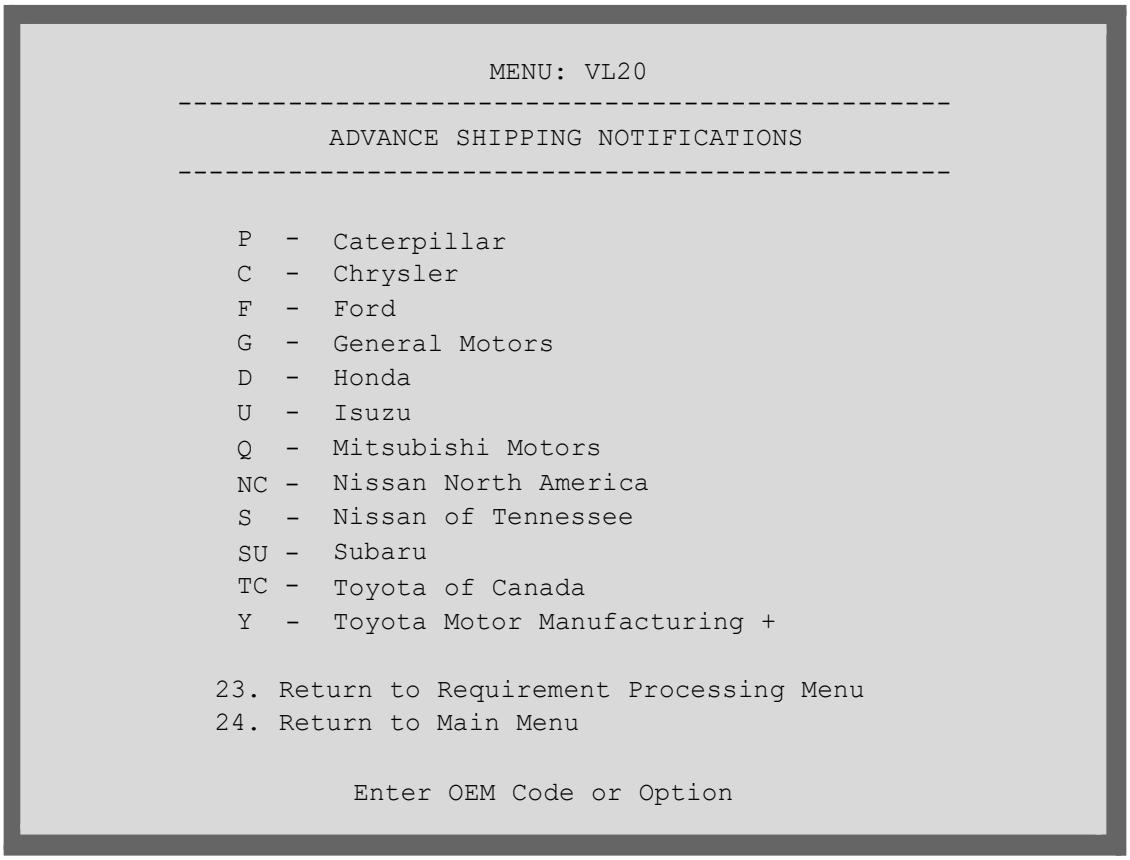
Chapter 4: Variable Length ASNs

TABLE OF CONTENTS

ASN Menu **2**

Possible Error Messages **3**

ASN Menu



This screen is an example of how menu VL20 may look. Each client has a unique screen based on the trading partner modules on its system. Each user may have a unique screen based on the trading partner menus for which they have been given user authority through the Set Up Security File option on the System Maintenance Menu.

Enter the OEM code and press Enter to display the ASN Menu for a specific trading partner.

Note: All traditional ASN trading partner menus are named “VL8xx” (“xx” = the OEM code). Menus can also be accessed using F5 to display the GO TO window and entering VL8 in the Menu Name field and the OEM code in the OEM Code field.

See the trading partner document for each individual trading partner to see the menu that is called and for a detailed description of each menu option unique to this trading partner.

See the ASN Options chapter for a description of the options on the VL8 menu that are the same for all trading partners.

Possible Error Messages

Enter OEM Code or Option AA

OEM Code AA is Invalid

Enter the valid OEM code and press Enter. OEM codes for OEMs available for this user profile are listed on this screen. A complete list is found in Appendix A.

Enter OEM Code or Option GL

OEM Code GL not found in Authorization File for user FUTURE

All libraries that each user profile may access must be entered in the library list for that user profile. This is done through the Set Up Security File option on the System Maintenance Menu.

Enter OEM Code or Option __

User Profile XXXXXX not found in Authorization File

There is no library list for the user profile named in this error message. The library list is entered for each user profile through the Set Up Security File option on the System Maintenance Menu.
