return	<p>The F12=RETURN function key displays and is enabled only when this screen is called from the Check Reconciliation menu option. It does not display when this screen is called from Processed ACH Payments (MENU APCHCK).</p> <p>Press F12=RETURN to return to the A/P Check Reconciliation Screen (p. 28-4) where you may mark or un-mark additional checks for reconciliation.</p>
F13=Accept	<p>Press F13=ACCEPT to accept the check reconciliations that have been made through this option. These checks are marked as having been reconciled and are updated in payment history. MENU APCHCK will appear.</p>

Check reversals are performed if a check has been printed (through standard or manual processing) and recorded, but not be sent to a vendor. Use this option to enter check reversals. Once check reversals have been keyed through this option, they must be edited (through MENU APCHCK) and posted (through MENU APCHCK). If the G/L Interface is activated, the entries to void the checks and reopen the payable will be done for you.

Use the Enter Check Reversals option on the Accounts Payable Check Processing Menu (MENU APCHCK) to enter reversals. This is the first step of check reversal processing.

Enter Check Reversals

IC003-00001	001-0002000-000	Accounts Payable	RV Revaluation J 08/25/09		.24 RV	
IC003-00002	001-0005415-000	Canadian Cash Gain/L	RV Revaluation J 08/25/09	.24	CD041	
Regular Entry Totals:		2 Transactions		.24		

This journal prints when transactions are posted to G/L. When check reversals are posted through this option, this journal prints the corresponding general ledger transactions.

For details about this journal, refer to its description as provided for Post Transactions (MENU GLMAIN) in the General Ledger manual.

When International Currency is installed:

- If partial payments made to foreign currency vendors are reversed, the reversal will be based upon the rate of the open payable.
- If full payments made to foreign currency vendors are reversed, the reversal will be based upon the exchange rate in payment history.
- If a fluctuation has occurred between the rate of the check and the rate of the voucher, a revaluation will automatically occur when the reversal is posted.
- When the International Currency revaluation process takes place for this option, the G/L Transaction Post Report (IC680D) may print, depending on the value specified in the *A/P to G/L* field through Company Name Maintenance (MENU XAFIELD). Refer to Revalue Receipts Pending Invoicing (MENU ICRVAL) in the International Currency User Guide for information about this report.

- Any resulting gains/losses will be posted to the G/L Gain/Loss account. A second G/L Transaction Post Journal listing the gains/losses transactions will print in addition to the usual G/L Transaction Post Journal. In order to link the gain/loss transactions generated as IC journal transactions to the Cash Disbursements journal, the CD journal number is placed into the transaction source of IC transactions. Also, a Currency Revaluation Detail Report (p. 31-9) will print a detailed breakdown of the G/L gain/loss transactions generated as a result of the revaluation.

Cash Disbursements Report

			* TOTAL \$\$ *		14,413.31		

This report prints when check reversals are posted through this option.

For each check that was reversed, the following information prints:

- Vendor number and name
- Invoice Number
- Voucher Number
- G/L Cash Disbursements Journal number and reference number
- Debit and Credit Amounts
- G/L account number
- Check number
- Total debits and credits in the currency of the company
- Total amount in the currency of the company

Currency Totals:					.24	.24
Company Totals:					.24	.24

This report will only print when International Currency is installed.

This report prints when check reversals are posted through this option and a currency revaluation is automatically performed. This report shows the detail information to balance G/L Journal created for the currency gain/loss.

For each check that was reversed, the following information prints:

- Currency code and description
- G/L account number and description
- Check number
- Voucher number
- G/L Journal number and line reference number
- Transaction source
- Debit and Credit amounts in the bank account's currency
- Currency and company totals

Checks which have not been used (due to damage, etc.) need to be voided. Use the Void Unprinted Checks option on the Accounts Payable Check Processing Menu (MENU APCHCK) to record the numbers of the checks being voided.

Void Unprinted Checks

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Payment Processing Company Selection Screen	Use to specify the company for which you are voiding checks.
Record Used/Voided Checks Screen	Use to record the number of the checks being voided.

A/P Payment Processing Company Selection Screen

AP PAYMENT PROCESSING

Company? 01

F3=Exit

This screen appears after selecting option 18 - Void Unprinted Checks from the Accounts Payable Check Processing Menu (MENU APCHCK), if you are using Distribution A+ in multi-company mode. Otherwise, this screen will be bypassed and the Bank Accounts List Screen (p. 9-13) will appear instead.

Use this screen to select the company for which manual checks are keyed. This option cannot be processed for a particular company if any of the following are true for that company:

- Check editing (MENU APCHCK) has been submitted to the Transaction Processor and has not completed.
- Check printing (MENU APCHCK) has been submitted to the Transaction Processor and has not completed.
- Checks have been printed for this company but the check numbers have not yet been recorded through Record Check Numbers / Post ACH or CC Payments MENU APCHCK).

A/P Payment Processing Company Selection Screen Fields and Function Keys

This screen appears after you press **ENTER** from the Bank Accounts List Screen (p. 9-13). Use this screen to record the numbers of unused checks that have been voided.

Record Used/Voided Checks Screen Fields and Function Keys

Field/Function Keys	Description
Checking Account	The checking account bank number and name for which checks are voided. Display
Range	The number of the range of checks voided. You may key up to 15 ranges. Display
From - To Range	The range of check numbers that have been voided. Key the first number in a group of voided checks in the <i>From</i> column, and key the last number in the group in the <i>To</i> column.
<p>NOTE: You must key a <i>From</i> and <i>To</i> check number. If there is only one check in the range, key that number in both fields.</p>	
<p>(2 @ N 6,0) Required</p>	

Record Used/Voided Checks Screen Fields and Function Keys

Field/Function Keys	Description
Use/Void	<p>Indicates if the range of check numbers keyed in the <i>From -To Range</i> are voided or used.</p> <p>Key V if the indicated check numbers have not been printed and you want to void those checks.</p> <p>Key U if the indicated check numbers have been printed and used. The number of used checks must match the number of checks printed.</p> <p><i>Valid Values:</i> V, U</p> <p>(A 1) Required</p>
Count	<p>Displays the number of checks keyed in one range of used or voided checks.</p> <p>Display</p>
Warning	<p>An * is displayed in this column if one of the check numbers selected in the range of numbers to record has been previously recorded for this company.</p> <p>An * is also displayed if the check group voided is not continuous from the last check number recorded.</p> <hr/> <p style="text-align: center;">NOTE: This * is only a warning message and does not terminate processing.</p> <hr/> <p>Display</p>
Check Counts	<p>The total number of checks voided through this option. These fields are updated immediately for each range of check numbers keyed on this screen.</p> <p>Display</p>
F3=Exit	<p>Press this key to exit the option and return to the menu.</p>
F13=Accept Check Numbers	<p>Press this key to confirm your selections and record check numbers. MENU APCHCK will appear.</p>

Positive Pay is an anti-fraud service offered throughout the banking community protecting companies against altered checks and counterfeit check fraud.

In a simple format, the company that issues checks to pay its bills will also transmit an electronic version of those checks to their bank for verification. The bank will import the electronic version and match each check presented for clearing against the electronic version. If the presented checks' numbers and amounts appear on a previously submitted list, the check is sent through for payment. If both items do not match, the check is not cleared.

This program will be used to define various bank formats of Positive Pay output files. Each format is stored as a template. Use the record layout screens to create the record layout details of a particular positive pay template format output (transmission) file. Most positive pay output file formats have File Header, Check Details, and File Summary sections, with each section containing different information. The names of these sections may vary for different bank formats, for example the Summary section can be called the Totals or Trailer section, but the meaning is the same. In some cases an additional record, often called the Sign On Record, is required as the first line in the transmission file. Some Positive Pay bank formats do not require File Header or File Summary sections, and only use Detail records, some only Detail and Summary records etc. This information is used as the basis for Positive Pay Extract processing to populate each section of the Positive Pay Output text file.

Positive Pay Template Maintenance provides the flexibility to optionally use any of the record layouts and omit those that will not be used. Each of the record layouts is maintained on a separate screen: SIGNON, HEADER, DETAIL and TOTALS screens. Entering data on any of these screens is optional, they are used only if required by a particular Positive Pay Format. The record layout screens are similar, and have the almost the same set of fields and functionality. They are designed to be generic enough to satisfy the most widely used Positive Pay bank format requirements.

The exported data is generated in a .TXT text file; all data is treated as character fields. All field formatting needs to be specified on the record layout screen for the specific field and record. The text file name will be comprised of the template name, the file creation date and file creation time separated by an underscore (template name_YYYY-MM-DD_NN:NN:NN.txt).

Positive Pay Template Maintenance

Title	Purpose
Positive Pay Template Maintenance Selection Screen	Use to select the template to be added, changed or deleted.
Positive Pay Template Maintenance Screen	Use to identify the output file path and type of file to be created for the export.

This screen appears when you press **ENTER** on the Positive Pay Template Maintenance Selection Screen (p. 33-3). Use this screen to define general information about the positive pay template.

Positive Pay Template Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Template Name	A unique Positive Pay Name from previous screen. Display only.
Template Description	Key the description for this Positive Pay Template that will display in the search for template names. (A 30) Required

Positive Pay Template Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Output File IFS Path	<p>Use this field to specify the location where Positive Pay Extract file will be placed at the root of the IFS. If you have already created this directory at the root of the IFS, enter the path for that directory.</p> <p>If you have not created a directory at the root of the IFS, enter the path for the directory; when you press ENTER, the F5=CREATE PATH function key displays to have the system create it for you.</p> <p><i>Valid Values:</i> Letters A through Z and Numbers 1 through 9</p> <ul style="list-style-type: none"> the path must begin with a "/"; the characters "\:?\<> " are not valid in the Path Name; the path cannot include a segment that begins or ends in a blank the FTP path cannot contain two or more consecutive "/" characters <p>(A 50) Required</p>
Output File Type	<p>Use to identify the type of output file being created.</p> <p>Key F for a fixed width file which is then defined as the field length of each field is specified on the Positive Pay Detail Record Layout - Field Value View Screen (p. 33-22).</p> <p>Key D for a delimited file and then use the Delimiter field to specify what character will be used for the delimiter. With delimited output type files, fields will truncate thereby removing blank spaces at the end of each field.</p> <p><i>Valid Values:</i> F for fixed width file, D for delimited file.</p> <p>(A 1) Required</p>
Delimiter	<p>Use to define the delimiter character to be used to separate data fields in the output file for Output File Type of D.</p> <p><i>Valid Values:</i> Blank when the Output File Type field is F for fixed width, any character for delimited files</p> <p>(A 1) Required</p>
F5=Create Path	<p>The F5=CREATE PATH function key only appears when the Output File IFS Path entered does not exist.</p> <p>Press F5=CREATE PATH to create the FTP path.</p>
F10=Layout	<p>Press the F10=LAYOUT function key to continue to the process of creating the record layouts. The Positive Pay SignOn Record Layout - Field Value View Screen (p. 33-8) appears.</p>
F12=Return	<p>Press F12=RETURN to return to the previous screen without saving data. The Positive Pay Template Maintenance Screen (p. 33-5) appears.</p>

Positive Pay Template Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
F24=Delete	<p>The F24=DELETE function key only displays when a Function of D is entered on the Positive Pay Template Maintenance Selection Screen (p. 33-3). Press F24=DELETE to delete the template.</p> <hr/> <p>NOTE: The Output File IFS Path actual folder is not removed from the \IFS\Root directory of the System i when you delete a specific template. If that folder is no longer required, you will manually delete it after ensuring that the information contained in the folder is no longer relevant or has been moved to an appropriate location.</p> <hr/>
Enter	<p>Press ENTER to validate the data keyed on this screen. Press the F10=LAYOUT function key to continue with the next step in template maintenance.</p> <hr/>

Use this screen to define the fields that will be used for each Sign On output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: company number, bank ID, bank name, bank account number, file creation date, space, and long bank account number.

In some cases, the sign on record is required as the first line in the transmission file. If a sign on record is not required, you can bypass this record by pressing **F10=NEXT RECORD** and continuing with the header record layouts.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting all fields will be left justified as a text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Positive Pay SignOn Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Maintenance Mode	The type of maintenance, Add or Change, is shown in reverse image. Display
Template Name	The Template Name selected on the Positive Pay Template Maintenance Selection Screen (p. 33-3) displays. Display
Record Type	The record layout type that is being maintained. Display
Seq	Use to identify the order of appearance of the Field Value in the Sign On record of the output file. Key the field sequence number for the Field Value used on this line. The first data field on a line should have a field sequence of 1, and each next data field should have a field sequence increments by 1. <i>Valid Values:</i> must be greater than zero when the Field Value is not blank; cannot be any gaps in field sequence numbers assigned to valid lines (N 2,0) Required

Positive Pay SignOn Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Field Name	<p>Use to identify what this Field Value represents to this template. This field is for internal use only and can be the shortened version of the Field Value, a generic field name that you create to represent filler or fields that the bank's file has but the check file does not, or text to represent the meaning of the field. This field is not included in the export file.</p> <p>Key the field name to be used.</p> <p>(A 20) Display</p>
Length	<p>Use to identify the length of the field to be exported to the Positive Pay output text file. This field is optional for an Output File Type set to D for delimited on the Positive Pay Template Maintenance Screen (p. 33-5). If the Output File Type is F for fixed width, this field is required.</p> <p>For example, the check amount field size is 15,2 which means that there are 15 positions total with the last 2 being decimal positions. If the bank's file only has a 10 position amount field size, 10 would be entered in this field and the left-most positions of the field would not be included in the bank's field.</p> <p>Key the field length for fixed width output files.</p> <p>(N 3,0) Optional/Required</p>
Field Value	<p>Only displays with the 'Positive Pay Header Record Layout - Field Value View Screen.</p> <p>Use this field to insert the appropriate Field Value that selects the actual field from the Accounts Payable Printed Checks File (APCHK), Bank Account File (XABAC), Bank Names records in the Order Control File (ORCTL), Accounts Payable Name Files (APHNM, APVEN, APONM); the System i system date; or a Constant value entered by the user to be loaded in the Positive Pay output text file.</p> <p>Using the constant value, you can use this field to add spaces, create filler fields or text fields required by the banks positive pay format. For those fields, the data keyed in this field is loaded to the file exactly as it is entered here.</p> <p>To assist in selecting the source of data, set the cursor to any place in the Field Value and press F4=INSERT FIELD VALUE.</p> <p><i>Valid Values:</i> a valid Field Value selected from Positive Pay Field Values Screen (p. 33-14); text required by the bank and entered here by the user</p> <p>(A 36) Required</p>

Positive Pay SignOn Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Justify	<p>Only displays with the Positive Pay SignOn Record Layout - Field Formatting View Screen.</p> <p>Use this field to properly set text to be left or right justified to match the banks specifications.</p> <p>Key R to begin filling this field at the right-most position thereby leaving the left positions blank, zero, or other characters. For example, check number 12345 could be right-justified in the bank's file (<<12345 where the < represents a space).</p> <p>Key L to begin filling this field at the left-most position thereby leaving the right positions blank. For example, check number 12345 could be left-justified in the bank's file (12345>>where the > represents a space).</p> <p>Leave this field blank and the fields will default to left justification and no filler.</p> <p><i>Default Value:</i> blank</p> <p><i>Valid Values:</i> R, L, or blank</p> <p>(A 1) Optional</p>
Filler	<p>Only displays with the Positive Pay SignOn Record Layout - Field Formatting View Screen.</p> <p>Use this field to properly set text left or right justified and fill the remaining spaces with this value.</p> <p>For alpha fields, key the character to be used to fill the blank space in this field if blanks are not allowed.</p> <p>For numeric fields, key zero to left zero-fill a numeric field. Leave the field blank for blank filled fields.</p> <p>For example:</p> <ul style="list-style-type: none"> • the 15,2 N position check amount could be left zero-filled and right-justified as 00000000023456 for \$234.56 • the 9,0 N position check number 12345 could be 000012345 <p>(A 1) Optional</p>

Positive Pay SignOn Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Implied Decimal	<p>Only displays with the Positive Pay SignOn Record Layout - Field Formatting View Screen.</p> <p>The Implied Decimal field will be used for numeric fields with decimal positions, such as monetary amounts, to indicate if decimal should be implied.</p> <p>Key Y to indicate that the decimal point will be implied and not be added to the field in the file. For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>
Date Format	<p>Only displays with the Positive Pay SignOn Record Layout - Field Formatting View Screen.</p> <p>Use the Date Format field to indicate the required date formatting for the bank's output text file.</p> <p>The Date Format field is only used for date fields such as Check Print Date or File Creation Date. The validation of date formats is a common sense type validation and is aimed to ensure that the specified date format has year, month and day portions in any order and allows for any separators to be used. General expectations are the following:</p> <ul style="list-style-type: none"> YY or YYYY for Year segment MM for Month segment DD for Day segment <p>Segments may be separated by any character if needed.</p> <p><i>Default Value:</i> YYYY-MM-DD is used for the .TXT file when this field is left blank</p> <p><i>Valid Values:</i> Examples of valid formats are YYMMDD, YYYYMMDD, MMDDYYYY, DDMMYYYY, YY-MM-DD, MM/DD/YYYY</p> <p>(A 10) Optional</p>
F2=Formatting / F2=Field Values	<p>Press F2=FORMATTING / F2=FIELD VALUES to toggle the screen between the Field Values and Field Formatting views.</p>

Positive Pay SignOn Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
F4=Insert Field Value	<p>Only displays with the Positive Pay SignOn Record Layout - Field Value View Screen.</p> <p>Press F4=INSERT FIELD VALUE to insert the actual field from the file. The Positive Pay Field Values Screen (p. 33-14) appears.</p> <p>The cursor needs to be positioned in the Field Value field at the location where the insert will occur.</p>
F5=Re-sort	<p>Press the F5= RE-SORT to sort the fields by sequence entered, and redisplayed in ascending order by sequence. This can be helpful, for example, in cases when the initial layout needs to be adjusted by inserting some new fields or changing the order of fields appearance on the Output File line.</p> <p>For example:</p> <p>Seq 1 is Company, Seq 2 is Bank Name and Seq13 is Bank Account. The bank name and bank account fields should be reversed. Change the sequence numbers of the two lines and press F5= RE-SORT. The screen will now show Seq 1 is Company, Seq 2 is Bank Account and Seq13 is Bank Name.</p>
F10=Next Record	<p>Press F10=NEXT RECORD to move to the next record layout screen.</p> <p>From the Positive Pay SignOn Record Layout - Field Formatting View Screen (p. 33-8) F10=NEXT RECORD displays the Positive Pay Header Record Layout - Field Value View Screen (p. 33-16).</p>
F12=Return	<p>Press F12=RETURN to return to the Positive Pay Template Maintenance Screen (p. 33-5) without saving data. You must continue, using the F10=NEXT RECORD function key, through the Header, Detail, and Trailer records to save your template data.</p>

The data that displays in the **Field Value** and **Data Source** columns is different data based on the originating screen. Data is filtered to the specific record being added/maintained.

Positive Pay Field Values Screen Fields and Function Keys

Field/Function Key	Description
Record Type	This field displays the specific record layout that is being maintained: SIGNON, HEADER, DETAIL, or TRAILER. Display
Sl	The reference number to select a line on the screen. Will be used with the Select field to choose a field to be added to the template. Display
Field Value	The selectable actual field from the files that can be used for the specific record layout. The list of field values will be different for each specific record layout. Display

Positive Pay Field Values Screen Fields and Function Keys

Field/Function Key	Description
Data Source	Indicates which file or data source will be used for the selection of the Field Value . Data files used are A/P Check File (APCHK), Bank Accounts File (XABAC), and Order Control File (ORCTL). Display
Select	Use to select a field value to be included in the specific record layout for the template being maintained. Key the reference number of the Field Value to be selected. (N 2,0) Optional
F2=Show Source Size/ F2=Hide Source Size	The F2=SHOW SOURCE SIZE / F2=HIDE SOURCE SIZE fields will toggle to display the column with the originating file field size. This information will be helpful in determining the compatibility between the check files field sizes and the requirements of each specific bank.
F12=Return	Press F12=RETURN without selecting data.
Enter	Press ENTER to select the field value and return to the screen for the record layout being maintained.

7	bank # full	30	L			

The Positive Pay Header Record Layout - Field Value View Screen displays when you press F10=NEXT RECORD on the Positive Pay SignOn Record Layout - Field Value View Screen (p. 33-8) or the Positive Pay SignOn Record Layout - Field Formatting View Screen (p. 33-8).

The Positive Pay Header Record Layout - Field Formatting View Screen displays with the F2=FORMATTING / F2=FIELD VALUE toggle key.

Use this screen to define the fields that will be used for each Header output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: company number, bank ID, bank name, bank account number, file creation date, space, and long bank account number. If the header record is not required, you can bypass this record by pressing **F10=NEXT RECORD** and continuing with the detail record layouts.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting all fields will be left justified as a text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Positive Pay Header Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Maintenance Mode	The type of maintenance, Add or Change, is shown in reverse image. Display
Template Name	The Template Name selected on the Positive Pay Template Maintenance Selection Screen (p. 33-3) displays. Display
Record Type	The record layout type that is being maintained. (Display
Seq	Use to identify the order of appearance of the Field Value in the Header on record of the output file. Key the field sequence number for the Field Value used on this line. The first data field on a line should have a field sequence of 1, and each next data field should have a field sequence increments by 1. <i>Valid Values:</i> must be greater than zero when the Field Value is not blank; cannot be any gaps in field sequence numbers assigned to valid lines (N 2,0) Required

Positive Pay Header Record Layout - Field View & Field Formatting Fields and Function Keys

Field/Function Key	Description
Field Name	<p>Use to identify what this Field Value represents to this template. This field is for internal use only and can be the shortened version of the Field Value, a generic field name that you create to represent filler or fields that the bank's file has but the check file does not, or text to represent the meaning of the field. This field is not included in the export file.</p> <p>Key the field name to be used.</p> <p>(A 20) Display</p>
Length	<p>Use to identify the length of the field to be exported to the Positive Pay output text file. This field is optional for an Output File Type set to D for delimited on the Positive Pay Template Maintenance Screen (p. 33-5). If the Output File Type is F for fixed width, this field is required.</p> <p>For example, the check amount field size is 15,2 which means that there are 15 positions total with the last 2 being decimal positions. If the bank's file only has a 10 position amount field size, 10 would be entered in this field and the left-most positions of the field would not be included in the bank's field.</p> <p>Key the field length for fixed width output files.</p> <p>(N 3,0) Optional/Required</p>
Field Value	<p>Only displays with the 'Positive Pay Header Record Layout - Field Value View Screen.</p> <p>Use this field to insert the appropriate Field Value that selects the actual field from the Accounts Payable Printed Checks File (APCHK), Bank Account File (XABAC), Bank Names records in the Order Control File (ORCTL), Accounts Payable Name Files (APHNM, APVEN, APONM); the System i system date; or a Constant value entered by the user to be loaded in the Positive Pay output text file.</p> <p>Using the constant value, you can use this field to add spaces, create filler fields or text fields required by the banks positive pay format. For those fields, the data keyed in this field is loaded to the file exactly as it is entered here.</p> <p>To assist in selecting the source of data, set the cursor to any place in the Field Value and press F4=INSERT FIELD VALUE.</p> <p><i>Valid Values:</i> a valid Field Value selected from the Positive Pay Field Values Screen (p. 33-14); text required by the bank and entered here by the user</p> <p>(A 36) Required</p>

Positive Pay Header Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Justify	<p>Only displays with the Positive Pay Header Record Layout - Field Formatting View Screen.</p> <p>Use this field to properly set text to be left or right justified to match the bank specifications.</p> <p>Key R to begin filling this field at the right-most position thereby leaving the left positions blank, zero, or other characters. For example, check number 12345 could be right-justified in the bank's file (<<12345 where the < represents a space).</p> <p>Key L to begin filling this field at the left-most position thereby leaving the right positions blank. For example, check number 12345 could be left-justified in the bank's file (12345>>where the > represents a space).</p> <p>Leave this field blank and the fields will default to left justification and no filler.</p> <p><i>Default Value:</i> blank</p> <p><i>Valid Values:</i> R, L, or blank</p> <p>(A 1) Optional</p>
Filler	<p>Only displays with the Positive Pay Header Record Layout - Field Formatting View Screen.</p> <p>Use this field to properly set text left or right justified and fill the remaining spaces with this value.</p> <p>For alpha fields, key the character to be used to fill the blank space in this field if blanks are not allowed.</p> <p>For numeric fields, key zero to left zero-fill a numeric field. Leave the field blank for blank filled fields.</p> <p>For example:</p> <ul style="list-style-type: none"> • the 15,2 N position check amount could be left zero-filled and right-justified as 00000000023456 for \$234.56 • the 9,0 N position check number 12345 could be 000012345 <p>(A 1) Optional</p>

Positive Pay Header Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
Implied Decimal	<p>Only displays with the Positive Pay Header Record Layout - Field Formatting View Screen.</p> <p>The Implied Decimal field will be used for numeric fields with decimal positions, such as monetary amounts, to indicate if decimal should be implied.</p> <p>Key Y to indicate that the decimal point will be implied and not be added to the field in the file. For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56; or with no edits it would be blank filled and show as 23456.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56; or with no edits it would be blank filled and show as 234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>
Date Format	<p>Only displays with the Positive Pay Header Record Layout - Field Formatting View Screen.</p> <p>Use the Date Format field to indicate the required date formatting for the bank's output text file.</p> <p>The Date Format field is only used for date fields such as Check Print Date or File Creation Date. The validation of date formats is a common sense type validation and is aimed to ensure that the specified date format has year, month and day portions in any order and allows for any separators to be used. General expectations are the following:</p> <ul style="list-style-type: none"> YY or YYYY for Year segment MM for Month segment DD for Day segment <p>Segments may be separated by any character if needed.</p> <p><i>Default Value:</i> YYYY-MM-DD is used for the .TXT file when this field is left blank</p> <p><i>Valid Values:</i> Examples of valid formats are YYMMDD, YYYYMMDD, MMDDYYYY, DDMMYYYY, YY-MM-DD, MM/DD/YYYY</p> <p>(A 10) Optional</p>
F2=Formatting / F2=Field Values	<p>Press F2=FORMATTING / F2=FIELD VALUES to toggle the screen between the Field Values and Field Formatting views.</p>

Positive Pay Header Record Layout - Field View& Field Formatting Fields and Function Keys

Field/Function Key	Description
F4=Insert Field Value	<p>Only displays with the Positive Pay Header Record Layout - Field Value View Screen.</p> <p>Press F4=INSERT FIELD VALUE to insert the actual field from the file. The Positive Pay Field Values Screen (p. 33-14) appears.</p> <p>The cursor needs to be positioned in the Field Value field at the location where the insert will occur.</p>
F5=Re-sort	<p>Press the F5=RE-SORT to sort the fields by sequence entered, and redisplayed in ascending order by sequence. This can be helpful, for example, in cases when the initial layout needs to be adjusted by inserting some new fields or changing the order of fields appearance on the Output File line.</p> <p>For example:</p> <p>Seq 1 is Company, Seq 2 is Bank Name and Seq13 is Bank Account. The bank name and bank account fields should be reversed. Change the sequence numbers of the two lines and press F5=RE-SORT. The screen will now show Seq 1 is Company, Seq 2 is Bank Account and Seq13 is Bank Name.</p>
F10=Next Record	<p>Press F10=NEXT RECORD to move to the next record layout screen.</p> <p>From the Positive Pay Header Record Layout - Field Value View Screen (p. 33-16) F10=NEXT RECORD displays the Positive Pay Detail Record Layout - Field Value View Screen (p. 33-22).</p>
F12=Return	<p>Press F12=RETURN to return to the Positive Pay Trailer Record Layout - Field Value View Screen (p. 33-29). Any data keyed on the record layout screens is saved while you are moving between them.</p>

For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56; or with no edits it would be blank filled and show as 23456.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56; or with no edits it would be blank filled and show as 234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>
Date Format	<p>Only displays with the Positive Pay Trailer Record Layout - Field Formatting View Screen.</p> <p>Use the Date Format field to indicate the required date formatting for the bank's output text file.</p> <p>The Date Format field is only used for date fields such as Check Print Date or File Creation Date. The validation of date formats is a common sense type validation and is aimed to ensure that the specified date format has year, month and day portions in any order and allows for any separators to be used. General expectations are the following:</p> <ul style="list-style-type: none"> YY or YYYY for Year segment MM for Month segment DD for Day segment <p>Segments may be separated by any character if needed.</p> <p><i>Default Value:</i> YYYY-MM-DD is used for the .TXT file when this field is left blank</p> <p><i>Valid Values:</i> Examples of valid formats are YYMMDD, YYYYMMDD, MMDDYYYY, DDMMYYYY, YY-MM-DD, MM/DD/YYYY</p> <p>(A 10) Optional</p>
F2=Formatting / F2=Field Values	<p>Press F2=FORMATTING / F2=FIELD VALUES to toggle the screen between the Field Values and Field Formatting views.</p>

Positive Pay Trailer Record Layout - Field View & Field Formatting Fields and Function Keys

Field/Function Key	Description
F4=Insert Field Value	<p>Only displays with the Positive Pay Trailer Record Layout - Field Value View Screen.</p> <p>Press F4=INSERT FIELD VALUE to insert the actual field from the file. The Positive Pay Field Values Screen (p. 33-14) appears.</p> <p>The cursor needs to be positioned in the Field Value field at the location where the insert will occur.</p>
F5=Re-sort	<p>Press the F5=RE-SORT to sort the fields by sequence entered, and redisplayed in ascending order by sequence. This can be helpful, for example, in cases when the initial layout needs to be adjusted by inserting some new fields or changing the order of fields appearance on the Output File line.</p> <p>For example:</p> <p>Seq 1 is Company, Seq 2 is Bank Name and Seq13 is Bank Account. The bank name and bank account fields should be reversed. Change the sequence numbers of the two lines and press F5=RE-SORT. The screen will now show Seq 1 is Company, Seq 2 is Bank Account and Seq13 is Bank Name.</p>
F10=Next Record	<p>Press F10=NEXT RECORD to move to the next record layout screen.</p> <p>From the Positive Pay SignOn Record Layout - Field Formatting View Screen (p. 33-8) F10=NEXT RECORD displays the Positive Pay Header Record Layout - Field Value View Screen (p. 33-16).</p> <p>From the Positive Pay Header Record Layout - Field Value View Screen (p. 33-16) F10=NEXT RECORD displays the Positive Pay Detail Record Layout - Field Value View Screen (p. 33-22).</p> <p>From the Positive Pay Detail Record Layout - Field Value View Screen (p. 33-22) F10=NEXT RECORD displays the Positive Pay Trailer Record Layout - Field Value View Screen (p. 33-29).</p>
F10=Save Template	<p>Press F10=SAVE TEMPLATE to save the template and update the Positive Pay Template files.</p> <p>From the Positive Pay Trailer Record Layout - Field Value View Screen (p. 33-29) F10=SAVE TEMPLATE displays the Positive Pay Template Maintenance Selection Screen (p. 33-3).</p>
F12=Return	<p>Press F12=RETURN to return to the Positive Pay Detail Record Layout - Field Value View Screen (p. 33-22). Any data keyed on the record layout screens is saved while you are moving between them.</p>

The positive pay extracts for the banks will be created using this menu option. The selection criteria should be very specific to send the banks exactly what they need and not additional data that will delay the acceptance process.

Positive Pay Extract

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Positive Pay Extract Screen	Use to select the criteria to generate the Positive Pay Extract File.

Positive Pay Extract Screen

```

                POSITIVE PAY EXTRACT

Template Name? _ .....
Bank Id?      ..... to? .....
Company?      01,    to? ...
Bank Account? ..... to? .....
Check Date:   ..... to: .....
Check Numbers: ..... to: .....

Include Voided Checks:  N (Y,N)

Submit to Batch:       Y (Y,N)

                                F3=Exit
    
```

This screen displays when you select option **20** - Positive Pay Extract from MENU APCHCK. The extract text file that is created will be placed on the /IFS/Root directory based on the **Output File IFS Path** specified on the Positive Pay Template Maintenance Screen (p. 33-5).

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

Important

There is one record for the extract totals in each positive pay extract file. Key your selection criteria carefully and specifically to exactly match the bank requirements for data totals.

Positive Pay Extract Screen Fields and Function Keys

Field/Function Key	Description
Template Name	Key the specific positive pay bank format template to be used for this extract. <i>Valid Values:</i> a Positive Pay Template created through Positive Pay Template Maintenance (p. 33-2) (MENU APCHCK) (A 10) Required

Positive Pay Extract Screen Fields and Function Keys

Field/Function Key	Description
Bank ID	<p>Key the range of bank ID's to be used to limit the information selected for this positive pay extract.</p> <p><i>Valid Values:</i> a valid bank ID created through Bank Account Maintenance (p. 52-1) (MENU APCHCK)</p> <p>2 @ (A 5) Optional</p>
Company	<p>Key the company number associated with the items that you want to print on the report.</p> <p><i>Valid Values:</i> A valid company number defined through Company Name Maintenance (MENU XAFILE) which you are authorized to access through Authority Profile Maintenance (MENU XASCTY).</p> <p>2 @ (N 2,0) Optional</p>
Bank Account	<p>Key the range of bank accounts to be used to limit the information selected for this positive pay extract.</p> <p><i>Valid Values:</i> a valid bank ID created through Bank Account Maintenance (p. 52-1) (MENU APCHCK)</p> <p>2 @ (A 10) Required</p>
Check Date	<p>Key the range of check dates to be used to limit the information selected for this positive pay extract.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
Check Numbers	<p>Key the range of check numbers to be used to limit the information selected for this positive pay extract.</p> <p>2 @ (A 8) Required</p>
Include Voided Checks	<p>Key Y to include the check numbers that have been recorded and marked as voided checks through Record Check Numbers / Post ACH or CC Payments (MENU APCHCK) or Void Unprinted Checks (MENU APCHCK).</p> <p>Key N to only have actual used checks included in the positive pay extract file.</p> <p>(A 1) Required</p>
Submit to Batch	<p>Jobs sent to the batch subsystem will enable you to continue working on your workstation. Whereas, jobs which run interactively tie up your workstation until processing of the job is complete.</p> <p>Key Y to send this print job to the batch subsystem.</p> <p>Key N to process the job interactively.</p> <p>(A 1) Required</p>

The Open Payables by Vendor Report lists open payable invoices for each vendor in summary or in detail. Use the Open Payable by Vendor Report option on the Accounts Payable Report Menu (MENU APREPT) to print this report.

NOTE: The Open Payables by Vendor Report can be exported to Microsoft Excel using a Tab Separated Value (.tsv) format. Make that appropriate selection on the PC File Export Selection Screen that displays from the Report Options Screen when **Export Report** is set to **Y**. Refer to the Cross Applications User Guide for more information about exporting reports. Only those fields so noted in the report descriptions will be included in the export.

Open Payables by Vendor Report

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Open Payables By Vendor Screen	Use to specify limiting criteria for the report.
Open Payables by Vendor Report	Prints open payable by vendor.

Open Payables By Vendor Screen

```

OPEN PAYABLES BY VENDOR

Company?      ...   to?   ...
Vendor:       ..... to   .....
Due Date:     ..... to   .....
Invoice Date: ..... to   .....
Business Unit? ...   to?   ...
Include Held Invoices: Y, Y,N
Dsply Trding Currency: N, Y,N
Vendor Sort:  2    1=Vendor Number
                2=Vendor Sort Word
Sort Sequence: .I, I=Invoice Number
                D=Due Date
Detail/Summary: S, D,S
                                                    F3=Cancel
    
```

This screen appears after selecting option 1 - Open Payables by Vendor Report option from the Accounts Payable Report Menu (MENU APREPT). Use this screen to select the open payables, sort sequence, and the format (detail or summary) for the report. By default, this report is sorted by company, vendor sort word and then invoice number or due date, depending on your selection.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

Open Payables By Vendor Screen Fields and Function Keys

Field/Function Key	Description
Company	This field appears only if the Multi Company field is set to Y through System Options Maintenance (MENU XAFILE). Key the range of company numbers to limit the report to customers assigned to companies in the range. (2 @ N 2,0) Optional
Vendor	Key the range of vendors to limit the report to vendors with open payables for the companies in the range. (2 @ A 6) Optional

Open Payables By Vendor Screen Fields and Function Keys

Field/Function Key	Description
Due Date	<p>Key the range of due dates to limit the report to invoices that are due for payment in that date range.</p> <p><i>Valid Values:</i> A date keyed in the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(2 @ N 6,0) Optional</p>
Invoice Date	<p>Key the range of invoice dates to limit the report to invoices that are dated in that date range.</p> <p><i>Valid Values:</i> A date keyed in the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(2 @ N 6,0) Optional</p>
Business Unit	<p>Key the range of business units to limit the report to open payables assigned those business units. Business units can be assigned to vendors in Vendor Maintenance (MENU APFILE) and will then default to each voucher, or a business unit can be individually assigned to vouchers in Voucher Entry (MENU APMAIN).</p> <p><i>Valid Values:</i> A valid business unit created in Business Units Maintenance (MENU APFILE).</p> <p>(2 @ A 2) Optional</p>
Include Held Invoices	<p>Used to determine if held open payables should be included on the report.</p> <p>Key Y if held open payable invoices should be printed on the report. All selected open payable invoices will print regardless if a hold code is assigned.</p> <p>Key N if held open payable invoices should not be printed on the report. Any open payable invoice that is assigned a hold code will not print.</p> <p><i>Default Value:</i> Y</p> <p>(A 1) Required</p>

Open Payables By Vendor Screen Fields and Function Keys

Field/Function Key	Description
Dsply Trding Currency	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify whether or not amounts on the report will print in the company's local currency, or in both the company's local currency and the vendor's trading currency; local equivalent amounts will print below the trading currency amounts.</p> <p>Key Y if you want amounts to print in the trading currency as well as the company's local currency.</p> <p>Key N if you want amounts to print only in the company's local currency. This field must be N if the Detail/Summary field is S.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Vendor Sort	<p>Use this field to specify how you want to sort the report, either by vendor number or vendor sort word.</p> <p>Key 1 to sort the report by the vendor number.</p> <p>Key 2 to sort the report by the vendor sort word.</p> <p><i>Default Value:</i> 2</p> <p>(N 1,0) Required</p>
Sort Sequence	<p>Use this field to specify the secondary sort sequence of the report. The report is primarily sequenced by vendor. For each vendor, the report may be sequenced by invoice number or due date.</p> <p>Key I to sort the report by invoice number for each vendor.</p> <p>Key D to sort the report by due date for each vendor.</p> <p><i>Default Value:</i> I</p> <p>(A 1) Required</p>
Detail/Summary	<p>Use this field to specify if the report will print in summary or detail format.</p> <p>Key D to print the report in detail. The detail report prints all activity for a voucher, including debit and credit memos.</p> <p>Key S to print the report in summary. The summary report prints information for the original invoice only. Debit and credit memo activity for the open payable is not reported.</p> <p><i>Default Value:</i> S</p> <p>(A 1) Required</p>
F3=Cancel	<p>Press F3=CANCEL to cancel this option and return to the menu.</p>
Enter	<p>Press ENTER to confirm your selections. The Report Options Screen will appear (refer to the Cross Applications User Guide for details about this screen).</p>

This report prints based on the open payables that were selected based on the criteria entered in the fields on the Open Payables By Vendor Screen (p. 35-2) and the Report Options Screen (refer to the Cross Applications User Guide for details about this screen).

The report prints out in detail or summary based on your selection in the *Detail/Summary* field on that screen.

NOTE: All dates will display in the Default Date Format for this user that generated the report, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIILE).

Open Payables By Vendor Report

Report/Listing Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed and the Company Number field will be exported to Excel .tsv reports.</p>

Open Payables By Vendor Report

Report/Listing Field	Description
Vendor Information	<p>For each invoice on the report, the vendor number, vendor's name and telephone number and extension will print.</p> <p>These fields will be exported to Excel .tsv reports: Vendor Number, Vendor Name, Telephone, Extension.</p>
Invoice	<p>The number of the original invoice for this open payable.</p> <hr/> <p>NOTE: Credit/Debit memo vouchers will print as additional lines beneath the original invoice voucher. For detail reports, CR or DR is printed to the left of the voucher number for credit or debit memos, respectively.</p> <hr/> <p>These fields will be exported to Excel .tsv reports: Invoice Number, Credit/Debit Memo Code.</p>
Voucher	<p>The voucher number assigned when creating this open payable.</p> <p>The Voucher Number field will be exported to Excel .tsv reports.</p>
Description	<p>The description of the voucher group as keyed during Voucher Entry (APMAIN).</p> <p>The Description field will be exported to Excel .tsv reports.</p>
Inv Date	<p>The invoice date of the open payable.</p> <p>The Invoice Date field will be exported to Excel .tsv reports.</p>
Dsc Date	<p>The last date of the discount period for this open payable.</p> <p>The Discount Date field will be exported to Excel .tsv reports.</p>
Due Date	<p>The due date of the open payable.</p> <p>The Due Date field will be exported to Excel .tsv reports.</p>
Open Amt	<p>The total amount due for this open payable, not considering discounts.</p> <p>If a partial payment has been applied to an invoice, the letter P will print to the right of the open amount data.</p> <p>When International Currency is installed:</p> <ul style="list-style-type: none"> • The Currency Symbol for the invoice will display to the right of the open amount value. • If the Dsply Trding Currency prompt is Y, the Trading Currency Open Amount and Trading Currency Symbol will print below the local amounts. <p>These fields will be exported to Excel .tsv reports: Open Amount, Currency Symbol, Trading Currency Open Amount, Trading Currency Symbol, Partial.</p>

Open Payables By Vendor Report

Report/Listing Field	Description
Dsc Avail	<p>The applicable discount if the invoice is paid within the discount period. An asterisk (*) prints to the right of the amount if the discount date has passed. In this case, the discount amount is not deducted from the open amount when calculating the total due. An “F” prints if the discount has been forced; the discount will be deducted from the total.</p> <p>When International Currency is installed:</p> <ul style="list-style-type: none"> • The Currency Symbol for the invoice will display to the right of the discount available value. • If the Dsply Trding Currency prompt is Y, the Trading Currency Discount Available and Trading Currency Symbol will print below the local discount available amounts. <p>These fields will be exported to Excel .tsv reports: Discount Available Amount, Currency Symbol, Trading Currency Discount Available, Trading Currency Symbol, Force Discount.</p>
Total Due	<p>The total amount due to the vendor. Discounts are reflected in this amount only if the discount date has not passed.</p> <p>When International Currency is installed:</p> <ul style="list-style-type: none"> • The Currency Symbol for the invoice will display to the right of the total due value. • If the Dsply Trding Currency prompt is Y, the Trading Currency Total Due and Trading Currency Symbol will print below the local total due amounts. <p>These fields will be exported to Excel .tsv reports: Total Amount Due Amount, Currency Symbol, Trading Currency Total Amount Due Amount, Trading Currency Symbol.</p>
HC	<p>Prints the hold code assigned to a voucher. A hold code indicates that this open payable cannot be paid until the hold code is removed.</p> <p>This field will be exported to Excel .tsv reports.</p>
Totals	<p>The detail report has totals at the vendor level and the company level for the Open Amount, Discount Available, and the Total Due. If International Currency is installed, the trading currency equivalent total is provided for these fields for the vendor totals. The company total for these fields is only available in the company’s local currency.</p> <p>The summary report has totals for these fields at the company level. If International Currency is installed, the company total is only available in the company’s local currency.</p>

The Open Payables by Due Date Report prints open payable invoices sequenced by payment due date. Use the Open Payables by Due Date Report option on the Accounts Payable Report Menu (MENU APREPT) to print this report.

NOTE: The Open Payables by Due Date Report can be exported to Microsoft Excel using a Tab Separated Value (.tsv) format. Make that appropriate selection on the PC File Export Selection Screen that displays from the Report Options Screen when **Export Report** is set to **Y**. Refer to the Cross Applications User Guide for more information about exporting reports. Only those fields so noted in the report descriptions will be included in the export.

Open Payables by Due Date Report

F - INDICATES DISCOUNT HAS BEEN FORCED - DISCOUNT AMT DEDUCTED FROM TOTAL DUE

This report prints based on the open payable invoices selected on the Open Payables By Due Date Screen (p. 36-2) and the Report Options Screen (refer to the Cross Applications User Guide for details about this screen).

NOTE: All dates will display in the Default Date Format for this user that generated the report, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIILE).

Open Payables By Due Date Report

Report/Listing Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p> <p>These fields will be exported to Excel .tsv reports: Company Number, Due Date.</p>

Open Payables By Due Date Report

Report/Listing Field	Description
Vendor Information	<p>For each invoice on the report, the vendor's name and telephone number and extension will print.</p> <p>These fields will be exported to Excel .tsv reports: Vendor Number, Vendor Name.</p>
Invoice Number	<p>The number of the original invoice for this open payable.</p> <p>The Invoice Number field will be exported to Excel .tsv reports.</p>
Voucher	<p>The voucher number assigned when creating this open payable.</p> <p>These fields will be exported to Excel .tsv reports: Voucher Number, Credit/Debit Memo Code.</p>
Description	<p>The description of the voucher group as keyed during Voucher Entry (APMAIN).</p> <p>The Description field will be exported to Excel .tsv reports.</p>
Inv Date	<p>The invoice date of the open payable.</p> <p>The Invoice Date field will be exported to Excel .tsv reports.</p>
Dsc Date	<p>The last date of the discount period for this open payable.</p> <p>The Discount Date field will be exported to Excel .tsv reports.</p>
Dsc Amt	<p>The applicable discount if the invoice is paid within the discount period. An asterisk (*) prints to the right of the amount if the discount date has passed. In this case, the discount amount is not deducted from the open amount when calculating the total due. An "F" prints if the discount has been forced; the discount will be deducted from the total.</p> <p>When International Currency is installed:</p> <ul style="list-style-type: none"> • The Currency Symbol for the invoice will display to the right of the discount available value. • If the Dsply Trding Currency prompt is Y, the Trading Currency Discount Available and Trading Currency Symbol will print below the local discount available amounts. <p>These fields will be exported to Excel .tsv reports: Discount Available Amount, Currency Symbol, Trading Currency Discount Available, Trading Currency Symbol, Force Discount.</p>

Open Payables By Due Date Report

Report/Listing Field	Description
Total Due	<p>The total amount due to the vendor. Discounts are reflected in this amount only if the discount date has not passed. This amount is net of all invoice, debit memo, and credit memo transactions posted against the original invoice transaction.</p> <p>When International Currency is installed:</p> <ul style="list-style-type: none"> • The Currency Symbol for the invoice will display to the right of the total due value. • If the Dsply Trding Currency prompt is Y, the Trading Currency Total Due and Trading Currency Symbol will print below the local total due amounts. <p>These fields will be exported to Excel .tsv reports: Total Amount Due Amount, Currency Symbol, Trading Currency Total Amount Due Amount, Trading Currency Symbol.</p>
HC	<p>Prints the hold code assigned to a voucher. A hold code indicates that this open payable cannot be paid until the hold code is removed.</p> <p>The Hold Code field will be exported to Excel .tsv reports.</p>
Totals	<p>The detail report has totals at the vendor level and the company level for the Discount Amount and Total Due.</p> <p>When International Currency is installed, the trading currency equivalent total is provided for these fields for the vendor totals. The company total is only available for these fields in the company's local currency.</p> <p>The summary report has totals for these fields at the company level. When International Currency is installed, the company total for these fields is only available in the company's local currency.</p>

The Cash Requirements Report will show your cash requirements for up to six aging periods. Cash requirements are based on your open payable due dates. Additionally, if posted dated checks exist, the Cash Requirements - Post Dated Checks Report will print. Use the Cash Requirements Report option on the Accounts Payable Report Menu to print these reports.

Cash Requirements Report

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Cash Requirements Report Selection Screen	Use to specify limiting criteria for the report.
Cash Requirements Report	Prints cash requirements for up to six aging periods.
Cash Requirements - Post Dated Checks Report	Prints posted dated checks.

Cash Requirements Report Selection Screen

```

This screen appears after selecting option 3 - Cash Requirements Report option from the Accounts Payable Report Menu (MENU APREPT). Use this screen to select the company and aging dates for which the report(s) will print. You can also select whether to print the reports in detail or summary, and whether or not invoice comments will print.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

Cash Requirements Report Selection Screen Fields and Function Keys

Field/Function Key	Description
Report Selection Criteria	Key a range of companies and business units for which the reports will print. Use the from and to fields to limit the report to open payables for the companies and business units specified in the ranges. Optional

Cash Requirements Report Selection Screen Fields and Function Keys

Field/Function Key	Description
Aging Dates	<p>Use this field to key the date or dates by which cash is required for payments. You must key at least one aging date; you may key up to five.</p> <p>The number of cash requirement periods is one greater than the number of aging dates keyed. Therefore, you may have up to six cash requirement periods.</p> <p>For example, if you key the aging dates for January 31 and February 28, the following cash requirement periods will print on the Cash Requirements Report:</p> <ul style="list-style-type: none"> • Cash required through January 31 • Cash required from February 1 through February 28 • Cash required after February 28 <p>Key the appropriate aging dates.</p> <p><i>Valid Values:</i> A date keyed in the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, in the system's Default Date Format specified through System Options Maintenance (MENU XAFILE). The first field cannot be blank and aging dates must be in ascending order.</p> <p>(5 @ N 6,0) Required (Aging Date 1)</p>
Detail/Summary	<p>Use this field to specify if the reports will print in detail or summary format.</p> <p>Key D to print the reports in detail format.</p> <p>Key S to print the reports in summary format.</p> <p><i>Valid Values:</i> D or S</p> <p>(A 1) Required</p>
Include Invoice Comments	<p>Use this field to specify whether or not invoice comments will appear on the detail reports. Invoice comments are keyed through the Accounts Payable Inquiry (MENU APMAIN).</p> <p>Key Y to include comments.</p> <p>Key N to omit comments.</p> <p>Leave this field blank if you are printing in summary format.</p> <p><i>Valid Values:</i> Y or N if the Detail/Summary field is set to D; otherwise, this field must be left blank.</p> <p>(A 1) Optional</p>

Cash Requirements Report Selection Screen Fields and Function Keys

Field/Function Key	Description
Display Trading Currency	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify whether or not amounts on the report will print in the company's local currency, or in both the company's local currency and the vendor's trading currency; local equivalent amounts will print below the trading currency amounts. If the payment is in the local currency and the selected vendor also is a local vendor, regardless if I/C is installed, the applicable field will not display.</p> <p>Key Y if you want amounts to print in the trading currency as well as the company's local currency.</p> <p>Key N if you want amounts to print only in the company's local currency.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
F3=Cancel	Press F3=CANCEL to cancel this option and return to the menu.
Enter	Press ENTER to confirm your selections. The Report Options Screen will appear. Refer to the Cross Applications User Guide for a detailed explanation of this screen.

This report prints following your selections on both the Cash Requirements Report Selection Screen (p. 37-2) and the Report Options Screen. Refer to the Cross Applications User Guide for a detailed explanation of the Reports Options Screen.

Your cash requirements for up to six aging periods will print in detail or summary as determined on the Cash Requirements Report Selection Screen (p. 37-2).

With Expanded Field Use (MENU XAFIL2) set to Y for this report, this report will print in a two-line format.

Cash Requirements Report

Report/Listing Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p>

Cash Requirements Report

Report/Listing Field	Description
Vendor Information	<p>The number and name of the vendor for whom cash is required. The vendor totals are printed for each aging period; and the grand total of all aging periods for this vendor is printed.</p> <p>On a detail report, the open payable invoices that comprise the cash requirements due to this vendor are printed on the lines that follow the vendor information.</p>
Open Payables Information	<p>For detail reports only, the cash requirements for each aging period are printed for each open payable. The open payable information provided is the following:</p> <ul style="list-style-type: none"> • <i>Invoice Number:</i> The number of the original invoice. • <i>Due Date:</i> The due date of the invoice.
Aging Dates	<p>The five aging periods specified for this report. For each aging period, the cash requirements for each vendor (and open payable if printing a detail report) are printed.</p> <p>When International Currency is installed, the invoice amounts are printed in the currency of the company and may also print in the currency of the vendor if Y was selected to the Display Trading Currency field on the Cash Requirements Report Selection Screen (p. 37-2).</p>
Totals	<p>For each aging period, Vendor Totals are printed followed by a single Vendor Net Total of all the aging periods.</p> <p>For each company, aging period Company Totals are printed followed by a single Company Net total of all the aging periods. When International Currency is installed, the totals that print are the company's local currency.</p> <p>When the company has a Post Dated Checks Report, the amount of the Post Dated Checks is then printed.</p> <p>The last lines of the report are Total Cash Requirements and Net Cash Requirements. The Total Cash Requirements include all the companies selected for all the aging periods followed by the Net Cash Requirements for all the companies selected.</p>

Company Totals:							94,693.80	

This report prints at the beginning of the Cash Requirements Report only when post dated checks exist for any of the bank accounts for the company within the range of aging dates you keyed on the Cash Requirements Report Selection Screen (p. 37-2). Use this report to review post dated check information for any applicable bank accounts checks. When International Currency is installed, the amounts are printed in the company’s local currency only.

Cash Requirements - Post Dated Checks Report

Report/Listing Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p>
Check No	This field represents the check number that was issued.
Check Date	This field represents the date the check was issued.
Aging Dates	This group of fields print the aging periods specified for this report on the Cash Requirements Report Selection Screen (p. 37-2). For each aging period, the amount issued for the against a voucher by a post dated check prints.
Totals	For each aging period, the Bank Account Total is printed. After the last bank account for the company, Company Totals are also printed.

The Aged Open Payables Report prints the amounts of your payables into four aging periods based on the invoice date or due date. Amounts of your payables that print on this report are those in the open and history files. Therefore, payables that may be in history now but were open at the time of the **As of Date** on the Aged Open Payables Report Selection Screen (p. 38-2) will print on this listing.

Use the Aged Open Payable Report option on the Accounts Payable Report Menu (MENU APREPT) to print this report.

Aged Open Payables Report

This screen appears after selecting option 4 - Aged Open Payables Report option from the Accounts Payable Report Menu (MENU APREPT). Use this screen to select the companies, aging periods, aging date, and the format (detail or summary) for the Aged Open Payables Report. By default, this report is sorted by company and vendor number.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

Aged Open Payables Report Selection Screen Fields and Function Keys

Field/Function Key	Description
Report Selection Criteria	Key a range of companies and business units for which open payables are printed. Use the from and to fields to limit the report to open payables for the companies and business units specified in the ranges. Optional

Aged Open Payables Report Selection Screen Fields and Function Keys

Field/Function Key	Description
As of Date	<p>The Aged Open Payables Report prints aged open payables for five aging periods, starting with the current aging period. The current aging period starts on the as of date keyed in this field, and lasts for the number of days specified in the first Number of Days field. Therefore, the as of date is the reference date for all aging periods (e.g. an aging period of over 90 days starts on the 90th day after the as of date).</p> <hr/> <p>NOTE: If the posting date of the voucher is greater than the date in this field, it will not print on the report, regardless of whether you print by invoice or due date. This allows you to balance your open payables to general ledger.</p> <hr/> <p><i>Valid Values:</i> A date keyed in the <i>Default Date Format</i> for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, in the system's <i>Default Date Format</i> specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>
Number of Days	<p>The number of days is used to determine the aging periods reported on the Aged Open Payables Report. The open payables for each aging period are printed.</p> <p>You must specify four numbers for five aging periods (i.e. the current aging period, aging period 1, aging period 2, aging period 3, and aging period 4). The current aging period starts on the as of date keyed in the As of Date field, and lasts for the number of days specified in the first Number of Days field. For example, if you specify the aging days as follows:</p> <p>Number of Days</p> <ul style="list-style-type: none"> • 1: 30 • 2: 60 • 3: 90 • 4: 120 <p>The aging periods that will print on the Aged Open Payables Report are:</p> <ul style="list-style-type: none"> • Current • Over 30 • Over 60 • Over 90 • Over 120 <p><i>Valid Values:</i> Days must be in sequence (i.e. first must be less than second, etc.)</p> <p>(4 @ N 3,0) Required</p>

Aged Open Payables Report Selection Screen Fields and Function Keys

Field/Function Key	Description
Based On	<p>Use this field to specify the date used for aging the invoices.</p> <p>Key I to age on the invoice date. The number of days open is calculated as the difference between the As of Date report date and the vendor's invoice date.</p> <p>Key D to age on the due date. The number of days open is calculated as the difference between the As of Date and the vendor's due date.</p> <p>(A 1) Required</p>
Vendor Sort	<p>Use this field to specify how you want to sort the report, either by vendor number or vendor sort word.</p> <p>Key 1 to sort the report by the vendor number.</p> <p>Key 2 to sort the report by the vendor sort word.</p> <p><i>Default Value:</i> 1</p> <p>(N 1,0) Required</p>
Display Trading Currency	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify whether or not amounts on the report will print in the company's local currency, or in both the company's local currency and the vendor's trading currency; local equivalent amounts will print below the trading currency amounts. If the payment is in the local currency and the selected vendor also is a local vendor, regardless if I/C is installed, the applicable field will not display.</p> <p>Key Y if you want amounts to print in the trading currency as well as the company's local currency.</p> <p>Key N if you want amounts to print only in the company's local currency.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Detail/Summary	<p>Used to specify if the report will print in detail or summary format.</p> <p>Key D to print the report in detail format. A detail report prints one line for each open payable for each vendor in addition to the vendor, company and grand totals for that company.</p> <p>Key S to print the report in summary format. A summary report prints one line per vendor, indicating the total open payables for each period. The vendor and company totals are also printed.</p> <p><i>Valid Values:</i> D or S</p> <p>(A 1) Required</p>
F3=Cancel	Press F3=CANCEL to cancel this option and return to the menu.
Enter	Press ENTER to confirm your selections. The Report Options Screen will appear (refer to the Cross Applications User Guide for details about this screen).

This report prints according to the criteria specified on the Aged Open Payables Report Selection Screen (p. 38-2).

The company's open accounts payable for each vendor in detail or summary is printed based on the selections on the Aged Open Payables Report Selection Screen (p. 38-2).

With Expanded Field Use (MENU XAFIL2) set to Y for this report, this report will print in a two-line format.

Aged Open Payables Report

Report/Listing Field	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p>
Invoice	The number of the original invoice for this open payable.
Voucher	The voucher number assigned when creating this open payable.
Description	The description of the voucher transaction as keyed during Voucher Entry (APMAIN).

Aged Open Payables Report

Report/Listing Field	Description
Inv Date	The invoice date of the open payable.
Due Date	The date the invoice payment is due to be paid to the vendor.
HC	Will display the specific hold code when a hold code is assigned to a voucher. A hold code indicates that this open payable cannot be paid until the hold code is removed.
Aging Periods	<p>These are the aging periods specified for the report beginning with the current aging period. Detail format will list each open payable invoice amount due for the respective aging period. Detail and summary format will show vendor totals for the amount due for the respective aging period.</p> <p>When International Currency is installed, the vendor's trading currency will print below the company's local currency amount.</p>
Totals	<p>Company totals for each aging period are also printed.</p> <p>When International Currency is installed, the company totals are shown in the company's local currency.</p>

The A/P Check History Report lists check history for a specified group of selection criteria. Use the A/P Check History Report option on the Accounts Payable Report Menu (MENU APREPT) to print this report.

A/P Check History Report

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Check History Selection Screen	Use to specify limiting criteria for the report.
A/P Check History Report	Prints check history.

This screen appears after selecting option 5 - A/P Check History Report option from the Accounts Payable Report Menu (MENU APREPT). Use this screen to determine the selection criteria for which check history will print. For convenience, the first section of the resulting report will contain a copy of the selection criteria entered here.

NOTE: Access to bank account selection is also provided with the use of the **All Check Accts** field.

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

A/P Check History Selection Screen Fields and Function Keys

Field/Function Key	Description
Print Used	<p>Use this field to indicate if used checks in check history will print on the report. Used checks are those that have been printed but not yet reconciled.</p> <p>Key Y to print the indicated checks on the report.</p> <p>Key N if you do not want to print the indicated checks on the report. To obtain those checks which have been selected for reconciliation, the Print Used, Voided, and Reconciled fields must all indicate N.</p> <p>(A 1) Required</p>

A/P Check History Selection Screen Fields and Function Keys

Field/Function Key	Description
Print Voided	<p>Use this field to indicate if voided checks in check history will print on the report. Voided Checks are checks that have been voided through the Check Reversal process (CHAPTER 29: <i>Entering Check Reversals</i>, CHAPTER 30: <i>Editing Check Reversals</i>, and CHAPTER 31: <i>Posting Check Reversals</i>). This does not include checks voided through CHAPTER 23: <i>Recording Check Numbers and Posting ACH or CC Payments</i> or checks voided through CHAPTER 32: <i>Voiding Unprinted Checks</i>.</p> <p>Key Y to print the indicated checks on the report.</p> <p>Key N if you do not want to print the indicated checks on the report. To obtain those checks which have been selected for reconciliation, the Print Used, Voided, and Reconciled fields must all indicate N.</p> <p>(A 1) Required</p>
Print Reconciled	<p>Use this field to indicate if reconciled checks in check history will print on the report. Reconciled checks are checks that have been reconciled.</p> <p>Key Y to print the indicated checks on the report.</p> <p>Key N if you do not want to print the indicated checks on the report. To obtain those checks which have been selected for reconciliation, the Print Used, Voided, and Reconciled fields must all indicate N.</p> <p>(A 1) Required</p>
Print Sel for Recon	<p>Use this field to indicate if checks that have been selected for reconciliation in check history will print on the report. Sel for Recon will print checks that have been selected for reconciliation but have not yet been accepted.</p> <p>Key Y to print the indicated checks on the report.</p> <p>Key N if you do not want to print the indicated checks on the report. To obtain those checks which have been selected for reconciliation, the Print Used, Voided, and Reconciled fields must all indicate N.</p> <p>(A 1) Required</p>
Company	<p>Key a range of companies for which check history will print.</p> <p>Use the from and to fields to limit the report to the check history specified in the company ranges.</p> <p><i>Valid Values:</i> A valid company number defined through Company Name Maintenance (MENU XAFILE).</p> <p>(2 @ N 2.0) Optional</p>

A/P Check History Selection Screen Fields and Function Keys

Field/Function Key	Description
Check Date	<p>Key a range of check dates (actual dates of the checks), for which check history will print.</p> <p>Use the from and to fields to limit the report to the check history specified in the check date ranges.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(2 @ N 6.0) Optional</p>
Check Numbers	<p>Key a range of check numbers for which check history will print.</p> <p>Use the from and to fields to limit the report to the check history specified in the check number ranges.</p> <p>(2 @ N 9,0) Optional</p>
Reconcile Dt	<p>Key a range of reconciliation dates (dates on which checks have been processed by the bank) for which check history will print.</p> <p>Use the from and to fields to limit the report to the check history specified in the reconciliation date ranges.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(2 @ N 6.0) Optional</p>
All Check Accts	<p>Use this field to specify if you wish to print the report for all bank accounts, or for one bank account only.</p> <p>Key Y to print check history for all bank accounts.</p> <p>Key N to print check history for one bank account only. You must have selected only one company in the Company field to select N.</p> <hr/> <p>NOTE: If you key N, the Bank Accounts List Screen (p. 9-13) will appear (after ENTER is pressed), providing you with the ability to select the bank account for which the report will print.</p> <hr/> <p>(A 1) Required</p>
Vendor	<p>Use this field to print the report for one vendor only.</p> <p>Key the vendor number for which check history is reported.</p> <p>If you leave this field blank, the report will print for all vendors meeting the report selection criteria.</p> <p><i>Valid Values:</i> A valid A/P vendor, or blank.</p> <p>(A 6) Optional</p>

A/P Check History Selection Screen Fields and Function Keys

Field/Function Key	Description
Display Trading Currency	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify whether or not amounts on the applicable report will print in the company's local currency, or in both the company's local currency and the trading currency; local equivalent amounts will print below the trading currency amounts. If the payment is in the company's local currency and the selected vendor also is a local vendor, regardless if International Currency is installed, the applicable field will not display.</p> <p>Key Y if you want amounts to print in the trading currency as well as the company's local currency.</p> <p>Key N if you want amounts to print only in the company's local currency.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
F3=Exit	Press F3=EXIT to exit the option and return to the menu.
Enter	<p>Press ENTER to confirm your selections.</p> <p>If All Check Accts is Y, the Report Options Screen will appear (refer to the Cross Applications User Guide for details about this screen). The report will print following your selections on that screen.</p> <p>If All Check Accts is N, the Bank Accounts List Screen (p. 9-13) will appear where you may select the bank account for which the report will print. The Report Options Screen will then display following the Bank Accounts List Screen (p. 9-13).</p>

This report prints pending receipts or vouchered receipt history. For each vendor, those pending receipts for which vouchers have not been created; and/or those receipts for which vouchers have been created through Voucher Entry (MENU APMAIN) are printed. If specified, the general ledger account updated for vouchered receipts and any transaction comments keyed for the receipts are printed. Zero costs receipts may also be printed, if specified on the Receipt History Report Selection Screen (p. 42-2).

This report can be used to detect differences in the dollar amount the vendor committed to, and the dollar amount actually invoiced.

Information on this report is sorted by company number and a new page will print for each new company number, with the company number displayed in the heading.

Receipt History Report

Report/Listing Fields	Description
Co/PO #	The company number and purchase order number of the pending or vouchered receipt.
Rct Date	The receipt posting date in Purchasing.
WH	The warehouse that received the goods.

Receipt History Report

Report/Listing Fields	Description
Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed.</p>
Vendor Information	<p>The number and name of the vendor for whom receipt information prints.</p>
G/L Cd	<p>The vendor G/L code used when creating the voucher. This code is used in the G/L Interface to determine which A/P liability and expense accounts are updated.</p>
Item Number/Description	<p>The number and description of the item received.</p>
Qty Received	<p>The quantity of items received.</p>
Receipt \$	<p>The cost amount of the items received.</p>
Invoice \$	<p>The amount of the invoice for the items received. This amount is printed for vouchered receipts only.</p>
Variance Amt	<p>The difference between the dollar amount of items received and the dollar amount specified on the invoice.</p>
Co/Voucher	<p>The company and voucher number used when a voucher is created for the receipt. This field prints for vouchered receipts only.</p>
(Comments)	<p>Additionally, any transaction comments for the receipts will print if so selected on the Receipt History Report Selection Screen (p. 42-2).</p>

Use the Vendor Labels option on the Accounts Receivable Report Menu (MENU ARREPT) to print Vendor Labels for some or all vendors.

Vendor Labels

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Vendor Labels Selection Screen	Use to specify the business unit code to maintain.
Vendor Labels	Provides a sample of a vendor label.

Vendor Labels Selection Screen

```

                         AP VENDOR LABELS

Vendor:                - ..... to .....
Vendor AP Class?      ... to? ...
Vendor G/L Code?     ... to? ...
Default Business Unit? ... to? ...

Include Vendors with Assignee Numbers:  Y (Y,N)
Number of Labels per Vendor:             .1

--

The mailing address labels for the specified vendors will print. Vendor Labels print on form type **VLAB**. If you are using a line printer, use 4 x 1 15/16 inch labels. If you are using a laser printer, use 1 1/3 x 4 inch labels. These dimensions are recommended as the maximum size required to accommodate all mailing information. If you are printing less information, you can use a smaller label size.

Labels may be sequenced by zip code or vendor sort word. This sort sequence is determined in the **Print Sequence** field on the A/P Vendor Labels Selection Screen (p. 43-2).

This option allows you to define the vendors and vendor information used in Purchasing. You also can select the vendors for which you want to add/change vendor-level special order options or e-mail contacts, or for which you want to review vendor audit activity.

Through this option, a mass copy functionality is also available (if Purchasing is installed and activated) that will assist you in copying vendor/item related files from one vendor to another vendor. This is useful if you are switching an entire product line from one vendor to another.

Vendors Maintenance

The screens and/or reports in this option and a brief description of their purpose are listed in the following table. A complete description of each is provided in this section.

Title	Purpose
Vendor Master Maintenance Selection Screen	Use to select a vendor to add, change or delete.
Vendor Search Screen	Use to review and change search criteria and to select a vendor for processing.
Vendor Special Order Options Screen	Use to specify special order options for a specific vendor.
Copy Vendor Item Information Screen	Use to copy vendor/item related files from one vendor to another vendor.
Vendor Audit Activity Screen	Use to review vendor audit activity for the vendor you selected on the Vendor Master Maintenance Selection Screen.
Vendor Audit Activity Detail Screen	Use to review specific vendor change information about the activity you selected.

Title	Purpose
Vendor Master Maintenance (1) Screen	Use to add, change, or delete vendor purchasing information.
Vendor Master Maintenance (2) Screen	Use to add or change vendor user field information.
A/P Vendor Master Maintenance Screen	Use to add, change, or delete vendor information used by Accounts Payable.
Vendor ACH Information Maintenance Screen	Use to identify the bank account information to establish ACH transfers.
Vendor ACH Information - Delete Maintenance Screen	Use to review where existing ACH vouchers or invoices exist for the vendor (or vendor as assignee), and to optionally delete ACH related information from the vendor.
Vendor Master Additional Information Maintenance Screen	Use to enter EDI and/or FAX vendor master information.
Vendor Master Additional EDI Maintenance Screen	Use to set up the conditions for creating and transmitting the Product Activity Data (852) document to this vendor.
Vendor Master Additional EDI Maintenance - 867 Screen	Use to set up the conditions for creating and transmitting the Product Transfer & Resale Report (867) to this vendor.
Vendor Master Additional Email Maintenance Screen	Use to add or change additional vendor information concerning e-mail transmission for certain documents.
Vendor Rebate Customer Maintenance Screen	Use to identify those customers having a rebate relationship with this vendor in which the method for rebate payment is accounts receivable, as opposed to accounts payable.

Vendor Master Maintenance Selection Screen

```

      VENDOR MASTER MAINTENANCE

Function:  .. (A,C,D)

Vendor No: .....

```

This screen displays after selecting option **1** - Vendors Maintenance (MENU APFILE/MENU POFIL2).

Use this screen to select a vendor to add, change or delete. You can also use this screen to:

- select a vendor for which you want to add/change vendor-level special order options or e-mail contacts
- select a vendor for which you want to access vendor audit activity
- copy vendor/item information from one vendor to another vendor

Vendor Master Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Function	<p>Key A to add a new vendor.</p> <p>Key C to change existing vendor information.</p> <p>Key D to delete an existing vendor. You cannot delete a vendor if:</p> <ul style="list-style-type: none"> • open vouchers exist for that vendor • open purchase orders exist for that vendor • vendor/item records exist for that vendor • Bid & Quote is installed and either open or closed bids exist for that vendor • the vendor is assigned to a vendor group (MENU POFIL2) <p>(A 1) Required</p>

Vendor Master Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Vendor No	<p>Key the six character vendor number of the vendor you are adding, changing, or deleting.</p> <p>If you are unsure of the vendor number, use the Find and City fields with the ENTER key to activate the Vendor Search feature.</p> <p>(A 6) Required</p>
Find	<p>Use this field either alone or with the City field to search for the vendor by name.</p> <p>Key up to 10 characters (the first 10) of one or more words in the vendor's name. Key the words in any order and separate each word with one blank space.</p> <p>For information on entering search criteria, refer to Searches in the Introduction section of this manual.</p> <p>(A 40) Optional</p>
City	<p>Use this field together with the Find field to search for a vendor in a particular city.</p> <p>Key up to 8 characters (the first 8) of the vendor's city.</p> <p>For information on entering search criteria, refer to Searches in the Introduction section of this manual.</p> <p>(A 8) Optional</p>
F2=S/O Options	<p>Use this function key to maintain vendor-level special order options. The Vendor Special Order Options Screen (p. 44-9) appears.</p> <p>Key the number of the vendor in the Vendor No field for which you want to maintain (add, change or delete) vendor-level special order options and press this function key to access the Vendor Special Order Options Screen. You can maintain special order options for a particular vendor, and based on company-level options defined through Special Order Options Maintenance (MENU XAFILE), vendor-level options may override company-level options and be used during Special Order Processing for a particular vendor.</p> <hr/> <p>NOTE: Special order options are not available for deleted vendors, work order vendor numbers, and outside service vendor numbers.</p>
F3=Exit	<p>Press this key to cancel this option and return to MENU POFILE.</p>

Vendor Master Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
F5=Copy V/I Info	<p>This function key displays only if Purchasing is installed and activated. The availability of vendor/item related records is completely reliant on Purchasing.</p> <p>Press F5=COPY V/I INFO to perform a mass copy of vendor/item related files from one vendor to another vendor. This is useful if you are switching an entire product line from one vendor to another. The Copy Vendor Item Information Screen (p. 44-19) will appear.</p> <hr/> <p>NOTE: When PO vendor/item and/or PO vendor/item/price file records are updated and Days to Keep Vendor/Item Audit Activity is greater than 0 in Purchasing System Options Maintenance (MENU XAFILE), vendor/item activity will be tracked when F5=COPY V/I INFO is pressed.</p>
F11=Email Contacts	<p>The F11=EMAIL CONTACTS function key appears only if you have the Mail Server module installed.</p> <p>Press F11=EMAIL CONTACTS to add or maintain a vendor e-mail contact. The Vendor Contact Maintenance Selection Screen will appear. Refer to the Mail Server User Guide for information about this screen.</p>
F18=Vendor Activity	<p>The F18=VENDOR ACTIVITY function key appears only if the Days to Keep Vendor Audit Activity field in Purchasing Options Maintenance (MENU XAFILE) contains a value of at least 1. If you are not tracking vendor audit activity, this function key does not appear on this screen.</p> <p>Press F18=VENDOR ACTIVITY to display vendor master audit activity for the selected vendor. The Vendor Audit Activity Screen (p. 44-25) will appear.</p> <hr/> <p>NOTE: Deleted vendors are not available for review through Vendor Audit Activity. When a vendor is deleted, any previously tracked data for that vendor will also be deleted.</p>
<p>Important</p>	
<p>Tracked activity older than the number of days keyed in the Days to Keep Vendor Audit Activity field in Purchasing Options Maintenance (MENU XAFILE) will be purged when you press this function key.</p>	
Enter	<p>The ENTER key performs two functions:</p> <ul style="list-style-type: none"> • Press this key to confirm your selections. The Vendor Master Maintenance (1) Screen (p. 44-32) will display. • Press this key to view a list of vendors after keying search criteria in the Find and City fields. The Vendor Search Screen (p. 44-7) will appear.

F12=Return			

This screen appears after you press F2=S/O OPTIONS on the Vendor Master Maintenance Selection Screen (p. 44-3). Use this screen to specify special order options for a specific vendor. If you are using the auto-creation process (as determined through Special Order Options Maintenance (MENU XAFILE)) and the **Use Vendor Level Options First** field is set to Y in that option, the options specified on this screen will be used to handle special orders during the auto-creation process for this vendor.

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
Place S/O Items on a Req/PO Immediately	<p>Use this field to specify whether or not requisitions or purchase orders will be automatically created for special order items for this vendor at end order time. Also, auto-creation options defined through this option will be considered for this vendor when you run Special Order Automatic Req Creation (MENU POMAST).</p> <p>Key Y to allow Distribution A+ to automatically create requisitions or purchase orders for special order items at end order time.</p> <p>If this field is set to Y, at least one of the following fields on this screen must be set to Y:</p> <ul style="list-style-type: none"> • Create New Requisition • Add to Unapproved Requisition • Add to Approved Requisition • Add to Purchase Order <p>Once a field is set to Y, the Sequence field on this screen will display the hierarchy in which special order line items will be added to the new/existing requisition or purchase order.</p> <p>Key N to prevent Distribution A+ from automatically creating requisitions or purchase orders for special order items for this vendor at end order time if vendor-level special order options are being used first.</p> <p>(A1) Required</p>
S/O Items: Create New Requisition	<p>If you keyed Y in the Place S/O Items on Req/PO Immediately field, use this field to specify whether or not a new requisition will be created for special order items for this vendor.</p> <p>Key Y to automatically create new requisitions for special order items for this vendor:</p> <ul style="list-style-type: none"> • at end order time after the lines are extracted (MENU OEMAIN), • as the special order automatic requisition creation process runs (MENU POMAST), • as any process associated with Offline Order Entry (e.g., web@work and Point of Sale) runs. <p>Key N to prevent new requisitions from being automatically created for special order items for this vendor.</p> <p>(A 1) Required</p>

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
S/O Items: Add to Unapproved Requisition	<p>If you keyed Y in the Place S/O Items on Req/PO Immediately field, use this field to specify whether or not special order items will be added to unapproved requisitions for this vendor.</p> <p>Key Y to automatically add special order items to unapproved requisitions for this vendor.</p> <p>Key N to prevent special order items from being automatically added to unapproved requisitions for this vendor.</p> <p>(A 1) Required</p>
S/O Items: Add to Approved Requisition	<p>If you keyed Y in the Place S/O Items on Req/PO Immediately field, use this field to specify whether or not special order items will be added to approved requisitions for this vendor.</p> <p>Key Y to automatically add special order items to approved requisitions for this vendor.</p> <p>Key N to prevent special order items from being automatically added to approved requisitions for this vendor.</p> <p>(A 1) Required</p>
S/O Items: Add to Purchase Order	<p>If you keyed Y in the Place S/O Items on Req/PO Immediately field, use this field to specify whether or not special order items will be added to purchase orders for this vendor.</p> <p>Key Y to automatically add special order items to purchase orders for this vendor.</p> <p>Key N to prevent special order items from being automatically added to purchase orders for this vendor.</p> <p>WARNING!</p> <p>If a change request process updates an existing purchase order that has already been sent via EDI, you will be notified to resend the purchase order. However, if using the advanced special order features to automatically add special order items to existing purchase orders and to reprint purchase orders when special order items are added, you will not be notified to resend the purchase orders already sent through EDI. In this case, you must manually resend the purchase orders through EDI to notify the trading partner of the updates.</p> <p>(A 1) Required</p>

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
S/O Items AND D/S Items: Add to Req/PO Based On	<p>The D/S Items: Add to Req/PO Based On field on this screen appears only if the Use Drop-Ships field is set to Y through System Options Maintenance (MENU XAFILE).</p> <p>Use these fields to determine how special order and drop ship line items will be added to an existing requisition/purchase order. These fields apply only if Y is selected in at least one of the options on this screen for both special order items and drop ship items (i.e., Add to Unapproved Requisition, Add to Approved Requisition, and/or Add to Purchase Order).</p> <p>Key L (Last requisition/purchase order) if you want special order line items or drop ship line items added to the last or most recent requisition/purchase order with the latest order date. The line items will be added to the last requisition/purchase order entered for this vendor that is open, not received, not in use, whose warehouse ID matches the warehouse on the order, and, if applicable, whose drop ship address matches the drop ship on the order. If there is more than one open requisition/purchase order for a vendor on the latest order date, then the line items will be added to the one with the highest requisition/purchase order number.</p> <p>Key O (sales Order number) if you want special order line items or drop ship line items added to a requisition/purchase order based on the sales order number. The line items will be added to the most recent requisition/purchase order located that already contains lines from this same sales order number. If there are no lines from this sales order number included in any of the eligible requisitions/purchase orders, then the process will revert to L (the last requisition/purchase order method). If there are multiple eligible requisitions/purchase orders located, then the requisition/purchase order with the highest sequence number will be used.</p> <p>Key R (Requested ship date) if you want special order line items or drop ship line items added to a requisition or purchase order based on the requested ship date from the order detail record. The line items will be added to the requisition/purchase order that has the closest due date that is equal to or less than the lines requested ship date. For example, if a customer places 12 orders that</p>

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
S/O Items AND D/S Items: Add to Req/PO Based On Continued....	<p>they want delivered on the 12th day of each month and you do not want to store the inventory for a year, you would create 12 requisitions/purchase orders for the vendor, each with a due date on the 5th of the month. By then choosing this option (R), the special order line or drop ship line added with a requested ship date of June 1st, would be placed on the requisition/purchase order that has a due date of May 5th.</p> <p>If there are multiple eligible requisitions/purchase orders located, then the requisition/purchase order with the highest sequence number will be used.</p>

Important

Lead times affect which requisition/purchase order is selected to add special order or drop ship line items to. When R is keyed in this field and the lead time is being used to calculate a requisition's/purchase order's due date for this company (as determined through Purchasing Options Maintenance, MENU XAFILE), then the due date used will be the requested ship date from the line instead of today's date.

Without Lead Times

When R is keyed in this field and you are not using Lead Time, the Order Entry's requested ship date will be the due date on the purchase order line level.

Example: Assume a special order or drop ship item is entered on an order with a requested ship date of March 15th, and you had the following requisitions open with due dates every 2 months: Jan 1 (req # JS1234), Mar 1 (req # ST4567), May 1 (req # AA7789), July 1 (req # WC9332), Sept 1 (req # DB0111), and Nov 1 (req # MB5534). The requisition selected for this item would be ST4567, dated Mar 1, since it is the one with the closest date, but prior to, the requested ship date of March 15th.

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
S/O Items AND D/S Items: Add to Req/PO Based On Continued....	<p data-bbox="602 306 802 331"><i>With Lead Times</i></p> <p data-bbox="602 352 1328 506">Using the same example above, assume the special order or drop ship item being added has an 8 week lead time. The lead time would be subtracted from the ordered item's requested ship date to determine the date to compare to the Purchase Order header date.</p> <p data-bbox="602 527 1328 680">The Purchase Order's due date must be equal to or less than the requested ship date on the order minus the lead time, but not prior to today's date. The purchase order detail's due date will be created with the requested ship date from the customer order.</p> <p data-bbox="602 701 1328 919">Example: If the requested ship date of the special ordered or drop ship item is 4 weeks from today, and the item has a lead time of 8 weeks, the item will not be added to a requisition/purchase order since (once the requested ship date less the lead time was calculated) the resulting date would be a date one month before today's date. In this scenario, the item would not reach the customer before the date the customer requested it.</p>
	<hr/> <p data-bbox="553 1024 1382 1224">NOTE: These tailoring options will be considered during: -the auto creation process at end order time (MENU OEMAIN) -the special order automatic requisition creation process (MENU POMAST) -any process associated with Offline Order Entry (e.g., web@work and Point of Sale)</p>
	<hr/> <p data-bbox="527 1251 1333 1314"><i>Default Value:</i> L (add line items to the last or most recent requisition/purchase order)</p> <p data-bbox="527 1329 667 1350">(A 1) Required</p>

Vendor Special Order Options Screen Fields and Function Keys

Field/Function Key	Description
S/O Items: Sequence	<p data-bbox="527 310 1430 378">For any of the following fields that are set to Y, a sequence number, beginning with the number 1, will be assigned in the order listed:</p> <ul data-bbox="527 388 958 556" style="list-style-type: none"> <li data-bbox="527 388 852 420">• Add to Purchase Order 1 <li data-bbox="527 430 933 462">• Add to Approved Requisition 2 <li data-bbox="527 472 958 504">• Add to Unapproved Requisition 3 <li data-bbox="527 514 868 546">• Create New Requisition 4 <p data-bbox="527 567 1430 1050">The sequence number determines the order in which the system will try to add special order items to the specified document. The sequence is determined by the system in the logical order mentioned above. The system will first attempt to add the item to the most recently created type of document with sequence number 1 and with the same vendor, warehouse, company, and, if applicable, ship-to address associated with the special order. If the document with sequence number 1 is not available, the system will check the document assigned with the sequence number of 2, and so on. If the system passes through this hierarchy at end order time and the item is not successfully added to a requisition/purchase order, the item will remain in the Special Order File (SPORD). If the system passes through this hierarchy during Special Order Automatic Req Creation (MENU POMAST) and the item is not successfully added to a requisition/purchase order, the system will attempt to add the item to a new requisition as a last resort.</p> <p data-bbox="527 1060 600 1092">Display</p>

This value is only copied over when the vendor currencies match exactly.</p> <hr/>
F12=Return	<p>Press F12=RETURN to return to the Vendor Master Maintenance Selection Screen (p. 44-3).</p>

Vendor Audit Activity Screen

<u>VENDOR AUDIT ACTIVITY</u>				
Vendor: 200 K & M CORPORATION				
<u>Sel</u>	<u>Function</u>	<u>User ID</u>	<u>Date</u>	<u>User Time</u>
1	Change	APDEMO	7/30/09	18:08:47 EST
2	Add S/O Options	APDEMO	7/30/09	17:59:24 EST
3	Change	APDEMO	7/30/09	17:55:00 EST
4	Change	APDEMO	7/30/09	12:02:32 EST
5	Change	APDEMO	7/29/09	21:13:27 EST
Selection: _ . From System Activity Date: To:				Last
F2=Actual Time F5=Refresh F12=Return				

This screen appears after you press F18=VENDOR ACTIVITY on the Vendor Master Maintenance Selection Screen (p. 44-3). Use this screen to review summary vendor audit activity for the vendor you selected on the Vendor Master Maintenance Selection Screen (p. 44-3). You can limit the activity records that display based on a system activity date range. You can also review detailed information about change activity by selecting an activity from the list.

Through this screen, you will be able to track and retain vendor information changes made through Vendors Maintenance (MENU POFILE/MENU APFILE) for the number of days entered in the system option field **Days to Keep Vendor Audit Activity** in Purchasing Options Maintenance (MENU XAFILE). If zero is entered in the system option field, the system will not track any vendor change activity and it therefore will not be available through this Vendor Audit Activity.

Changes are grouped together for each specific vendor change and the individual field changes are available for display on the Vendor Audit Activity Detail Screen (p. 44-30).

Vendor Audit Activity Screen Fields and Function Keys

Field/Function Key	Description
Sel	<p>This field displays the line number of a vendor activity.</p> <p>Key this number in the Selection field to select a particular activity to review in detail.</p> <hr/> <p>NOTE: Detail information is available for an activity only if you select a function for which tracked information has been changed for the vendor. If you select an activity for which tracked information has not been changed for a vendor, you will receive a message indicating that detailed information is not available.</p> <hr/> <p>Display</p>
Function	<p>This field displays the activity that was performed on the vendor through Vendors Maintenance (MENU POFIELD/MENU APFILE).</p> <p>Functions include:</p> <ul style="list-style-type: none"> • Add S/O Options • Change S/O Options • Delete S/O Options • Add Email Contact • Change Email Contact • Delete Email Contact • Add (vendor) • Change (vendor) <hr/> <p>Display</p>
User ID	<p>This field displays the user ID of the person who performed the activity on the vendor.</p> <hr/> <p>Display</p>

Vendor Audit Activity Screen Fields and Function Keys

Field/Function Key	Description
Date	<p>This field displays the date, in your default date format specified through Register A+ User IDs (MENU XACFIG), on which the activity was performed on the vendor. The display of this field may change depending on the corresponding Time field and what time is shown via the F2=ACTUAL TIME / F2=USER TIME / F2=SYSTEM TIME key.</p> <p>The User Date is the date on which the activity occurred in relation to your default time zone. Your default user time zone is set up through Register A+ User IDs (MENU XACFIG).</p> <p>The Actual Date is the date on which the activity occurred shown in relation to the time zone of the user who performed the activity.</p> <p>The System Date is the date on which the activity occurred shown in relation to the system's default time zone. The system's default time zone is set up through Time Zone Codes Maintenance (MENU OEFIL3).</p> <p>For example, a change was made to a vendor at your company's New York office at 7:00 p.m., Eastern Standard Time (EST) on March 24th. You are inquiring on the activity from an office in Paris, France, which is 6 hours ahead of New York. The User Time and User Date will display as 1:00 a.m., March 25th. The Actual Time and Actual Date will display as 2:00p.m., March 24th. The time zone difference caused the variance between the User Date and Actual Date. Additionally, you can view the activity in the System Date, which is in relation to the system's time zone.</p> <p>Display</p>

Vendor Audit Activity Screen Fields and Function Keys

Field/Function Key	Description
User/Actual/System Time	<p>This field displays the time on which the activity was performed on the vendor. The display of this field can be toggled via the F2=ACTUAL TIME / F2=USER TIME / F2=SYSTEM TIME key to show the time in the User Time, Actual Time, or System Time, including the time zone. When this field is toggled, the corresponding date field also changes accordingly.</p> <p>The User Time is the time in which the activity occurred shown in your default time zone. Your default user time zone is set up through Register A+ User IDs (MENU XACFIG).</p> <p>The Actual Time is the time in which the activity occurred shown in the time zone of the user who performed the activity.</p> <p>The System Time is the time in which the activity occurred shown in the system's default time zone. The system's default time zone is set up through Time Zone Codes Maintenance (MENU OEFIL3).</p> <p>For example, a change was made to a vendor at your company's New York office at 2:00 p.m., Eastern Standard Time (EST). You are inquiring on the activity from an office in San Diego, California, which uses Pacific Standard Time (PST). PST is 3 hours earlier than EST. The User Time will display as 11:00 PST (your time zone), and the Actual Time will display as 14:00 EST (the time zone in which the user performed the activity). Additionally, you can view the activity in the system's time zone.</p> <p>Display</p>
Selection	<p>Use this field to select the line of the activity you want to review in detail.</p> <p>Key the line number shown in the Sel column of the activity you want to select and press ENTER. The Vendor Audit Activity Detail Screen (p. 44-30) will appear.</p> <p>(N 2,0) Optional</p>
System Activity Date From/To	<p>Use this from and to range field to limit the vendor activity records to display based on a date range.</p> <p>Key the system date range in the default date format specified for your user ID through Register A+ User IDs (MENU XACFIG).</p> <p>Leave this field blank to display all existing vendor activity records for this item. Note that audit activity records are retained based on the value entered in the Days to Keep Vendor Audit Activity in Purchase Options Maintenance (MENU XAFILE).</p> <p>(2 @ N 6,0) Optional</p>
F2=Actual Time / F2=User Time / F2=System Time	<p>Use this toggle function key to display the User Time, Actual Time, or System Time, including the time zone.</p> <p>For details about the different times that you can display, refer to the User/Actual/System Time field on this screen.</p>

Vendor Audit Activity Screen Fields and Function Keys

Field/Function Key	Description
F5=Refresh	Use this function key to refresh the screen according to the system date range specified in the System Activity Date From/To fields and, if applicable, to include any new activity performed since you accessed this screen.
F12=Return	Press F12=RETURN to return to the previous screen.
Enter	After entering an activity line in the Selection field, press ENTER to display detailed vendor change information. The Vendor Audit Activity Detail Screen (p. 44-30) will appear.

Vendor Audit Activity Detail Screen

VENDOR AUDIT ACTIVITY DETAIL

This screen displays after you confirm your selections and press **ENTER** on the Vendor Master Maintenance Selection Screen (p. 44-3). Use this screen to add, change, or delete vendor purchasing information.

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Vendor	Key the vendor's name. (A 30) Required
Addr 1 - 4	You can use the Addr 4 field only if Form Type is 2 in System Options Maintenance (MENU XAFILE). Key the vendor's street address, post office box number, or other address information except for the city, state/province, country, and zip/postal code which are specified in fields below. This address is used when purchasing from this vendor. If the payee for this vendor has a different name and/or address, the Payee address keyed on the A/P Vendor Master Maintenance Screen (p. 44-48) is used for payment information. (4 @ A 30) Optional
City	Key the vendor's city. (A 20) Optional

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
St/Prov	<p>Key the vendor's state or province.</p> <p><i>Valid Values:</i> A state or province code defined through State/Province Codes Maintenance (MENU OEFIL3) if Validate State/Province is Y in Systems Options Maintenance (MENU XAFIL3).</p> <p>(A 30) Optional</p>
Zip/Pstl	<p>Key the vendor's zip or postal code.</p> <p>(A 10) Optional</p>
Cntry	<p>Key the vendor's country.</p> <hr/> <p>NOTE: You must key a country code if country of origin restrictions are being used [that is, either the country of origin Buying Restrictions or Selling Restrictions field is Y in System Options Maintenance (MENU XAFIL3)].</p> <hr/> <p><i>Valid Values:</i> A country code defined through Country Name Maintenance (MENU POFILE/MENU ARFIL2).</p> <p>(A 3) Optional/Required</p>
Contact	<p>This field is the name of the vendor's primary contact person. The name keyed here may be different than that keyed in the AP Contact field on the A/P Vendor Master Maintenance Screen (p. 44-48).</p> <hr/> <p>NOTE: If FAX is installed, and you are using the Quadrant FastFax third party product, this field may update automatically through Quadrant's FastFax if you run Update A+ From FastFax via Nickname (MENU AXMAIN) and enter Y in the Update Vendor Master File field. Refer to the FAX User Guide for details.</p> <hr/> <p>(A 25) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Phone/Ext	<p>In the Phone field, key the vendor's telephone number, which includes the following:</p> <ul style="list-style-type: none"> • 3-character country access code • 20-character area code and telephone number <p>For example: 011 (781) 555-1212</p> <p>In the Ext field, key the extension number of the person specified in the Contact field.</p> <p>For more information, refer to Phone and Fax Number Delimiters in the Cross Applications User Guide.</p> <p><i>Valid Values:</i></p> <p>Numerals and the following symbols: - () . /</p> <p>Blank spaces are allowed between numerals only if Allow Blank Phone Delimiters is Y in Systems Options Maintenance (MENU XAFILE).</p> <p>(N 3,0 / N 20,0 / N 4,0) Optional</p>
Fax/Ext	<p>Use these fields if FAX is installed and you plan to fax at least one type of document [Y must be entered for one or more of the document types listed on the Vendor Master Additional Information Maintenance Screen (p. 44-65)].</p> <p>In the Fax field, key the vendor's fax number, which includes the following:</p> <ul style="list-style-type: none"> • 3-character country access code • 20-character area code and telephone number <p>For example: 011 (781) 555-1212</p> <p>In the Ext field, key the extension number of the fax machine.</p> <p><i>Valid Values:</i></p> <p>Numerals and the following symbols: - () . /</p> <p>Blank spaces are allowed between numerals only if Allow Blank Phone Delimiters is Y in Systems Options Maintenance (MENU XAFILE).</p> <hr/> <p>NOTE: If FAX is installed, and you are using the Quadrant FastFax third party product, this field may update automatically through Quadrant's FastFax if you run Update A+ From FastFax via Nickname (MENU AXMAIN) and enter Y in the Update Vendor Master File field. Refer to the FAX User Guide for details.</p> <hr/> <p>(N 3,0 / N 20,0 / N 4,0) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Different Payee Name/ Address	<p>This field is used to indicate if the payee for this vendor has a different name and/or address than that keyed on this screen.</p> <p>Key Y if the payee for this vendor has a different name and/or address as that keyed on this screen. You will be allowed to key the payee's address in the Payee field on the A/P Vendor Master Maintenance Screen (p. 44-48).</p> <p>Key N if the payee for this vendor has the same name and/or address as that keyed on this screen. You will not be allowed to key a Payee on the A/P Vendor Master Maintenance Screen (p. 44-48).</p> <hr/> <p>NOTE: This field is only used within Vendor's Maintenance (MENU APFILE/MENU POFILE).</p> <hr/> <p>(A 1) Optional</p>
Buyer	<p>Use this field to select the buyer responsible for purchasing from this vendor. You may also assign a buyer at the vendor/warehouse level (if the buyer for the warehouse is different than the buyer entered in this field), vendor/item level, and/or vendor/item/warehouse level (if the buyer at the vendor/item level is different than the buyer at the vendor/warehouse level).</p> <p>Key the buyer code of the primary person in your organization responsible for purchasing from this vendor. The buyer code is included on all new requisitions and may be changed during Enter or Change Requisitions (MENU POMAIN).</p> <p>If you change the buyer assigned to a vendor, when you complete your maintenance in this option the system will update the IM&P and vendor/item level records for the vendor and buyer. For example, assume buyer 234 is assigned to vendor 100. If you change the buyer to 104, the system will change all records for vendor 100 and buyer 234 to buyer 104. A record for vendor 100 and buyer 82 would not be changed.</p> <p><i>Valid Values:</i> A buyer code defined through Buyers Maintenance (MENU POFILE).</p> <p>(A 3) Optional</p>
Disc Pct	<p>Key the standard price discount percent taken for purchases from this vendor. The discount percent keyed here is included on all new requisitions and may be changed during Enter or Change Requisitions (MENU POMAIN).</p> <p>(N 4,2) Optional</p>
Ship Via	<p>Key the standard shipping instructions for the vendor. This is included on all new requisitions and may be changed during Enter or Change Requisitions (MENU POMAIN).</p> <p>(A 20) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Min Val	<p>Key the vendor's minimum acceptable purchase order value.</p> <p>The value keyed here is displayed when completing a requisition for this vendor and is used to verify that the minimum order value is met. If the purchase amount requisitioned from this vendor is less than the value keyed in this field, a warning message is displayed.</p> <p>(N 9,2) Optional</p>
FOB Code	<p>The FOB code contains shipping information, including who is responsible (you or the vendor) for shipping charges and freight damages.</p> <p>Use this field to assign a default FOB code to this vendor. The code you enter will display on the Requisition Header Screen in Enter or Change Requisitions (MENU POMAIN) each time you enter a requisition for this vendor.</p> <p>Key the FOB code.</p> <p><i>Valid Values:</i> An FOB code defined through FOB Codes Maintenance (MENU POFIL2 or MENU OEFIL3).</p> <p>(A 5) Optional</p>
Currency	<p>This field appears only if International Currency is installed and activated through Activate International Currency (MENU ICMASST).</p> <p>Key the currency code for the vendor's currency: the foreign vendor's currency code or accept the default value for vendors whose trading currency is the same as your the company's local currency.</p> <hr/> <p>NOTE: If you change the currency code on this screen, the change will also affect the code in the Currency field on the A/P Vendor Master Maintenance Screen (p. 44-48).</p> <hr/> <p><i>Default Value:</i> The default local currency specified for the system through International Currency Options Maintenance (MENU ICFIL2).</p> <p><i>Valid Values:</i> A currency code defined through Currency/Exchange Codes Maintenance (MENU ICFIL2).</p> <p>(A3) Required</p>
Currency Code Description	<p>This field appears only if International Currency is installed and activated through Activate International Currency (MENU ICMASST).</p> <p>This field displays the description for the currency code in the Currency field.</p> <p>Display</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Lead Time	<p>The number of weeks required for this vendor to make a shipment from the time the Purchase Order is printed. The value keyed here will be used as the default for all new vendor/item records created manually for this vendor through Vendor/Item Information (MENU POFILE) or automatically through Create Default Vendor/Item Information (MENU POFILE).</p> <p>If you select to use allocation time periods for a warehouse, the lead time is used in calculating the date on which inventory will be allocated for each customer order.</p> <p>If you do not have Inventory Management & Planning or Advanced Inventory Management installed, you must key the lead time for allocation time periods.</p> <p>When the Purchasing Options (MENU XAFILE) Company Option to Calculate PO Due Dates Based on Lead Times is set to Y, this value will be reviewed for inclusion of the item level due date.</p> <p>(N 2,0) Optional</p>
Exch Code	<p>This field appears only if International Currency is installed and activated through Activate International Currency (MENU ICMASST).</p> <p>Key the exchange code to be used to access the exchange rate for the vendor's currency.</p> <hr/> <p>NOTE: If you change the exchange code on this screen, the change will also affect the code in the Exch Code field on the A/P Vendor Master Maintenance Screen (p. 44-48).</p> <hr/> <p><i>Valid Values:</i> An exchange code defined through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A3) Optional</p>
Exch Code Description	<p>This field appears only if International Currency is installed and activated through Activate International Currency (MENU ICMASST).</p> <p>This field displays the description of the exchange code in the Exch Code field.</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Calc from Receipts	<p>This field is protected and defaults to N if the Allow PO's field is N on this screen.</p> <p>This field allows the calculation of lead time from receipt history when running the Lead Time History Report (MENU IMREPT).</p> <p>Key A to include all items for this vendor. This changes the default to Y for Update Lead Time fields associated with all purchase order line items for this vendor.</p> <p>Key N to not include any items for this vendor. This changes the default to N for Update Lead Time fields associated with all purchase order line items for this vendor. Even if you change a line item's default to Y on a PO for this vendor, the average lead time calculation will occur, but the IM&P Balance File will not be updated.</p> <p>Key I to have a check made against each vendor/item record. This changes the default to the value on the Vendor/Item record for Update Lead Time fields associated with all purchase order line items for this vendor.</p> <p><i>Valid Values: A, N, I</i></p> <p>(A 1) Required</p>
Ord Cycle	<p>The order cycle code used to represent the order cycle for this vendor. This is used to classify vendors based on the frequency in which you place orders with a vendor.</p> <p>The value keyed here is used when printing the Suggested Orders Report [via Suggested Orders Report (MENU POREPT)].</p> <p>Example: Assign vendors whom you purchase from on a weekly basis the Order Cycle Code of "WK"; assign vendors whom you purchase from on a monthly basis the Order Cycle Code of "MN", etc. When printing the Suggested Orders Report, you may print separate reports for vendors with weekly and monthly order cycles.</p> <p>(A 2) Optional</p>
Order Frequency	<p>Key the number of weeks for the interval at which a PO is issued to this vendor. The value keyed here will be used as the default for all new vendor/item records created manually for this vendor through Vendor/Item Information (MENU POFIELD) or automatically through Create Default Vendor/Item Information (MENU POFIELD).</p> <p>If you select to use allocation time periods for a warehouse, the order frequency is used in calculating the date on which inventory will be allocated for each customer order.</p> <p>If you do not have Inventory Management & Planning or Advanced Inventory Management installed, you must key the order frequency for allocation time periods.</p> <p>(N 3,1) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Sfty Stc %	<p>The percentage of minimum level inventory used as safety stock. Safety stock is used to prevent stockouts when variable customer demand or extended vendor lead times occur. This value will print on the Suggested Orders Report (MENU POERETPT).</p> <p>(N 5,3) Optional</p>
Item Prt	<p>This field is protected and defaults to O if the Allow PO's field is N on this screen.</p> <p>This is the item print code used to determine whether your item number, the manufacturer's item number, or both item numbers are printed on Purchase Orders.</p> <p>Key O to print item numbers used by your organization (our item number) on Purchase Orders for this vendor.</p> <p>Key M to print the manufacturer's item number on Purchase Orders for this vendor.</p> <p>Key B to print both your item number and the manufacturer's item number on Purchase Orders for this vendor.</p> <hr/> <p>NOTE: If you select either M or B, you will be required to key the manufacturer's order number during Enter or Change Requisitions (MENU POMAIN).</p> <hr/> <p>(A 1) Required</p>
GTIN Prt	<p>This is the Global Trade Item Number (GTIN) print code used to determine whether your GTINs are printed on Purchase Orders for this vendor. GTINs may be set up for your items through UPC & GTIN Item/UOM Cross Reference Maintenance (MENU IAFIELD).</p> <p>Key Y to print GTINs, if any, for an item number/Buying U/M on Purchase Orders for this vendor.</p> <p>Key N if you do not want GTINs printed on Purchase Orders for this vendor.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Rbt Mthd	<p>This field is used to determine if rebates that must be requested from your vendor (applied for) should be created as open invoices in Accounts Receivable or as credit memos in Accounts Payable.</p> <p>Key R if rebates for this vendor should be created as open invoices in Accounts Receivable. If you key an R, the Vendor Rebate Customer Maintenance Screen (p. 44-88) will be presented during this vendor master maintenance to allow you to identify those customers using this vendor with account receivable type rebates.</p> <p>Key P if rebates for this vendor should be created as credit memos in Accounts Payable.</p> <p>Leave this field blank if you do not want to assign a rebate method to this vendor. When rebates are posted, no credit memo or invoice will be created for this vendor, and no general ledger entries will be made to the pending rebates account.</p> <p>(A 1) Optional</p>
Elec Rbt Typ	<p>Use this field to specify the electronic file format that the Rebate Extract Filing option (MENU OERMAIN) will use when generating electronic filing reports for this vendor. XML and flat file formats are available. For a complete description of each filing format and more information about generating rebate filing reports, refer to the Order Entry Rebates User Guide.</p> <p>Key A if you want to use the paper industry flat file format.</p> <p>Key B to use the paper industry XML file format.</p> <p>Key C to use the generic flat file format.</p> <p>Key D to use the generic XML file format.</p> <p>Leave this field blank if you do not want electronic files generated for this vendor. Extract filing reports for this vendor will always use the print format.</p> <p><i>Valid Values:</i> A, B, C, D, or blank</p> <p>(A 1) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Allow PO's	<p>This field is used to determine if purchase orders may or may not be created for this vendor.</p> <p>Key Y if purchase orders may be created for this vendor.</p> <p>Key N to prohibit the creation of purchase orders for this vendor which includes Suggested Order Maintenance (MENU POREPT) and Inventory Control Center.</p> <p>If this field is N, then the following fields on this screen, the Vendor Master Additional Information Maintenance Screen (p. 44-65) and Vendor Master Additional Email Maintenance Screen (p. 44-83), will be protected and default to N or O:</p> <ul style="list-style-type: none"> • Default to N: Calc from Receipts, Allow Off-Line Validation, Print Purchase Orders, Print Vendor RFQ, EDI Purchase Orders, FAX Purchase Orders, FAX Vendor RFQ, Email Purchase Orders, and Email Vendor RFQ • Default to O: Item Print <p>(A 1) Required</p>
Vendor Volume Disc Type	<p>If the vendor offers volume discounts (i.e., PO level discounts), use this field to specify one of the following types of discounts:</p> <ul style="list-style-type: none"> • Highest qualifying percentage discount. • Sum of the qualifying discounts. • Chain discount where all qualifying discounts are applied, but each is based on the previously discounted value rather than the original cost. <p>If the vendor does not allow volume discounts, leave this field blank.</p> <p>Key 1 to use the highest qualifying percentage discount.</p> <p>Key 2 to use the sum of the qualifying discounts.</p> <p>Key 3 to chain the qualifying discount values and use the result.</p> <p>For more information on vendor volume discounts, refer to Vendor Volume Discounts in the Purchasing Overview section of this manual.</p> <p>(A 1) Optional</p>
Last PO Dt	<p>Key the date on which the last order was placed with this vendor.</p> <p>Distribution A+ will update this field as purchase orders are printed for the vendor.</p> <hr/> <p>NOTE: Key the date using the Default Date Format for this user, specified through Register A+ User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFIILE).</p> <hr/> <p>(N 6,0) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Allow Multi Ship-To POs	<p>Use this field to specify whether or not the vendor accepts purchase orders with more than one ship-to address.</p> <p>Key Y if the vendor will ship items on a single purchase order to more than one warehouse.</p> <hr/> <p>NOTE: For every warehouse you wish to be available for inclusion on a multi-warehouse purchase order, you must key Y in the Multi Ship-to POs field in Warehouse Numbers Maintenance (MENU IAFILE).</p> <hr/> <p>Key N if the vendor will not ship items on a single purchase order to more than one warehouse.</p> <p>For information on multi-warehouse purchase orders, refer to Multi-Warehouse Purchase Orders in the Purchasing Overview section of this manual.</p> <p>(A1) Required</p>
Misc Notes	<p>Use this field to add any brief notes pertaining to this vendor, or to requisitions for this vendor. The text you enter here will display on the Requisition Header Screen whenever you enter a requisition for this vendor through Enter or Change Requisitions (MENU POMAIN).</p> <p>Key the note for this vendor.</p> <p>(A 20) Optional</p>
Allow Off-Line Validation	<p>This field displays only if EDI is installed. Also, this field is protected and defaults to N if the Allow PO's field is N on this screen.</p> <p>Key Y to have incoming EDI invoices from this vendor automatically receipt validated when they are received. If you key Y, the automatic receipt validation will check the Cost Variance Warning Percent and Cost Variance Warning Value defined through Purchasing Options Maintenance (MENU XAFILE). Incoming invoices that exceed the cost variance warning percent/value will not be receipt validated, but will remain as pending invoices marked with an error through Incoming Documents (MENU EIMAIN).</p> <p>Key N to prevent incoming EDI invoices from this vendor being automatically receipt validated when they are received. If you key N, invoices received through EDI must be manually validated through Voucher Entry (MENU APMMAIN).</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
User Area	<p>Use this field to key any additional information regarding this vendor.</p> <p>(A 15) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Transport Mode	<p>This field displays only if the country in the vendor's address is defined as a European Community (EC) member through Country Names Maintenance (MENU ARFIL2).</p> <p>Companies in EC member countries are required to submit a monthly Intrastat Report (MENU IAREPT) to their respective governments detailing shipments to and receipts from other EC member countries. The mode of transport for each shipment or receipt is required on the report. The transport mode code you enter here will be used as the default transport mode whenever you enter a requisition for this vendor.</p> <p>Key the transport mode code for this vendor.</p> <p><i>Valid Values:</i> A transport mode code defined through Transport Mode Maintenance (MENU OEFIL3 or MENU POFIL2).</p> <p>(A 2) Required</p>
Min Units	<p>Key the vendor's minimum acceptable purchase quantity.</p> <p>The value keyed here is displayed when completing a requisition for this vendor and is used to verify that the minimum order quantity is met. If the number of units requisitioned from this vendor is less than the value keyed in this field, a warning message is displayed.</p> <p>When International Currency is installed, for vendors whose trading currencies differ from the company's local currency, this value will display in the trading currency with the trading currency symbol displayed to the right and the local currency equivalent and symbol displayed below.</p> <p>(N 11,3) Optional</p>
Min Wght/Min Size	<p>Key the vendor's minimum acceptable order weight and size values.</p> <p>The values keyed here are displayed when completing a requisition for this vendor and are used to verify that the minimum weight and size values are met. If the total weight and size of the items requisitioned from this vendor are less than the values keyed in these fields, a warning message is displayed.</p> <p>(2 @ N 13,4) Optional</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Max Units / Max Wght / Max Size	<p>Vendor maximum values can be entered using the Max Units, Max Wght, and Max Size fields. The system will look at the values entered in these fields to determine item ratios for those items that already exist on a Purchase Order, to ensure that the correct ratio remains based on the weight and size. The system will round up or down to the maximum appropriately, while keeping the ratios on the suggested order.</p> <p>For example, if using vendor maximums, and you have a crate that holds 15 tons and you have 20 tons of items, the system will round down to the maximum of 15. If you have 15 tons of items and a crate that holds 20 tons, the system will round up to the maximum of 20 proportionally.</p> <p>Key the vendor's maximum acceptable purchase quantity, maximum acceptable order weight, and/or size values. These values are ONLY used during Suggested Order Maintenance (MENU POREPT) once you press F17=AUTO RND on the Suggested Order Maintenance End Order Screen to round to the vendor maximum levels.</p> <hr/> <p style="text-align: center;">NOTE: If you enter more than one value (that is, you enter a unit and weight or unit, weight and size), the system will look at all values keyed to determine the maximum without going over any one of these values (the greatest amount of any one of the values will be used to round to the maximum).</p> <hr/> <p>(3 @ N 11,3) Optional</p>
F12=Return	<p>Press F12=RETURN to return to Vendor Master Maintenance Selection Screen (p. 44-3) without updating this vendor.</p>
F24=Delete	<p>F24=DELETE displays in Delete Mode only.</p> <p>Press F24=DELETE to delete the selected vendor. A vendor may not be deleted if any open payables exist for the vendor.</p>

Vendor Master Maintenance (1) Screen Fields and Function Keys

Field/Function Key	Description
Enter	<p data-bbox="527 310 1414 411">Press ENTER to confirm your selections and update additions or changes made for this vendor. You will be prompted to press ENTER a second time to confirm your selections.</p> <p data-bbox="527 426 1414 489">One of the following screens will appear based on the following conditions and hierarchy:</p> <ul data-bbox="527 504 1414 1142" style="list-style-type: none"><li data-bbox="527 504 1414 567">• Vendor Master Maintenance (2) Screen (p. 44-46), if any vendor user fields have been defined.<li data-bbox="527 581 1414 644">• A/P Vendor Master Maintenance Screen (p. 44-48), if no vendor user fields have been defined and Accounts Payable is installed/set up.<li data-bbox="527 659 1414 760">• Vendor Master Additional Information Maintenance Screen (p. 44-65), if Accounts Payable is not installed/set up and either the EDI or FAX modules are installed/set up.<li data-bbox="527 774 1414 837">• Vendor Master Additional Email Maintenance Screen (p. 44-83), if EDI and FAX are not installed/set up and Mail Server is installed/set up.<li data-bbox="527 852 1414 995">• Vendor Rebate Customer Maintenance Screen (p. 44-88), if Mail Server is not installed/set up and you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].<li data-bbox="527 1010 1414 1142">• Vendor Master Maintenance Selection Screen (p. 44-3), if Vendor Rebates are not being used, or if you did not identify the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

Vendor Master Maintenance (2) Screen

```

VENDOR MASTER MAINTENANCE          Change
Vendor: 200      Name: K & M CORPORATION
USER FLDS? 1 Industry                .....
F12=Return
    
```

This screen displays after pressing **ENTER** from the Vendor Master Maintenance (1) Screen (p. 44-32) if at least one vendor user field has been created through Vendor User Fields Maintenance (MENU POFILE).

Use this screen to add or change vendor user field information. This information will help with the classification of a vendor.

NOTE: The information defined here pertains to the vendor. However, you may also define user fields for the customer or item.

Vendor Master Maintenance (2) Screen Fields and Function Keys

Field/Function Key	Description
USER FLDS	<p>For each vendor user field previously defined, you can assign one of the valid vendor user field values to this specific vendor. The valid values for a specific vendor user field are keyed to the right of that field.</p> <p>Up to six vendor user fields, and an unlimited number of vendor user field values for each of the six, are defined through Vendor User Fields Maintenance (MENU POFILE). Only those user fields already defined will appear on this screen.</p> <p>Display</p>

Vendor Master Maintenance (2) Screen Fields and Function Keys

Field/Function Key	Description
(USER FIELD VALUES)	<p>Through Vendor User Fields Maintenance (MENU POFILE) you can define up to six vendor user fields (in the Code No field) to further classify a vendor. The description you enter for each of those code numbers displays on this screen. Once a code number has been defined (you may define up to 6), you can then create and associate as many vendor user field values (in the User Field field) as desired for the defined code numbers.</p> <p>Key a vendor user field value which has been defined for the specific vendor user field. After you key the user code and press ENTER, the description of the user code will display.</p> <p><i>Valid Values:</i> Any vendor user field value defined for the specific vendor user field through Vendor User Fields Maintenance (MENU POFILE).</p> <p>(6 @ A 5) Optional</p>
F12=Return	Press F12=RETURN to return to the Vendor Master Maintenance (1) Screen (p. 44-32).
Enter	<p>Press ENTER to confirm your selections and update additions or changes made for this vendor.</p> <p>One of the following screens will appear based on the following conditions and hierarchy:</p> <ul style="list-style-type: none"> • A/P Vendor Master Maintenance Screen (p. 44-48), if Accounts Payable is installed. • Vendor Master Additional Information Maintenance Screen (p. 44-65), if Accounts Payable is not installed and either the EDI or FAX modules are installed. • Vendor Master Additional Email Maintenance Screen (p. 44-83), if EDI and FAX are not installed and Mail Server is installed. • Vendor Rebate Customer Maintenance Screen (p. 44-88), if Mail Server is not installed and you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)]. • Vendor Master Maintenance Selection Screen (p. 44-3), if Vendor Rebates are not being used, or if you did not identify the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

NOTE: This screen displays only if Accounts Payable is installed on your system.

This screen appears when you press ENTER on the following screens:

- Vendor Master Maintenance Selection Screen (p. 44-3) if Purchasing is not installed
- Vendor Master Maintenance (1) Screen (p. 44-32) if Purchasing is installed and you are not using User Fields.
- Vendor Master Maintenance (2) Screen (p. 44-46) if Purchasing is installed.

Use this screen to specify vendor information to be used in Accounts Payable.

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Vendor	If Purchasing is installed, this field is display-only. Key the vendor name. (A 30) Required/Display
CC Vendor	Use this field to identify if the vendor located in the Vendor field on this screen is allowed to pay by credit card. Key Y to identify this vendor as a credit card vendor. Key N if this vendor is not a credit card vendor and instead must pay by check or ACH. (A 1) Required

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Payee	<p>This field is display-only if Different Payee Name/Address is N on the Vendor Master Maintenance Selection Screen (p. 44-3)</p> <p>This field is required if Different Payee Name/Address is Y on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Key the name of the payee to be used when processing vouchers and printing checks for this vendor. You can override this name when keying a voucher.</p> <hr/> <p>NOTE: The payee is not necessarily the same as the assignee. The payee's name and address is used during voucher and payment processing. The assignee (see Assignee) is a different vendor with a different Vendor ID. The assignee is used for voucher creation and receives payment for this vendor.</p> <hr/> <p>During check processing, when vouchers exist for multiple vendors, and these vendors have exactly the same payee name and address information, only one check will generate since the same address exists for both the vendor and payee name. To generate separate checks for this example, you can either enter the vendor as an assignee to vouchers (if multiple), or use the Sep Chk field (if only one voucher), or simply change the name or address slightly so that these vendors can be differentiated and will be sorted to separate checks per vendor.</p> <p>(A 30) Required/Display</p>
Addr 1 - Addr 4	<p>These fields are display-only if Different Payee Name/Address is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>You can use the Addr 4 field only if Form Type is 2 in System Options Maintenance (MENU XAFILE).</p> <p>Key the payee's street address, post office box number or other address information except for the city, state/province, country, and zip/postal code which are specified in fields below.</p> <p>(4 @ A 30) Optional/Display</p>
Phone/Ext	<p>In the Phone field, key the payee's telephone number, which includes a 3-character country access code followed by the area code and telephone number. For example: 011 (781) 555-1212</p> <p>In the Ext Field, key the telephone extension of the contact person specified in the AP Contact field.</p> <p><i>Valid Values:</i> Numerals and the following symbols: - () . /. Blank spaces are allowed between numerals only if Allow Blank Phone Delimiters is Y in Systems Options Maintenance (MENU XAFILE).</p> <p>(N 3,0/N 20,0/N 4,0) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Fax/Ext	<p>In Fax field, key the payee's fax number, which includes a 3-character country access code followed by the area code and telephone number. For example: 011 (781) 555-1212</p> <p>In the Ext Field, key the telephone extension for the fax machine.</p> <p><i>Valid Values:</i> Numerals and the following symbols: - () . /. Blank spaces are allowed between numerals only if <i>Allow Blank Phone Delimiters</i> is Y in Systems Options Maintenance (MENU XAFILE).</p> <p>(N 3,0/N 20,0/N 4,0) Optional</p>
Tax Body	<p>Use this field if the Calculate GST for Purchases (Inputs) field is set to Y through AP Options Maintenance (MENU APFIL2) and you want to calculate GST for purchases from this vendor. The tax body you key here will be used during the receipt validation process through Voucher Entry (MENU APMAIN). The GST rate specified for the tax body will be used in the calculation of GST for purchases.</p> <p>Key the tax body. After you key the tax body and press ENTER, the description of the tax body appears beneath this field.</p> <p><i>Valid Values:</i> A tax body defined through Tax Body Maintenance (MENU OEFIL2 or ARFILE). Because this field is used to calculate the tax amount for purchases, the tax body should be one with the Goods/Services Tax field set to Y in Tax Body Maintenance.</p> <p>(A 10) Optional</p>
City	<p>This field is display-only if Different Payee Name/Address is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Key the payee's city.</p> <p>(A 20) Optional/Display</p>
St/Prov	<p>This field is display-only if Different Payee Name/Address is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Key the payee's state or province.</p> <p><i>Valid Values:</i> A state or province code defined through State/Province Codes Maintenance (MENU OEFIL3) if Validate State/Province is Y in Systems Options Maintenance (MENU XAFILE).</p> <p>(A 30) Optional\Display</p>
Cntry	<p>This field is display-only if Different Payee Name/Address is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Key the payee's country.</p> <p><i>Valid Values:</i> A country code defined through Country Name Maintenance (MENU ARFIL2).</p> <p>(A 3) Optional\Display</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
A/P Contact	<p>Use this field to key the name of the vendor's primary accounts payable contact person. The name you key in this field may differ from the one keyed in the Contact field on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>The name keyed in this field is used when a voucher is created for this vendor. You may override this field when creating a voucher.</p> <p>(A 30) Optional</p>
Zip/Pstl	<p>This field is display-only if Different Payee Name/Address is N on the Vendor Master Maintenance (1) Screen, Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Key the payee's zip or postal code.</p> <p>(A 10) Optional\Display</p>
Sort Word	<p>Used when sequencing reports by vendor. Reports and inquiries sort this vendor by this sort word, not by the vendor name.</p> <p>(A 10) Required</p>
1099 Req'd	<p>Used to determine whether a 1099 form is required for this vendor.</p> <p>Key Y if this vendor requires a 1099 form be completed.</p> <p>Key N if this vendor does not require a 1099 form.</p> <p>(A 1) Required</p>
Force Cash Dsc	<p>Used to indicate if cash discounts should be applied regardless if payment is made after the discount date. This is a default value and may be overridden during Voucher Entry (MENU APMMAIN).</p> <p>Key Y to force a cash discount for this voucher even if the discount date has passed.</p> <p>Leave this field blank if you do not wish to specify a default force cash discount value for this vendor.</p> <p>Key N if you do not want to force cash discounts for this vendor. This means that cash discounts will not be taken if the discount date has passed.</p> <p><i>Valid Values:</i> Y, N or blank</p> <p>(A 1) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Fed Tax ID	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>Key federal tax identification code for this vendor.</p> <p>For vendors that require a 1099 form, this code is printed on 1099 forms in it's original (un-encrypted) format.</p> <p>For vendors for whom you want to calculate GST for purchases, this code displays during the receipt validation process through Voucher Entry (MENU APMAIN).</p> <p>(A 15) Optional</p>
ID Type	<p>The Federal Tax ID Type.</p> <p>This field defines the type of taxpayer identification number the value in the corresponding Fed Tax ID field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>Key 1 to print EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type.</p> <p>Key 2 to print SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type.</p> <p>Leave blank if the Federal Tax ID Type cannot be determined.</p> <p>(A 1) Optional</p>
State Tax ID	<p>The state tax identification code for this vendor, which is for informational purposes only.</p> <p>Use this field when a state tax identification code is required.</p> <p>(A 15) Optional</p>
Hold Code	<p>Use this field to enter a user-defined code that identifies invoices for special payment processing for all vouchers for this vendor. Vouchers for this vendor are held and cannot be paid until the hold code is removed from the voucher.</p> <p><i>Valid Values:</i> Must be a valid hold code defined through Hold Codes Maintenance (MENU APFILE)</p> <p>(A 2) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Pay Days	<p>The maximum number of days required for payment to this vendor. This value is used to calculate the due date when creating vouchers for this vendor. The due date may be calculated based on the invoice date or the voucher entry date. This is specified in A/P Options Maintenance (MENU APFIL2).</p> <hr/> <p>NOTE: The Cash Requirements Report (MENU POREPT) in Purchasing uses the due date.</p> <hr/> <p>(N 3,0) Required</p>
Payment Pty	<p>The default priority for which payment is made to this vendor.</p> <p>When a voucher is created for this vendor, the payment priority keyed in this field is used as the default. You may override or accept this default value. When selecting vouchers for payment during Payment Selection (MENU APCHCK), you may select for payment those vouchers of a specified priority.</p> <p>Key 1 if the payment priority for this vendor is high. Key 2 if the payment priority for this vendor is medium. Key 3 if the payment priority for this vendor is low.</p> <p>For example, assume that this vendor demands prompt payment within 30 days. Assign this vendor a payment priority of 2 in this field. When a voucher is keyed for this vendor, the payment priority of 2 for the voucher is displayed. Accept the default priority. After the voucher is posted and you are ready to select vouchers for payment, select vouchers with a payment priority of 1 or 2 only. The voucher created for this vendor is selected for payment. Vendors assigned a payment priority of 3 are not selected.</p> <p>(N 1,0) Required</p>
A/P Class	<p>Use this field to enter the class code that classifies this vendor. This field can be used in the vendor performance analysis.</p> <hr/> <p>NOTE: This A/P Class is the “vendor class” referred to elsewhere in this manual.</p> <hr/> <p><i>Valid Values:</i> An A/P Class defined in Vendor Class Maintenance (MENU APFILE).</p> <p>(A 2) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Urgency Days	<p>The number of days since either the invoice date or the voucher entry date [depending on your selection through A/P Options Maintenance (MENU APFIL2)] that payment to this vendor is considered urgent.</p> <hr/> <p>NOTE: The value in this field must be greater than that in the Payment Days field. This field is required if you key a value in the Urgency Pty field.</p> <hr/> <p>From the value keyed in this field, the urgency date is calculated. The urgency date is used when keying a voucher through Voucher Entry (MENU APMAIN). The payment priority for a voucher is replaced by the urgency priority if the selected voucher is not paid by the urgency date. The urgency date may be accepted or overridden during Voucher Entry.</p> <p>When this number of days has passed, the urgency priority (see Urgency Pty) is used instead of the payment priority when selecting vouchers for payment through Payment Selection (MENU APCHCK) if you choose to select vouchers by payment priority.</p> <p>For example, assume that the vendor with a payment priority of 2 demands payment within 30 days. If you have not paid this vendor within the 30 days, and it is urgent that this vendor be paid, assign an urgency days of 30 in this field. When a voucher is keyed for this vendor, the urgency date is calculated as 30 days from the voucher entry date (or invoice date depending on your selection in A/P Options.) You may override the urgency date, if desired.</p> <p>Also assume that this vendor has an urgency priority of 1. When the urgency date is reached, the vendor's payment priority of 2 is replaced by the vendor's urgency priority of 1. When you select vouchers for payment through Payment Selection, select all vouchers with a payment priority of 1. If the urgency date has passed, this vendor's voucher is selected (since the urgency priority of 1 is used). If the urgency date has not yet been reached, this vendor's voucher is not selected (since the payment priority of 2 is used).</p> <p>(N 3,0) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Urgency Pty	<p>The default urgency priority for which payment is made to this vendor.</p> <p>When a voucher is created for this vendor, the urgency priority keyed in this field is used as the default. You may override or accept this default value.</p> <p>The urgency priority is used instead of the payment priority for this vendor when the urgency date (see Urgency Days) is reached. When selecting vouchers for payment during Payment Selection (MENU APCHCK), you may select for payment those vouchers of a specified priority.</p> <hr/> <p>NOTE: The value in this field must be of a higher priority than that in the Payment Pty field. Also, this field is required if you key a value in the Urgency Days field.</p> <hr/> <p>Key 1 if the urgency priority for this vendor is high. Key 2 if the urgency priority for this vendor is medium. Key 3 if the urgency priority for this vendor is low.</p> <p>For example, assume that this vendor demands prompt payment within 30 days, and therefore assigned this vendor a payment priority of 2. Assign this vendor an urgency priority of 1 in this field. When a voucher is keyed for this vendor, the urgency priority of 1 for the voucher is displayed.</p> <p>After the voucher is posted and you are ready to select vouchers for payment, select vouchers with a payment priority of 1 only. If the urgency date has not yet been reached (see Urgency Days), the voucher for this vendor is not selected since the payment priority is 2; if the urgency date has passed, the voucher for this vendor is selected since the urgency priority of 1 is used instead of the payment priority of 2.</p> <p><i>Valid Values:</i> 1, 2, or 3</p> <p>(N 1,0) Optional</p>
Terms	<p>The default standard payment terms for this vendor. These may be overridden or accepted during Voucher Entry (MENU APMAIN).</p> <p>This field is descriptive only and not used for calculations.</p> <p>(A 20) Optional</p>
Csh Dsc Pct	<p>The default standard price discount percent for this vendor. This percentage may be overridden or accepted during Voucher Entry (MENU APMAIN).</p> <hr/> <p>NOTE: This field is required if you key a value in the Cash Dsc Days field.</p> <hr/> <p>(N 5,3) Required</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Allow Split Terms	<p>Use this field to specify if you want to allow split term amounts for each voucher for this vendor. Split terms pertain to vendors who allow their invoice amounts to be split over a specific period of time. Split terms codes are created and maintained in Split Terms Code Maintenance (MENU APFIL2).</p> <p>Key Y if you wish to allow split terms for this vendor. If split terms are allowed, you will be able to split invoice amounts so that installments may be made over a period of predefined pay dates. If you key Y, you must specify a default split terms code in the Dft Split Terms Code field.</p> <p>Key N if you wish to omit split term processing. If split terms are not allowed, invoice amounts will not be allowed to be split.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Csh Dsc Dys	<p>Use this field to enter the default number of days available to take the cash discount indicated in the Csh Dsc Pct field. This value may be overridden or accepted during Voucher Entry (MENU APMAIN).</p> <hr/> <p>NOTE: This field is required if you key a value in the Cash Dsc Pct field.</p> <hr/> <p>(N 3,0) Optional</p>
Dft Split Terms Code	<p>Use this field to specify a default split terms code for this vendor. This is the default split terms code that will be used throughout voucher entry.</p> <p>Key the default split terms code you wish to assign to this vendor.</p> <p>Leave this field blank if you specified N in the Allow Split Terms field.</p> <p><i>Valid Values:</i> Must be a valid split terms code defined through Split Terms Code Maintenance (MENU APFIL2).</p> <p>(A 2) Optional/Blank</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Dft 1099 Cde	<p>This field defines the default IRS 1099 code to be used for this vendor's vouchers. The 1099 code represents one of the IRS 1099 amount types available for use on the 1099-MISC and 1099-NEC forms.</p> <p>If a vendor doesn't have a default 1099 code assigned, then vouchers created for that vendor in this company will use the company default defined in APFIL2 AP Company Options; if no vendor and no company default is defined, then the voucher's code will default to blank (although it can be overridden on the voucher). A blank 1099 code on a voucher will assume the code representing Nonemployee Compensation.</p> <p>The code on the voucher, if any, is consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. If the code representing Nonemployee Compensation is used for a voucher, that voucher's value will be included on the 1099-NEC form; if the code representing any other amount type is used for a voucher, that voucher's value will be included on the 1099-MISC form. If a voucher has a blank 1099 code, the code representing Nonemployee Compensation will be assumed.</p> <p>Key the 1099 code representing the applicable IRS 1099 amount type to be used as a default for this vendor's vouchers. A question mark list provides the available codes and their associated IRS 1099 amount types.</p> <p><i>Valid Values:</i> Blank, or one of the values in the Order Control File (ORCTL) representing the valid IRS 1099 amount types (these values are presented when you key a ? in this field).</p> <p>(N 2,0) Optional</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Sep Check	<p>Use this field to specify if a separate check is required for each voucher for this vendor.</p> <p>Key Y if a separate check is required for each voucher for this vendor.</p> <p>Key N if a separate check is not required for each voucher for this vendor.</p> <p>This may be overridden when entering a voucher for this vendor.</p> <p>(A 1) Required</p>
User Area	<p>Use this field to key additional information regarding this vendor.</p> <p>(A 20) Optional</p>
Assignee	<p>Key the number of the vendor to which payment will be made. This value is used as the default Assignee value when creating a voucher for this vendor. The assignee is a different vendor with a different Vendor ID to whom payment is made.</p> <p>The assignee specified here is used as the default assignee when creating a voucher for this vendor if Use Assignees is Y in AP Options Maintenance (MENU APFIL2). You can override the default assignee during Voucher Entry (MENU APMAIN).</p> <p><i>Valid Values:</i> A vendor number defined through Vendors Maintenance (MENU POFIL2). This vendor number must be different from the vendor number in the Vendor field. When International Currency is installed, the currency specified for this assignee (through Vendors Maintenance) must be the same as the currency specified for the selected vendor.</p> <p>(A 6) Optional</p>
Currency	<p>This field only displays when International Currency is installed.</p>
	<p style="text-align: center;">Important</p> <p>Once you define a currency for a vendor, you cannot change the currency if there are any existing vendor/item records, open POs, open requisitions, open payables, or PO history. You may, however, change the vendor's exchange code.</p>
	<p>Key the currency code for this vendor's currency.</p> <p>If you change the currency code on this screen, the change also will affect the code in the Currency field on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p><i>Valid Values:</i> A currency code defined through Currency/Exchange Codes Maintenance (MENU ICFIL2).</p> <p>(A 3) Required</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
(Currency Code Description)	<p>This field only displays when International Currency is installed.</p> <p>This field displays the description associated with the currency code entered in the Currency field.</p> <p>Display</p>
PO Required	<p>Use this field to determine if a purchase order number is required when creating vouchers for this vendor.</p> <p>Key Y if a purchase order number is required when creating vouchers for this vendor.</p> <p>Key N if a purchase order number is not required when creating vouchers for this vendor.</p> <p>(A 1) Required</p>
Exch Code	<p>This field only displays when International Currency is installed.</p> <p>Key the exchange code to be used to access the exchange rate for the vendor's currency.</p> <p>If you change the exchange code on this screen, the change also will affect the code in the Exch Code field on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p><i>Valid Values:</i> An exchange code defined for the currency through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A 3,0) Required</p>
(Exchange Code Description)	<p>This field only displays when International Currency is installed.</p> <p>This field displays the description associated with the exchange code entered in the Exch Code field.</p> <p>Display</p>
Credit Limit	<p>Key the amount of credit available with this vendor.</p> <p>When International Currency is installed, key the amount of credit available from this vendor in the vendor's currency. The local currency equivalent will display beneath the vendor's currency. The corresponding currency edit symbol appears to the right of each value.</p> <p>(N 9,0) Required</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Vendor G/L Cd	<p>The vendor G/L code assigned to this vendor. The vendor G/L code is used to determine which accounts in your general ledger are updated based on the vendor to whom payment is made.</p> <p>Based on your selections in the G/L Interface (See the G/L Interface User Guide), you may update more than one A/P Liability, A/P Cash Discount and A/P expense accounts based on the classification of the vendor to whom payment was made. The vendor G/L code is used to establish this classification of vendor for your general ledger.</p> <p>Key the vendor G/L code for this vendor.</p> <p>Leave this field blank if you do not wish to assign a G/L code to this vendor, or if you have not set up the vendor G/L code in the G/L Interface.</p> <p>For example, assume that you have two classifications of vendors: hard goods supplier vendors and professional service vendors. Assume also that it is necessary to track the expenses made to each classification of vendor. You need to create these vendor G/L codes through Vendor G/L Codes Maintenance (MENU APFILE), and set up the G/L Interface to indicate which expense accounts are updated for each classification of vendor. If you create the vendor G/L codes of “HG” for hard good supplier vendors, and “PS” for professional service vendors, you would next assign each vendor either of these vendor G/L codes.</p> <p>(A 2) Optional</p>
Dft Bus Unit	<p>The default business unit code assigned to this vendor. This default is used when keying a voucher for this vendor if you have set up the G/L Interface to use business units (see the Cross Applications User Guide.) The business unit code is used to update accounts in your general ledger based on a specification made on a voucher. This condition is represented by the business unit code.</p> <p>Key a default business unit in this field if the vendor deals with only one business unit. You may accept or override the business unit when keying a voucher for this vendor through Voucher Entry (MENU APMAIN).</p> <p>Leave this field blank if you do not wish to assign a default business unit to this vendor, or if you do not use business units in the G/L Interface.</p> <p><i>Valid Values:</i> Blank or a valid business unit which has been set up through Business Units Maintenance (MENU APFILE).</p> <p>(A 2) Required</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
PO-AP Transfer	<p data-bbox="527 310 1414 373">Activates or deactivates receipt validation and landing cost validation during Voucher Entry (MENU APMAIN) for this vendor.</p> <p data-bbox="527 390 1386 453">Key Y to allow access to receipt validation and landing cost validation for this vendor during voucher entry.</p> <p data-bbox="527 470 1352 533">Key N to prohibit receipt validation and landing cost validation for this vendor during voucher entry.</p> <hr/> <p data-bbox="555 558 1380 653">NOTE: This field should be set to N if the vendor is a warehouse transfer vendor, since no receipt validation is done on a transfer Purchase Order.</p> <hr/> <p data-bbox="527 678 665 703">(A 1) Required</p>
Allow Vouchers	<p data-bbox="527 730 1414 898">Indicates if vouchers can be created for this vendor. Vouchers are created for vendors that will receive payment for goods and services. Some vendors should not allow vouchers to erroneously be created, such as, vendors that are paid by an assignee vendor account, or vendors used for processing and tracking warehouse transfer purchases.</p> <p data-bbox="527 915 1414 978">Key Y if vouchers can be created for this vendor. This is the circumstance for most vendors.</p> <p data-bbox="527 995 1414 1125">Key N if vouchers cannot be created for this vendor. This is useful when creating vendors that are used as assignees only. A voucher may be created for the assignee only when a voucher is created for the vendor who uses that assignee.</p> <hr/> <p data-bbox="527 1140 665 1167">(A 1) Required</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
ACH	<p>Application Action Authority (MENU XASCTY) user authorization for Vendor ACH Information is required to access the F4=ACH INFORMATION KEY.</p> <p>Automatic Clearing House (ACH) is a nationwide electronic network for financial transactions. ACH processes large volumes of credit and debit transactions in batches. Electronic ACH payments provide better cash management capabilities, lower costs and faster processing than traditional paper payments. You can benefit from having this ability to process vendor payments as ACH transactions.</p> <p>Use this field to indicate the default value of the selected vendor's payment preference. This value will default into the ACH Payment field for this vendor on the End Voucher Screen during Voucher Entry (MENU APMAIN).</p> <p>Key Y to select ACH payments as this vendor's default payment preference. If this field is Y, ACH information must exist for this vendor in the ACH Vendor Information File (ACHVEN). To add ACH information, press the F4=ACH INFORMATION function key.</p> <p>Key N to select paper checks or credit card as this vendor's default payment preference.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Landing Costs Only	<p>Determines whether or not this vendor has been established only as a landing cost vendor. Purchase Orders can not be created for landing cost only vendors, and therefore, normal receipt validation does not occur. The only receipt validation which can occur is that for landing costs.</p> <p>Key Y to identify this vendor as a landing cost only vendor.</p> <p>Key N if you do not want this vendor to be a landing cost only vendor.</p> <p><i>Valid Values:</i> If the value in the Allow POs field on the Vendor Master Maintenance Screen is Y, you must set this field to N.</p> <p>(A 1) Required</p>
F4=ACH information	<p>Application Action Authority (MENU XASCTY) user authorization for Vendor ACH Information is required to access the F4=ACH INFORMATION KEY.</p> <p>In order to use this key, the ACH field on this screen must be Y.</p> <p>Press F4=ACH INFORMATION to enter or maintain ACH information for this vendor. The Vendor ACH Information Maintenance Screen (p. 44-63) will appear.</p>

A/P Vendor Master Maintenance Screen Fields and Function Keys

Field/Function Key	Description
F12=Return	Press F12=RETURN to return to the previous screen without saving any additions or changes. The Vendor Master Maintenance (2) Screen (p. 44-46) will appear if Purchasing is installed and User Codes have been defined, the Vendor Master Maintenance (1) Screen (p. 44-32) will appear if Purchasing is installed and User Codes are not defined. Otherwise, the Vendor Master Maintenance Selection Screen (p. 44-3) will appear.
Enter	Press ENTER to confirm your selections and update additions or changes made for this vendor. If Purchasing and EDI or Fax are installed, the Vendor Master Additional Information Maintenance Screen (p. 44-65). If Purchasing and Mail Server are installed, the Vendor Master Additional Email Maintenance Screen (p. 44-83) Depending on the rebate method selected on the Vendor Master Maintenance Screen*, either the Vendor Master Maintenance Selection Screen (p. 44-3) or the Vendor Rebate Customer Maintenance Screen (p. 44-88) will then display.

Vendor ACH Information Maintenance Screen

```

VENDOR ACH INFORMATION MAINTENANCE

Vendor: IC3000 SAUERKRAUT PRODUCTS

Receiving DFI Identification: 424982722 .....
DFI Account Number:          87363533 .....
Individual ID Number:        IC3000 .....

F12=Return      F24=Delete
    
```

This screen displays after pressing **F4=ACH INFORMATION** on the **A/P Vendor Master Maintenance Screen** (p. 44-48). Use this screen to enter, maintain or delete ACH information for the indicated vendor. ACH information is used when ACH transactions are submitted with this vendor as a receiver (that is, as a company or individual). It is this receiver that authorizes a company or individual (originator) to initiate a transaction to their financial institution account.

Vendor ACH Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Vendor	This is the vendor for which you are adding or maintaining ACH information. Display
Payee	This is the payee name for those vendors that have a different payee name selected on the A/P Vendor Master Maintenance Screen (p. 44-48). If a different payee name has not been selected, this field does not appear. Display
Receiving DFI Identification	This field identifies the Transit Routing Number of the receiver's Depository Financial Institution (DFI). Key the transit routing number of the receiving bank. NOTE: This field is used in the creation of the ACH payment group to generate the hash totals on the Control Record. <i>Valid Values:</i> Numbers only (A 20) Required

Vendor ACH Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
DFI Account Number	<p>This field identifies the receiver's account number at their Depository Financial Institution (DFI).</p> <p>Key the receiving bank account number.</p> <p>(A 20) Required</p>
Individual ID Number	<p>This field indicates the receiver's identification number. This number may be printed on the receiver's bank statement by the Receiving Financial Institution.</p> <p>Key the unique receiver ID or vendor ID of this receiver.</p> <p><i>Default Value:</i> vendor ID</p> <p>(A 20) Required</p>
F12=Return	<p>Press F12=RETURN to return to the A/P Vendor Master Maintenance Screen (p. 44-48), without updating this screen.</p>
F24=Delete	<p>Press F24=DELETE to delete existing ACH data. All fields on this screen will become display only. If this vendor (or this vendor as an assignee) has no vouchers or invoices flagged as ACH in the Open Vouchers (APVHD), Open Invoices (APOHD), or Paid Invoices (APHHD) file, the user may press F24=DELETE a second time to delete this ACH data and the A/P Vendor Master Maintenance Screen (p. 44-48) will be presented. If this vendor (or this vendor as an assignee) has vouchers or invoices flagged as ACH in any of these files, the Vendor ACH Information Delete Screen (p. 44-91) will be presented.</p>
Enter	<p>Press ENTER to confirm your selections. The A/P Vendor Master Maintenance Screen (p. 44-48) will appear. You will be prompted to press ENTER again to confirm your selections.</p>

NOTE: This screen displays only if the EDI and/or FAX module is installed/set up. The **FAX Info** fields appear on this screen only after the FAX module system options have been set up through Fax System Options Maintenance (MENU AXMAIN). The **EDI Info** fields appear on this screen only after the EDI system options have been set up through EDI Options (MENU EIMAIN).

This screen displays after pressing **ENTER** on the Vendor Master Maintenance (2) Screen (p. 44-46), or, if A/P is installed, the A/P Vendor Master Maintenance Screen (p. 44-48).

Use this screen to enter EDI and/or FAX vendor master information.

This fax data is maintained in Distribution A+ through this screen and is used as the default data for this vendor when processing Purchase Orders. However, if this vendor's individual Purchase Order job is being processed interactively (as opposed to batch) through FAX, you have the option to override some of this data with that from the installed fax system's (e.g. QUADRANT's FastFax) files. This would occur on the Fax Cover Sheet Information Screen. Refer to this screen as provided in the Appendix section of the FAX User Guide.

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Print Purchase Orders	<p>This field is protected and defaults to N if the Allow PO's field is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Since Purchase Orders may be printed and/or sent via EDI or FAX, it is required to identify the method(s) to be used for this particular vendor.</p> <p>Key Y to indicate, for this vendor's default, that Purchase Orders should be printed. This field must be Y if both the EDI Purchase Orders and FAX Purchase Orders fields are N.</p> <p>Note, if only EDI or FAX is installed and if the applicable purchase order field is N, then this Print Purchase Orders field must still be Y. Note too that keying a Y here does not preclude the use of EDI or FAX for Purchase Orders. The EDI Purchase Orders and/or FAX Purchase Orders field(s) may also be Y.</p> <p>Key N to indicate, for this vendor, that Purchase Orders should not be printed. If an N is keyed here, either the EDI Purchase Orders field or the Fax Purchase Orders field must be Y.</p> <hr/> <p>NOTE: If you key an N in this field and instead use EDI or FAX for your Purchase Orders, you may still produce a reprint of those POs through Purchase Orders (MENU POMAIN). A message will print at the top of the PO identifying the original method of "printing."</p> <hr/>
Print Vendor RFQ	<p>This field is protected and defaults to N if the Allow PO's field is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Since Vendor RFQs may be printed and/or sent via FAX, you are required to identify the method(s) to be used for this particular vendor.</p> <p>Key Y to indicate, for this vendor's default, that Vendor RFQs should be printed. This field must be Y if the FAX Vendor RFQ field is set to N. Additionally, keying Y in this field does not preclude the use of EDI or FAX for Vendor RFQs. The FAX Vendor RFQ field may also be Y.</p> <p>Key N to indicate, for this vendor, that Vendor RFQs should not be printed. If N is keyed in this field, the Fax Vendor RFQ field must be Y.</p> <hr/>

(A 1) Required

(A 1) Required

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Trading Partner Id	<p>NOTE: This field is required only if you key a Y in the EDI Purchase Orders or Send Product Activity Data (852) field.</p> <p>A unique trading partner identification code should be assigned to each vendor [and customer, through Customer/Ship to Master Maintenance (MENU ARFILE)] with whom EDI documents such as Purchase Orders or Product Activity Data (852) (PAD) documents will be exchanged. To assist in ensuring the codes are unique, it may be helpful to utilize the vendor (or customer) name or number as the Trading Partner ID or as part of the Trading Partner ID.</p> <p>By using the Trading Partner ID, inquiries can be made to determine which documents were sent to whom and the current status (e.g., has the document been received by that vendor/customer).</p> <p>Key the desired trading partner identification code. Note that values keyed in this field are not validated, so be sure text entered is keyed correctly.</p> <p>(A 15) Required/Optional</p>
EDI Purchase Orders	<p>This field is protected and defaults to N if the Allow PO's field is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Since Purchase Orders may be printed and/or sent via EDI or FAX, it is required to identify the method(s) to be used for this particular vendor.</p> <p>Key Y to indicate, for this vendor's default, that EDI should be used for Purchase Orders. A Trading Partner ID must be identified as well.</p> <p>Key N to indicate, for this vendor's default, that EDI should not be used for Purchase Orders.</p> <p style="text-align: center;">Important</p> <p style="text-align: center;">Refer to the Print Purchase Orders field description for details about PO printing options and requirements for printing POs as related to EDI.</p> <p>(A 1) Required</p>

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Hold EDI Purchase Orders	<p>If using EDI for Purchase Orders, as determined with a Y in the EDI Purchase Orders field, you must use this field to determine the default for whether an EDI PO “print” for this vendor will be available for immediate processing, or if an EDI hold will be placed on the job, which would require a manual release.</p> <p>A Y indicates, for this vendor’s default, that if a PO print is submitted to EDI for one of this vendor’s requisitions, it will go on hold until manually released through EDI. Refer to the EDI User Guide for details about releasing jobs from EDI hold.</p> <p>An N indicates, for this vendor’s default, that if a PO print is submitted to EDI for one of this vendor’s requisitions, no EDI hold will occur and EDI processing will continue normally.</p> <p>(A 1) Required</p>
Update Vendor/Item/Warehouse File with Price Catalog (832)	<p>Use this field to indicate if the Price Catalogs Warehouse Selection Screen (MENU EIMAIN - Option 1) is to be displayed when you press F15=RECEIVE or F17=RECEIVE ALL on the Pending Incoming EDI Price Catalogs Screen (MENU EIMAIN). The Price Catalogs Warehouse Selection Screen will allow you to select which warehouses will have their associated Vendor/Item/Price File updated with the new price information contained in the received Price Catalog.</p> <p>Key Y to indicate that the Price Catalogs Warehouse Selection Screen (MENU EIMAIN) is to be displayed when you press F15=RECEIVE or F17=RECEIVE ALL on the Pending Incoming EDI Price Catalogs Screen (MENU EIMAIN).</p> <p>Key N to indicate that the Price Catalogs Warehouse Selection Screen (MENU EIMAIN) will not be displayed when you press F15=RECEIVE or F17=RECEIVE ALL on the Pending Incoming EDI Price Catalogs Screen (MENU EIMAIN). This will cause no warehouse specific Vendor/Item/Price Files to be updated with the new price information contained in the received Price Catalog.</p> <p>(A 1) Required</p>
IA Vendor	<p>This field appears only if EDI is installed. If you key a Y in the Send Product Activity Data (852) field, use this field to enter the customer ID the vendor uses to identify your company. The vendor will provide this information. Distribution A+ puts whatever you key in this field in the IA Vendor No. field of the outgoing Product Activity Data (852) documents when it creates that document during Day-End Processing (MENU XAMAST).</p> <hr/> <p>NOTE: This field is not related in any way to the Distribution A+ Inventory Accounting (IA) module.</p> <hr/> <p>Key the ID number.</p> <p>(A 10) Optional</p>

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Department	<p>This field appears only if EDI is installed. If you key a Y in the Send Product Activity Data (852) field, use this field to enter the department ID for the department at the vendor's company that should receive the Product Activity Data (852) document. The vendor will provide this information. Distribution A+ puts whatever you key in this field in the Department field of the outgoing Product Activity Data (852) document when it creates that document during Day-End Processing (MENU XAMAST).</p> <p>Key the department ID.</p> <p>(A 5) Optional</p>
Send Product Activity Data (852)	<p>This field appears only if EDI is installed. Use this field to specify if you want to send Product Activity Data (852) (PAD) documents to this vendor. PAD documents notify the vendor whenever selected quantities of any items of which the vendor is a primary vendor have changed. The vendor can then submit a suggested order or ship a predetermined quantity of the item(s). For more information about the PAD document, refer to the Tools to Assist the Buyer section of the Purchasing User Guide.</p> <p>Key Y if you want to send PAD documents to this vendor.</p> <hr/> <p>NOTE: PAD documents are warehouse-specific. If you key a Y in this field, when Distribution A+ creates PAD documents for this vendor, it will not consider the quantities of any items stocked in a warehouse with an N in the Send Outgoing Product Activity Data (852) field in Warehouse Number Maintenance (MENU IAFIELD). If you have multiple warehouses and you want to create PAD documents for all items and units of measure for a vendor, you must be sure that the Send Outgoing Product Activity Data (852) field is set to Y in Warehouse Number Maintenance (MENU IAFIELD) for every warehouse that stocks that vendor's items.</p> <hr/> <p>Key N if you do not want to send PAD documents to this vendor.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
Send Product Transfer & Resale Report (867)	<p>This field appears only if EDI is installed. Use this field to specify if you want to send Product Transfer & Resale Report (867) (PTR) documents to this vendor. PTR documents notify the vendor of product movement. For more information about the PTR document, refer to the Tools to Assist the Buyer section of the Purchasing User Guide.</p> <p>Key Y if you want to send PTR documents to this vendor.</p> <p>Key N if you do not want to send PTR documents to this vendor.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
FAX Number	<p>This field displays the fax number specified on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Display</p>
Nickname	<p>This field is only used if you are using the Quadrant FastFax third party software product.</p>
	<p>NOTE: This field or the FAX Number field is required only if the FAX Purchase Orders field is Y.</p>
	<p>A unique name code should be assigned to each vendor (or customer) with whom FAX documents such as Purchase Orders will be exchanged. To assist in ensuring the codes are unique, it may be helpful to utilize the vendor (or customer) name or number as the Nickname or as part of the Nickname.</p>
	<p>By using the Nickname in your Distribution A+ files, you can limit the keying of required fax data to send documents to/from this vendor. A nickname is identified and defined for this vendor with the fax requirements in the chosen fax system's files. Once defined there, that data can be associated with this Distribution A+ vendor by simply identifying that same nickname in this field. Then, when desired, you can key this nickname in Distribution A+ and the fax file data will be pulled in and used.</p>
	<p>Key the desired Nickname. Note that values keyed in this field are not validated, so be sure text entered is keyed correctly.</p>
	<p>(A 10) Required/Optional</p>
FAX Purchase Orders	<p>This field is protected and defaults to N if the Allow PO's field is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p>
	<p>Since Purchase Orders may be printed and/or sent via EDI or FAX, it is required to identify the method(s) to be used for this particular vendor.</p>
	<p>Key Y to indicate, for this vendor's default, that FAX should be used for the "printing" of Purchase Orders. A FAX number or nickname also must be identified.</p>
	<p>Key N to indicate, for this vendor's default, that FAX should not be used for "printing" Purchase Orders.</p>
	<p>Important</p>
	<p>Refer to the Print Purchase Orders field description for details about PO printing options and requirements for printing POs as related to FAX.</p>
	<p>(A 1) Required</p>

Vendor Master Additional Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
FAX Vendor RFQ	<p>This field will only display when Fax System Options Maintenance (MENU AXMAIN) options are set to use the interface for Quadrant Fax. Also, this field is protected and defaults to N if the Allow PO's field is N on the Vendor Master Maintenance (1) Screen (p. 44-32).</p> <p>Since Vendor RFQs may be printed and/or sent via FAX, you are required to identify the method(s) to be used for this particular vendor.</p> <p>Key Y to indicate, for this vendor's default, that FAX should be used for the "printing" of Vendor RFQs. A FAX number or nickname also must be identified.</p> <p>Key N to indicate, for this vendor's default, that FAX should not be used for "printing" Vendor RFQs.</p> <p>(A 1) Required</p>
F12=Return	Press F12=RETURN to return to the previous screen.
Enter	<p>Press ENTER to confirm your entries.</p> <p>One of the following screens will appear based on the following conditions and hierarchy:</p> <ul style="list-style-type: none"> • Vendor Master Additional EDI Maintenance Screen (p. 44-72), if you have EDI installed and you keyed a Y in the Send Product Activity Data (852) field. • Vendor Master Additional EDI Maintenance - 867 Screen (p. 44-80), if Send Product Transfer & Resale Report (867) is set to Y on the Vendor Master Additional Information Maintenance Screen (p. 44-65) and if you have EDI installed and you keyed a N in the Send Product Activity Data (852) field. • Vendor Master Additional Email Maintenance Screen (p. 44-83), if Mail Server is installed. • Vendor Rebate Customer Maintenance Screen (p. 44-88), if Mail Server is not installed and you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)]. • Vendor Master Maintenance Selection Screen (p. 44-3), if Vendor Rebates are not being used, or if you did not identify the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

Vendor Master Additional EDI Maintenance Screen

```

```

This screen displays after you press the **ENTER** key on the Vendor Master Additional Information Maintenance Screen (p. 44-65), if you have EDI installed/set up and you keyed a **Y** in the **Send Product Activity Data (852)** field.

Use this screen to set up the conditions for creating and transmitting the PAD document to this vendor. Fields on this screen allow you to specify:

- how often to send the PAD document to the vendor
- how you want the vendor to respond
- how often to purge records from the Product Activity Data Header File and the Product Activity Data Detail File during Day-End Processing (MENU XAMAST)
- whether the PAD document should contain requisition numbers for the vendor to use when responding
- what changes in quantity for each item to report to the vendor
- whether Distribution A+ should consider non-stock items when deciding whether to create and transmit the PAD document

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Send Frequency (Days)	<p>Use this field to specify how often you want Distribution A+ to check item quantities in the Item Balance File and, if one or more quantities have changed, create the PAD document for this vendor.</p> <p>When you first select to use PAD documents for a vendor, Distribution A+ takes a snapshot of the quantities in the Item Balance File for each item of which the vendor is the primary vendor. The snapshot is stored in the EDI 852 Item Balance Snapshot File (EOITB). The first time you run Day-End Processing (MENU XAMAST) after the number of days in this field has passed, Distribution A+ compares the quantities in the Item Balance File for the selected items with the information in the EDI 852 Item Balance Snapshot File. If there has been a change in any one quantity for an item, Day-End Processing creates an outgoing PAD document for the vendor and stores a new snapshot of the item quantities in the EDI 852 Item Balance Snapshot File. The outgoing PAD document will use the vendor's purchasing unit of measure as defined through Vendor/Item Information (MENU POFIE). This is the unit of measure quantities will be listed in on the outgoing PAD document. If there is no purchasing unit of measure defined through Vendor/Item Information, the PAD will use the primary unit of measure as defined in the Item Master File.</p> <p>Key the number of days you want to wait before checking the quantities in the Item Balance File for this vendor.</p> <hr/> <p>NOTE: Distribution A+ checks the Item Balance File and creates the PAD document as part of Day-End Processing (MENU XAMAST). If the number of days in this field ends on a day when you do not run Day-End Processing, the PAD document will be created the first time you run Day-End Processing after that date.</p> <hr/> <p>Example: : Vendor 100 has a 5 in the Send Frequency (Days) field. The last time Distribution A+ checked the Item Balance File quantities for vendor 100 was at Day-End on Monday, March 2. The first Day-End after 5 days would be run on March 8. However, March 8 is a Sunday and your company does not run Day-End on Sundays. The quantities in the Item Balance File will not be checked for vendor 100 until you run Day-End Processing on Monday, March 9.</p> <p><i>Valid Values:</i> A number greater than zero. (N 3,0) Required</p>

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Transaction Handling Code	<p>Use this field to indicate how you want the vendor to respond to PAD documents. The information in this field is passed to the vendor in the PAD document.</p> <p>Key F if you want the vendor to plan and submit a suggested PO for these items and units of measure. You can then enter the suggested PO as a requisition through Enter or Change Requisitions (MENU POMAIN) to create the order.</p> <p>Key G if you want the vendor to create a PO and ship the items. You will then have to create a requisition through Enter or Change Requisitions (MENU POMAIN) and print the Purchase Order through Print Purchase Orders (MENU POMAIN) before you will be able to receive the items into inventory.</p> <p>Key H if the PAD document is for notification, only. Use this code if you want the vendor to be aware of the changes in item quantities, but do not want the vendor to take any action at this time. Keying an H notifies the vendor that you may be submitting a PO for some or all of these items soon.</p> <p>Key Z if you want the vendor to take some other, predetermined action. For example, you may have instructed vendor 1200 to send you a price quote upon receipt of a PAD document with a Transaction Handling Code of Z.</p> <p>(A 1) Required</p>
Purge Days	<p>Use this field to specify how often you want Distribution A+ to purge records from the Product Activity Data Header File and the Product Activity Data Detail File during Day-End Processing (MENU XAMAST).</p> <p>During Day-End Processing, Distribution A+ will purge all records for which the difference between the send date of the PAD document and the day-end date is greater than the number of days you specify here.</p> <p>Key the number of days you want used to purge PAD document records.</p> <p><i>Valid Values:</i> A number greater than zero.</p> <p>(N 3,0) Required</p>

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
No. of Pre-Assigned PO Numbers	<p>In the PAD document, you can send the vendor one or more pre-assigned requisition numbers. The vendor can then use these requisition numbers when submitting a suggested PO or shipping the items.</p> <p>If you key a number in this field, when Distribution A+ creates the PAD document for a vendor during Day-End Processing (MENU XAMAST), it will check the Order Control File for the last requisition number used, generate the specified number of requisition numbers for the vendor, and then update the last number used in the Order Control File.</p> <p>Example: : The last requisition number used in the Order Control File is 10082. The No. of Pre-Assigned PO Numbers for vendor 100 is 3. When Distribution A+ creates the PAD document for vendor 100, it will assign requisition numbers 10083, 10084, and 10085 and include those in the PAD document. Additionally, Distribution A+ will reset the last requisition number used in the Order Control File to 10085.</p>

NOTE: If you want to pre-assign requisition numbers to vendors, it is recommended that you set the **Use Requisition No. for PO No.** field to **Y** in Purchasing Options Maintenance (MENU XAFIELD).

The numbers sent to the vendor are requisition numbers. If the **Use Requisition No. for PO No.** field is set to **Y**, and you key the pre-assigned requisition number when you enter the requisition, that number will become the PO number when you print the Purchase Order.

However, if the **Use Requisition No. for PO No.** field is set to **N**, you must either key the requisition number in the **Our PO No.** field on the Requisition/Purchase Order Maintenance Header Screen in Enter or Change Requisitions (MENU POMAIN), or have the system assign the next available PO number. If you key the PO number, that number may have already been used for another PO. If you let the system assign the next available PO number, the PO number you are using will not match the number the vendor received in the PAD document and may have already entered in their files.

(N 2,0) Optional

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Send Quantities	<p>Use these fields to specify which types of quantity changes this vendor should be notified about.</p> <p>During Day-End Processing (MENU XAMAST), Distribution A+ creates the PAD document for a vendor if there has been a change in quantity for at least one item of which that vendor is the primary vendor. However, the PAD document is not sent to the vendor, unless the quantity that changed is one that is selected on this screen. Additionally, any PAD document sent to the vendor will include information for each quantity changed that you select here.</p> <p>Example: Vendor 100 has a Y in the Quantity Sold, Quantity Returned, and Quantity Available fields. Vendor 100 is the primary vendor for item A120. Since the last PAD document was created for vendor 100, you have sold 5 A120s. Because there has been a change in quantity for an item of which vendor 100 is the primary vendor, Day-End Processing (MENU XAMAST -Option 2) will create the PAD document for vendor 100. The PAD document that is created will contain Quantity Sold and Quantity Available. Because Quantity Returned has not changed, it will not be included on the PAD document. Additionally, because there has been a change to one or more of the quantities selected on this screen (i.e., Quantity Sold and Quantity Available), the PAD document will be sent to vendor 100.</p> <p>You can select to send the PAD document to this vendor whenever one or more of the following quantities have changed for an item of which the vendor is the primary vendor:</p>
Quantity Sold	<p>The quantity of this item that has been sold to customers since the last time the PAD document was created for the vendor.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Quantity Returned	<p>The quantity of this item that has been returned by customers since the last time the PAD document was created for this vendor.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
On-Hand Quantity	<p>The quantity of the item that is currently on-hand; meaning the quantity before considering items ordered by your customers or ordered from your vendors.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Maximum On-Hand Quantity	<p>The maximum quantity of the item that should remain in inventory as defined through the Item Balance File Maintenance (MENU IAFILE).</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Minimum On-Hand Quantity	<p>The minimum quantity of the item that should remain in inventory as defined through the Item Balance File Maintenance (MENU IAFILE).</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Quantity on Back Order	<p>The quantity of the item that is on backorder. This is the quantity that has been ordered by customers, but cannot be shipped.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Quantity on PO	<p>The quantity of the item that is on open purchase orders. Items on an open purchase order have been ordered through Purchasing, but not yet received.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Quantity Committed	<p>The quantity of the item that is currently committed to specific customer orders. Inventory can be committed to orders automatically as the orders are entered, or manually through Inventory Commit/Uncommit (MENU OEMAST). Depending on how you have set up your Order Entry options, the quantity committed may or may not equal the quantity allocated for an item.</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>

Vendor Master Additional EDI Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Quantity Available	<p>The quantity of the item that is available to fill customer orders. This quantity is calculated during Day-End Processing (MENU XAMAST) on the date that the PAD document is scheduled to be created for the vendor.</p> <p>If Warehouse Management is not installed, the quantity available is calculated as:</p> <p>Calculation: Qty Available = Qty On-Hand - Qty Allocated + Unposted Receipts + Special Orders</p> <p>If Warehouse Management is installed, the quantity available is calculated as:</p> <p>Calculation: Qty Available = Qty On-Hand - Qty Allocated + Unposted Receipts + Special Orders - Allocated Warehouse Transfers - Qty in Reserved Locations + Returns in Reserved Locations</p> <p><i>Default Value:</i> N.</p> <p><i>Valid Values:</i> You must key a Y for at least one of the Send Quantities.</p> <p>(A 1) Required</p>
Exclude Non-Stock Items	<p>Key Y if you do not want Distribution A+ to consider the quantities of non-stock items when determining whether to create the PAD document for this vendor. A non-stock item is an item defined with an N in the Update Inventory field through Item Master File Maintenance (MENU IAFILE).</p> <p>Key N if you do want Distribution A+ to consider the quantities of non-stock items.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>
F12=Return	<p>Press the F12=RETURN function key to cancel your entries and return to the Vendor Master Additional Information Maintenance Screen (p. 44-65).</p>
Enter	<p>Press ENTER to confirm your entries.</p> <p>One of the following screens will appear based on the following conditions and hierarchy:</p> <ul style="list-style-type: none"> • Vendor Master Additional EDI Maintenance - 867 Screen (p. 44-80), if Send Product Transfer & Resale Report (867) is set to Y. on the Vendor Master Additional Information Maintenance Screen (p. 44-65) • Vendor Rebate Customer Maintenance Screen (p. 44-88), if Mail Server is not installed and you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)]. • Vendor Master Maintenance Selection Screen (p. 44-3), if Vendor Rebates are not being used, or if you did not identify the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

Vendor Master Additional EDI Maintenance - 867 Screen

```
ADDITIONAL EDI MAINTENANCE - 867
Vendor: 200 K & M CORPORATION

867 OPTIONS:      Send Frequency:      W
                  If weekly, enter day of week:  ..
                  Purge Days:                365

F12=Return
```

This screen displays after you press the **ENTER** key on the

- Vendor Master Additional Information Maintenance Screen (p. 44-65), if you have EDI installed/set up and you keyed a **Y** in the **Send Product Transfer & Resale Report (867)** field and you keyed a **N** in the **Send Product Activity Data (852)** field.
- Vendor Master Additional EDI Maintenance Screen (p. 44-72), if you have EDI installed/set up and you keyed a **Y** in the **Send Product Transfer & Resale Report (867)** field.

Use this screen to set up the conditions for creating and transmitting the Product Transfer& Resale Report document to this vendor. Fields on this screen allow you to specify:

- how often to send the Product Transfer& Resale Report document to the vendor
- how often to purge records from the Product Transfer& Resale Report Header File and the Transfer& Resale Report Detail File during Day-End Processing (MENU XAMAST)

Vendor Master Additional EDI Maintenance -867 Screen Fields and Function Keys

Field/Function Key	Description
Send Frequency	<p>Use this field to specify how often you want Distribution A+ to capture the information and create the Product Transfer& Resale Report document for this vendor.</p> <p>Key an M for monthly frequency that will be submitted on the first day-end after the last day-end of the month with from/to dates covering the previous calendar month.</p> <p>Key a D for daily frequency (maximum of once a day) will be submitted for invoices posted the previous day.</p> <p>Key a W for weekly frequency that will be created during the first day-end on or after the day of the week selected within a from-to date range covering the seven (7) days prior to but not including the day selected.</p> <p><i>Valid Values:</i> M for monthly, W for weekly and D for daily.</p> <p>(A 1,0) Required</p>
If weekly, enter day of week	<p>Use this field to specify the day of the week that the Product Transfer& Resale Report document will be created for Send Frequency of weekly.</p> <p><i>Valid Values:</i> A number between 1 and 7.</p> <p>(N 1,0) Required</p>
Purge Days	<p>Use this field to specify how often you want Distribution A+ to purge records from the Product Transfer& Resale Header File and the Product Transfer& Resale Detail File during Day-End Processing (MENU XAMAST).</p> <p>During Day-End Processing, Distribution A+ will purge all records for which the difference between the send date of the PTR document and the day-end date is greater than the number of days you specify here.</p> <p>Key the number of days you want used to purge PTR document records.</p> <p><i>Valid Values:</i> A number greater than zero.</p> <p>(N 3,0) Required</p>
F12=Return	<p>Press F12=RETURN to cancel your entries and return to the Vendor Master Additional EDI Maintenance Screen (p. 44-72) or the Vendor Master Additional Information Maintenance Screen (p. 44-65).</p>

Enter	<p data-bbox="527 310 998 342">Press the ENTER key to save your entries.</p> <p data-bbox="527 359 1404 422">One of the following screens will appear based on the following conditions and hierarchy:</p> <ul data-bbox="527 438 1414 720" style="list-style-type: none"><li data-bbox="527 438 1414 569">• Vendor Rebate Customer Maintenance Screen (p. 44-88), if you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].<li data-bbox="527 588 1414 720">• Vendor Master Maintenance Selection Screen (p. 44-3), if Vendor Rebates are not being used, or if you did not identify the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

Vendor Rebate Customer Maintenance Screen

VENDOR REBATE CUSTOMER MAINTENANCE			
Vendor: 200	K & M CORPORATION	US Dollars	
Co	Customer	Name	Currency
1	-.....		
2		
3		
			F12=Return

NOTE: This screen displays only if you are using Vendor Rebates, and you identified the vendor as using the Accounts Receivable method of rebates [on the Vendor Master Maintenance (1) Screen (p. 44-32)].

This screen displays after pressing **ENTER** on the one of the following screens, depending on which modules are installed:

- Vendor Master Maintenance (2) Screen (p. 44-46)
- A/P Vendor Master Maintenance Screen (p. 44-48)
- Vendor Master Additional Information Maintenance Screen (p. 44-65)
- Vendor Master Additional EDI Maintenance Screen (p. 44-72)
- Vendor Master Additional Email Maintenance Screen (p. 44-83)

Use this screen to identify those customers having a rebate relationship with this vendor in which the method for rebate payment is accounts receivable, as opposed to accounts payable. The customer numbers will be used in determining the accounts affected. In other words, when rebates are generated by this vendor for these customers, these customer number will be used in A/R to ensure G/L consistency.

Vendor Rebate Customer Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Co	<p>NOTE: This field displays only if you are established in Distribution A+ through System Options Maintenance (MENU XAFILE) as multi-company.</p> <p>The companies defined in Distribution A+ for which rebates might be established will be presented. For each company presented, the customer number is to be keyed to identify with whom the vendor/customer rebate relationship exists.</p> <p>Display</p>
Customer	<p>Use this field to identify the customer number, for the specified company, with whom the rebate relationship exists. This customer number will be used in determining how A/R will be affected.</p> <p>Key the desired customer number. After keying the number and pressing ENTER, the name of the customer, as defined through Customer/Ship to Master Maintenance (MENU ARFILE) will display.</p> <p>(A 10) Optional</p>
F12=Return	<p>Press F12=RETURN to return to the previous screen.</p>
Enter	<p>Press ENTER to confirm your selections and update additions or changes made for this vendor. The Vendor Master Maintenance Selection Screen (p. 44-3) will display.</p>

Vendor ACH Information Delete Screen

```

-
      VENDOR ACH INFORMATION - DELETE
Vendor: 200      K & M CORPORATION SOA20

Receiving DFI Identification: 399302
DFI Account Number:      ABGGD-12
Individual ID Number:    200MY
Open Vouchers (APVHD):   Y
Open Invoices (APOHD):   Y
Paid Invoices (APHHD):   Y
WARNING: These Open and/or Paid files indicating a 'Y' currently contain one
or more entries marked as ACH=Y for this vendor or with this vendor as the
assignee. Any such open entries should be changed to ACH=N, since they
should not be processed as ACH payments if this ACH information is deleted.
If Check Reversals are done to re-open any of the paid entries, then those
re-opened entries should be changed too.
1020: Press F24 to confirm deletion of record

F12=Return      F24=Delete

```

This screen displays after pressing F24=DELETE on the Vendor ACH Information Maintenance Screen (p. 44-63) if there were vouchers or invoices found for this vendor (or this vendor as an assignee) that are currently flagged as ACH. This serves to warn users that ACH data should not be deleted from the vendor while vouchers or invoices are identified as expecting ACH processing and also identifies in which file(s) the ACH flagged data was found.

Vendor ACH Information Delete Screen Fields and Function Keys

Field/Function Key	Description
Vendor	This is the vendor for which you are deleting ACH information. Display
Payee	This is the payee name for those vendors that have a different payee name selected on the A/P Vendor Master Maintenance Screen (p. 44-48). If a different payee name has not been selected, this field does not appear. Display
Receiving DFI Identification	This is the Transit Routing Number currently assigned to this vendor on the Vendor ACH Information Maintenance Screen (p. 44-63). Display

Vendor ACH Information Maintenance Screen Fields and Function Keys

Field/Function Key	Description
DFI Account Number	This is the receiver's account number currently assigned to this vendor on the Vendor ACH Information Maintenance Screen (p. 44-63). Display
Individual ID Number	This is the receiver's identification number currently assigned to this vendor on the Vendor ACH Information Maintenance Screen (p. 44-63). Display
F12=Return	Press F12=RETURN to return to the Vendor ACH Information Maintenance Screen (p. 44-63) without deleting the ACH data
F24=Delete	After reviewing the warning information on the screen Press F24=DELETE to delete the existing ACH data; the A/P Vendor Master Maintenance Screen (p. 44-48), will be presented.

Vendors Listing

The screens and/or reports in this option and a brief description of their purpose are listed in the following table. A complete description of each is provided in this section.

If you are accessing Vendors Listing from **MENU APFILE**, you will be presented with the following screen and listing:

Title	Purpose
A/P Vendor Master File List Screen	Use to select the range of vendors to print on the Vendor Master File Listing for Accounts Payable (p. 44-93).

Title	Purpose
Vendor Master File Listing for Accounts Payable	Prints the contents of the Accounts Payable Vendor Master File.

If you are accessing Vendors Listing from **MENU POFILE**, you will be presented with the following screen and listings:

Title	Purpose
Vendor Master File List Screen	Use to select the range of vendors to print on the Vendor Master File Listing for Purchasing.
Vendor Master File Listing for Purchasing - for Purchasing	Prints the contents of the Vendor Master File.
Vendor EDI/FAX/EMAIL Options Listing	Prints EDI/FAX/EMAIL options for the vendors.
Vendor Special Order Options Listing	Prints the special order options defined for vendors through Vendors Maintenance (MENU POFILE).

A/P Vendor Master File List Screen

AP VENDOR MASTER FILE LIST

Vendor: _ to

Sort Word: to

Vendor AP Class? ... to? ...

Hold Code? ... to? ...

Include Full Address: .. (Y,N)

F3=Cancel

This screen displays after selecting option 11 - Vendors Listing from the A/P File Maintenance Menu (MENU APFILE). Use this screen to select the range of vendors and other criteria to print on the Vendor Master File Listing for Accounts Payable (p. 44-93).

Refer to the Cross Applications User Guide for an explanation of the rules for entering From/To Ranges.

A/P Vendor Master File List Screen Fields and Function Keys

Field/Function Key	Description
Vendor	Key the range of vendor numbers to print on the Vendor Master File Listing. (2 @ A 6) Required
Sort Word	Key the range of sort words assigned to the vendors to print. Sort words are assigned to a vendor through Vendors Maintenance on the A/P Vendor Master Maintenance Screen (p. 44-48) (MENU APFILE/MENU POFIELD). (2 @ A 10) Required
Vendor A/P Class	Key the range of Vendor A/P Classes assigned to the vendors to print. Vendor A/P Classes are assigned to a vendor through Vendors Maintenance on the A/P Vendor Master Maintenance Screen (p. 44-48) (MENU APFILE/MENU POFIELD). <i>Valid Values:</i> a vendor A/P Class defined through Vendor Class Maintenance (MENU APFILE) (2 @ A 2) Required

A/P Vendor Master File List Screen Fields and Function Keys

Field/Function Key	Description
Hold Code	Key the range of hold codes assigned to the vendors to print. Hold codes are assigned to a vendor through Vendors Maintenance on the A/P Vendor Master Maintenance Screen (p. 44-48) (MENU APFILE/MENU POFILE). <i>Valid Values:</i> an A/P hold code defined through Hold Codes Maintenance (MENU APFILE) (2 @ A 2) Required
Include Full Address	Use to determine if the vendor's full address will print on the report. Key Y to print the full address that includes four address lines, city, state/province, zip/postal code, and country code. This adds 2 print lines per vendor to the report. Key N to only print the customer name and not print the 2 lines of full address information address on the report. (A 1) Required
F3=Cancel	Press F3=CANCEL to cancel this option and return to MENU APFILE.
Enter	Press ENTER to confirm your entries. The Report Options Screen will display. The reference section for this screen is in the Appendix section of the Cross Applications User Guide.

This listing is produced following your responses on the A/P Vendor Master File List Screen (p. 44-92), and the Report Options Screen.

All vendors that match the criteria specified on the A/P Vendor Master File List Screen (p. 44-92) are printed. This listing is sequenced by vendor number. When International Currency is installed, the fields relevant to that module are also printed. Refer to the Vendors Maintenance screens for details on the specific fields of this report.

NOTE: The Vendors Listing printed from Menu POFIL and the Vendors Listing printed from Menu APFIL are different reports and list the information relevant to each specific module.

NOTE: For the **Federal Tax ID** field, the display is based on your authorization to **Allow Access to Federal Tax ID** in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.

Vendor Master File List Screen

VENDOR MASTER FILE LIST

Include Full Address: **N** (Y,N)

Vendor Number: To:

EDI/FAX/EMAIL Options Listing: **N** (Y,N)

Special Order Options Listing: **N** (Y,N)

F3=Cancel

This screen displays after selecting option **11** - Vendors Listing from the Purchasing File Maintenance Menu (MENU POFIL). Use this screen to select the range of vendors to print on the Vendor Master File Listing for Purchasing (p. 44-96). You can also select whether to print EDI, FAX and e-mail information for the selected vendors and whether to print the Vendor Special Order Options Listing.

Vendor Master File List Screen Fields and Function Keys

Field/Function Key	Description
Include Full Address	Use this field to specify if the full address for this vendor will print. Key Y to print the vendor's full address. Key N if you do not want the full address printed. (A 1) Required
Vendor Number	Select the vendors to print on the Vendor Master File Listing using the FROM/TO ranges explained in the Cross Applications User Guide. (2 @ A 6) Required

Vendor Master File List Screen Fields and Function Keys

Field/Function Key	Description
EDI/FAX/EMAIL Options Listing	<p>This field appears only if you have one or more of the following modules installed:</p> <ul style="list-style-type: none"> • Electronic Data Interchange (EDI) • FAX • Mail Server <p>Key Y to print the Vendor EDI/FAX/EMAIL Options Listing, which lists the EDI, FAX, and e-mail information that has been entered for each vendor selected. The report will print after the Vendor Master File Listing for Purchasing (p. 44-96).</p> <p>Key N if you do not want to print the Vendor EDI/FAX/EMAIL Options Listing. Only the Vendor Master File Listing for Purchasing (p. 44-96) will print.</p> <p>(A 1) Required</p>
Special Order Options Listing	<p>Use this field to specify whether or not you want the Vendor Special Order Options Listing to print along with the Vendor Master File Listing. The Vendor Special Order Options Listing prints the special order options defined for vendors through Vendors Maintenance (MENU POFILE).</p> <p>Key Y if you want the Vendor Special Order Options Listing to print. If you key Y, the listing will print based on the vendor range only; it will not take into consideration any additional selection criteria.</p> <p>Key N if you do not want the Vendor Special Order Options Listing to print.</p> <p>(A 1) Required</p>
F3=Cancel	Press F3=CANCEL to cancel this option and return to MENU POFILE.
Enter	Press ENTER to confirm your entries. The Report Options Screen will display. The reference section for this screen is in the Appendix section of the Cross Applications User Guide.

The Vendor Special Order Options Listing prints the special order options defined for vendors through Vendors Maintenance (MENU POFILE). Refer to Vendor Special Order Options Screen (p. 44-9) for a description of the fields on this report.

Vendor classes are used to distinguish different classifications of vendors for A/P. You define the type and number of vendor classifications. Vendor classes should be added prior to performing Vendors Maintenance (MENU APFILE).

NOTE: Do not confuse Vendor Classes with Vendor G/L Codes. Vendor classes are used for inquiring and reporting in A/P. Vendor G/L codes are used to update accounts in your general ledger based on the classification of a vendor. Use Vendor G/L Codes Maintenance (Option 4) to set up vendor G/L codes.

Use the Vendor Class Maintenance option on the Accounts Payable File Maintenance Menu (MENU APFILE) to add or change vendor classes. You can print a list of defined classes using the Vendor Class Listing option.

Vendor Class Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Vendor Class Maintenance Selection Screen	Use to specify the business unit code to maintain.
Vendor Class Maintenance Screen	Use to provide a description for the code.

Vendor Class Maintenance Selection Screen

```

VENDOR AP CLASS FILE MAINTENANCE

Function:      -   (A,C)

Vendor AP Class? ...

F3=Exit
  
```

This screen appears selecting option 2 - Vendor Class Maintenance option from the Accounts Payable File Maintenance Menu (MENU APFILE). Use this screen to add or change a vendor class code.

Vendor Class Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Function	<p>The function to perform for a vendor class.</p> <p>Key A to add a new vendor class. You will be able to assign this classification to a group of vendors and sort by this classification for the vendor inquiry.</p> <p>Key C to change the description of an existing vendor class.</p> <p>(A 1) Required</p>
Vendor A/P Class	<p>The two-character vendor class code. This code represents the vendor class being added or changed through this option. This classification may be assigned to a vendor through Vendors Maintenance (MENU APFILE) to be used in the vendor performance inquiry.</p> <p>(A 2) Required</p>
F3=Exit	<p>Press the F3=EXIT function key to exit the option and return to the menu.</p>
Enter	<p>Press the ENTER key to confirm your selections. The Vendor Class Maintenance Screen (p. 45-3) will appear.</p>

Vendor Class Maintenance Screen

```

VENDOR AP CLASS FILE MAINTENANCE
Change

Vendor AP Class: 10

Description:  General Business.....

F12=Return

```

This screen appears after pressing **ENTER** on the Vendor Class Maintenance Selection Screen (p. 45-2). Use this screen to enter or change the description of the Vendor A/P Class selected on the previous screen.

Vendor A/P Class Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Description	Key the description of the vendor class. (A 30) Required
F12=Return	Press the F12=RETURN function key to exit from this screen and return to the previous screen without saving any changes. The Vendor Class Maintenance Selection Screen (p. 45-2) will appear.
Enter	Press the ENTER key to confirm your selection. The Vendor Class Maintenance Selection Screen (p. 45-2) will appear.

Vendor Class Listing

This option prints the Vendor Class Code List (p. 45-4). This listing shows the contents of the Vendor Class File, which is maintained through Vendor Class Maintenance (MENU APFILE). The Report Options Screen appears when you select this option.

Vendor Class Code List

AP825	09/22/11	20.57.14	VENDOR CLASS CODE LIST		AM/APDEMO	PAGE	1
Vendor Class Code			Description				
-----			-----				
	IN		International Vendors				
	MF		Manufacturing Vendors				
	TR		Warehouse Transfer Vendors				
	UT		Utilities Vendors				

This listing prints vendor class codes and their corresponding descriptions that have been defined through Vendor Class Maintenance (MENU APFILE). The vendor class codes are used to distinguish different classifications of vendors.

Voucher Hold Codes are used to prohibit payment of a voucher until the hold code has been removed. A voucher which is held with a Voucher Hold Code may be posted, but may not be paid. Use the Hold Codes Maintenance option to add or change Voucher Hold Codes. Use the Hold Codes Listing option to print a list of defined Voucher Hold Codes.

Hold Codes Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Hold Code Maintenance Selection Screen	Use to specify the business unit code to maintain.
Hold Code Maintenance Screen	Use to provide a description for the code.

Hold Code Maintenance Selection Screen

HOLD CODE MAINTENANCE

Function: - (A,C)

Hold Code? ...

F3=Exit

This screen appears after selecting option **3** - Hold Codes Maintenance from the Accounts Payable File Maintenance Menu (MENU APFILE). Use this screen to add or change an Accounts Payable Hold Code.

Hold Code Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Function	<p>Key A to add a new Voucher Hold Code. You will be able to use this code to prevent a voucher from being paid.</p> <p>Key C to change the description of an existing Voucher Hold Code.</p> <p>(A 1) Required</p>
Hold Code	<p>Use this field to enter a two-character Hold Code. This is the code you are adding or changing through this option. This code may be keyed through Voucher Entry (MENU APMAIN) to prevent a voucher from being paid.</p> <p>(A 2) Required</p>
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
Enter	Press the ENTER key to confirm your selections. The Hold Code Maintenance Screen (p. 46-3) will appear.

Hold Code Maintenance Screen

```

HOLD CODE MAINTENANCE                                     CHANGE

Description:    Voucher, Variance Hold .....
F12=Return
  
```

This screen appears after you press **ENTER** from the Hold Code Maintenance Selection Screen (p. 46-2). Use this screen to enter or change the description of the hold code selected on the previous screen.

Hold Code Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Description	Enter a new description, or change an existing one, for the Voucher Hold Code. (A 30) Required
F12=Return	Press the F12=RETURN function key to exit from this screen and return to the previous screen without saving any changes.
Enter	Press the ENTER key to confirm your selections. The Hold Code Maintenance Selection Screen (p. 46-2) will appear.

Hold Codes Listing

This option prints the Hold Code List (p. 46-4). This listing shows the contents of the Hold Code File, which is maintained through Hold Codes Maintenance (MENU APFILE). The Report Options Screen appears when you select this option.

Hold Code List

AP815	09/22/11	20.26.50	HOLD CODE LIST		AM/APDEMO	PAGE	1
			Hold Code	Description			
			AP	Voucher Variance Hold			
			D	Damaged			
			OB	Over Billed			

This listing prints all hold codes and their corresponding descriptions as defined through Hold Codes Maintenance (MENU APFILE). Hold codes are used to prevent certain vouchers from being selected for payment.

Vendor GL codes are defined through the Vendor GL Codes Maintenance option found on the GL Accounts Transfer Menu (MENU GLXFER) or on the Accounts Payable File Maintenance Menu (MENU APFILE). Use this option to define the vendor GL codes used for selecting A/P liability or expense accounts. Vendor GL codes are used to determine to which account a transaction is posted based on the classification of the vendor. Refer to the General Ledger Interface Glossary section of the General Ledger Interface User Guide for more information.

You must enter valid vendor GL codes if you answered **Y** to **Use Vendor GL Codes** for any type of account when setting up transfer options through GL Transfer Definition (MENU GLXFER). Otherwise, it is not necessary to run this option. Vendor GL codes will not be used.

Vendor GL Codes Maintenance

For an explanation of the Vendor GL Codes Maintenance and Listing options, refer to the General Ledger Interface User Guide.

Business unit codes (keyed during voucher entry) may be used to determine to which account a transaction is posted. You must enter valid business unit codes if you have answered **Y** to **Use Business Units** for any type of account when setting up transfer options (Function T). Otherwise, it is not necessary to run this option. Business unit codes will not be used.

Use the Business Units Maintenance option on the GL Accounts Transfer Menu (MENU GLXFER) or on the Accounts Payable File Maintenance Menu (MENU APFILE) to define the business unit codes used for selecting A/P liability or expense accounts. To print a list of defined business units, use the Business Units Listing option (MENU APFILE). Refer to the General Ledger Interface Glossary section of the General Ledger Interface User Guide for more information.

Business Units Maintenance

For an explanation of the Business Units Maintenance and Listing options, refer to the General Ledger Interface User Guide.

The Accounts Payable Maintenance option allows you to set up or maintain tailoring options for Accounts Payable. Two types of options must be setup: system-level and company-level.

System-level options pertain to all companies using Accounts Payable.

Company-level options define default values for an individual company. You can also create bank accounts through the company-level options if they have not already been defined.

NOTE: You should run this option as part of the initial setup of Accounts Payable; it should be one of the first options selected when setting up the module.

Accounts Payable Options Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
A/P Options Maintenance Selection Screen	Use to specify whether you want to maintain system-level or company-level options.
A/P Options Maintenance Default Values Screen	Use to set system-level default values.
A/P Company Options Maintenance Screen 1	Use to set company-level default values.
A/P Company Options Maintenance Screen 2	Use to set company-level processing options.

A/P Options Maintenance Selection Screen

A/P OPTIONS MAINTENANCE

Company Number? _ . 00 for system options
 01-99 for company options

F3=Exit

This screen appears after selecting option 1 - Accounts Payable Options Maintenance from the Accounts Payable File Maintenance 2 Menu (MENU APFIL2). Use this screen to determine if system-wide or company options are being created or maintained.

A/P Options Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Company Number	This field determines the type of options you are creating or maintaining. Key 00 to create or maintain system-wide options. Key a valid company number (01-99) to create or maintain company options. (N 2,0) Required
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
Enter	Press the ENTER key to confirm your selection. The A/P Options Maintenance Default Values Screen (p. 49-3) will appear if 00 was keyed for system-wide options. The A/P Company Options Maintenance Screen 1 (p. 49-6) will appear if you keyed a company number.

A/P Options Maintenance Default Values Screen

A/P OPTIONS MAINTENANCE	
Voucher Number Assignment: S=System, U=User	S (S/U)
Do you want to use User Security:	Y (Y/N)
Do you want to use Program Security:	Y (Y/N)
One time Vendor number:	999...
Calculate GST for Purchases (Inputs):	N (Y/N)
F3=Exit F12=Previous	

This screen appears after you press **ENTER** on the A/P Options Maintenance Selection Screen (p. 49-2), if you selected to maintain the system-level options (00). Use this screen to default values for the Accounts Payable module.

A/P Options Maintenance Default Values Screen Fields and Function Keys

Field/Function Key	Description
Voucher Number Assignment	<p>Used to specify how voucher numbers are assigned for Voucher Entry (MENU APMAIN). You may individually assign voucher numbers each time a voucher is entered (user assigned), or the system can assign sequential voucher numbers (system assigned).</p> <hr/> <p>NOTE: This field is protected and cannot be changed once there are open invoices in Accounts Payable.</p> <hr/> <p>Key U to have the user assign voucher numbers. This means that each time a voucher is created through Voucher Entry (MENU APMAIN), a unique voucher number must be provided by the user.</p> <p>Key S to have the system assign voucher numbers. This means that each time a voucher is keyed, the user leaves the voucher number field blank and the system assigns the next sequential voucher number.</p> <p>(A 1) Required</p>

A/P Options Maintenance Default Values Screen Fields and Function Keys

Field/Function Key	Description
Do you want to use User Security	<p>This option is used to determine if user security is to be activated in A/P. User security permits only specified users to access A/P.</p> <p>User security is optional, but is required in order to use any other Security.</p> <p>Key Y to activate security. If security is activated, only users who have been set up in Security Maintenance (MENU APFIL2) are allowed to execute A/P programs.</p> <p>When security is activated, you may activate any of the following types of security:</p> <ul style="list-style-type: none"> • Company Number • Password Security • Program Security • User Group Security (for G/L Accounts) • Account Access Level Security (for G/L Accounts) • Restricted Transaction Entry <p>Key N if you do not want to activate security.</p> <p>Refer to Security Maintenance (MENU GLFIL2) in the General Ledger manual for more information about setting up user security.</p> <p>(A 1) Required</p>
Do you want to use Program Security	<p>This option is used to determine if Program Security is to be activated in A/P.</p> <p>Key Y to activate Program Security. You must then use System Options Maintenance (MENU APFIL2) to allow or deny specific users access to certain menu options.</p> <p>Key N to de-activate Program Security.</p> <p><i>Default Value:</i> N</p> <p>(A 1) Required</p>

A/P Options Maintenance Default Values Screen Fields and Function Keys

Field/Function Key	Description
One time Vendor Number	<p>NOTE: Once you enter a value in this field, you will not be able to change it.</p> <p>The vendor number for miscellaneous purchases from vendors not defined in your vendor file. The vendor number must be a valid vendor number in the Vendor Master File.</p> <p>Key the six-character vendor number which is to be used exclusively for one time vendors.</p> <p>NOTE: When you enter vouchers for this vendor, the Sep Check field on the A/P Vendor Master Maintenance Screen will default to Y. You will not be able to change this field on the Voucher Header Screen or on the Voucher Selection Change Screen in Payment Selection Maintenance (MENU APCHCK).</p> <p>(A 6) Required</p>
Calculate GST for Purchases (Inputs)	<p>This field appears only if the Use GST/PST Taxing field is set to Y through System Options Maintenance (MENU XAFILE).</p> <p>Key Y in this field if you want Distribution A+ to calculate GST for purchases during miscellaneous voucher entry and receipt validation for vendors with a GST tax body. If you key Y, you must specify credited and non-credited purchase tax accounts through General Ledger Transfer Definition (MENU GLXFER). If purchase tax accounts are not specified, Day-End Processing (MENU XAMAST) and Voucher Entry (MENU APMAN) will not run.</p> <p>Key N if you do not want Distribution A+ to calculate GST for purchases.</p> <p><i>Default Value: N</i></p> <p>(A 1) Required</p>
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
F12=Previous	Press the F12=PREVIOUS function key to return to the A/P Options Maintenance Selection Screen (p. 49-2) without saving your changes.
Enter	Press the ENTER key to confirm your selections. The A/P Options Maintenance Selection Screen (p. 49-2) will appear.

A/P Company Options Maintenance Screen 1

```

A/P COMPANY OPTIONS MAINTENANCE
01 - A & C Office Supply

Due date Calculation: I=Invoice, E=Entry  I  (I/E)
Payee Name/Address overrides:             Y, (Y/N)
Use Assignees:                            Y, (Y/N)
Default Bank Account:                     CHK-32100.
1099 Print Format:                         C, (C/L)
Default 1099 Amount Cde?                  07.

F3=Exit  F4=Bank Accts  F12=Previous
    
```

This screen appears after you press **ENTER** on the A/P Options Maintenance Selection Screen (p. 49-2), if you specified a company number. Use this screen to define default options for that company.

You may also use this screen to establish and maintain your bank accounts, if you have not already done so through Accounts Receivable Options Maintenance (MENU XAFILE). An unlimited number of bank accounts may be established. Refer to the description of the **F4=BANK ACCTS** function key.

A/P Company Options Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Due Date Calculation	<p>Use this field to enter the date for calculating the payment due date. The payment due date may be calculated as the number of payment days from the date the invoice was issued, or the number of payment days from the date the voucher is keyed. The number of payment days is extracted from the vendor file.</p> <p>Key I to calculate the payment due date as the number of days from the invoice date.</p> <p>Key E to calculate the payment due date as the number of days from the voucher entry date.</p> <p>(A 1) Required</p>

A/P Company Options Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Payee Name/Address overrides	<p>Use this field to determine if the default name and address of the vendor's payee may be overridden during Voucher Entry (MENU APMAIN).</p> <p>If you have both Purchasing and Accounts Payable, vendors can have different PO and Payee Name/Address information.</p> <p>Key Y if the default name and address of the payee may be overridden during Voucher Entry (MENU APMAIN).</p> <p>Key N if the default name and address of the payee may not be overridden during Voucher Entry (MENU APMAIN).</p> <p>(A 1) Required</p>
Use Assignees	<p>Use this field to determine if an assignee may be assigned to a vendor. An assignee is a vendor (other than the vendor who is purchasing) who receives payment for the original vendor. Assignees are defined in Vendors Maintenance (MENU APFILE) and may be keyed during Voucher Entry (MENU APMIAN).</p> <p>Key Y if you allow assignees to be assigned to vendors. Payments may be made to the original vendor, or to another vendor who receives payment for the original vendor.</p> <p>Key N if you do not want assignees to be assigned to vendors. Payments may be made to the vendor only.</p> <p>(A 1) Required</p>
Default Bank Account	<p>This field represents the bank account that will be used as the default when performing bank account selection throughout Distribution A+.</p> <p>Key the desired bank account for this company.</p> <p>Press F4=BANK ACCTS to display a list of existing bank accounts from which you may select an account to be used as the default.</p> <hr/> <p>NOTE: In addition to entering a default bank account in this field, you may also enter one in A/R Options Maintenance (MENU XAFILE). The default entered may be different. When performing A/P bank account selection, the default entered in this field will be used. When performing A/R bank account selection, the default entered in A/R Options Maintenance will be used. Therefore, you may set up two different defaults per company.</p> <hr/> <p><i>Valid Values:</i> An existing bank account previously defined through this option or A/R Options Maintenance (MENU XAFILE)</p> <p>(A 10) Required</p>

A/P Company Options Maintenance Screen Fields and Function Keys

Field/Function Key	Description
1099 Print Format	<p>You have the option to print 1099 IRS forms on Continuous feed printers (one form per sheet) or optionally on Laser/Inkjet printers, using pre- printed standard 1099 pages that contain two (MISC) or three (NEC) forms per sheet. Use this field to determine what format the 1099 IRS forms will be printed in.</p> <p>Key C to select the Continuous print format: landscape mode, one 1099 form per page).</p> <p>Key L to select the Laser/Inkjet print format: portrait mode, 8.5 by 11 paper, with two 1099-MISC forms per page (on pre-printed, standard 1099-MISC forms, 2-Up) and three 1099-NEC forms per page (on pre-printed, standard 1099-NEC forms, 3-Up).</p> <p><i>Default Value:</i> C</p> <p>(A 1) Required</p>
Default 1099 Amount Cde	<p>This field defines the default IRS 1099 code to be used for this company's vouchers if the vendor on the voucher doesn't have a default. The 1099 code represents one of the IRS 1099 amount types available for use on the 1099-MISC and 1099-NEC forms.</p> <p>If a vendor doesn't have a default 1099 code assigned, then vouchers created for that vendor in this company will use this company default; if no vendor and no company default is defined, then the voucher's code will default to blank (although it can be overridden on the voucher). A blank 1099 code on a voucher will assume the code representing Nonemployee Compensation.</p> <p>The code on the voucher, if any, is consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. If the code representing Nonemployee Compensation is used for a voucher, that voucher's value will be included on the 1099-NEC form; if the code representing any other amount type is used for a voucher, that voucher's value will be included on the 1099-MISC form. If a voucher has a blank 1099 code, the code representing Nonemployee Compensation will be assumed.</p> <p>Key the 1099 code representing the applicable IRS 1099 amount type to be used as a default for this company's vouchers. A question mark list provides the available codes and their associated IRS 1099 amount types.</p> <p><i>Default Value:</i> 7 (for nonemployee compensation).</p> <p><i>Valid Values:</i> Blank, or one of the values in the Order Control File (ORCTL) representing the valid IRS 1099 amount types (these values are presented when you key a ? in this field)</p> <p>(N 2,0) Optional</p>

A/P Company Options Maintenance Screen Fields and Function Keys

Field/Function Key	Description
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
F4=Bank Accts	Press the F4=BANK ACCTS function key to display a list of existing bank accounts from which you may select an account or add a new one. The Bank Accounts List Screen (p. 9-13) will appear, if accounts have previously been defined for this company. The A/P Company Options Maintenance Screen 2 (p. 49-10) will appear, if no accounts have been defined for this company.
F12=Previous	Press the F12=PREVIOUS function key to return to the A/P Options Maintenance Selection Screen (p. 49-2) without saving your changes.
Enter	Press the ENTER key to confirm your selections. The A/P Company Options Maintenance Screen 2 (p. 49-10) will appear.

A/P Company Options Maintenance Screen 2

```

A/P COMPANY OPTIONS MAINTENANCE
01 - A & C Office Supply

Age paid invoices based on
invoice date or due date:      - (I/D)

Inquiry aging option:          1 1=current date - invoice date
                                2=current date - due date
                                3=due date - current date

Aging Days:                    .30
                                .60
                                .90
Example:
For 0-30 enter 30
31-60 enter 60
61-90 enter 90

Voucher edit list in detail or summary:  D. (D/S)
Check for duplicate invoices:            N. (N/I/D/B)
Post Held Vouchers:                      Y. (Y/N)

F3=Exit    F12=Previous
    
```

This screen appears after you press **ENTER** on the A/P Company Options Maintenance Screen 1 (p. 49-6). Use this screen to maintain additional accounts payable options for the selected company.

Age paid invoiced based on invoice date or due date

Example: Have invoice date of January 30 with due date of February 19.

Using invoice date: Invoice Date Jan 30; Paid Date Feb 4; shows 5 days

Using due date: Due Date Feb 19; Paid Date Feb 4; shows -15 days

Inquiry Aging Option

Example: Have invoice date of January 30 with due date of February 19.

Using 1: current date 2/17 - invoice date 1/30 = 18 days old

Using 2: current date 2/17 - due date 2/19 = -2 days past due

Using 3: due date 2/19 - current date 2/17 = 2 days until due

A/P Company Options Maintenance Screen 2 Fields and Function Keys

Field/Function Key	Description
Age paid invoices based on invoice date or due date	<p>To determine the type of aging to use for paid invoices in the A/P System.</p> <p>Key I to age paid invoices on the invoice date. Aging on the Invoice Date establishes that the number of days to pay an invoice is reported as the number of days from the invoice date through the payment date.</p> <p>Key D to age paid invoices on the due date. Aging on the Due Date indicates that the number of days to pay an invoice is reported as the number of days from the due date through the payment date.</p> <p><i>Default Value:</i> I</p> <p>(A 1) Required</p>
Inquiry aging option	<p>To determine how aging is reported for open invoices in the Accounts Payable Inquiry (MENU APMAIN) and on the open payables reports (printed through MENU APREPT).</p> <p>Key 1 to calculate the number of days open as the difference in days between the current date and the invoice date. This Aging Option indicates “how old” an invoice is.</p> <p>Key 2 to calculate the number of days open as the difference in days between the current date and the due date. This Aging Option indicates how many days “past due” an invoice is.</p> <p>Key 3 to calculate the number of days open as the difference in days between the due date and the current date. This Aging Option is useful if you typically pay your invoices on time or ahead of time. It indicates how many days before the invoice becomes due.</p> <p><i>Default Value:</i> 1</p> <p>(N 1,0) Required</p>

A/P Company Options Maintenance Screen 2 Fields and Function Keys

Field/Function Key	Description
Aging Days	<p>This field allows you to determine the number of days for each aging period, for up to four periods. Three input fields allow you to enter three values. Each field represents the number of days for the current date in which the aging periods end.</p> <p>In the first field, key the number of days from the current date from which the first period ends.</p> <p>In the second field, key the number of days from the current date from which the second aging period ends. Here the second aging period is from the day after the value keyed in the first field through the value in the second field.</p> <p>In the third field, key the number of days from the current date from which the third aging period ends. Here the third aging period is from the day after the value keyed in the second field through the value keyed in the third field; and the fourth aging period is any number of days after the value keyed in this field. For example, if you wanted to create monthly aging buckets, you would key 30 in the first input field, 60 in the second input field, and 90 in the third input field. The following four aging periods are established: 0-30 days (period 1), 31-60 days (period 2), 61-90 days (period 3), and over 90 days (period 4).</p> <p><i>Default Value:</i> 30, 60, 90</p> <p><i>Valid Values:</i> 001 through 999. The value of the first field must be less than the second field and the value of the second field less than the third field.</p> <p>(3 @ N 3,0) Required</p>
Voucher edit list in detail or summary	<p>Use this field to determine the default value when printing the Voucher Edit List (MENU APMAIN), and posting vouchers through Post Vouchers (MENU APMAIN). You will be able to override the default through Voucher Edit List, but not through Post Vouchers.</p> <p>Key D to print the Voucher Edit List in detail. Detail voucher transactions for each voucher are printed.</p> <p>Key S to print the Voucher Edit List in summary. A summary of each voucher keyed in the voucher group is printed.</p> <p><i>Default Value:</i> D</p> <p>(A 1) Required</p>

A/P Company Options Maintenance Screen 2 Fields and Function Keys

Field/Function Key	Description
Check for duplicate invoices	<p>Use this field to control whether the system checks for duplicate invoices when vouchers are added or maintained or when open payables are maintained in Accounts Payable.</p> <p>Key N to disable the check for duplicate invoices. If you key an N, you can run the Duplicate Invoice Report through Voucher Edit List (MENU APMAIN) to identify duplicate invoices.</p> <p>Key I to check for duplicate invoices using vendor and invoice number.</p> <p>Key D to check for duplicate invoices using vendor, invoice date, and invoice amount.</p> <p>Key B to check for duplicate invoices using the criteria of I and D.</p> <p>If the value in this field is I, D, or B, then the system will check for duplicate invoices in the Voucher Header File, the Open Payables File, and the History Payables File when you enter or maintain a voucher. This check functions in the following options:</p> <ul style="list-style-type: none"> • Voucher Entry (MENU APMAIN) • Create Vouchers From Templates (MENU APMAIN) • Open Payables Maintenance (MENU APMAIN) <p>Invoices with a split terms code will only be checked when the invoice number or date is changed in Open Payables Maintenance (MENU APMAIN).</p> <p>If a duplicate invoice is found a warning message will appear with information about the location of the duplicate.</p> <p><i>Default Value:</i> N (A 1) Required</p>
Post Held Vouchers	<p>Key Y to post held vouchers to the open payable files (the open payable will be on hold).</p> <p>Key N to post only the vouchers not containing hold codes.</p> <p>(A 1) Required</p>
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
F12=Previous	Press the F12=PREVIOUS function key to leave this screen and return to the A/P Company Options Maintenance Screen 1 (p. 49-6) without saving any changes.
Enter	Press the ENTER key to confirm your selections. You will be prompted to press ENTER again to verify your selections. The A/P Options Maintenance Selection Screen (p. 49-2) will appear.

The Company Name Maintenance option is used to create company names and specify the company settings. For a description of this option, refer to Maintaining Company Names in the Cross Applications User Guide.

Before bank accounts may be defined in Distribution A+, you must first set up the banks or financial institutions that will be used by a Distribution A+ company. Use the Bank Names Maintenance option to provide a uniform definition of banks for a bank account. Use the Bank Names Listing option to print the bank IDs defined and maintained through Bank Names Maintenance (MENU APFIL2).

Bank Names Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Name Maintenance Selection Screen	Use to specify a bank ID.
Bank Name Maintenance Screen	Use to provide a name for the ID.

Bank Name Maintenance Selection Screen

```

      BANK NAME MAINTENANCE

      Function:  -   (A,C,D)
      Bank Id?  .....

                                     F3=Exit
  
```

This screen appears after selecting option 4 - Bank Names Maintenance from the Accounts Payable File Maintenance 2 Menu (MENU APFIL2). Use this screen to specify the bank ID you want to add, change or delete.

Bank Name Maintenance Selection Screen Fields and Function Keys

Field/Function Key	Description
Function	Key A to add a bank ID. Key C to change an existing bank ID's description. Key D to delete an existing bank ID. (A 1) Required
Bank ID	Use this field to specify the bank ID to add, change or delete. (A 5) Required
F3=Exit	Press the F3=EXIT function key to exit the option and return to the menu.
Enter	Press the ENTER key to confirm your selections. The Bank Name Maintenance Screen (p. 51-3) will appear.

Bank Name Maintenance Screen

BANK NAME MAINTENANCE Change

Bank Id: BKAME

Name: Bank of America .: Rhode Island

F12=Return

This screen appears after you press **ENTER** on the Bank Name Maintenance Selection Screen (p. 51-2). Use this screen to specify the name of bank to be associated with the bank ID. You may also use this screen to change the description of an existing bank name or delete the current bank name record.

Bank Name Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Name	Use this field to specify the name of the bank you are defining. (A 30) Required
F12=Return	Press the F12=RETURN function key to return to the Bank Name Maintenance Selection Screen (p. 51-2) without updating this screen.
F24=Delete	The F24=DELETE function key appears only if you are deleting a bank ID. Press the F24=DELETE function key to delete the bank name record currently displayed. You will need to press the F24=DELETE function key a second time to confirm deletion.
Enter	Press the ENTER key to confirm your entries. The Bank Name Maintenance Selection Screen (p. 51-2) will appear.

Bank Names Listing

Use the Bank Names Listing option to print the Bank Name Listing (p. 51-5). This listing shows the bank IDs defined and maintained through Bank Names Maintenance. The Report Options Screen appears when you select this option.

Bank Name Listing

XA805	09/22/11	19:35:49	BANK NAME LISTING	AM/APDEMO	PAGE	1
Bank Id	Bank Name					
BKAME	Bank of America - Rhode Island					
DFBNK	Default Bank Account Names					
DNB	Dallas National Bank					
DOMST	Domestic					
FCS	First Chicago Savings					
INTNL	International Bank Accounts					
ONTAR	Provincial Bank of Ontario					
UNNAT	United National Bank					
WCNB	West Coast National Bank					

This listing prints after entering responses on the Report Options Screen (refer to the Cross Applications User Guide for details about this screen). The Report Options Screen appears after selecting the Bank Names Listing option.

This listing prints bank IDs defined and maintained through Bank Names Maintenance. Refer to the Bank Name Maintenance Screen (p. 51-3) for an explanation of the fields on this listing.

The Bank Accounts Maintenance option allows you to create and maintain bank account information that is used in Accounts Payable and Accounts Receivable. This option is accessed from Accounts Payable Options Maintenance (MENU APFIL2) and Accounts Receivable Options Maintenance (MENU XAFIL2) to allow you to create bank accounts and then establish those accounts as the default values for those modules.

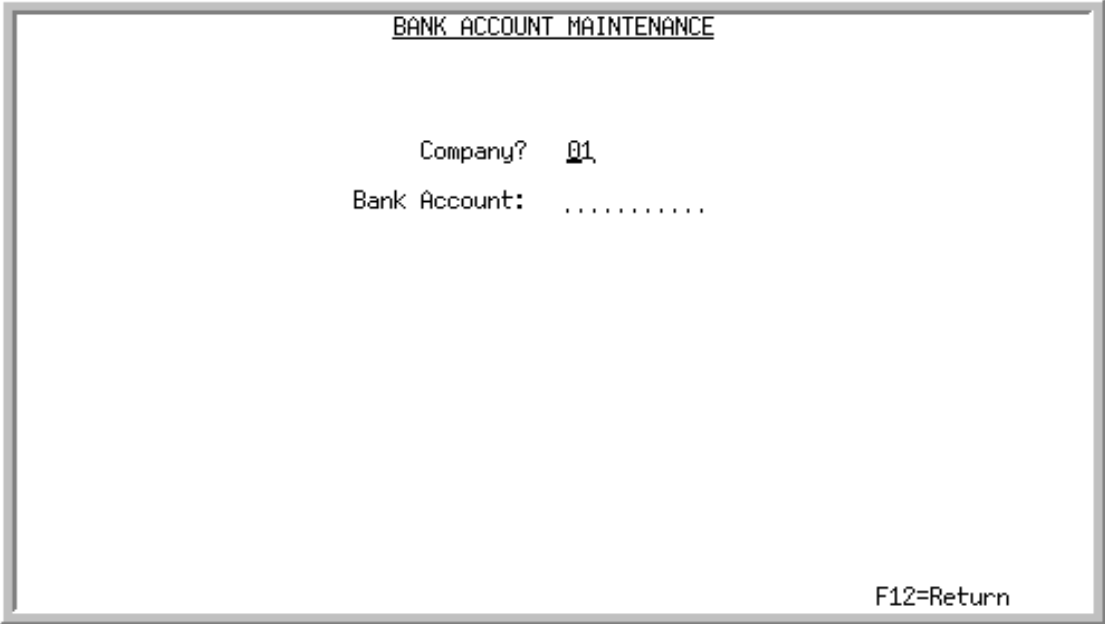

Bank Account Maintenance

The screens and/or reports in this option and a brief description of their purpose are listed in the following table. A complete description of each is provided in this section.

Title	Purpose
Bank Accounts List Screen	Use to review the existing bank accounts and select one for additional use. Refer to CHAPTER 9: <i>Maintaining Bank Account Transactions</i> for the Bank Accounts List Screen.
Bank Account Maintenance Screen 1	Use to add a new bank account number.
Bank Account Maintenance Screen 2	Use to complete the required information to create or maintain a bank account.
ACH File Template Maintenance Screen	Use to specify the location where the generated ACH file will be placed at the root of the IFS.
ACH File Header Record Layout - Field Value View Screen, or ACH File Header Record Layout - Field Formatting View Screen	Use to define the fields that will be used for each Header output record in the text file.
ACH File Field Values Screen	Use to display a list of available field values you can select from.

Title	Purpose
ACH Batch Header Record Layout - Field Value View Screen, or ACH Batch Header Record Layout - Field Formatting View Screen	Use this screen to define the fields that will be used for each Batch Header output record in the text file.
ACH Entry Detail Record Layout - Field Value View Screen, or ACH Entry Detail Record Layout - Field Formatting View Screen	Use this screen to define the fields that will be used for each Detail output record in the text file.
ACH Batch Control Record Layout - Field Value View Screen, or ACH Batch Control Record Layout - Field Formatting View Screen	Use this screen to define the fields that will be used for each Batch Control output record in the text file.
ACH File Control Record Layout - Field Value View Screen, or ACH File Control Record Layout - Field Formatting View Screen	Use this screen to define the fields that will be used for each File Control output record in the text file.

Bank Account Maintenance Screen 1

This screen displays by pressing F5=ADD on the Bank Accounts List Screen (p. 9-13). Use this screen in Bank Account Maintenance to add a new bank account. Once added, the Bank Accounts List Screen (p. 9-13) will be updated to reflect the new account.

Bank Account Maintenance Screen 1 Fields and Function Keys

Field/Function Keys	Description
Company	The selected company for which A/P options are being defined. This is the company that will be associated with the new bank account your are setting up. Display
Bank Account	Use this field to select the bank account you want to add. Key the appropriate bank account. An unlimited number of accounts is allowed. (A 10) Required
F12=Return	Press F12=RETURN to return to the Bank Accounts List Screen (p. 9-13) without updating this screen.
Enter	After keying a bank account, press ENTER to confirm your selection. The Bank Account Maintenance Screen 2 (p. 52-4) will display.

Bank Account Maintenance Screen 2

Field/Function Keys	Description
Account Type	<p>This is the type of bank account you are adding or maintaining.</p> <p>Key C to define a checking account.</p> <p>Key S to define a savings account.</p> <p>Key L to define a line of credit account.</p> <p>Key O to display all other types of accounts, excluding checking, savings, and line of credit accounts.</p> <p>Key T to define a credit card transfer account to be used for credit card payment processing.</p> <p>(A 1) Required</p>
Bank ID	<p>This is the bank ID of the name of the bank for which you are adding or maintaining this bank account.</p> <p>Key the appropriate bank ID.</p> <p><i>Valid Values:</i> Any bank name defined through Bank Names Maintenance (MENU APFIL2)</p> <p>(A 5) Required</p>
Allow Checks	<p>This field indicates if checks will be allowed to be used for this bank account.</p> <p>Key Y to allow checks for this account.</p> <hr/> <p>NOTE: Since ACH processing and credit card processing of payments uses Check Processing, this field should be Y for those types of accounts.</p> <hr/> <p>Key N to prohibit the use of checks.</p> <hr/> <p>NOTE: If this field is N, then this bank account CANNOT be selected in a check run.</p> <hr/> <p>(A 1) Required</p>

Bank Account Maintenance Screen 2 Fields and Function Keys

Field/Function Keys	Description
Currency Code	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify the code for the type of currency contained in the selected bank account, if it differs from the company's local currency for the company.</p> <p>Key the currency code of the foreign currency contained in the account.</p> <p>Leave this field blank if the account contains the company's local currency.</p> <hr/> <p>NOTE: Once the selected bank account is activated, this field will be protected and cannot be changed.</p> <hr/> <p><i>Default Value:</i> If this field is left blank, the default value will be the company's default local currency.</p> <p><i>Valid Values:</i> A valid currency code defined through Currency/Exchange Codes Maintenance (MENU ICFILE) other than the company's local currency.</p> <p>(A 3) Optional</p>
Exchange Code	<p>This field only displays when International Currency is installed.</p> <p>Use this field to specify the exchange code that will be utilized by Distribution A+ to determine the exchange rate for the account's currency when performing revaluations and posting transactions.</p> <p>Key the appropriate exchange code.</p> <p>Leave this field blank if you are not using exchange codes, or for bank accounts containing the company's local currency.</p> <hr/> <p>NOTE: Once the selected bank account is activated, this field will be protected and cannot be changed.</p> <hr/> <p><i>Valid Values:</i> A valid exchange code defined through Currency/Exchange Codes Maintenance (MENU ICFILE).</p> <p>(A 3) Blank/Required</p>
Check's Currency Desc	<p>This field only displays when International Currency is installed.</p> <p>Use this field to key a description to be associated with the account's currency. This description will print on the check(s) next to the check amount when this bank account is selected during check processing.</p> <p>Key a description of up to 15 characters.</p> <p>Example:</p> <p>If the description you enter in this field is U.S. Dollars and the check amount is \$100.00, the following description would print on the check(s):</p> <p>One hundred and 00/100 U.S. Dollars</p> <p>(A 15) Required</p>

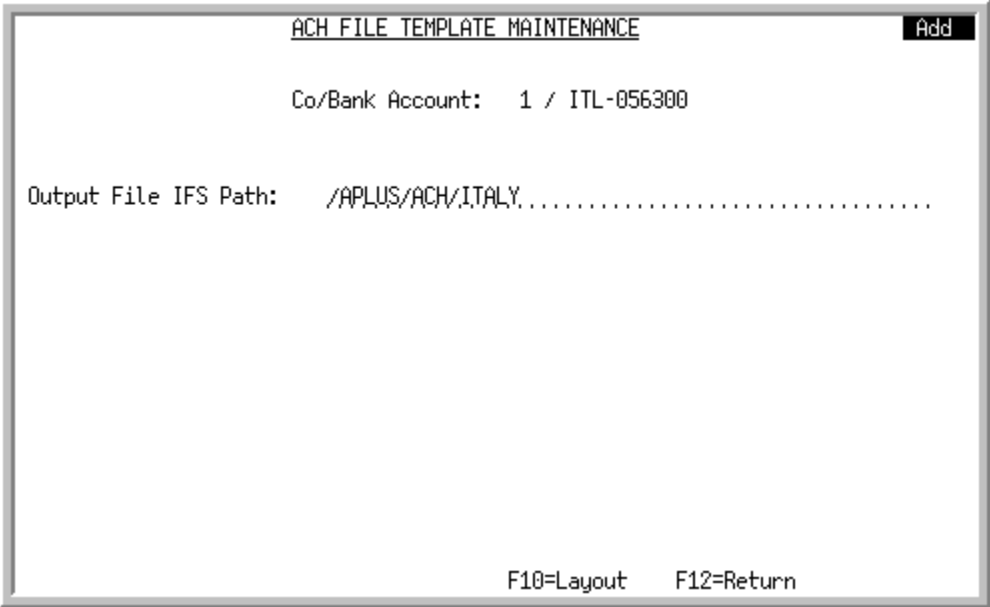

Bank Account Maintenance Screen 2 Fields and Function Keys

Field/Function Keys	Description
Long Bank Account	<p>Use this field to create a longer formatted bank account that can be used for bank account extract information to be transmitted to the bank for positive pay transmissions.</p> <p>Key a formatted bank account.</p> <p>(A 30) Optional</p>
Reserved ACH checks	<p>Use this field to select the checks to be reserved for ACH payments only. Having a reserved ACH check range defined will ensure that ACH checks will not be duplicating regular paper checks and vice versa.</p> <p>Key the ACH check number or range of ACH check numbers that will be used by the system for ACH payments in place of 'paper check numbers'. A range of check numbers must be defined for each Bank Account that will be using ACH payments. For each Bank Account that will be using ACH payments, an ACH File Template must also be defined; see F4=ACH TEMPLATE.</p> <p><i>Valid Values:</i> Cannot be a check number or range of check numbers that have been previously used or voided</p> <p>(N 9,0) Optional</p>
F4=ACH Template	<p>Press F4=ACH TEMPLATE to access ACH Template Maintenance, where you define the Automatic Clearing House (ACH) template. You can add, change or delete an ACH template.</p> <p>When you press F4=ACH TEMPLATE, the ACH File Template Maintenance Screen (p. 52-9) will appear. This is the first of several screens that will be called to define the ACH template.</p> <hr/> <p>NOTE: An ACH File Template must be defined for each Bank Account that will be using ACH Payments.</p> <hr/>
F12=Return	<p>Press F12=RETURN to return to the Bank Account Maintenance Screen 1 (p. 52-3) without updating this screen.</p>

Bank Account Maintenance Screen 2 Fields and Function Keys

Field/Function Keys	Description
F24= Delete/Suspend/ Reinstate	<p>This key displays different functions depending upon the bank account you have selected:</p> <p>F24=DELETE displays when you are maintaining an existing record that has not been used (i.e., no activity has been recorded against the bank account). You may delete new records only; once activity has occurred, records may not be deleted.</p> <p>Press F24=DELETE to delete the record displayed. You will be prompted to press this key again to confirm deletion. The Bank Accounts List Screen (p. 9-13) will display.</p> <p>F24=SUSPEND displays when you are maintaining an existing record that has been used (i.e., activity has been recorded against the bank account) and that has not already been suspended.</p> <p>Press F24=SUSPEND to suspend the selected bank account. You will be prompted to press this key again to confirm suspension. The Bank Accounts List Screen (p. 9-13) will display.</p> <p>F24=REINSTATE displays only when you are maintaining a record that has been suspended.</p> <p>Press F24=REINSTATE this key to reinstate the selected bank account. You will be prompted to press this key again to confirm reinstatement. The Bank Accounts List Screen (p. 9-13) will display.</p>
Enter	<p>Press ENTER to confirm your selections. The Bank Accounts List Screen (p. 9-13) will display.</p>

ACH File Template Maintenance Screen

This screen displays after pressing F4=ACH TEMPLATE on the Bank Account Maintenance Screen 2 (p. 52-4). Use this screen to specify the location where the generated ACH file will be placed at the root of the IFS.

ACH File Template Maintenance Screen Fields and Function Keys

Field/Function Key	Description
(Mode Status)	The function you are performing (Add or Change) displays on the top right portion of this screen. Display
Co/Bank Account	This field displays the company and bank account number you selected on the Bank Account Maintenance Screen 1 (p. 52-3), and for which you are adding, maintaining, or deleting an Automatic Clearing House (ACH) template. Display

ACH File Template Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Output File IFS Path	<p>Use this field to specify the location where the generated ACH file will be placed at the root of the IFS. If you have already created this directory at the root of the IFS, enter the path for that directory.</p> <p>If you have not created a directory at the root of the IFS, enter the path for the directory, and press ENTER. The F5=CREATE PATH function key will appear, and the system will create the path for you once you press F5=CREATE PATH.</p> <p><i>Valid Values:</i></p> <ul style="list-style-type: none"> - Letters A through Z and Numbers 1 through 9 - The path must begin with a "/" - The characters "\:?\<> or " are not valid in the Path Name - The path cannot include a segment that begins or ends in a blank - The FTP path cannot contain two or more consecutive "/" characters <p>(A 50) Required</p>
F5=Create Path	<p>The F5=CREATE PATH function key only appears when the Output File IFS Path entered does not exist.</p> <p>Press F5=CREATE PATH to create the FTP path.</p>
F6=Restore Default	<p>The F6=RESTORE DEFAULT function key displays in Change mode only.</p> <p>Press F6=RESTORE DEFAULT to replace the current ACH template with default template detail information.</p>
F10=Layout	<p>Press the F10=LAYOUT function key to continue to the process of creating the record layouts. You will be presented with several record layout screens to define details of a particular ACH File's Format. The ACH File Header Record Layout - Field Value View Screen (p. 52-12) will appear first when you press F10=LAYOUT.</p>
F12=Return	<p>Press F12=RETURN to return to the previous screen without saving data. The Bank Account Maintenance Screen 2 (p. 52-4) will appear.</p>
F24=Delete	<p>The F24=DELETE function key displays in Change mode only.</p> <p>Press F24=DELETE to delete the ACH template. You will be prompted to press F24=DELETE again to confirm deletion. The Bank Account Maintenance Screen 2 (p. 52-4) will appear.</p> <p>NOTE: The Output File IFS Path actual folder is not removed from the \IFS\Root directory of the System i when you delete a specific template. If that folder is no longer required, you will manually delete it after ensuring that the information contained in the folder is no longer relevant or has been moved to an appropriate location.</p>
Enter	<p>Press ENTER to validate the data keyed on this screen. Press the F10=LAYOUT function key to continue with the next step in template maintenance.</p>

F2=Field Value F5=Re-sort F10=Next Record F12=Return

The ACH File Header Record Layout - Field Value View Screen displays after pressing F10=LAYOUT on the ACH File Template Maintenance Screen (p. 52-9).

The ACH File Header Record Layout - Field Formatting View Screen displays with the use of the F2=FORMATTING / F2=FIELD VALUES toggle function keys.

Use this screen to define the fields that will be used for each Header output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: Blocking Factor, Destination, Destination Name, File Creation Date, File Creation Time, File ID Modifier, Format Code, Origin, Origin Name, Priority Code, Record Size, Record Type Code, Reference Code.

NOTE: In **Add** mode, a default ACH format will be used and most screen layout fields will be pre-populated for you, with only few bank specific fields that will need to be filled in. In **Change** mode, data will be copied from the previously saved ACH Template Detail (ACHTDT) records, to be maintained as needed.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting, all fields will be left justified as text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Unformatted dates will appear as YYYY-MM-DD.

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
(Maintenance Mode)	This field displays the type of maintenance. Add or Change, is shown in reverse image on the top right of the screen. Display
Co/Bank Account	This field displays the company and bank account number you selected on the Bank Account Maintenance Screen 1 (p. 52-3). Display
Record Type	This field displays the record layout type that is being maintained: File Header. Display
Seq	This field is used to identify the order of appearance of the Field Value in the Header record of the output file. Key the field sequence number for the Field Value used on this line. The first data field on a line should have a field sequence of 1, and each next data field should have a field sequence increments by 1. <i>Valid Values:</i> must be greater than zero when the Field Value is not blank; cannot be any gaps in field sequence numbers assigned to valid lines (N 2,0) Required

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
Field Name	<p>This field is used to identify what this Field Value represents to this template. This field is for internal use only and can be the shortened version of the Field Value, a generic field name that you create to represent filler or text to represent the meaning of the field. This field is not included in the export file.</p> <p>Key the field name to be used.</p> <p>(A 20) Required</p>
Length	<p>This field is used to identify the length of the field to be exported to the ACH output text file. This field is optional for an Output File Type set to D for delimited. If the Output File Type is F for fixed width, this field is required.</p> <p>For example, the check amount field size is 15,2 which means that there are 15 positions total with the last 2 being decimal positions. If the bank's file only has a 10 position amount field size, 10 would be entered in this field and the left-most positions of the field would not be included in the bank's field.</p> <p>Key the field length for fixed width output files.</p> <p>(N 3,0) Required/Optional</p>
Field Value	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Value View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to insert the appropriate Field Value that selects the actual field from the Accounts Payable Printed Checks File (APCHK), Bank Account File (XABAC), Bank Names records in the Order Control File (ORCTL), Accounts Payable Name Files (APHNM, APVEN, APONM); the System i system date; or a Constant value entered by the user to be loaded in the Positive Pay output text file.</p> <p>Using the constant value, you can use this field to add spaces, create filler fields or text fields required by the banks positive pay format. For those fields, the data keyed in this field is loaded to the file exactly as it is entered here.</p> <p>To assist in selecting the source of data, set the cursor to any place in the Field Value and press F4=INSERT FIELD VALUE.</p> <p><i>Valid Values:</i> a valid Field Value selected from the ACH File Field Values Screen (p. 52-19), via F4=INSERT FIELD VALUE, or text required by the bank and entered here by the user</p> <p>(A 36) Required</p>

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
Justify	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Formatting View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to properly set text to be left or right justified to match the banks specifications.</p> <p>Key R to begin filling this field at the right-most position thereby leaving the left positions blank, zero, or other characters. For example, check number 12345 could be right-justified in the bank's file (<<12345 where the < represents a space).</p> <p>Key L to begin filling this field at the left-most position thereby leaving the right positions blank. For example, check number 12345 could be left-justified in the bank's file (12345>> where the > represents a space).</p> <p>Leave this field blank and the fields will default to left justification and no filler.</p> <p><i>Default Value:</i> blank</p> <p><i>Valid Values:</i> R, L, or blank</p> <p>(A 1) Optional</p>
Filler	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Formatting View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to properly set text left or right justified and fill the remaining spaces with this value.</p> <p>For alpha fields, key the character to be used to fill the blank space in this field if blanks are not allowed.</p> <p>For numeric fields, key zero to left zero-fill a numeric field. Leave the field blank for blank filled fields.</p> <p>For example:</p> <ul style="list-style-type: none"> • the 15,2 N position check amount could be left zero-filled and right-justified as 000000000023456 for \$234.56 • the 9,0 N position check number 12345 could be 000012345 <p>(A 1) Optional</p>

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
Implied Dec	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Formatting View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>The Implied Dec field will be used for numeric fields with decimal positions, such as monetary amounts, to indicate if a decimal should be implied.</p> <p>Key Y to indicate that the decimal point will be implied and not be added to the field in the file. For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>

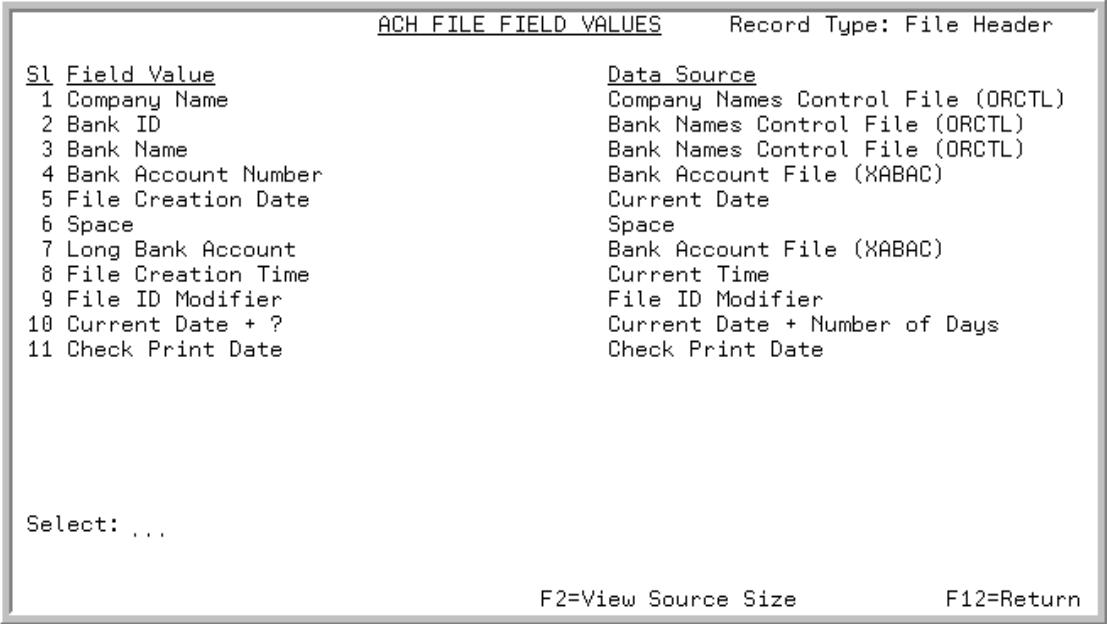

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
Date/Time Format	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Formatting View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use the Date/Time Format field to indicate the required date/time formatting for the bank's output text file.</p> <p>The Date/Time Format field is only used for date fields such as Check Print Date or File Creation Date. The validation of date formats is a common sense type validation and is aimed to ensure that the specified date format has year, month and day portions in any order and allows for any separators to be used. General expectations are the following:</p> <ul style="list-style-type: none"> • YY or YYYY for Year segment • MM for Month segment • DD for Day segment • Segments may be separated by any character, if needed <p>The validation of time formats is also a common sense type validation, and is aimed to ensure that the Time Format has hours and minutes. General expectations for Time Formats are the following:</p> <ul style="list-style-type: none"> • HH for Hours (military time) • MM for Minutes • Segments may be separated by any character, if needed <p>The Time Format field is used for Time fields only (fields that have a word "Time").</p> <p><i>Default Value:</i> YYYY-MM-DD is used for the .TXT file when this field is left blank</p> <p><i>Valid Values:</i> Examples of valid date formats are: YYMMDD, YYYYMMDD, MMDDYYYY, DDMMYYYY, YY-MM-DD, MM/DD/YYYY. Examples of valid time formats are: HHMM, HH:MM.</p> <p>(A 10) Optional</p>
F2=Formatting / F2=Field Value	<p>Press F2=FORMATTING / F2=FIELD VALUE to toggle the screen between the Field Values and Field Formatting views.</p>
F4=Insert Field Value	<p>This field displays only if you are viewing the ACH File Header Record Layout - Field Value View Screen (p. 52-12), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Press F4=INSERT FIELD VALUE to insert the actual field from the Distribution A+ file. The ACH File Field Values Screen (p. 52-19) appears.</p> <p>The cursor needs to be positioned in the Field Value field at the location where the insert will occur.</p>

ACH File Header Record Layout-Field View & Field Formatting Screens Fields/FuncKeys

Field/Function Key	Description
F5=Re-sort	<p>Press F5=RE-SORT to sort the fields by sequence entered, and have them re-display in ascending order by sequence. This can be helpful, for example, in cases when the initial layout needs to be adjusted by inserting some new fields or changing the order of fields appearance on the Output File line.</p> <p>Example: Seq 1 is Company, Seq 2 is Bank Name, and Seq13 is Bank Account. The bank name and bank account fields should be reversed. Change the sequence numbers of the two lines and press F5=RE-SORT. The screen will now show Seq 1 is Company, Seq 2 is Bank Account, and Seq13 is Bank Name.</p>
F10=Next Record	<p>Press F10=NEXT RECORD to proceed to the next record layout screen. The ACH Batch Header Record Layout - Field Value View Screen (p. 52-21) will appear.</p>
F12=Return	<p>Press F12=RETURN to return to the ACH File Template Maintenance Screen (p. 52-9). Any data keyed on the record layout screens is saved while you are moving between them.</p>
	<p>NOTE: To save your template, you must continue to use the F10=NEXT RECORD function key through the Batch Header, Entry Detail, Batch Control, and File Control records.</p>

ACH File Field Values Screen

This screen displays after pressing F4=INSERT FIELD VALUE from the following screens:

- ACH File Header Record Layout - Field Value View Screen (p. 52-12)
- ACH Batch Header Record Layout - Field Value View Screen (p. 52-21)
- ACH Entry Detail Record Layout - Field Value View Screen (p. 52-28)
- ACH File Control Record Layout - Field Value View Screen (p. 52-42)

This screen displays a list of available system defined field values that can be selected to be used for a corresponding ACH Template record type. The data that displays in the **Field Value** and **Data Source** columns varies based on the originating screen. Data is filtered to the specific record being added/maintained.

ACH File Field Values Screen Fields and Function Keys

Field/Function Keys	Description
Record Type	This field displays the specific record layout that is being maintained: File Header, Batch Header, Entry Detail, Batch Control, or File Control. Display
Sl	This field is the reference number to select a line on the screen. This number will be keyed in the Select field to choose a field to be added to the template. Display

ACH File Field Values Screen Fields and Function Keys

Field/Function Keys	Description
Field Value	<p>This field is the actual field from the Distribution A+ files that can be used for the specific record layout. The list of field values will be different for each specific record layout.</p> <p>Display</p>
Size	<p>This field displays after pressing F2=VIEW SOURCE SIZE.</p> <p>This field displays the originating file field size. This information will be helpful in determining the compatibility between the check files field sizes and the requirements of each specific bank.</p> <p>Display</p>
Data Source	<p>This field indicates which data file or data source will be used for the selection of the Field Value. Data files used are A/P Check File (APCHK), Bank Accounts File (XABAC), and Order Control File (ORCTL).</p> <p>Display</p>
Select	<p>Use this field to select a field value to be included in the specific record layout for the template being maintained.</p> <p>Key the reference number of the Field Value to be selected, and press ENTER.</p> <p>(N 2,0) Optional</p>
F2=View Source Size/ F2=Hide Source Size	<p>Press F2=VIEW SOURCE SIZE / F2=HIDE SOURCE SIZE to view or hide the Size column with the originating file field size. This information will be helpful in determining the compatibility between the check files field sizes and the requirements of each specific bank.</p>
F12=Return	<p>Press F12=RETURN without selecting data.</p>
Enter	<p>Press ENTER to select the field value and return to the screen for the record layout being maintained.</p>

F2=Field Value F5=Re-sort F10=Next Record F12=Return

This screen displays after pressing F10=NEXT RECORD on the ACH Batch Header Record Layout - Field Value View Screen (p. 52-21) or ACH Batch Header Record Layout - Field Formatting View Screen (p. 52-21).

The ACH Entry Detail Record Layout - Field Formatting View Screen (p. 52-28) displays with the use of the F2=FORMATTING / F2=FIELD VALUE toggle function keys.

Use this screen to define the fields that will be used for each Detail output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: Record Type Code, Transaction Code, Receiving DFI ID, Check Digit, DFI Account Number, Amount, Individual ID, Individual Name, Discretionary Data, Addenda Record ID, Trace Bank R/T, Trace Sequence. Note that Check Digit is the ninth digit of the receiving financial institution's transit routing number (that is, the 9th character from the **ACDFID** field from the **ACHVEN** file).

The **Trace Number** is unique to the transaction and will help identify the transaction in case of an inquiry. It displays on the ACH File Transactions Screen (p. 24-6) in the Processed ACH Payments option (MENU APCHCK).

The **Vendor Receiving DFI** field is assigned to each vendor through Vendors Maintenance (MENU APFILE/MENU POFILE) as a 20 position numeric field. Based on the field length specified on this screen, only those positions will be used in the payment file and included for the calculation of the hash totals.

NOTE: In **Add** mode, a default ACH format will be used and most screen layout fields will be pre-populated for you, with only few bank specific fields that will need to be filled in. In **Change** mode, data will be copied from the previously saved ACH Template Detail (ACHTDT) records, to be maintained as needed.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting all fields will be left justified as a text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Unformatted dates will appear as YYYY-MM-DD.

ACH Entry Detail Record Layout - Field View & Formatting View Screens Fields and Function Keys

Field/Function Key	Description
(Maintenance Mode)	This field displays the type of maintenance. Add or Change, is shown in reverse image on the top right of the screen. Display
Co/Bank Account	This field displays the company and bank account number you selected on the Bank Account Maintenance Screen 1 (p. 52-3). Display

ACH Entry Detail Record Layout - Field View & Formatting View Screens Fields and Function Keys

Field/Function Key	Description
Record Type	This field displays the record layout type that is being maintained: Entry Detail. Display
Seq	This field is used to identify the order of appearance of the Field Value in the Detail record of the output file. Key the field sequence number for the Field Value used on this line. The first data field on a line should have a field sequence of 1, and each next data field should have a field sequence increments by 1. <i>Valid Values:</i> must be greater than zero when the Field Value is not blank; cannot be any gaps in field sequence numbers assigned to valid lines (N 2,0) Required
Field Name	This field is used to identify what this Field Value represents to this template. This field is for internal use only and can be the shortened version of the Field Value , a generic field name that you create to represent filler or text to represent the meaning of the field. This field is not included in the export file. Key the field name to be used. (A 20) Required
Length	This field is used to identify the length of the field to be exported to the ACH output text file. This field is optional for an Output File Type set to D for delimited. If the Output File Type is F for fixed width, this field is required. For example, the check amount field size is 15,2 which means that there are 15 positions total with the last 2 being decimal positions. If the bank's file only has a 10 position amount field size, 10 would be entered in this field and the left-most positions of the field would not be included in the bank's field. Key the field length for fixed width output files. (N 3,0) Required/Optional

F2=Field Value F5=Re-sort F10=Next Record F12=Return

This screen displays after pressing F10=NEXT RECORD on the ACH Entry Detail Record Layout - Field Value View Screen (p. 52-28) or ACH Entry Detail Record Layout - Field Formatting View Screen (p. 52-28).

The ACH Batch Control Record Layout - Field Formatting View Screen (p. 52-35) displays with the use of the F2=FORMATTING / F2=FIELD VALUE toggle function keys.

Use this screen to define the fields that will be used for each Batch Control output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: Record Type Code, Service Class Code, Entry Count, Entry Hash, Total Debit Amount, Total Credit Amount, Company ID, Message Auth CD, Reserved, Originating Fin ID, and Batch Number.

Note that Entry Hash is a calculated field. It is the sum of the Detail record's Vendor DFI Account Number output data field (that is, the ACDFID field from the ACHVEN file, truncated to the size defined in the template). The resulting field is truncated - only the final 10 positions in the entry are used.

NOTE: In **Add** mode, a default ACH format will be used and most screen layout fields will be pre-populated for you, with only few bank specific fields that will need to be filled in. In **Change** mode, data will be copied from the previously saved ACH Template Detail (ACHTDT) records, to be maintained as needed.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting all fields will be left justified as a text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Unformatted dates will appear as YYYY-MM-DD.

ACH Batch Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
Filler	<p>This field displays only if you are viewing the ACH Batch Control Record Layout - Field Formatting View Screen (p. 52-35), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to properly set text left or right justified and fill the remaining spaces with this value.</p> <p>For alpha fields, key the character to be used to fill the blank space in this field if blanks are not allowed.</p> <p>For numeric fields, key zero to left zero-fill a numeric field. Leave the field blank for blank filled fields.</p> <p>For example:</p> <ul style="list-style-type: none"> the 15,2 N position check amount could be left zero-filled and right-justified as 000000000023456 for \$234.56 the 9,0 N position check number 12345 could be 000012345 <p>(A 1) Optional</p>
Implied Dec	<p>This field displays only if you are viewing the ACH Batch Control Record Layout - Field Formatting View Screen (p. 52-35), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>The Implied Dec field will be used for numeric fields with decimal positions, such as monetary amounts, to indicate if a decimal should be implied.</p> <p>Key Y to indicate that the decimal point will be implied and not be added to the field in the file. For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>

ACH Batch Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
Date/Time Format	<p>This field displays only if you are viewing the ACH Batch Control Record Layout - Field Formatting View Screen (p. 52-35), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use the Date/Time Format field to indicate the required date/time formatting for the bank's output text file.</p> <p>The Date/Time Format field is only used for date fields such as Check Print Date or File Creation Date. The validation of date formats is a common sense type validation and is aimed to ensure that the specified date format has year, month and day portions in any order and allows for any separators to be used. General expectations are the following:</p> <ul style="list-style-type: none"> • YY or YYYY for Year segment • MM for Month segment • DD for Day segment • Segments may be separated by any character, if needed <p>The validation of time formats is also a common sense type validation, and is aimed to ensure that the Time Format has hours and minutes. General expectations for Time Formats are the following:</p> <ul style="list-style-type: none"> • HH for Hours (military time) • MM for Minutes • Segments may be separated by any character, if needed <p>The Time Format field is used for Time fields only (fields that have a word "Time").</p> <p><i>Default Value:</i> YYYY-MM-DD is used for the .TXT file when this field is left blank</p> <p><i>Valid Values:</i> Examples of valid date formats are: YYMMDD, YYYYMMDD, MMDDYYYY, DDMMYYYY, YY-MM-DD, MM/DD/YYYY. Examples of valid time formats are: HHMM, HH:MM.</p> <p>(A 10) Optional</p>
F2=Formatting / F2=Field Value	<p>Press F2=FORMATTING / F2=FIELD VALUE to toggle the screen between the Field Values and Field Formatting views.</p>
F4=Insert Field Value	<p>This function key displays only if you are viewing the ACH Batch Control Record Layout - Field Value View Screen (p. 52-35), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Press F4=INSERT FIELD VALUE to insert the actual field from the file. The ACH File Field Values Screen (p. 52-19) appears.</p> <p>The cursor needs to be positioned in the Field Value field at the location where the insert will occur.</p>

ACH Batch Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
F5=Re-sort	<p>Press F5=RE-SORT to sort the fields by sequence entered, and have them re-display in ascending order by sequence. This can be helpful, for example, in cases when the initial layout needs to be adjusted by inserting some new fields or changing the order of fields appearance on the Output File line.</p> <p>Example: Seq 1 is Company, Seq 2 is Bank Name, and Seq13 is Bank Account. The bank name and bank account fields should be reversed. Change the sequence numbers of the two lines and press F5=RE-SORT. The screen will now show Seq 1 is Company, Seq 2 is Bank Account, and Seq13 is Bank Name.</p>
F10=Next Record	<p>Press F10=NEXT RECORD to proceed to the next record layout screen. The ACH File Control Record Layout Screen will appear.</p>
F12=Return	<p>Press F12=RETURN to return to the ACH Entry Detail Record Layout - Field Value View Screen (p. 52-28) or ACH Entry Detail Record Layout - Field Formatting View Screen (p. 52-28). Any data keyed on the record layout screens is saved while you are moving between them.</p>
	<p>NOTE: To save your template, you must continue to use the F10=NEXT RECORD function key through the Batch Control and File Control records.</p>

F2=Field Value F5=Re-sort F10=Save Template F12=Return

This screen displays after pressing F10=NEXT RECORD on the ACH Batch Control Record Layout - Field Value View Screen (p. 52-35) or ACH Batch Control Record Layout - Field Formatting View Screen (p. 52-35).

The ACH File Control Record Layout - Field Formatting View Screen (p. 52-42) displays with the use of the F2=FORMATTING / F2=FIELD VALUE toggle function keys.

Use this screen to define the fields that will be used for each File Control output record in the text file. Complete the fields on the formatting screen to define the exact specifications required by the bank for processing.

The available **Field Values** for this record format are: Record Type Code, Batch Count, Block Count, Entry Count, Entry Hash, Total Debit Amount, Total Credit Amount, and Reserved.

The **Entry Hash** is a calculated field. It is the sum of the ACH Template Detail (ACHTDT) records Vendor DFI Account Number (ACDFID) output data field from the ACH Vendor File (ACHVEN), truncated to the size defined in the template. The resulting field is truncated - only the final 10 positions in the entry are used.

NOTE: In **Add** mode, a default ACH format will be used and most screen layout fields will be pre-populated, with only few bank specific fields needing to be filled in. In **Change** mode, data will be copied from the previously saved ACH Template Detail (ACHTDT) records, to be maintained as needed.

Important

All the data fields in the output file are treated as text fields; there are no data type concepts. Without formatting all fields will be left justified as a text fields, and added as they are stored in the database. The user should provide formatting to match bank requirements as needed.

Unformatted dates will appear as YYYY-MM-DD.

ACH File Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
(Maintenance Mode)	This field displays the type of maintenance. Add or Change, is shown in reverse image on the top right of the screen. Display
Co/Bank Account	This field displays the company and bank account number you selected on the Bank Account Maintenance Screen 1 (p. 52-3). Display
Record Type	This field displays the record layout type that is being maintained: File Control. Display

ACH File Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
Seq	<p>This field is used to identify the order of appearance of the Field Value in the Detail record of the output file.</p> <p>Key the field sequence number for the Field Value used on this line. The first data field on a line should have a field sequence of 1, and each next data field should have a field sequence increments by 1.</p> <p><i>Valid Values:</i> must be greater than zero when the Field Value is not blank; cannot be any gaps in field sequence numbers assigned to valid lines</p> <p>(N 2,0) Required</p>
Field Name	<p>This field is used to identify what this Field Value represents to this template. This field is for internal use only and can be the shortened version of the Field Value, a generic field name that you create to represent filler or text to represent the meaning of the field. This field is not included in the export file.</p> <p>Key the field name to be used.</p> <p>(A 20) Required</p>
Length	<p>This field is used to identify the length of the field to be exported to the ACH output text file. This field is optional for an Output File Type set to D for delimited. If the Output File Type is F for fixed width, this field is required.</p> <p>For example, the check amount field size is 15,2 which means that there are 15 positions total with the last 2 being decimal positions. If the bank's file only has a 10 position amount field size, 10 would be entered in this field and the left-most positions of the field would not be included in the bank's field.</p> <p>Key the field length for fixed width output files.</p> <p>(N 3,0) Required/Optional</p>

ACH File Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
Field Value	<p>This field displays only if you are viewing the ACH File Control Record Layout - Field Value View Screen (p. 52-42), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to insert the appropriate Field Value that selects the actual field from the Accounts Payable Printed Checks File (APCHK), Bank Account File (XABAC), Bank Names records in the Order Control File (ORCTL), Accounts Payable Name Files (APHNM, APVEN, APONM); the System i system date; or a Constant value entered by the user to be loaded in the Positive Pay output text file.</p> <p>Using the constant value, you can use this field to add spaces, create filler fields or text fields required by the banks positive pay format. For those fields, the data keyed in this field is loaded to the file exactly as it is entered here.</p> <p>To assist in selecting the source of data, set the cursor to any place in the Field Value and press F4=INSERT FIELD VALUE.</p> <p><i>Valid Values:</i> a valid Field Value selected from the ACH File Field Values Screen (p. 52-19), via F4=INSERT FIELD VALUE, or text required by the bank and entered here by the user</p> <p>(A 36) Required</p>
Justify	<p>This field displays only if you are viewing the ACH File Control Record Layout - Field Formatting View Screen (p. 52-42), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to properly set text to be left or right justified to match the banks specifications.</p> <p>Key R to begin filling this field at the right-most position thereby leaving the left positions blank, zero, or other characters. For example, check number 12345 could be right-justified in the bank's file (<<12345 where the < represents a space).</p> <p>Key L to begin filling this field at the left-most position thereby leaving the right positions blank. For example, check number 12345 could be left-justified in the bank's file (12345>> where the > represents a space).</p> <p>Leave this field blank and the fields will default to left justification and no filler.</p> <p><i>Default Value:</i> blank</p> <p><i>Valid Values:</i> R, L, or blank</p> <p>(A 1) Optional</p>

ACH File Control Record Layout - Field View & Field Formatting Screen Fields and Function Keys

Field/Function Key	Description
Filler	<p>This field displays only if you are viewing the ACH File Control Record Layout - Field Formatting View Screen (p. 52-42), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>Use this field to properly set text left or right justified and fill the remaining spaces with this value.</p> <p>For alpha fields, key the character to be used to fill the blank space in this field if blanks are not allowed.</p> <p>For numeric fields, key zero to left zero-fill a numeric field. Leave the field blank for blank filled fields.</p> <p>For example:</p> <ul style="list-style-type: none"> the 15,2 N position check amount could be left zero-filled and right-justified as 000000000023456 for \$234.56 the 9,0 N position check number 12345 could be 000012345 <p>(A 1) Optional</p>
Implied Dec	<p>This field displays only if you are viewing the ACH File Control Record Layout - Field Formatting View Screen (p. 52-42), as toggled with the F2=FORMATTING / F2=FIELD VALUES toggle function keys.</p> <p>The Implied Dec field will be used for numeric fields with decimal positions, such as monetary amounts, to indicate if a decimal should be implied.</p> <p>Key Y to indicate that the decimal point will be implied and not be added to the field in the file. For example, the 15,2 position check amount could be left zero-filled, right-justified, and implied decimal as 000000000023456 for \$234.56.</p> <p>Leave this field blank to have the decimal point inserted in the monetary amount field. For example, the 15,2 position check amount could be left zero-filled, right-justified, and not implied decimal as 0000000000234.56 for \$234.56.</p> <p><i>Valid Values:</i> Y or blank</p> <p>(A 1) Optional</p>

This listing prints following your selections on the Bank Account File Listing Screen (p. 52-49) and the Report Options Screen (refer to the Cross Applications User Guide for details about this screen).

This listing prints bank accounts that match the company or range of companies specified on the Bank Account File Listing Screen (p. 52-49). One company is printed per page.

Bank Account Listing

Report/Listing Field	Description
(Headings)	Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number. Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.
Account No	The account number assigned to this bank account.
Name	The description associated with this bank account.
Bank Id	The bank ID assigned to this bank account on the Bank Account Maintenance Screen 2 (p. 52-4).
Acct Type	This is the type of bank account: C for a checking account, S for a savings account, L for a line of credit account.
Allow Checks	Determines if checks will be allowed to be used for this bank account; Y allow checks and N prohibits the use of checks.

Bank Account Listing

Report/Listing Field	Description
Account Balance	The current balance that exists for each account. When International Currency is installed, the account balance will print in both the company's local currency and the foreign currency for each foreign currency bank account. The currency edit symbol will appear next to each amount.the
G/L Account No(s)	The G/L Account No on this listing is defined through GL Transfer Definition (MENU GLXFER).
Status	Current status of the account where A is active and S is suspended.
Long Bank Account	The longer formatted bank account that can be used for bank account extract information transmitted to the bank for positive pay transmissions.
Currency	The currency code and description will print for each foreign currency bank account.
Exchange Code	The exchange code and description will print for each foreign currency bank account.
Exchange Rate	The exchange rate used for each foreign currency bank account will print beneath the account balance figures.
Gain/Loss Account	The number of the G/L gain/loss account associated with each the foreign currency bank account will print.
Exchange Fees Account	The number of the G/L exchange fees account associated with each the foreign currency bank account will print.
Reserved ACH checks	The ACH check number or range of ACH check numbers that will be used by the system for ACH payments in place of 'paper check numbers'. This data prints only if the ACH information exists.

Split terms pertain to vendors who allow their customers to split invoice amounts over specific periods of time. Split terms enable you to split accounts payable invoice amounts and assign different due dates to those split amounts without having to enter multiple vouchers. Before accounts payable split terms may be applied to vouchers in Distribution A+, you must first use this option to set up valid split term codes. This option will provide a uniform definition of split term codes for vendors who allow split terms.

NOTE: Pre-receipt vouchers are allowed. However, pre-receipt validation can only be performed on the original split voucher against the original expense accounts on the voucher.

Use the Split Terms Code Maintenance option to set up and maintain split term codes. You will be able to define split terms codes with up to 12 splits per terms code.

Split Terms Code Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Split Terms Code Maintenance Selection Screen	Use to specify the code to maintain.
Split Terms Code Maintenance Screen	Use to assign the split days and percentages.

This screen appears after you press **ENTER** on the Split Terms Code Maintenance Selection Screen (p. 53-2). Use this screen to assign or maintain split term information for the selected split terms code. You can define up to 12 splits for each split terms code. For each split specified, you are required to key the split pay days and percentage. Additionally, you may key discount and urgency information. These values will override voucher entry header information entered through Voucher Entry (MENU APMAIN).

NOTE: If split discount days are keyed, you must key a discount percentage. This discount percentage will be used to calculate the discount amounts that apply to the individual split invoice amounts on a voucher.

Split Terms Code Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Description	Use this field to enter the split terms code description you wish to add or update. Key the description of the selected split terms code. (A 30) Required

Split Terms Code Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Split Dsc Days	<p>Use this field to add or update the split discount days for this split terms code. Discount days for split terms codes are defined as the number after the prior split's due date that the discount date will be calculated as.</p> <p>For example, assume that an invoice has been split three times with three splits of 30 days, 40 days, and 50 days. If you set split discount days to 10, the discount days for the first split would be equal to 40 days (10 days from the due date of that split). The split discount days for the the other two splits would be 50 days and 60 days respectively.</p> <hr/> <p>NOTE: The discount days for the first split is calculated as the number of days after the invoice/entry date.</p> <hr/> <p>Key the split discount days for the selected split terms code.</p> <p>(N 3,0) Optional</p>
Split Dsc %	<p>Use this field to enter the split discount percentage for the selected split terms code. This value is used to calculate the discount amount when applicable. Additionally, this field is required if the Split Dsc Days is keyed.</p> <p>Key the split discount percentage you wish to assign to each of the selected codes split amounts.</p> <p>(N 5,3) Optional/Required</p>
Split Urg Days	<p>Use this field to enter the split urgency days for the selected split terms code. This field is used as the number of days since the split's due date that payment to this vendor will be considered urgent.</p> <p>For example, assume that an invoice has been split five times with five splits of 30 days, 40 days, 50 days, 60 days, and 70 days. If you set split urgency days to 10, the urgency date for the first split would be equal to 40 days (10 days from the due date of that split). The urgency dates for the other four splits would be 50 days, 60 days, 70 days, and 80 days, respectively.</p> <p>Key the number of days after each split's due date you wish to set split urgency dates to.</p> <p><i>Valid Values:</i> The urgency days must be greater than the first split's pay days and the split urgency days cannot be entered as a negative number.</p> <p>(N 3,0) Required</p>
Split Days	<p>Use this list of fields to enter the split pay days you wish to define for the selected split terms code.</p> <p>Key the split days for the selected split terms code. You must enter at least two split pay days for the selected split terms code. Split pay days must be entered in a consecutive sequence, i.e., 30, 40, 50, etc.</p> <p>(12 @ N 3,0) Required</p>

Split Terms Code Maintenance Screen Fields and Function Keys

Field/Function Key	Description
Split %	<p>Use this field to enter the split pay percentage for its corresponding split pay day that you entered in the Split Days fields.</p> <p>Key the split percentage for its corresponding split pay day.</p> <p><i>Valid Values:</i> Split percentages cannot be negative and must total 100%. Split percentages cannot be zero if split days have been specified.</p> <p>(12 @ N 4,2) Required</p>
F12=Return	<p>Press the F12=RETURN function key to return to the Split Terms Code Maintenance Selection Screen (p. 53-2) without updating this screen.</p>
Enter	<p>Press the ENTER key to confirm your selections. A confirmation window will appear. If you key Y, your selections will be entered and the Split Terms Code Maintenance Selection Screen (p. 53-2) will appear.</p>

Split Terms Code Listing

Use the Split Terms Code Listing option to print the Split Terms Code Listing. This listing shows the split terms codes defined and maintained through Split Terms Code Maintenance (MENU APFIL2). The Report Options Screen appears when you select this option.

This listing prints after entering responses on the Report Options Screen (refer to the Cross Applications User Guide for details about this screen). The Report Options Screen appears after selecting the Split Terms Listing option from the Accounts Payable File Maintenance Menu (MENU APFIL2).

Split terms codes defined and maintained through Split Terms Codes Maintenance (MENU APFIL2) print out on this listing.

Refer to the Split Terms Code Maintenance Screen (p. 53-3) for an explanation of the fields on this listing.

The Copy Purchasing Vendors to A/P option copies vendor information defined in the Purchasing Vendor Master File to the A/P Vendor Master File. Use this option to eliminate the task of re-keying vendors in the A/P Vendor Master File.

Use this option only if Purchasing is installed and you install Accounts Payable at a later time.

When you run this option, vendors are copied automatically and no screens appear.

Use the Rebuild Vendor Search File option after restoring purchasing files or upon initial installation. It is not necessary to perform this function on a regular basis (or each time vendors are added), as the file is automatically updated when exiting vendor add or change through Vendors Maintenance.

NOTE: This option requires exclusive use of the Vendor Search File. Before you run this option, you must stop Distribution A+, and when completed, start Distribution A+ again.

Rebuild Vendor Search File

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Build Vendor Search File Screen	Use to begin the rebuild of the Vendor Search File.

Build Vendor Search File Screen

This screen appears after you select option **11** - the Rebuild Vendor Search File from the Accounts Payable Master Menu (MENU APMAS). Use this screen to update the Vendor Search File.

Rebuild Vendor Search File Screen Fields and Function Keys

Field/Function Key	Description
Do You Want To Continue (Y/N)	Key Y to build the Vendor Search File. Key N to discontinue this process and return to MENU APMAS.
Run From The Jobq (Y/N)	Jobs can be processed interactively or from the job queue. If a job is processed interactively, the job is processed immediately and your workstation will be in a hold status until the job is complete. If a job is processed from the job queue, the job is put into a queue or holding area and processed accordingly. This allows you to continue using your workstation. Key Y to run the job from the job queue. Key N to run the job interactively.
Enter To Continue	Press the ENTER key to build the Vendor Search File. After processing, MENU APMAS will appear.
F3=To Cancel	Press the F3=TO CANCEL function key to cancel this option. MENU APMAS will appear.

You can create vouchers for received items using the A/P Receipt Validation function. To ensure that receipts, received prior to the installation of Accounts Payable, do not display for payment during receipt validation, use this option to mark previously vouchered PO receipts. You may mark individual receipts or mark all receipts “previously vouchered” for a receipt date associated with a vendor. Once receipts are marked, they do not appear in A/P Receipt Validation, cannot be selected for transfer from Purchasing to A/P, and do not update G/L.

NOTE: This function is applicable only if Purchasing is installed on your system.

If you have more than 9,999 records that need processed, you may have to run the process more than once to process all of your records.

Mark Previously Vouchered PO Receipts

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Mark Previously Vouchered PO Receipts Screen	Use to specify the criteria that will be used to select vouchers for marking.
Mark Previously Vouchered PO Receipts Process Screen	Displays a list of matching vouchers for review. use to begin the process that marks the vouchers.

Mark Previously Vouchered PO Receipts Screen

This screen appears after selecting option 12 -Mark Previously Vouchered PO Receipts from the Accounts Payable Master Menu (MENU APMAS). Use this screen to select the criteria for which previously vouchered receipts will display on the Mark Previously Vouchered PO Receipts Process Screen (p. 56-4).

Mark Previously Vouchered PO Receipts Screen Fields and Function Keys

Field/Function Key	Description
Company	<p>This field reflects the company number associated with the records to display on the Mark Previously Vouchered PO Receipts Process Screen (p. 56-4).</p> <p>Key a valid company number. Only previously vouchered receipts associated with this company will display on the next screen.</p> <p>Leave this field blank to include voucher receipts for all company numbers.</p> <p>(N 2,0) Optional</p>
Receipt Date	<p>The date keyed in this field determines the records to display on the Mark Previously Vouchered PO Receipts Process Screen (p. 56-4). Records on or before this date (that meet the company and vendor criteria entered) will display on the next screen.</p> <p><i>Valid Values:</i> Key the date using the Default Date Format for this user, specified through Register User IDs (MENU XACFIG), or if that field is blank, key the date using the system's Default Date Format specified through System Options Maintenance (MENU XAFILE).</p> <p>(N 6,0) Required</p>

Mark Previously Vouchered PO Receipts Screen Fields and Function Keys

Field/Function Key	Description
Vendor	<p>This field reflects the vendors for which records will display on the Mark Previously Vouchered PO Receipts Process Screen (p. 56-4).</p> <p>Key up to 15 vendor numbers. Only records associated with this vendor (that meet the company and receipt date entered) will display on the next screen.</p> <p>Leave this field blank to include voucher receipts for all vendors.</p> <p>(15 @ A 6) Optional</p>
F3=Cancel	<p>Press the F3=CANCEL function key to cancel this option. MENU APMASST will display.</p>
F5=Process	<p>Press the F5=PROCESS function key to confirm your selections. The Mark Previously Vouchered PO Receipts Process Screen (p. 56-4) displays.</p>

F3=Exit F9=Sel All F10=Update F11=Local Curr F12=Return

This screen appears after you press **F5=PROCESS** on the Mark Previously Vouchered PO Receipts Screen (p. 56-2). Previously vouchered PO receipts that match the selection criteria you keyed on the Mark Previously Vouchered PO Receipts Screen (p. 56-2) are shown on this screen for your review and selection.

Use this screen to mark selected receipts for processing via the **Sel** field, or all receipts with the **F9=SEL ALL** function key. After you mark the desired receipts, or all receipts, press **F10=UPDATE** to submit the receipts for processing. After processing completes, you cannot select the marked receipts for transfer from PO to A/P.

Mark Previously Vouchered PO Receipts Process Screen Fields and Function Keys

Field/Function Key	Description
Company	<p>If you keyed a company number on the initial screen, this field appears and displays the company number you selected. When a company number displays, it indicates that the records shown on this screen are for this company only.</p> <p>If you did not key a company number on the Mark Previously Vouchered PO Receipts Screen (p. 56-2), this field will not display. When this field does not display it indicates that the records shown on this screen are for all companies.</p> <p>Display</p>
Receipt Date	<p>This field displays the receipt date entered on the Mark Previously Vouchered PO Receipts Screen (p. 56-2).</p> <p>Display</p>

Mark Previously Vouchered PO Receipts Process Screen Fields and Function Keys

Field/Function Key	Description
Sel	<p>Use this field to select individual receipts that you want to mark for processing.</p> <p>Key an X in the fields preceding the receipts you want to include for processing. After you select the desired receipts, see F10.</p> <p>To mark all receipts for processing, see F9.</p> <p>(A 1) Optional</p>
Vendor	<p>This field displays the vendor number associated with the PO receipt.</p> <p>Display</p>
PO Num	<p>This field displays the PO number of the receipt.</p> <p>Display</p>
Seq #:	<p>This field displays the sequence number of the PO number.</p> <p>Display</p>
Item & Description	<p>This field displays the item number and description included in the receipt.</p> <p>Display</p>
Receipt Val	<p>This field displays the dollar value of the previously vouchered PO receipt for the selected vendor at time of receipt (i.e., whatever resides in the Receipt History File).</p> <p>Display</p>
F3=Exit	<p>Press the F3=EXIT function key to exit the option and return to the menu.</p>
F9=Sel All	<p>Use the F9=SEL ALL function key to mark all receipts for processing; that includes all receipts that are visible to you on the current screen and that may exist on subsequent screens if a + sign displays on the lower right corner of the screen.</p> <p>After you press the F9=SEL ALL function key, an X displays in the Sel field preceding each PO receipt. Press the F10=UPDATE function key to confirm your selections and begin processing.</p>
F10=Update	<p>Use the F10=UPDATE function key after you mark individual PO receipts for processing via the Sel field, or mark all receipts for processing with the F9=SEL ALL function key to confirm your selections and begin processing. Only those PO receipts marked will process.</p> <p>After processing completes, you will return to MENU APMAS and the marked POs will no longer be available for PO to A/P receipt validation; that is, the POs will no longer be considered not validated and will not appear in the list.</p>

Mark Previously Vouchered PO Receipts Process Screen Fields and Function Keys

Field/Function Key	Description
F12=Return	Press the F12=RETURN function key if you do not want to begin processing and instead wish to return to the Mark Previously Vouchered PO Receipts Screen (p. 56-2) where you may select different criteria for which PO receipts will display on this screen.

Important

You should only use this option once per bank account, since general ledger does not get updated with the new balance entered.

You may use this option as a way to maintain the balances for your existing bank accounts. Be sure to run this option only once per bank account to establish a balance that is already in the cash G/L account defined for the bank account. Because this process does not affect General Ledger, using this option to maintain the balance may cause a gap between the bank account balance and the cash account's current balance.

After running this option, records will be stored in a Bank Account Audit File for the amount of any adjustments. You may use these records to audit any discrepancies between the bank account and general ledger cash account's balance. Once bank transactions have been processed for an account, you will no longer be able to enter the balance.

Additionally, if Distribution A+ was installed on your system prior to the release of Version 2.06, which introduced bank accounts, you may use this option to place a balance in bank accounts that existed before 2.06. This will allow you to enter the current balance of the general ledger cash account, defined for a bank account, into the balance of the actual bank account.

Bank Account Balance Maintenance

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Bank Account Balance Maintenance Selection Screen	Use to specify the bank account for which you want to maintain the balance.
Bank Account Balance Maintenance Screen	Use to enter a new balance for the account.

Bank Account Balance Maintenance Selection Screen

```

BANK ACCOUNT BALANCE MAINTENANCE

1099 Code Maintenance Voucher Screen Fields and Function Keys

Field/Function Keys	Description
Vendor	This field displays the number and name of the vendor associated with the voucher.
Assign / Payee	The Assign field appears only if the selected company is set to use assignees in AP Options Maintenance (MENU APFIL2); otherwise the field name is Payee . This field indicates to whom the check will be issued.
Co/Voucher	The company number and voucher number selected on the previous screen.
(Address)	These fields are the assignee or payee's four address lines that represent the street address, post office box number or other address information followed by the city, state/province, country, and zip/postal code.
Contact	The name of the default contact person or the contact person that was keyed for this voucher.

1099 Code Maintenance Voucher Screen Fields and Function Keys

Field/Function Keys	Description
Phone	The assignee or payee's telephone number, which includes a 3-character country access code followed by the area code and telephone number. For example: 011 (781) 555-1212. The Extn field for the telephone extension of the contact person specified in the AP Contact field is shown on the line below.
Inv No	This voucher is created for the invoice number keyed in this field. If this voucher is for a drop ship receipt validation voucher, it is the number keyed in the Invoice No. field on the Drop Ship Receipt Validation Screen (p. 4-129). If this voucher is for a drop ship receipt validation charge back voucher, it is the number keyed in the Charge Back No. field on the End Drop Ship Receipt Validation Screen (p. 4-135).
Inv Desc	A description of the invoice being recorded with this voucher. If this voucher is a drop ship receipt validation voucher, the description keyed from the Invoice Desc field on the Drop Ship Receipt Validation Screen (p. 4-129). If this voucher is a drop ship receipt validation charge back voucher, this field will display the phrase C/B FOR , followed by the number keyed in the Invoice No. field on the End Drop Ship Receipt Validation Screen (p. 4-135) to signify that this is a charge back voucher associated with the vendor's invoice for the drop shipment.
Inv Date	The date of the invoice recorded with this voucher shown in the default date format of the user.
Inv Amt	The amount of the invoice which is being recorded with this voucher. When International Currency is installed, the invoice amount is displayed in the vendor's currency with the company's local currency amount displayed beneath. For type C invoices (credit), the invoice amount is a negative value.
User Area	Additional information added for this voucher.
PO No	The number of the purchase order issued when placing the original order being recorded with this voucher.
Due Date	The due date for payment of this voucher calculated as the number of payment days plus either the voucher entry date or the invoice date depending on your selection in A/P Options Maintenance (MENU APFIL2 shown in the default date format of the user.
Terms	The standard payment terms of this vendor. The terms keyed in this field are printed on appropriate documents.
Csh Dsc %	The cash discount percent offered by this vendor or taken for this voucher.
Dsc Date	The last date on which the cash discount for this voucher is effective shown in the default date format of the user.

1099 Code Maintenance Voucher Screen Fields and Function Keys

Field/Function Keys	Description
Dsc Days	The number of days for which the cash discount associated with this vendor is effective.
Pmt Pty	The payment priority used to indicate the priority level for making payments to this vendor. Payment priority can be used in Payment Selection (MENU APCHCK) to select groups of vouchers to be paid. Payment priority 1 is high, payment priority 2 is medium, payment priority 3 is low.
Urg Pty	The urgency priority is similar to payment priority in that it is used to indicate the priority level for making payment to a vendor. It differs in that its value (1, 2 or 3) replaces the payment priority on the day of the urgency date. When using the urgency priority and urgency date, the payment priority must be lower than the urgency priority. Urgency priority 1 is high, urgency priority 2 is medium, urgency priority 3 is low.
Urg Date	When a payment and urgency priority are specified for a vendor, it is on this date that the value of the urgency priority replaces the payment priority. The urgency date is calculated based on the number of urgency days for this vendor and is shown in the default date format of the user.
Sep Chk	A N indicates the when this voucher is paid it should be paid on the same check as any other vouchers for this vendor. A Y indicates a separate check is required for this voucher.
Project	The project associated with this voucher.
Force Dsc	A Y will to force cash discounts to be taken regardless if the discount date has passed. A N will not take cash discounts if the discount date has passed.
Bus Unit	This field appears only if you selected to use business units when selecting A/P Liability and Expense accounts or Purchase Tax Accounts for the G/L Interface through G/L Transfer Definition (MENU GLXFER sub-option T) and represents the business unit that is assigned to the vendor that was used to select the default A/P Liability, A/P Expense, and Purchase Tax Accounts for this voucher.
1099 Req	Use this field to determine if a 1099 is required for this voucher. Key Y if a 1099 is required for this voucher. Key N if a 1099 is not required for this voucher. <i>Default Value:</i> The value defined in Vendors Maintenance (MENU APFILE). (A 1) Optional

1099 Code Maintenance Voucher Screen Fields and Function Keys

Field/Function Keys	Description
Tax Id	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>Use this field to record the Tax Id that should be assigned to this voucher for this vendor or vendor/WH.</p> <p>Key the Tax Id or social security number for the vendor.</p> <hr/> <p>NOTE: If you originally leave this field blank in the Vendor Master File, the Tax Id # will need to be keyed for every voucher transaction. At this point in the process, it will not fill in from the Vendor Master File.</p> <hr/> <p><i>Default Value:</i> The tax ID assigned to the voucher in Voucher Entry (MENU APMAIN).</p> <p>(A 15) Optional</p>
1099 Cde	<p>This code represents the IRS 1099 amount type applicable to this voucher. A question mark list provides the available codes and their associated IRS 1099 amount types.</p> <p>This field will be consulted when 1099-MISC and/or 1099-NEC forms are generated to determine where this voucher's value will be included on those forms. If the code representing Nonemployee Compensation is selected, this voucher's value will be included on the 1099-NEC form; if the code representing any other amount type is selected, this voucher's value will be included on the 1099-MISC form. If this field is blank, Nonemployee Compensation will be assumed.</p> <p>Key the 1099 code representing the applicable IRS 1099 amount type for this voucher.</p> <p><i>Valid Values:</i> Blank, or one of the values in the Order Control File (ORCTL) representing the valid IRS 1099 amount types (these values are presented when you key a ? in this field)</p> <p>(N 2,0) Optional</p>

1099 Code Maintenance Voucher Screen Fields and Function Keys

Field/Function Keys	Description
ID Tp	<p>Use this field to identify the Federal Tax ID Type.</p> <p>This field defines the type of taxpayer identification number the value in the Tax Id field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>Key 1 to print EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type.</p> <p>Key 2 to print SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type.</p> <p>Leave blank if the Federal Tax ID Type cannot be determined.</p> <p><i>Default Value:</i> The value from the AP Open Payables Header File (APOHD) or the AP History Header File (APHHD).</p> <p><i>Valid Values:</i> blank, 1 or 2.</p> <p>(A 1) Optional</p>
Dft Exp	<p>With the company for this voucher, for invoices, the default will be the account number identified as the default expense account through the GL Transfer Definition (MENU GLXFER), Function A. For pre-receipt invoices, the default will be the account number identified as the Pre-Receipt Inventory Account through the GL Transfer Definition (MENU GLXFER), Function A.</p>
AP Acct	<p>With the company for this voucher, the accounts payable account that is credited upon posting this voucher.</p>
CD Acct	<p>With the company for this voucher, the cash discount that is credited when posting this voucher if a discount is taken.</p>
F12=Cancel	<p>Press F12=CANCEL to cancel this change and return to the 1099 Code Maintenance Screen (p. 58-2).</p>
Enter	<p>Press ENTER to confirm your selections. The 1099 Code Maintenance Screen (p. 58-2) will appear.</p>

Use the Print 1099 Edit List option to print the 1099 Edit List, which provides you with a breakdown of 1099 data based on selection criteria. Using the paid invoices that are flagged with **1099 Required** as the control, this report is available in both a detail and summary format. 1099 control information can be maintained through Maintain 1099 Information (MENU APMASST).

Print 1099 Edit List

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
1099 Edit List Selection Screen	Use to specify the companies and vendors for which you are printing forms.
1099 Edit List	Prints the 1099 information for vendors that match the specified range.

Headings	<p>Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number.</p> <p>Summary of the selection criteria prints in the center of the headings area followed by the individual field headings.</p> <p>The company number and name are also printed, as well as if the report is printed in 'summary' or 'detail' format.</p>

1099 Edit List Summary and Detail Reports

Report/Listing Fields	Description
Vendor Name and Address	The vendor number, name and address for vendors which have 1099 information.
Soc Sec/Fed Id#	<p>The display of this field is based on your authorization to Allow Access to Federal Tax ID in Application Action Authority (MENU XASCTY). If you are not authorized, the field will display asterisks. If you are authorized, the un-encrypted federal tax identification code will display.</p> <p>The social security number or tax identification number for the selected vendor. If the 1099 Required field is Y and the Federal Tax ID field is blank, this field will display as ??-UNKNOWN-?? .</p> <p>If authorized, data for this field can be maintained through Maintain 1099 Information (MENU APMASST).</p>
Type	<p>Identifies the type of taxpayer identification number the value in the corresponding Fed Id# field is. This type is determined by the IRS. Note that this field is a required field in the 1099 export file.</p> <p>EIN (the IRS code for Employee Identification Number), which is a business, organization, some sole proprietors or other entity account type, prints for code 1.</p> <p>SSN (the IRS code for Social Security Number), which is an individual, including some sole proprietors account type, prints for code 2.</p> <p>This field is blank if the Federal Tax ID Type cannot be determined.</p> <p>Data for this field can be maintained through Maintain 1099 Information (MENU APMASST).</p>
Total Paid	This is the total amount paid to the vendor. Only amounts paid by system generated checks (including pre-paid vouchers and vouchers processed via ACH) are included. Manual checks are not included in this process.
Voucher	<p>This field only displays if you selected the Report Type as D on the 1099 Edit List Selection Screen (p. 59-2).</p> <p>The voucher number for the selected vendor; multiple vouchers may be shown.</p>
Amount	<p>This field only displays if you selected the Report Type as D on the 1099 Edit List Selection Screen (p. 59-2).</p> <p>The monetary amount paid for the selected voucher. These voucher amounts will equal the Total Paid field.</p>

1099 Edit List Summary and Detail Reports

Report/Listing Fields	Description
Cde	<p>This field only displays if you selected the Report Type as D on the 1099 Edit List Selection Screen (p. 59-2).</p> <p>The 1099 Cde assigned to the voucher. This code represents the IRS 1099 amount type applicable to this voucher.</p> <p>If the code indicates the IRS 1099 amount type is Nonemployee Compensation, and therefore will be included on a 1099-NEC rather than 1099-MISC form, the code will be preceded by an asterisk (*).</p> <p>This field can be maintained through Maintain 1099 Information (MENU APMASST).</p>
Inv Desc	<p>This field only displays if you selected the Report Type as D on the 1099 Edit List Selection Screen (p. 59-2).</p> <p>The invoice description for the selected voucher.</p>
Company Total	<p>The total amount for each company.</p>

CHAPTER 60 **Printing 1099 Forms**

Use the Print 1099 Forms option on the Accounts Payable Master Menu (MENU APMAS) to print 1099 information (such as payer, payee, and compensation information) in the print format selected in the **1099 Print Format** field in AP Company Options Maintenance (MENU APFIL2). Based on the format selected, when you print 1099-MISC and/or 1099-NEC IRS forms through this option, they will print on pre-printed, standard IRS approved forms for either Continuous feed printers (one form per sheet) or Laser/Inkjet printers (portrait mode, two MISC forms per 8.5 x 11 sheet in a 2 UP format and three NEC forms per sheet in a 3 UP format).

In this option you will also have the option to export 1099 information.

The 1099 Edit List (MENU APMAS) should be run prior to this option to verify entered selection criteria will generate the expected 1099 form.

NOTE: The information that prints on the 1099 is determined by the information entered on the Voucher Header Screen in Voucher Entry (MENU APMAS). If an assignee is entered in the **Assign** field, that vendor's address information prints on the 1099. If an assignee is not entered, then the vendor's name and address as it appears on the voucher prints on the 1099.

Print 1099 Forms

The screens and/or reports in this option and a brief description are listed in the following table. A complete description of each screen/report is contained in this section.

Title	Purpose
Print 1099 Selection Screen	Use to specify the companies and vendors for which you are printing forms.
Print 1099 Forms -Payer's Information Screen	Use to specify the address and tax ID number for the payer.

Title	Purpose
Export 1099 Records Screen	Use to define 1099 filing information.
1099-Misc Form	Prints payer/payee miscellaneous income information for the 1099 MISC form
1099-NEC Form	Prints payer/payee nonemployee compensation for the 1099-NEC form.
1096 Information Report	Use to fill out 1096 Annual Summary and Transmittal of U.S. Information Returns

F3=Exit	Press the F3=EXIT function key to cancel this option. MENU APMASST will appear.
F5=Create Path	Press the F5=CREATE PATH function key to create a path for the value you keyed in the IFS Export Path field.
F12=Return	Press the F12=RETURN function key to return to the previous screen without saving your values.
Enter	Press the ENTER key to confirm your selections. The Print 1099 Forms - Payer's Information Screen (p. 60-7) appears.

Form 1099-MISC (Rev. 1-2022) Cat. No. 14425J www.irs.gov/Form1099MISC Department of the Treasury - Internal Revenue Service		Do Not Cut or Separate Forms on This Page — Do Not Cut or Separate Forms on This Page			

This prints the 1099-MISC IRS Tax Form (see above sample), in the print format selected in the **1099 Print Format** field in AP Company Options Maintenance (MENU APFIL2). If the **1099 Print Format** field in AP Company Options Maintenance does not contain a value, Continuous feed printing (one form per sheet) will be assumed.

If the IRS 1099 amount type cannot be determined for a particular voucher, Nonemployee Compensation will be assumed, and those values will be included on the 1099-NEC form instead of the 1099-MISC form – refer to the 1099-NEC Form (p. 60-13) for more.

NOTE: The information that prints on the 1099 is determined by the information entered on the Voucher Header Screen in Voucher Entry (MENU APMAIN). If an assignee is entered in the **Assign** field, that vendor's address information prints on the 1099. If an assignee is not entered, then the vendor's name and address as it appears on the voucher prints on the 1099.

1099-MISC Form

Report/Listing Fields	Description
Payer Information	<p>The payer’s name, address, and telephone number with extension (if any) will appear on every form. This information prints in the format that displays on the Print 1099 Forms -Payer’s Information Screen (p. 60-7). The Payer’s Federal Tax ID Number will print in the specified Payer’s Tin box.</p>
Payee Information	<p>One form per payee will print for Continuous feed printing, and two forms for two different payees will print per one page for Laser/Inkjet printers.</p> <p>The Fed Tax ID field from the voucher/invoice prints in the Recipient’s TIN box on the form. The payee’s name and address is printed from information in the Vendor File. This may be maintained through Vendors Maintenance (MENU APFILE).</p>
IRS 1099 Amount Type	<p>The total value of each IRS 1099 amount type of miscellaneous income you are reporting for this vendor/payee will be printed in the appropriate box on this form.</p> <p>Amounts can be reported on this form as noted below, based on the IRS 1099 amount type selected on the voucher, vendor, or AP company option. If no selection could be determined for a particular voucher, that amount will be reported as Nonemployee compensation which is reported on the 1099-NEC form (refer to the 1099-NEC Form pg xxx), not this 1099-MISC form:</p> <p>Supported IRS 1099 amounts for the 1099-MISC form include:</p> <ul style="list-style-type: none"> • Rents • Royalties • Other income • Fishing boat proceeds • Medical and health care payments • Substitute payments in lieu of dividends or interest • Crop insurance proceeds • Excess golden parachute payments • Gross proceeds paid to an attorney

1099-NEC Form

This prints the 1099-NEC IRS Tax Form (see above sample), in the print format selected in the **1099 Print Format** field in AP Company Options Maintenance (MENU APFIL2). If the **1099 Print Format** field in AP Company Options Maintenance does not contain a value, Continuous feed printing (one form per sheet) will be assumed.

If the IRS 1099 amount type cannot be determined for a particular voucher, Nonemployee Compensation will be assumed, and those values will be included on this 1099-NEC form instead of the 1099-MISC form.

NOTE: The information that prints on the 1099 is determined by the information entered on the Voucher Header Screen in Voucher Entry (MENU APMAIN). If an assignee is entered in the **Assign** field, that vendor's address information prints on the 1099. If an assignee is not entered, then the vendor's name and address as it appears on the voucher prints on the 1099.

1099-NEC Form

Report/Listing Fields	Description
Payer Information	The payer's name, address, and telephone number with extension (if any) will appear on every form. This information prints in the format that displays on the Print 1099 Forms -Payer's Information Screen (p. 60-7). The Payer's Federal Tax ID Number will print in the specified Payer's Tin box.

1099-NEC Form

Report/Listing Fields	Description
Payee Information	<p>One form per payee will print for Continuous feed printing, and two forms for two different payees will print per one page for Laser/Inkjet printers.</p> <p>The Fed Tax ID field from the voucher/invoice prints in the Recipient's TIN box on the form. The payee's name and address is printed from information in the Vendor File. This may be maintained through Vendors Maintenance (MENU APFILE).</p>
Nonemployee Compensation	<p>This is the total value of the IRS 1099 amount type of Nonemployee compensation for this vendor/payee.</p> <p>Amounts can be reported on the 1099-NEC form if the IRS 1099 amount type selected on the voucher, vendor, or AP company option indicates Nonemployee compensation. If no selection could be determined for a particular voucher, that amount will be reported as Nonemployee compensation which is reported on this 1099-NEC form rather than the 1099-MISC form.</p>

1096-Information Report

This report is automatically produced when 1099-MISC and/or 1099-NEC form data is generated via the APMAS Print 1099 option; it provides a summary of the data that was included in that particular print/run. This summarized data aids users in completing an IRS 1096 (Annual Summary and Transmittal of Department of the Treasury U.S. Information Returns) form.

AP998		01/23/23	10.11.44	1096 INFORMATION REPORT		F5/APDEMO	PAGE-	1
Vendor From: 100		Check Date From: 01/01/22		Company: 01-A & C Office Supply/USD		Printed 1099s		
To: 200		To: 12/31/22		No Minimum \$ Amount Set				
Tax Form	Total No Of Forms	Total Amt Reported	Amount	Description				
1099-MISC	6	3,800.84						
			66.53	Rents				
			66.53	Royalties				
			967.50	Other income				
			2,022.50	Fishing boat proceeds				
			44.00	Medical and health care payments				
			365.35	Substitute payments in lieu of dividends or interest				
			268.43	Crop insurance proceeds				
1099-NEC	8	10,611.96						
			10,611.96	Nonemployee compensation				
Company Total:	14	14,412.80						

The 1096 Information Summary Report is printed at the end of an APMAS Print 1099 Form process (even if the 1099 data was selected to be exported instead of, or in addition to, being printed). This summary report provides some pertinent 1099-MISC and 1099-NEC data that was included in the run. This data then can easily be used when filling out/completing an IRS-1096 form for reporting.

1096-Information Report

Report/Listing Fields	Description
Headings	Program names appear on the upper left corner of the report followed by run date and time, report title, workstation ID, User ID, and page number. A summary of the selection criteria used for the run is printed in the center of the headings area followed by the individual field headings.
Tax Form	The tax form for which data was generated in this run, based on selection criteria; 1099-MISC and/or a 1099-NEC data may be produced in any one run.
Total No of Forms	The number of each tax form for which data was generated in this run, based on selection criteria.

1096-Information Report

Report/Listing Fields	Description
Total Amt Reported	<p>The total value reported for this tax form included in this run, based on selection criteria. This total includes values from all the supported IRS 1099 amount types for the form specified.</p> <p>When International Currency is installed, the values are shown in the company's local currency.</p>
Amount	<p>The total value reported per IRS 1099 amount type on the noted form, included in this run, based on selection criteria. Refer to the Description field for more regarding the supported amount types.</p> <p>When International Currency is installed, the values are shown in the company's local currency.</p>
Description	<p>The description of the IRS1099 amount type reported on the specified type of tax form, included in this run, based on selection criteria.</p> <p>While only Nonemployee Compensation type values are reported on the 1099-NEC, various other amount types may be reported on the 1099-MISC. The list of other reportable IRS 1099 amount types for any given year for these forms is determined by the IRS and may include:</p> <ul style="list-style-type: none"> •Rents •Royalties •Other income •Fishing boat proceeds •Medical and health care payments •Nonemployee compensation •Substitute payments in lieu of dividends or interest •Crop insurance proceeds •Excess golden parachute payments •Gross proceeds paid to an attorney <p>The default IRS 1099 amount type may be selected in Accounts Payable Company Options Maintenance (MENU APFIL2) and in Vendors Maintenance (MENU APFILE) but a final determination is made, per voucher, in Voucher Entry (MENU APMAIN). If no amount type is specified for a particular voucher, that voucher's value will be reported as Nonemployee compensation on the 1099-NEC form.</p>

Running this option deletes completed Transaction Processor requests from the TRAN3P file. Run this option periodically to clean out data contained in the Transaction Processor File (TRAN3P). You must Stop A+ before running this option.

NOTE: You only need to run this option if you purchased Accounts Payable and General Ledger as a standalone package.

Use this option to stop Distribution A+ in the current environment. This prevents users from signing onto new jobs within Distribution A+. Jobs currently executing will be allowed to complete normally.

NOTE: -If EDI is installed, selecting this option also stops the EDI Transaction Processor and the auto release of incoming EDI documents, if auto release is being used.
-If web@work is installed, you must stop the web@work Information Broker through Stop Web Information Broker (MENU WBMAIN) before you stop Distribution A+. Refer to that option in the web@work manual for additional information.
-If Mail Server is installed, you must stop the Mail Server Broker through Stop Mail Server Broker (MENU MSMMAIN) before you stop Distribution A+. Refer to that option in the Mail Server manual for additional information.

Select this option prior to running any of the following dedicated procedures:

- Day-End Processing (MENU XAMAST), only if you are running a “dedicated” portion of day-end; you do not have to stop Distribution A+ if you are running the “non-dedicated” day-end
- Save Files (MENU XAMAST)
- Save A+ History Library (MENU XAMAST)

Additionally, you must stop Distribution A+ prior to executing any of the following menu options:

- Initialize CRM Files (MENU OSMASST or MENU SWMASST)
- Rebuild the Customer Search File (MENU XAMAST)
- Rebuild the Item Search File (MENU XAMAST)
- Remove Deleted Records from Files (MENU XAMAST)

Perform this option through Stop A+ on the Cross Application - Master Menu (MENU XAMAST).

Refer to the Cross Applications User Guide for a detailed description of this task.

If Distribution A+ has been stopped through Stop A+ (MENU XAMAST/MENU APMASST), use this option to start A+. Users can use options and/or procedures once the Start A+ Screen is displayed.

If you have the Electronic Data Interchange (EDI) module installed, this option also starts the EDI Transaction Processor and the auto release of incoming EDI documents, if auto release is being used.

If the Mail Server module is installed, this option will start the Mail Server Broker if the **Start Mail Server Broker when A+ is started** field is set to Y through Mail Server System Options Maintenance (MENU MSFILE).

Perform this option through Start A+ on the Cross Application - Master Menu (MENU XAMAST).

Refer to the Cross Applications User Guide for a detailed description of this task.

Glossary

2-Up	Two different 1099 forms printed on one 8.5 X 11 pre-printed page.
Aged Payable	The oldest invoices that have not been paid.
Assignee	Designated during a re-assignment of who pays the bills. The Assignee is the party that you assign to pay your bill, similar to the A/R Headquarters Number.
Business Unit	A two character code assigned to each vendor during Voucher Entry (MENU APMAIN). Can be used to track payables by different branches of the company.
Cash Disbursements	The checks you generate to pay your bills.
Cash Requirements Report	A report that provides you with a look into the future to see how much cash you will need. It will help you decide whether or not it is necessary to borrow money.
Credit Memo	A statement that identifies a correction to an existing invoice in Open Payables. Credit memos are negative amounts.
Debit Memo	A statement that identifies a correction to an existing invoice in Open Payables. Debit memos are positive amounts. An example of this would be if you were billed for 10 items, but received only 8 items. You would create a debit memo for 2 items since you did not receive them.
Discounts	A percentage taken off your bill if you pay within a certain time frame. You discount the amount yourself if you pay within a certain number of days.
Force Discount	A type of discount that lets you to take the discount offered by the payment terms of the vendor even though you've gone past the discount date. Force discount setting can be 1) always take the discount 2) never take the cash discount if the discount date has passed or 3) decide whether to take the discount in Voucher or Payment Selection.

GS1	GS1 is an international not-for-profit association with member organizations in over 100 countries. GS1 is dedicated to the design and implementation of global standards and solutions to improve the efficiency and visibility of supply and demand chains globally and across sectors. The GS1 system of standards is the most widely used supply chain standards system in the world.
GTIN (Global Trade Item Number)	Global Trade Item Number (GTIN), as defined in the document called “An Introduction to the Global Trade Item Number”, is a unique identifier for trade items developed by the GS1, which include both products and services that are sold, delivered, and invoiced at any point in the supply chain. Such identifiers are used to look up product information in a database (often by inputting the number through a bar code scanner pointed at an actual product) which may belong to a retailer, manufacturer, collector, researcher, or other entity. The uniqueness and universality of the identifier is useful in establishing which product in one database corresponds to which product in another database, especially across organizational boundaries.
Group ID	An identification code for the voucher group you are adding or changing.
Open Payable	A list of outstanding invoices that have not been paid.
Payment Days	The number of days you have until payment is due.
Payment Priority	A numerical value that describes the priority level for making payments through Voucher Entry (MENU APMAN). The payment priority value can be high (make payment as soon as possible), medium, or low.
Payment Terms	The terms set up for you by the vendor. For example, if your terms are 2% 10 Net 30, then you may deduct 2% from your payment if you pay within 10 days, otherwise you pay the full amount within 30 days.
Posting Date	The date on which Accounts Payable transactions are posted to General Ledger.
Prepaid Invoice	An invoice in which you pay for goods and services before you receive them. This practice is typical for overseas/international vendors. Another example may be if a local vendor needs cash before leaving your building, and you don't have time for a check run, so you pay him cash.
Purchase Journal	The report that shows which vouchers have been posted in Accounts Payable.
Remittance	A document printed with a check that gives detail invoice information for each check.
Vendor Invoice	The vendor's invoice number.

Vendor Performance	The monthly monetary amount of business you do with a vendor.
Voucher	An invoice in payable. It is a written acknowledgment that says you are going to pay a bill (an invoice from a vendor). You enter a voucher once you validate the products received from a vendor. It is a brief record that shows you the amount you are going to pay the vendor for something that you received from them.
Voucher Edit	The process of checking your voucher entries for errors. This edit is performed through Voucher Edit List (MENU APMAIN). A voucher group cannot be posted until it has successfully passed the edit, meaning that no errors are found in your vouchers.
Voucher Edit List	The report that shows the error-free transactions for each voucher in a voucher group. This report is created through Voucher Edit List (MENU APMAIN).
Voucher Entry	The process of creating voucher groups. The minimum voucher group is one voucher.
Voucher Error List	The report that shows the errors found in your vouchers. This report is created through Voucher Edit List (MENU APMAIN).
Voucher Group	A quantity of assigned vouchers entered together for processing. A voucher group must contain at least one voucher.
Voucher Post	The process when vouchers are posted to General Ledger through Post Vouchers (MENU APMAIN). When a voucher has been posted, it then becomes an open payable. Posting vouchers creates a Purchase Journal.
Voucher Processing	The means by which vouchers are keyed, edited, and posted in Accounts Payable. Vouchers are processed in groups, called voucher groups. Once a voucher is posted, it becomes an open payable. Once it becomes an open payable it can then be selected for payment in Payment Selection (MENU APCHCK).
Voucher Template	A voucher group that has been designed for the sole purpose of copying it in order to create a new group. Templates are useful for voucher entries that are standard or recurring. Standard voucher entries are different in dollar amounts only. Recurring voucher entries are the same (like a monthly rent payment).
