FHY-RECORD (FHY) – Hierarchy Structure Record	5-143
FIN-RECORD (FIN) – Institution Record	5-145
FIR-RECORD (FIR) – Institution Reports Record	5-158
FLB-RECORD (FLB) – Subledger Account Detail Budget Set Record	5-199
FLG-RECORD (FLG) – Security Log Record	5-203
FLP-RECORD (FLP) – Last Day of Period Record	5-205
FNP-RECORD (FNP) – Reports to Cost Center Record	5-208
FNR-RECORD (FNR) – Account Reconciliation Rules Record	5-210
FNT-RECORD (FNT) – Account Reconciliation Open Item Record	5-213
FOA-RECORD (FOA) – Online Report to Account Record	5-219
FOR-RECORD (FOR) – Online Report Record	5-226
FOX-RECORD (FOX) – Online Report Index Record	5-228
FPA-RECORD (FPA) – Preprocessor Account Record	5-231
FPB-RECORD (FPB) – Preprocessor Branch Department Record	5-236
FPC-RECORD (FPC) – Preprocessor Transaction Code Record	5-239
FPI-RECORD (FPI) – Preprocessor Institution Number Change Record	5-242
FPN-RECORD (FPN) – Preprocessor Application Change Record	5-244
FPP-RECORD (FPP) – Preprocessor Account Proration Record	5-248
FPS-RECORD (FPS) – Preprocessor Account Subledger Change Record	5-253
FPT-RECORD (FPT) – Preprocessor Transaction Type Change Record	5-257
FRA-RECORD (FRA) – Batch Release Approval	5-260
FRF-RECORD (FRF) – Related Function Definition Record	5-264
FRP-RECORD (FRP) – Responsible Person Record	5-266
FRR-RECORD (FRR) – Report Writer Report Record	5-268
FRW-RECORD (FRW) – Report Writer Parameter Set Record	5-271
FSA-RECORD (FSA) – Suspense Account Record	5-274
FSB-RECORD (FSB) – Subledger Account Detail Amount Set Record	5-276
FSJ-RECORD (FSJ) – Standard Journal Entry Transaction Record	5-279
FSL-RECORD (FSL) – Subledger Account Detail Record	5-282
FSP-RECORD (FSP) – Suspense Profile Record	5-285
FSS-RECORD (FSS) – Suspense to Suspense Account Record	5-287
FST-RECORD (FST) – Posted Transactions History Record	5-289
FSV-RECORD (FSV) – Subledger Account Detail Level Record	5-295
FSW-RECORD (FSW) – Posted Transaction Center Index Record	5-298
FSX-RECORD (FSX) – Posted Transaction Effective Date Index Record	5-299

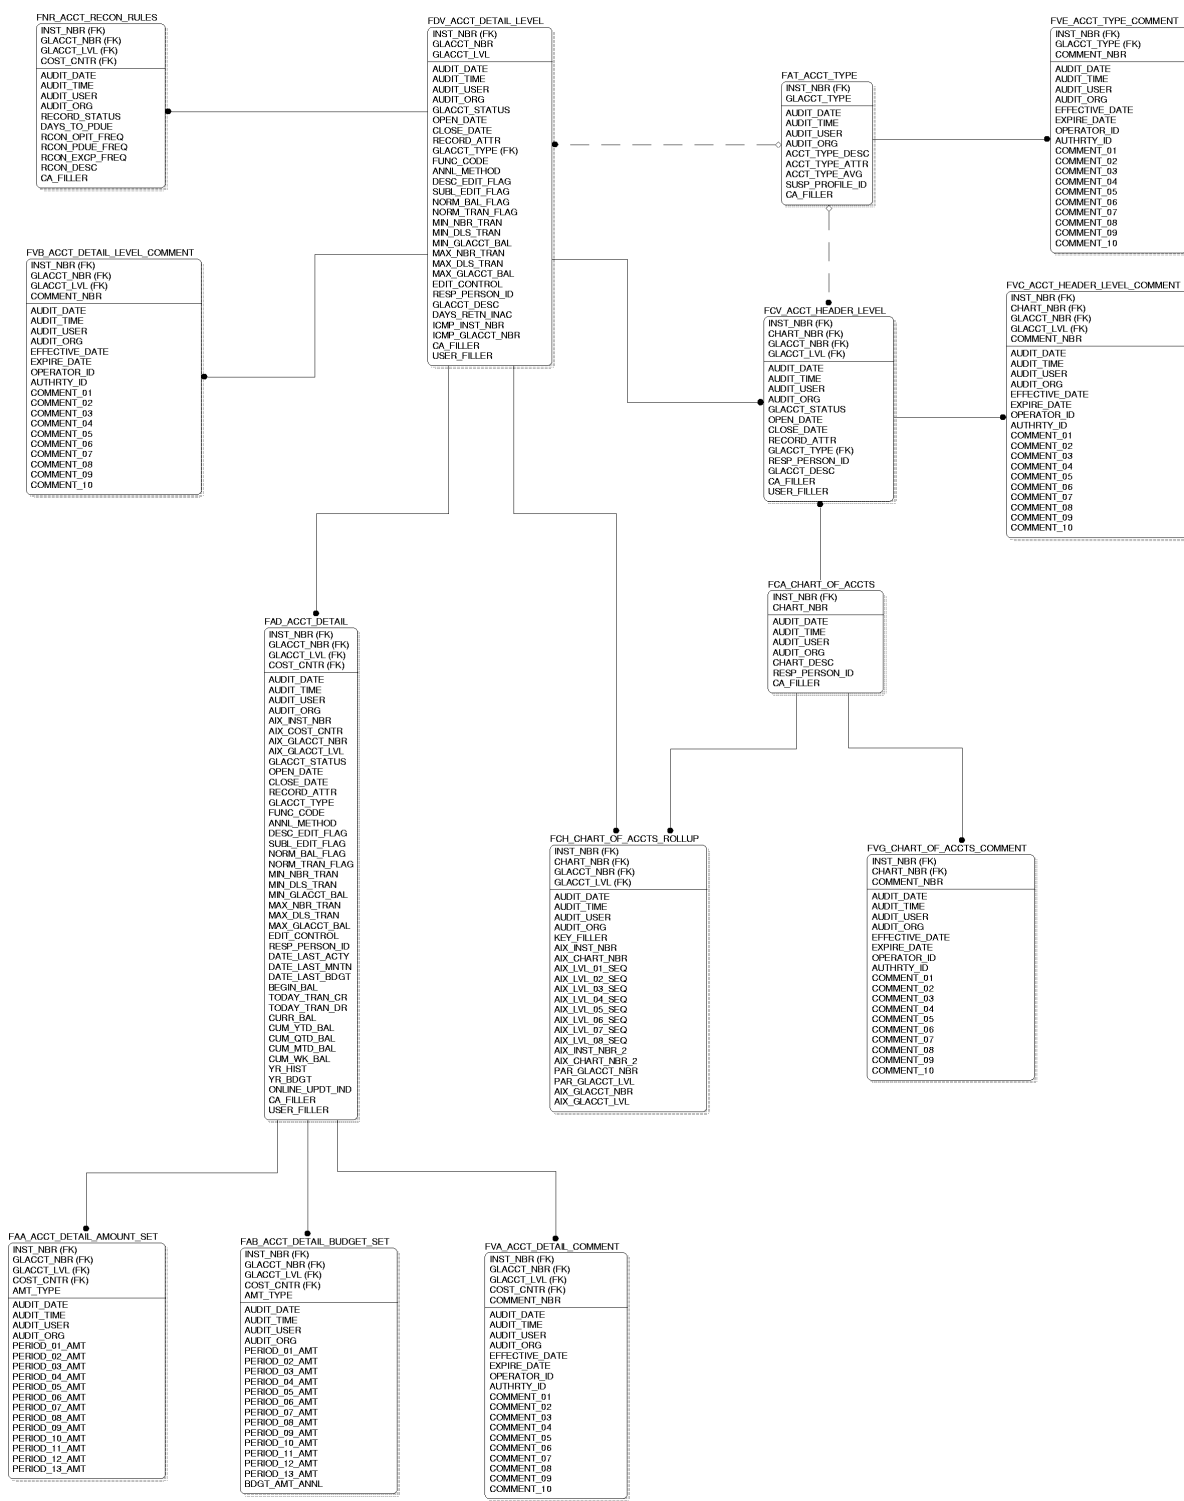

FSY-RECORD (FSY) – Posted Transaction Document Index Record	5-300
FSZ-RECORD (FSZ) – Posted Transaction Operator Index Record	5-301
FTN-RECORD (FTN) – Cost Center Record	5-302
FTR-RECORD (FTR) – Cost Center Reports Option Record	5-304
FVA-RECORD (FVA) – Account Detail Comments Record	5-313
FVB-RECORD (FVB) – Account Detail Level Comments Record	5-316
FVC-RECORD (FVC) – Account Header Level Comments Record	5-319
FVD-RECORD (FVD) – Account Reconciliation Item Comments Record	5-322
FVE-RECORD (FVE) – Account Type Comments Record	5-325
FVF-RECORD (FVF) – Batch Header Comments Record	5-328
FVG-RECORD (FVG) – Chart of Accounts Comments Record	5-331
FVH-RECORD (FVH) – Cost Center Comments Record	5-334
FVI-RECORD (FVI) – Distribution Profile Comments Record	5-337
FVJ-RECORD (FVJ) – Hierarchy Comments Record	5-340
FVK-RECORD (FVK) – Hierarchy Entry Comments Record	5-343
FVL-RECORD (FVL) – Hierarchy Option Profile Comments Record	5-346
FVM-RECORD (FVM) – Preprocessor Account Comments Record	5-349
FVN-RECORD (FVN) – Preprocessor Account Subledger Comments Record	5-352
FVO-RECORD (FVO) – Preprocessor Application Comments Record	5-355
FVP-RECORD (FVP) – Preprocessor Branch Department Comments Record	5-358
FVQ-RECORD (FVQ) – Preprocessor Institution Comments Record	5-361
FVR-RECORD (FVR) – Preprocessor Transaction Code Comments Record	5-364
FVS-RECORD (FVS) – Preprocessor Transaction Type Comments Record	5-367
FVT-RECORD (FVT) – Related Function Comments Record	5-370
FVU-RECORD (FVU) – SJE Comments Record	5-373
FVV-RECORD (FVV) – Transaction Comments Record	5-376
FVW-RECORD (FVW) – Subledger Account Detail Level Comments Record	5-379

FXL-RECORD (FXL) – Log Record	5-385
FXR-RECORD (FXR) – Commit/Restart Control Record	5-388

Index

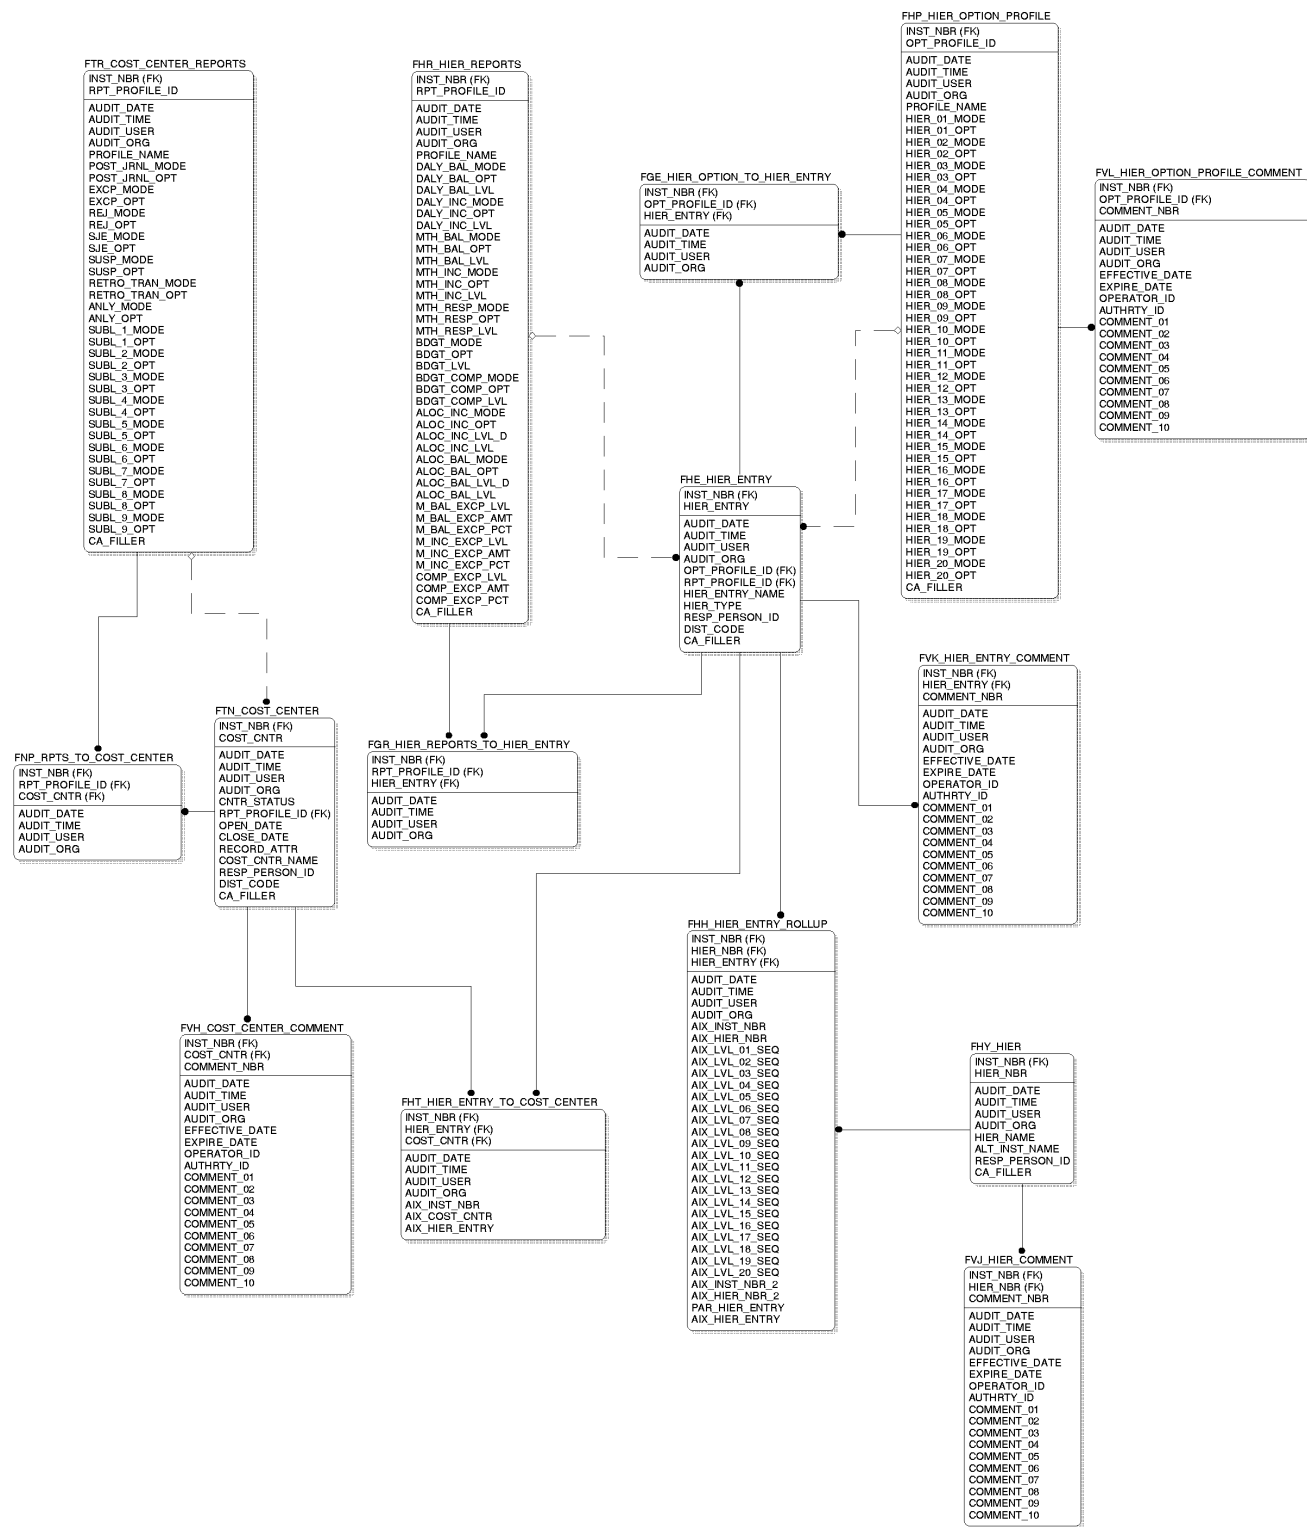

API Records

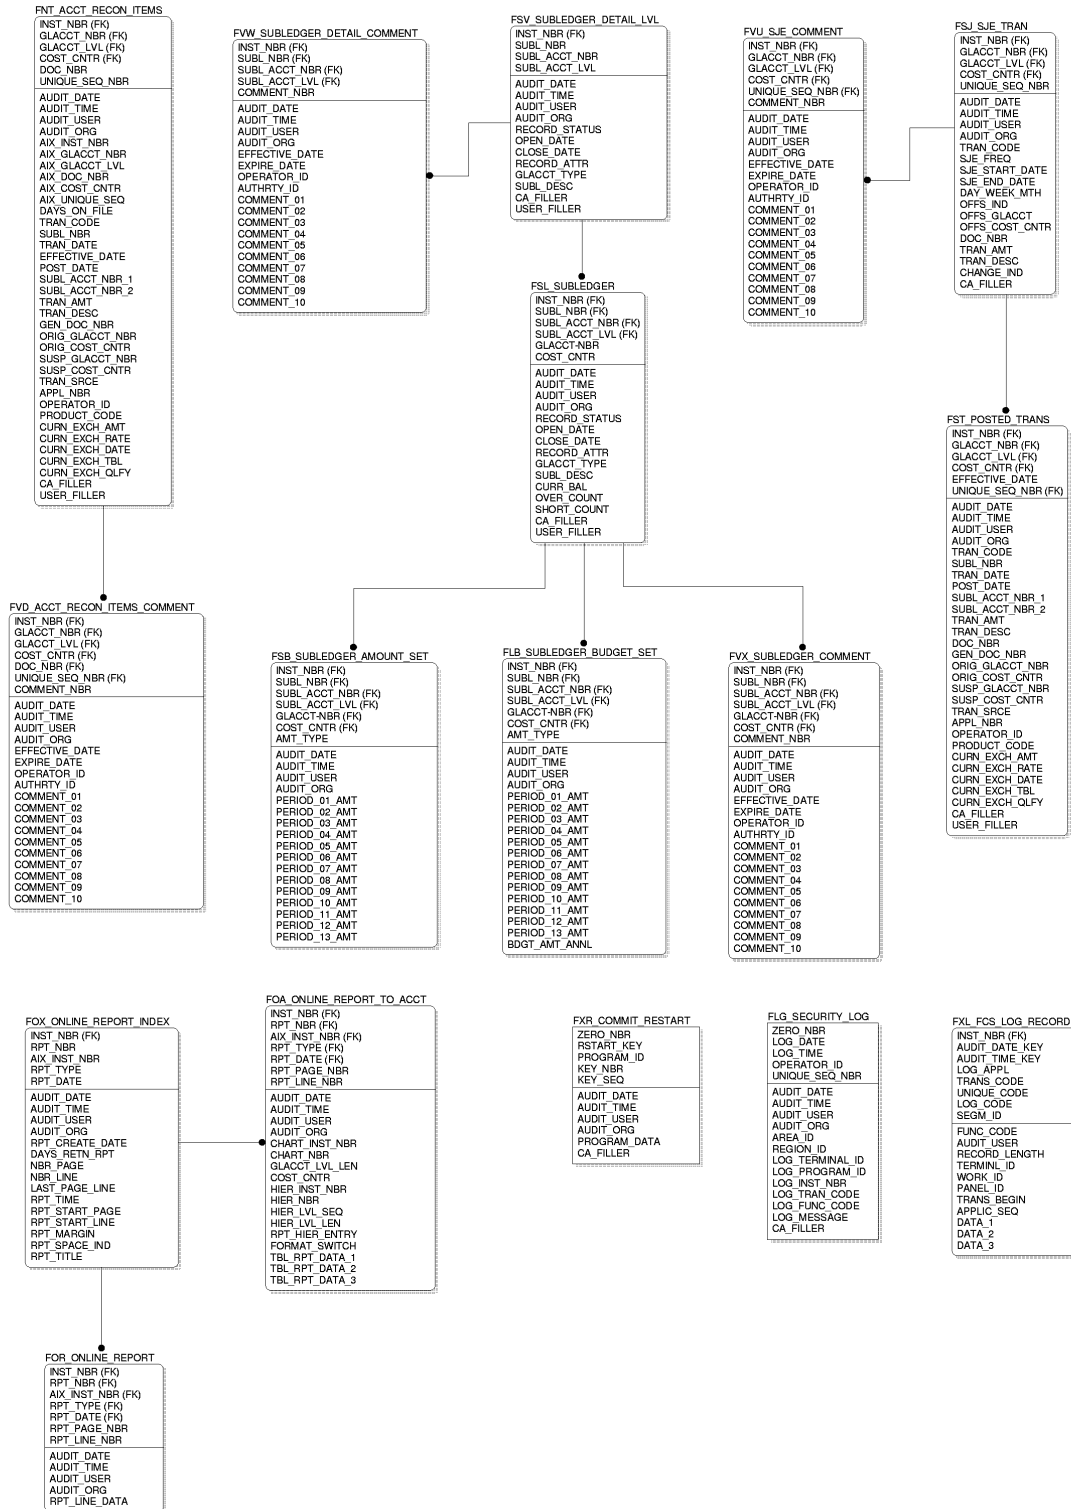

This chapter describes the records used by FCS that are accessed through the Application Program Interface (API). They are listed in alphabetical order by record ID. Included are all input data formats. Each record is introduced by a brief narrative defining the type of information contained and how it is used. A detailed description of each record then follows.

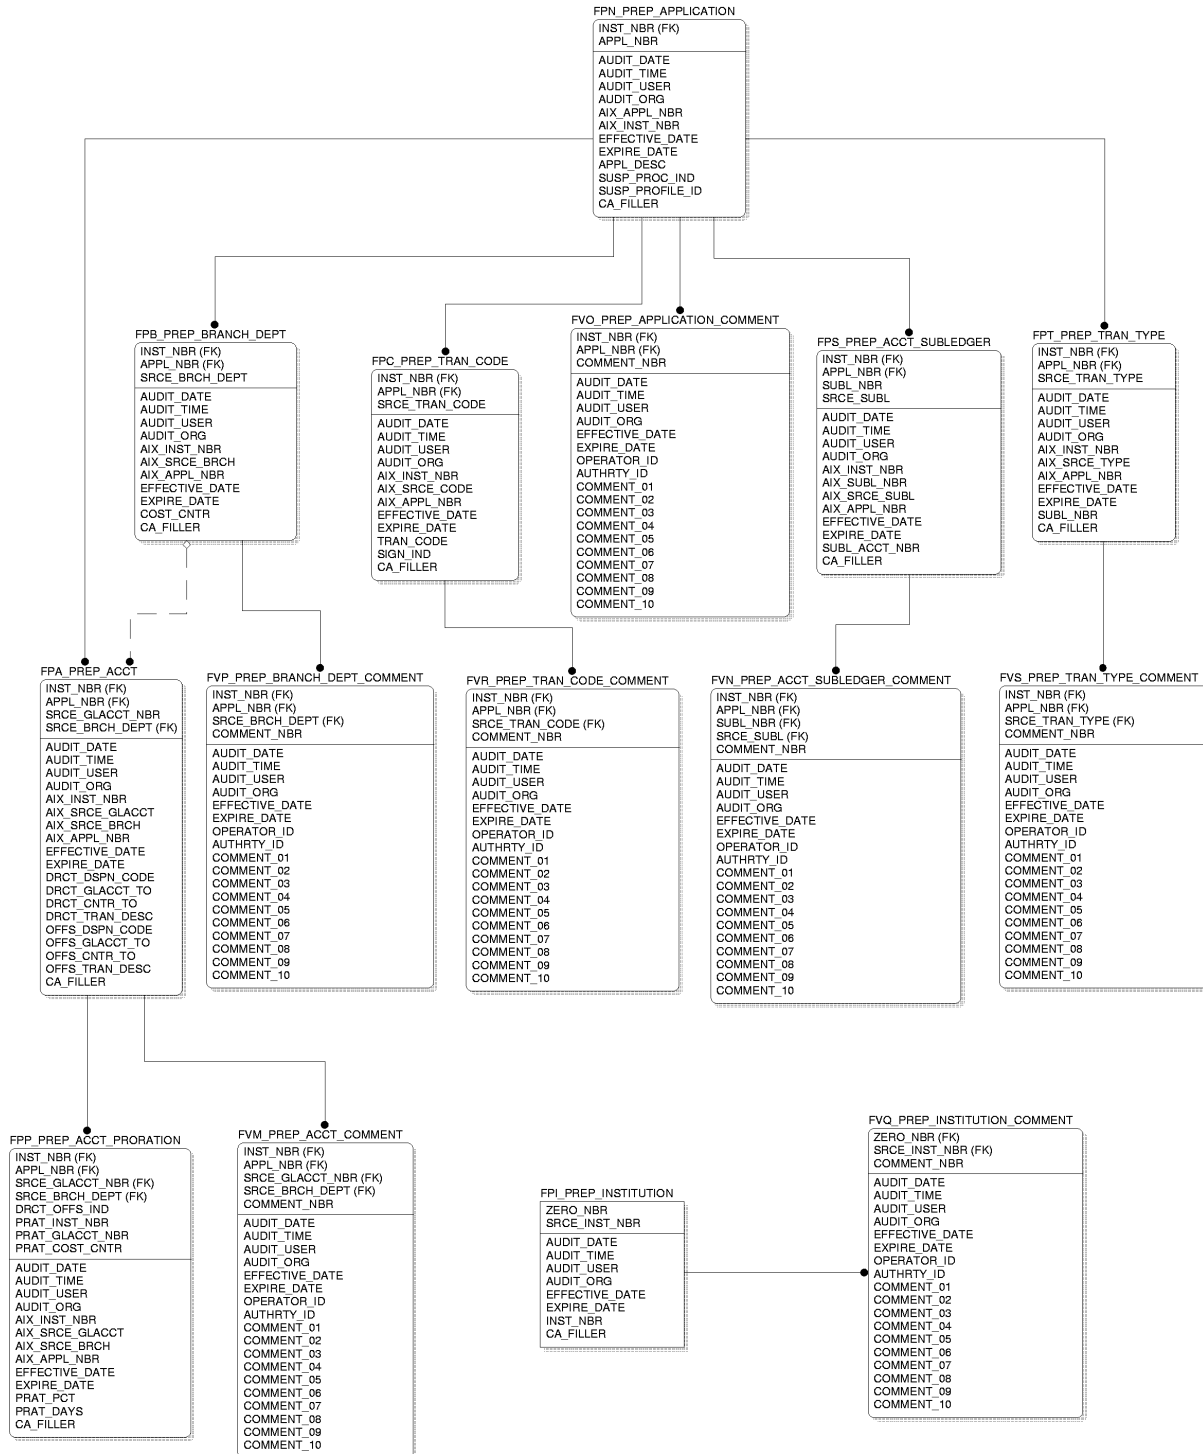

FCS Entity Relationship Diagram

MICM Entity Relationship Diagram

Internal/External Record Codes Table

Listed below are the internal and external API record ID codes used by the Financial Control System. This table provides a cross-reference between the internal record codes (physical record names) which are used by the Application Program Interface (API) and their corresponding external record codes (logical record names) used by FCS, and the associated record name/description.

Note: A logical name is an application-oriented synonym for a physical record name. Each logical name used within an application conveys specific meaning to that application. For more information, see the Infopoint Runtime Components *Reference Guide*.

Internal/External Record Code	Record Name	Record Description
FAA	FAA-RECORD	Account Detail Amount Set Record
FAB	FAB-RECORD	Account Detail Budget Set Record
FAD	FAD-RECORD	Account Detail Record
FAH	FAH-RECORD	Application to Batch Record
FAS	FAS-RECORD	Account Summary Amount Set Record
FAT	FAT-RECORD	Account Type Record
FBH	FBH-RECORD	Batch Record
FBR	FBR-RECORD	Budget Rate Transactions Record
FBT	FBT-RECORD	Budget Dollar Transactions Record
FCA	FCA-RECORD	Chart of Accounts Record
FCH	FCH-RECORD	Chart of Accounts Rollup Record
FCL	FCL-RECORD	Calendar Record
FCM	FCM-RECORD	Control Parameter Maintenance Record
FCV	FCV-RECORD	Account Header Level Record
FDP	FDP-RECORD	Distribution Profile Record
FDT	FDT-RECORD	Dollar Transaction Record
FDV	FDV-RECORD	Account Detail Level Record
FDY	FDY-RECORD	Days per Period Record
FEN	FEN-RECORD	Environment Record
FFA	FFA-RECORD	Related Function to Account Record

Internal/External Record Code	Record Name	Record Description
FGE	FGE-RECORD	Hierarchy Option to Hierarchy Entry Record
FGI	FGI-RECORD	Group to Institution Record
FGM	FGM-RECORD	GL Maintenance Transaction Record
FGP	FGP-RECORD	Group Record
FGR	FGR-RECORD	Reports to Hierarchy Entry Record
FHE	FHE-RECORD	Hierarchy Entry Record
FHH	FHH-RECORD	Hierarchy Entry Rollup Record
FHP	FHP-RECORD	Hierarchy Option Profile Record
FHR	FHR-RECORD	Hierarchy Reports Record
FHT	FHT-RECORD	Hierarchy Entry to Cost Center Record
FHY	FHY-RECORD	Hierarchy Structure Record
FIN	FIN-RECORD	Institution Record
FIR	FIR-RECORD	Institution Reports Record
FLB	FLB-RECORD	Subledger Account Detail Budget Set Record
FLG	FLG-RECORD	Security Log Record
FLP	FLP-RECORD	Last Day of Period Record
FNP	FNP-RECORD	Reports to Cost Center Record
FNR	FNR-RECORD	Account Reconciliation Rules Record
FNT	FNT-RECORD	Account Reconciliation Open Item Record
FOA	FOA-RECORD	Online Report to Account Record
FOR	FOR-RECORD	Online Report Record
FOX	FOX-RECORD	Online Report Index Record
FPA	FPA-RECORD	Preprocessor Account Record
FPB	FPB-RECORD	Preprocessor Branch Department Record
FPC	FPC-RECORD	Preprocessor Transaction Code Record
FPI	FPI-RECORD	Preprocessor Institution Number Change Record

Internal/External Record Code	Record Name	Record Description
FPN	FPN-RECORD	Preprocessor Application Change Record
FPP	FPP-RECORD	Preprocessor Account Proration Record
FPS	FPS-RECORD	Preprocessor Account Subledger Change Record
FPT	FPT-RECORD	Preprocessor Transaction Type Change Record
FRA	FRA-RECORD	Batch Release Approval Record
FRF	FRF-RECORD	Related Function Definition Record
FRP	FRP-RECORD	Responsible Person Record
FRR	FRR-RECORD	Report Writer Report Record
FRW	FRW-RECORD	Report Writer Parameter Set Record
FSA	FSA-RECORD	Suspense Account Record
FSB	FSB-RECORD	Subledger Account Detail Account Set Record
FSJ	FSJ-RECORD	Standard Journal Entry Transaction Record
FSL	FSL-RECORD	Subledger Account Detail Record
FSP	FSP-RECORD	Suspense Profile Record
FSS	FSS-RECORD	Suspense to Suspense Account Record
FST	FST-RECORD	Posted Transactions History Record
FSV	FSV-RECORD	Subledger Account Detail Level Record
FSW	FSW-RECORD	Posted Transaction Center Index Record
FSX	FSX-RECORD	Posted Transaction Effective Date Index Record
FSY	FSY-RECORD	Posted Transaction Document Index Record
FSZ	FSZ-RECORD	Posted Transaction Operator Index Record
FTN	FTN-RECORD	Cost Center Record
FTR	FTR-RECORD	Cost Center Reports Option Record
FVA	FVA-RECORD	Account Detail Comments Record
FVB	FVB-RECORD	Account Detail Level Comments Record
FVC	FVC-RECORD	Account Header Level Comments Record

Internal/External Record Code	Record Name	Record Description
FVD	FVD-RECORD	Account Reconciliation Item Comments Record
FVE	FVE-RECORD	Account Type Comments Record
FVF	FVF-RECORD	Batch Header Comments Record
FVG	FVG-RECORD	Chart of Accounts Comments Record
FVH	FVH-RECORD	Cost Center Comments Record
FVI	FVI-RECORD	Distribution Profile Comments Record
FVJ	FVJ-RECORD	Hierarchy Comments Record
FVK	FVK-RECORD	Hierarchy Entry Comments Record
FVL	FVL-RECORD	Hierarchy Option Profile Comments Record
FVM	FVM-RECORD	Preprocessor Account Comments Record
FVN	FVN-RECORD	Preprocessor Account Subledger Comments Record
FVO	FVO-RECORD	Preprocessor Application Comments Record
FVP	FVP-RECORD	Preprocessor Branch Department Comments Record
FVQ	FVQ-RECORD	Preprocessor Institution Comments Record
FVR	FVR-RECORD	Preprocessor Transaction Code Comments Record
FVS	FVS-RECORD	Preprocessor Transaction Type Comments Record
FVT	FVT-RECORD	Related Function Comments Record
FVU	FVU-RECORD	SJE Comments Record
FVV	FVV-RECORD	Transaction Comments Record
FVW	FVW-RECORD	Subledger Account Detail Level Comments Record
FVX	FVX-RECORD	Subledger Account Detail Comments Record
FXL	FXL-RECORD	Log Record
FXR	FXR-RECORD	Commit/Restart Control Record

Database Area Table

This table contains the database areas and API record IDs defined in FCS. The length of each API record is specified along with an indicator as to which records allow a zero institution number in the key.

Area	API Record ID	Length	Zero Inst Allowed?
G01	FAD	360	
G02	FAA	182	
G03	FAB	191	
G04	FAS	171	
G05	FBR	264	
G06	FBT	272	
G07	FCA	120	Y
G08	FCH	134	
G09	FCM	312	
G09	FRA	112	Y
G10	FDP	152	Y
G11	FDT	424	
G12	FDV	264	Y
G13	FCV	192	Y
G14	FFA	060	
G15	FHP	152	Y
G16	FGE	056	Y
G17	FGM	352	
G18	FHE	160	Y
G19	FHR	192	Y
G20	FGR	056	Y
G21	FIN	784	
G22	FIR	296	Y
G23	FLG	192	
G24	FNR	144	Y

Area	API Record ID	Length	Zero Inst Allowed?
G25	FNT	464

API VSAM File Structures Table

This table contains the record definitions of the Financial Control System VSAM Control File entries, as provided by Infopoint. This information is used to control the physical requirements for the API records used by FCS. The logical file names are listed with the API Record IDs they contain. The logical file name can be equated to the DD or DLBL name in the job control language.

Logical File Name	API Record ID
FSFL01	FAD, FSL
FSFL02	FAA
FSFL03	FAB, FAD
FSFL04	FCH, FHH
FSFL05	FCH, FHH
FSFL06	FAT, FCA, FCV, FDV, FGE, FGR, FHE, FHP, FHR, FHT, FHY, FNR, FSA, FSJ, FSP, FSS, FSV
FSFL07	FNT
FSFL08	FST
FSFL09	FCL, FDP, FDY, FEN, FFA, FGI, FGP, FIN, FIR, FLP, FNP, FRA, FRF, FRP, FTN, FTR
FSFL10	FPA, FPB, FPC, FPI, FPN, FPP, FPS, FPT
FSFL11	FLB, FSB
FSFL12	FAH, FBH
FSFL13	FDT
FSFL14	FBR, FBT, FCM, FGM, FRW
FSFL15	FRR
FSFL16	FOR
FSFL17	FOA, FOX
FSFL18	FOA, FOX, FOR
FSFL19	FVA, FVB, FVC, FVD, FVE, FVF, FVG, FVH, FVI, FVJ, FVK, FVL, FVM, FVN, FVO, FVP, FVQ, FVT, FVW, FVX
FSFL20	FLG
FSFL21	FXL, FXR
FSFL22	FAS

Logical File Name	API Record ID
FSFL30	FSW
FSFL31	FSX
FSFL32	FSY
FSFL33	FSZ

Record Descriptions

The records accessed through the Application Program Interface (API) are listed in alphabetical order. The record descriptions are detailed by field. Each field is described by the following headings:

Field Name	Actual COBOL name used in the record.
Token Name	Name used by the data management system that controls the record.
Level	Level number of the field, as assigned in the COBOL record.
Mode	Type of field defined. The following codes are used: <ul style="list-style-type: none">B Binary data only. Refers to COMPUTATIONAL halfword (2-byte), fullword (4-byte) and doubleword (8-byte) fields. Fields can be signed or unsigned.C Character, or alphanumeric data.G Group. Represents the fields immediately following.N Numeric data only.NS Numeric data with sign.P Packed numeric data. Refers to unsigned COMPUTATIONAL-3 fields.PS Packed numeric data with sign. Refers to signed COMPUTATIONAL-3 fields.R Record. This field usually represents the entire record.
Picture	COBOL format of the field indicating the field's content, length, whether it is signed or unsigned, and decimal position.
Displacement	Starting and ending position of the field. The first position used is '1'. If the field is defined with an OCCURS clause, the displacement is represented in 1 of 2 ways. When the field has a mode of 'G', the displacement represents the total length of the field multiplied by the number of occurrences. For all other modes, the displacement represents the length of the first occurrence of the field. When a field has a variable length, a 'V' is placed in the second, or ending, position of the displacement.

FAA-RECORD (FAA) – Account Detail Amount Set Record

This record is created automatically and contains the individual period fields. Twelve periods are available in each amount set. The key to this record is institution number, account number, account level, cost center and amount type. The amount type is used to indicate current year verses last year amount sets through 5-year ago amount sets.

Record Statistics

Record ID	FAA		
Primary Key Length	0041		
Record Name	Library Name	Record Length	
FAA-RECORD	FSSFAATK	0182 bytes	

Record Description

The following record description shows the format of the Account Detail Amount Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FAA-RECORD Group Level.		01	R		1 182
FAA-GRP-KEY Group Level.	GRP_KEY	03	G		1 41
FAA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FAA-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FAA-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FAA-COST-CNTR Cost Center. A unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAA-AMT-TYPE	AMT_TYPE	05	C	X(005)	37	41
Dollar Amount Type. Type of amount represented in the corresponding periods. Valid entries are:						
CYACT	Current year actual.					
CYAVG	Current year average daily balance.					
H1ACT	Last year actual.					
H1AVG	Last year average daily balance.					
H2ACT	Two years ago actual.					
H2AVG	Two years ago average daily balance.					
H3ACT	Three years ago actual.					
H3AVG	Three years ago average daily balance.					
H4ACT	Four years ago actual.					
H4AVG	Four years ago average daily balance.					
H5ACT	Five years ago actual.					
H5AVG	Five years ago average daily balance.					
FAA-AUDIT-GRP	AUDIT_GRP	03	G		42	65
Group Level.						
FAA-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	42	46
Audit Date. Date the record was last updated.						
FAA-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	47	51
Audit Time. Time the record was last updated.						
FAA-AUDIT-USER	AUDIT_USER	05	C	X(008)	52	59
Audit User. Last user (operator or program ID) that updated the record.						
FAA-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	60	65
Audit Organization. DBS organization associated with this record.						
FAA-GRP-DATA	GRP_DATA	03	G		66	182
Group Level.						
FAA-PERIOD-01-AMT	PERIOD_01_AMT	05	PS	S9(15)V9(2)	66	74
Dollar Period Amount. Total dollar amount posted to the corresponding period.						
FAA-PERIOD-02-AMT	PERIOD_02_AMT	05	PS	S9(15)V9(2)	75	83
Dollar Period Amount. Total dollar amount posted to the corresponding period.						
FAA-PERIOD-03-AMT	PERIOD_03_AMT	05	PS	S9(15)V9(2)	84	92
Dollar Period Amount. Total dollar amount posted to the corresponding period.						
FAA-PERIOD-04-AMT	PERIOD_04_AMT	05	PS	S9(15)V9(2)	93	101
Dollar Period Amount. Total dollar amount posted to the corresponding period.						

Field Name	Token Name	Level	Mode	Picture	Displacement
FAA-PERIOD-05-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_05_AMT	05	PS	S9(15)V9(2)	102 110
FAA-PERIOD-06-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_06_AMT	05	PS	S9(15)V9(2)	111 119
FAA-PERIOD-07-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_07_AMT	05	PS	S9(15)V9(2)	120 128
FAA-PERIOD-08-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_08_AMT	05	PS	S9(15)V9(2)	129 137
FAA-PERIOD-09-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_09_AMT	05	PS	S9(15)V9(2)	138 146
FAA-PERIOD-10-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_10_AMT	05	PS	S9(15)V9(2)	147 155
FAA-PERIOD-11-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_11_AMT	05	PS	S9(15)V9(2)	156 164
FAA-PERIOD-12-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_12_AMT	05	PS	S9(15)V9(2)	165 173
FAA-PERIOD-13-AMT Dollar Period Amount. Total dollar amount posted to the corresponding period.	PERIOD_13_AMT	05	PS	S9(15)V9(2)	174 182

FAB-RECORD (FAB) – Account Detail Budget Set Record

This record is created automatically and contains the individual budget period fields. Twelve periods are available in each amount set. Amount types are used to indicate types of budgets (history or working). The number of budget years maintained is defined at the institution level and determines the volume of FAB records. The key to this record is institution number, account number, account level, cost center, and amount type.

Record Description

The following record description shows the format of the Account Detail Budget Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAB-RECORD Group Level.		01	R		1	191
FAB-GRP-KEY Group Level.	GRP_KEY	03	G		1	41
FAB-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FAB-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5	19
FAB-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20	21
FAB-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22	36

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAB-AMT-TYPE	AMT_TYPE	05	C	X(005)	37	41
Budget Amount Type. Type of amount represented in the corresponding budget periods. Valid entries are:						
CYBUD	Current year budget.					
H1BUD	Last year budget.					
H2BUD	Two years ago budget.					
H3BUD	Three years ago budget.					
H4BUD	Four years ago budget.					
H5BUD	Five years ago budget.					
W1BUD	Working budget 1.					
W2BUD	Working budget 2.					
W3BUD	Working budget 3.					
W4BUD	Working budget 4.					
W5BUD	Working budget 5.					
W6BUD	Working budget 6.					
W7BUD	Working budget 7.					
W8BUD	Working budget 8.					
W9BUD	Working budget 9.					
FAB-AUDIT-GRP	AUDIT_GRP	03	G		42	65
Group Level.						
FAB-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	42	46
Audit Date. Date the record was last updated.						
FAB-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	47	51
Audit Time. Time the record was last updated.						
FAB-AUDIT-USER	AUDIT_USER	05	C	X(008)	52	59
Audit User. Last user (operator or program ID) that updated the record.						
FAB-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	60	65
Audit Organization. DBS organization associated with this record.						
FAB-GRP-DATA	GRP_DATA	03	G		66	191
Group Level.						
FAB-PERIOD-01-AMT	PERIOD_01_AMT	05	PS	S9(15)V9(2)	66	74
Budget Period Amount. Total budget amount posted to the corresponding period.						
FAB-PERIOD-02-AMT	PERIOD_02_AMT	05	PS	S9(15)V9(2)	75	83
Budget Period Amount. Total budget amount posted to the corresponding period.						
FAB-PERIOD-03-AMT	PERIOD_03_AMT	05	PS	S9(15)V9(2)	84	92
Budget Period Amount. Total budget amount posted to the corresponding period.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAB-PERIOD-04-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_04_AMT	05	PS	S9(15)V9(2)	93	101
FAB-PERIOD-05-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_05_AMT	05	PS	S9(15)V9(2)	102	110
FAB-PERIOD-06-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_06_AMT	05	PS	S9(15)V9(2)	111	119
FAB-PERIOD-07-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_07_AMT	05	PS	S9(15)V9(2)	120	128
FAB-PERIOD-08-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_08_AMT	05	PS	S9(15)V9(2)	129	137
FAB-PERIOD-09-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_09_AMT	05	PS	S9(15)V9(2)	138	146
FAB-PERIOD-10-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_10_AMT	05	PS	S9(15)V9(2)	147	155
FAB-PERIOD-11-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_11_AMT	05	PS	S9(15)V9(2)	156	164
FAB-PERIOD-12-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_12_AMT	05	PS	S9(15)V9(2)	165	173
FAB-PERIOD-13-AMT Budget Period Amount. Total budget amount posted to the corresponding period.	PERIOD_13_AMT	05	PS	S9(15)V9(2)	174	182
FAB-BDGT-AMT-ANNL Budget Annual Amount. Amount posted to the annual budget. This amount is specified on the direct budget entry Transaction 52.	BDGT_AMT_ANNL	05	PS	S9(15)V9(2)	183	191

FAD-RECORD (FAD) – Account Detail Record

This record contains data at the account/cost center level. Information such as current balance, today's debit and credits, date of last activity, maintenance and budget activity and this month's beginning balance are part of this record. Cumulative amounts are updated if the account type indicates averages are maintained. The edit criteria fields used during processing are copied from the FDV Record when this record is created. If needed, the edit criteria data at this level can be changed without affecting the FDV Record. These records are established based on activity or General Ledger maintenance parameters.

FAD-RECORD	FSSFADTK	0360 bytes	

Record Description

The following record description shows the format of the Account Detail Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FAD-RECORD Group Level.		01	R		1 360
FAD-GRP-KEY Group Level.	GRP_KEY	03	G		1 36
FAD-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FAD-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FAD-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FAD-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FAD-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		37 60
FAD-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	37 41

Field Name	Token Name	Level	Mode	Picture	Displacement	
Audit Date. Date the record was last updated.						
FAD-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	42	46
Audit Time. Time the record was last updated.						
FAD-AUDIT-USER	AUDIT_USER	05	C	X(008)	47	54
Audit User. Last user (operator or program ID) that updated the record.						
FAD-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	55	60
Audit Organization. DBS organization associated with this record.						
FAD-GRP-AIX1	GRP_AIX1	03	G		61	96
Group Level.						
FAD-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	61	64
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.						
FAD-AIX-COST-CNTR	AIX_COST_CNTR	05	N	9(015)	65	79
Cost Center. Unique number for each accounting unit and each function in the organization.						
FAD-AIX-GLACCT-NBR	AIX_GLACCT_NBR	05	N	9(015)	80	94
Account Number. Identifies a General Ledger Master File account number.						
FAD-AIX-GLACCT-LVL	AIX_GLACCT_LVL	05	N	9(002)	95	96
Account Level. Identifies the account header level. Valid entries are 01 – 08 .						
FAD-GRP-DATA	GRP_DATA	03	G		97	360
Group Level.						
FAD-GLACCT-STATUS	GLACCT_STATUS	05	C	X(001)	97	97
Account Status. Status of account. Valid entries are: 0 Record is open. 1 Record is closed.						
FAD-OPEN-DATE	OPEN_DATE	05	N	9(008)	98	105
Open Date. Date on which the account was added by Transaction 03, 23, 45, 47, or 48 (create), or the date on which it was last changed from closed to open status.						
FAD-CLOSE-DATE	CLOSE_DATE	05	N	9(008)	106	113
Close Date. Date on which the account was last changed from open to closed status by Transaction 03 or 23.						
FAD-RECORD-ATTR	RECORD_ATTR	05	C	X(008)	114	121
Record Attributes. User-defined data associated with this account.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAD-GLACCT-TYPE	GLACCT_TYPE	05	C	X(002)	122	123
Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid entries are:						
01	Assets.					
05	Liabilities.					
10	Capital.					
20	Income.					
25	Expense.					
30	Taxes.					
35	Nonoperating income.					
40	Nonoperating expense.					
90	Memo – balance account.					
95	Memo – activity account.					
FAD-FUNC-CODE	FUNC_CODE	05	N	9(015)	124	138
Related Function Code. Relates an account to a specific function and can be substituted for the cost center during cost allocation processing. It is used to redefine account relationships previously established by means of the cost center.						
FAD-ANNL-METHOD	ANNL_METHOD	05	N	9(004)	139	142
Annualizing Technique. Used to compare incomplete current year actual data to future budgets. Valid entries are:						
0001	Actual + budget.					
0002	Actual + average actual.					
0003	Actual + budget adjusted by past variance.					
0004	Actual + budget + average variance.					
0005	Actual + last month times number of months remaining.					
0006	Actual + projected actual based on last year actual.					
FAD-DESC-EDIT-FLAG	DESC_EDIT_FLAG	05	C	X(001)	143	143
Description Edit Flag. Forces all transactions against an account to contain a description. Valid entries are:						
1	Description required on transactions.					
2	Description not required.					
FAD-SUBL-EDIT-FLAG	SUBL_EDIT_FLAG	05	C	X(001)	144	144
Subledger Edit Flag. Forces all transactions against an account to have a subledger number. Valid entries are:						
1	Transaction must have subledger number.					
2	Number not required.					
3	Transaction must have 2 subledger fields coded.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAD-NORM-BAL-FLAG	NORM_BAL_FLAG	05	C	X(001)	145	145
Normal Balance Flag. Causes an account to appear on the exception report if it changes unexpectedly. Valid entries are:						
1 Debit or credit balance.						
2 Debit balance expected.						
3 Credit balance expected.						
FAD-NORM-TRAN-FLAG	NORM_TRAN_FLAG	05	C	X(001)	146	146
Normal Transaction Flag. Causes any transaction with an unexpected sign to appear on the exception report. Valid entries are:						
1 Debits and credits expected.						
2 Debits only expected.						
3 Credits only expected.						
FAD-MIN-NBR-TRAN	MIN_NBR_TRAN	05	PS	S9(07)	147	150
Minimum Number of Transactions. Minimum expected number of transactions received in 1 day. If the number is not met, the account appears on an exception report.						
FAD-MIN-DLS-TRAN	MIN_DLS_TRAN	05	PS	S9(15)	151	158
Minimum Transaction Dollars. Minimum expected dollar amount of any one transaction processed against this account. Transactions with a smaller dollar amount appear on an exception report.						
FAD-MIN-GLACCT-BAL	MIN_GLACCT_BAL	05	PS	S9(15)	159	166
Minimum Account Balance. Minimum expected balance for this account. If the balance falls below this amount, the account appears on an exception report.						
FAD-MAX-NBR-TRAN	MAX_NBR_TRAN	05	PS	S9(07)	167	170
Maximum Number of Transactions. Maximum expected number of transactions received in 1 day. If the number is exceeded, the account appears on an exception report.						
FAD-MAX-DLS-TRAN	MAX_DLS_TRAN	05	PS	S9(15)	171	178
Maximum Transaction Dollars. Maximum expected dollar amount of any 1 transaction processed against this account. Transactions with a larger dollar amount appear on an exception report.						
FAD-MAX-GLACCT-BAL	MAX_GLACCT_BAL	05	PS	S9(15)	179	186
Maximum Account Balance. Maximum expected balance for this account. If the balance exceeds this amount, the account appears on an exception report.						

Field Name	Token Name	Level	Mode	Picture	Displacement
FAD-EDIT-CONTROL	EDIT_CONTROL	05	N	9(004)	187 190
Edit Control. Internal code generated to control exception testing. The following table indicates which edits are performed, where B = account balance, D = transaction dollar, N = normal balance, and T = number of transactions.					
Value	Edits	Value	Edits		
01	----	09	---N		
02	T---	10	T--N		
03	-D--	11	-D-N		
04	TD--	12	TD-N		
05	--B-	13	--BN		
06	T-B-	14	T-BN		
07	-DB-	15	-DBN		
08	TDB-	16	TDBN		
FAD-RESP-PERSON-ID	RESP_PERSON_ID	05	C	X(008)	191 198
Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).					
FAD-DATE-LAST-ACTY	DATE_LAST_ACTY	05	N	9(008)	199 206
Last Activity Date. Date on which the last dollar transaction was posted to this account.					
FAD-DATE-LAST-MNTN	DATE_LAST_MNTN	05	N	9(008)	207 214
Last Maintenance Date. Date on which the last maintenance Transaction 04, 05, 06, 45, 47, 48 (change), 10, or 30 was posted to this account.					
FAD-DATE-LAST-BDGT	DATE_LAST_BDGT	05	N	9(008)	215 222
Last Budget Date. Date on which the last budget Transaction 51 or 52 with budget number zero (current budget) or Transaction 82 with a current budget destination was posted to this account.					
FAD-BEGIN-BAL	BEGIN_BAL	05	PS	S9(15)V9(2)	223 231
This Month Beginning Balance. Balance for this account at the beginning of the first day of the current month.					
FAD-TODAY-TRAN-CR	TODAY_TRAN_CR	05	PS	S9(15)V9(2)	232 240
Today's Transaction Credits. Total dollar amount of credits posted to this account today.					
FAD-TODAY-TRAN-DR	TODAY_TRAN_DR	05	PS	S9(15)V9(2)	241 249
Today's Transaction Debits. Total dollar amount of debits posted to this account today.					
FAD-CURR-BAL	CURR_BAL	05	PS	S9(15)V9(2)	250 258
Current Balance. Current balance of the account. For balance accounts, this is the actual balance. For income and expense accounts, this is the net amount since the books were last closed.					
FAD-CUM-YTD-BAL	CUM_YTD_BAL	05	PS	S9(15)V9(2)	259 267
Cumulative Year-to-date Balance. Cumulative year-to-date balance for this account. This value is accumulated for balance account types only.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAD-CUM-QTD-BAL	CUM_QTD_BAL	05	PS	S9(15)V9(2)	268	276
Cumulative Quarter-to-date Balance. Cumulative quarter-to-date balance for this account. This value is accumulated for balance account types only.						
FAD-CUM-MTD-BAL	CUM_MTD_BAL	05	PS	S9(15)V9(2)	277	285
Cumulative Month-to-date Balance. Cumulative month-to-date balance for this account. This value is accumulated for balance account types only.						
FAD-CUM-WK-BAL	CUM_WK_BAL	05	PS	S9(15)V9(2)	286	294
Cumulative Week-to-date Balance. Cumulative week-to-date balance for this account. This value is accumulated for both balance sheet and activity account types. For balance accounts, the current balance is added for each day of the week and is used to complete week-to-date averages. For activity accounts, this cumulative represents the net amount of all debits and credits posted during the current week.						
FAD-YR-HIST	YR_HIST	05	N	9(002)	295	296
Years of History. Number of years history that currently exist for the account.						
FAD-YR-BDGT	YR_BDGT	05	N	9(002)	297	298
Years of Budget. Number of years budget history that currently exist for the account.						
FAD-ONLINE-UPDT-IND	ONLINE_UPDT_IND	05	C	X(001)	299	299
Online Update Indicator. Indicates whether an online realtime dollar transaction has been posted to this account since the last batch posting cycle was executed. Valid entries are:						
0 No online update has been performed.						
1 One or more online updates have been performed.						
FAD-CA-FILLER	CA_FILLER	05	C	X(031)	300	330
Reserved for system use.						
FAD-USER-FILLER	USER_FILLER	05	C	X(030)	331	360
User-defined.						

FAH-RECORD (FAH) – Application to Batch Record

This record is created automatically when the FBH Record is created. This record is a key only record with an embedded alternate key. The primary key is used to get all applications for a given institution and the alternate key is used to get all batches for a given institution. Refer to the record layout below for the complete structure of each key.

Record Statistics

Record ID	FAH	
Primary Key Length	0022	
Record Name	Library Name	Record Length
FAH-RECORD	FSSFAHTK	0068 bytes

Record Description

The following record description shows the format of the Application to Batch Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FAH-RECORD Group Level.		01	R		1 68
FAH-GRP-KEY Group Level.	GRP_KEY	03	G		1 22
FAH-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FAH-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:	APPL_NBR	05	N	9(004)	5 8
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.				
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)				
0100	Deposits application.				
0150	Exception Administrator application.				
0200	Time Investment application.				
0300	Account Analysis application.				
0500	Commercial Loans application.				
0550	Installment Loans application.				
0600	Teller application.				
0700	Accounts Payable application.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FAH-BATCH-NBR	BATCH_NBR	05	N	9(004)	9	12
Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:						
9000 – 9099	FCS institution recycle batches.					
9100 – 9149	Deposits application.					
9150 – 9199	Exception Administrator application.					
9200 – 9299	Time Investment application.					
9300 – 9399	Account Analysis application.					
9500 – 9549	Commercial Loans application.					
9550 – 9599	Installment Loans application.					
9700 – 9799	Accounts Payable application.					
9800 – 9849	Automated Clearing House application.					
9850 – 9899	MICR application.					
FAH-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	13	14
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FAH-BATCH-DATE	BATCH_DATE	05	N	9(008)	15	22
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FAH-AUDIT-GRP	AUDIT_GRP	03	G		23	46
Group Level.						
FAH-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	23	27
Audit Date. Date the record was last updated.						
FAH-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	28	32
Audit Time. Time the record was last updated.						
FAH-AUDIT-USER	AUDIT_USER	05	C	X(008)	33	40
Audit User. Last user (operator or program ID) that updated the record.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAH-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	41	46
FAH-GRP-AIX1 Group Level.	GRP_AIX1	03	G		47	68
FAH-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	47	50
FAH-AIX-BATCH-NBR Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are: 9000 – 9099 FCS institution recycle batches. 9100 – 9149 Deposits application. 9150 – 9199 Exception Administrator application. 9200 – 9299 Time Investment application. 9300 – 9399 Account Analysis application. 9500 – 9549 Commercial Loans application. 9550 – 9599 Installment Loans application. 9700 – 9799 Accounts Payable application. 9800 – 9849 Automated Clearing House application. 9850 – 9899 MICR application.	AIX_BATCH_NBR	05	N	9(004)	51	54
FAH-AIX-BATCH-TYPE Batch Type. Indicates the type of batch. Valid entries are: CF Control File batch. GL General Ledger batch. RR Reject Recycle batch. RW Report Writer batch. SR Suspense Recycle batch.	AIX_BATCH_TYPE	05	C	X(002)	55	56
FAH-AIX-BATCH-DATE Batch Date. Date on which the batch of transactions was added to the warehouse.	AIX_BATCH_DATE	05	N	9(008)	57	64

Field Name	Token Name	Level	Mode	Picture	Displacement
FAH-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	65 68
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:					
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.				
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)				
0100	Deposits application.				
0150	Exception Administrator application.				
0200	Time Investment application.				
0300	Account Analysis application.				
0500	Commercial Loans application.				
0550	Installment Loans application.				
0600	Teller application.				
0700	Accounts Payable application.				
0800	Automated Clearing House application.				
0850	MICR application.				
0900	FCS online application.				
0901	FCS batch application.				

FAS-RECORD (FAS) – Account Summary Amount Set Record

This record is created by batch program FCS905 and contains the individual period fields in account headers. Twelve periods are available in each amount set. The key to this record is the institution number, chart number, account number, account level and amount type. The amount type is used to indicate current year verses last year amount sets through 5-year ago amount sets.

Record Statistics

Record ID	FAS		
Primary Key Length	0030		
Record Name	Library Name	Record Length	
FAS-RECORD	FSSFASTK	0171 bytes	

Record Description

The following record description shows the format of the Account Detail Amount Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAS-RECORD Group Level.		01	R		1	171
FAS-GRP-KEY Group Level.	GRP_KEY	03	G		1	30
FAS-INST-NBR Institution Number. Number of the institution for which the summary level amounts are assigned	INST_NBR	05	N	9(004)	1	4
FAS-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	CHART_NBR	05	N	9(004)	5	8
FAS-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	9	23
FAS-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	24	25

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAS-AMT-TYPE	AMT_TYPE	05	C	X(005)	26	30
Dollar Amount Type. Type of amount represented in the corresponding periods. Valid entries are:						
CYACT	Current year actual.					
CYAVG	Current year average daily balance.					
H1ACT	Last year actual.					
H1AVG	Last year average daily balance.					
H2ACT	Two years ago actual.					
H2AVG	Two years ago average daily balance.					
H3ACT	Three years ago actual.					
H3AVG	Three years ago average daily balance.					
H4ACT	Four years ago actual.					
H4AVG	Four years ago average daily balance.					
H5ACT	Five years ago actual.					
H5AVG	Five years ago average daily balance.					
FAS-AUDIT-GRP	AUDIT_GRP	03	G		31	54

FAT-RECORD (FAT) – Account Type Record

This record contains the description, attribute, suspense profile identifier, and a flag to indicate if the account type is subject to averaging. This record verifies the account types when new account FDV records are created or account header FCV records are created from General Ledger input parameters or from the FCS online system.

Record Statistics

Record ID	FAT	
Primary Key Length	0006	
Record Name	Library Name	Record Length
FAT-RECORD	FSSFATTK	0120 bytes

Record Description

The following record description shows the format of the Account Type Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FAT-RECORD Group Level.		01	R		1 120
FAT-GRP-KEY Group Level.	GRP_KEY	03	G		1 6
FAT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST-NBR	05	N	9(004)	1 4
FAT-GLACCT-TYPE Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid entries are:	GLACCT_TYPE	05	C	X(002)	5 6
01	Assets.				
05	Liabilities.				
10	Capital.				
20	Income.				
25	Expense.				
30	Taxes.				
35	Nonoperating income.				
40	Nonoperating expense.				
90	Memo – balance account.				
95	Memo – activity account.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAT-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		7	30
FAT-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	7	11
FAT-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	12	16
FAT-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	17	24
FAT-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	25	30
FAT-GRP-DATA Group Level.	GRP_DATA	03	G		31	120
FAT-ACCT-TYPE-DESC Account Type Description. Description of the account type.	ACCT_TYPE_DESC	05	C	X(050)	31	80
FAT-ACCT-TYPE-ATTR Account Type Attribute. Identifies how a user-defined account type is to be processed by FCS. It indicates if the user-defined account type is an asset, liability, income, expense, etc. Reserved for future use.	ACCT_TYPE_ATTR	05	C	X(002)	81	82
FAT-ACCT-TYPE-AVG Balance Forward/Activity. Indicates if the corresponding account type is a balance forward or activity type of account. Activity account types store month-to-date totals and average daily balances are not computed. Valid entries are: A Activity account type. B Balance forward account type.	ACCT_TYPE_AVG	05	C	X(001)	83	83
FAT-SUSP-PROFILE-ID Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP). Suspense profiles are used in three different areas of the system. The preprocessor application suspense profile ID determines the accounts used when an account control record does not exist for an input account number. The institution suspense profile ID is used during the posting cycle to determine the suspense account for posting rejected dollar amounts. The third use of the suspense profile is to force balance a batch of dollar transactions. The preprocessor and posting cycle match against the profile beginning and ending account range to determine the suspense account numbers. Dollar batch force balancing always uses the very first range defined for the suspense profile. (FSP).	SUSP_PROFILE_ID	05	C	X(008)	84	91

Field Name	Token Name	Level	Mode	Picture	Displacement	
FAT-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(029)	92	120

FBH-RECORD (FBH) – Batch Record

This record is part of the data warehouse. Each batch of dollar transactions, control maintenance transactions, budget rate transactions, budget dollar transactions, General Ledger maintenance transactions, and report writer parameters have a batch header. The release date in this record is used to release the batch for processing. An alternate key embedded in this record reads batches by batch types.

Record Statistics

Record Description

The following record description shows the format of the Batch Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FBH-RECORD Group Level.		01	R		1 208
FBH-GRP-KEY Group Level.	GRP_KEY	03	G		1 21
FBH-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FBH-BATCH-NBR Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:	BATCH_NBR	05	N	9(004)	5 8
9000 – 9099	FCS institution recycle batches.				
9100 – 9149	Deposits application.				
9150 – 9199	Exception Administrator application.				
9200 – 9299	Time Investment application.				
9300 – 9399	Account Analysis application.				
9500 – 9549	Commercial Loans application.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
9550 – 9599	Installment Loans application.					
9700 – 9799	Accounts Payable application.					
9800 – 9849	Automated Clearing House application.					
9850 – 9899	MICR application.					
FBH-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FBH-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FBH-RPT-NBR	RPT_NBR	05	N	9(003)	19	21
Report Number. User-defined number to identify a report. Must be a numeric value greater than zero. It is recommended that a 600 series report number be used for Report Writer reports.						
FBH-AUDIT-GRP	AUDIT_GRP	03	G		22	45
Group Level.						
FBH-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	22	26
Audit Date. Date the record was last updated.						
FBH-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	27	31
Audit Time. Time the record was last updated.						
FBH-AUDIT-USER	AUDIT_USER	05	C	X(008)	32	39
Audit User. Last user (operator or program ID) that updated the record.						
FBH-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	40	45
Audit Organization. DBS organization associated with this record.						
FBH-GRP-AIX1	GRP_AIX1	03	G		46	66
Group Level.						

Field Name	Token Name	Level	Mode	Picture	Displacement
FBH-AIX-BATCH-NBR	AIX_BATCH_NBR	05	N	9(004)	46 49
Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:					
9000 – 9099	FCS institution recycle batches.				
9100 – 9149	Deposits application.				
9150 – 9199	Exception Administrator application.				
9200 – 9299	Time Investment application.				
9300 – 9399	Account Analysis application.				
9500 – 9549	Commercial Loans application.				
9550 – 9599	Installment Loans application.				
9700 – 9799	Accounts Payable application.				
9800 – 9849	Automated Clearing House application.				
9850 – 9899	MICR application				
FBH-AIX-BATCH-TYPE	AIX_BATCH_TYPE	05	C	X(002)	50 51
Batch Type. Indicates the type of batch. Valid entries are:					
CF	Control File batch.				
GL	General Ledger batch.				
RR	Reject Recycle batch.				
RW	Report Writer batch.				
SR	Suspense Recycle batch.				
FBH-AIX-BATCH-DATE	AIX_BATCH_DATE	05	N	9(008)	52 59
Batch Date. Date on which the batch of transactions was added to the warehouse.					
FBH-AIX-RPT-NBR	RPT_NBR	05	N	9(003)	60 62
Report Number. User-defined number to identify a report. Must be a numeric value greater than zero. It is recommended that a 600 series report number be used for Report Writer reports.					
FBH-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	63 66
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.					
FBH-GRP-DATA	GRP_DATA	03	G		67 208
Group Level.					
FBH-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	67 67
Status. Identifies if an item has been posted. Valid entries are:					
*	All items have been posted.				
b	No items have been posted.				
U	At least one item has been posted and at least one item has not been posted or is pending.				

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FBH-BATCH-RLSE	BATCH_RLSE	05	C	X(001)	68 68
----------------	------------	----	---	--------	-------

Batch Release/Adjustment Status. Used to set the status of a batch. Valid entries are:

- B** Non-adjustment batch without a status. If a release date is entered on the batch header, the batch is released when the institution current effective processing date matches the release date.
- A** Adjustment batch this is not released. A release date cannot be entered on this batch header.
- F** Non-adjustment batch released during the next first run (or non-dollar maintenance) posting cycle. A release date cannot be entered on this batch header.
- P** Adjustment batch that is also released. If a release date is entered on the batch header, the batch is released when the institution current effective processing date matches the release date. If the release date is blank, the batch is released immediately.
- R** Non-adjustment batch that is released immediately. A release date cannot be entered on this batch header.

FBH-RLSE-DATE	RLSE_DATE	05	N	9(008)	69 76
---------------	-----------	----	---	--------	-------

Batch Release Date. Indicates the date on which a batch is to be released for posting. The batch is posted when the institution current effective processing date matches the release date.

Note: A batch can be released immediately without entering a date. Refer to the Batch Release/Adjustment Status field for further details.

FBH-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	77 84
-----------------	-------------	----	---	--------	-------

Batch Expire Date. Indicates the date on which this batch expires. When this date is reached, all posted items are deleted from the batch. Unposted items remain even after this date is reached but are immediately deleted when posted. The number of Days to Retain Batch Items field should be used if expiration at the item level is desired. Posted items are available for reversal by the FCS posting preprocessor up until this date. After all items have been deleted, the batch header is deleted. This field cannot be entered if the number of Days to Retain Batch Items is used.

FBH-RETN-BATCH	RETN_BATCH	05	C	X(001)	85 85
----------------	------------	----	---	--------	-------

Batch Retention Indicator. Indicates whether the batch is retained on the FCS transaction warehouse. Retained batches must be copied to a regular batch before being released. Valid entries are:

- N** Regular Batch.
- Y** Retained Batch.

FBH-RETN-DAYS	RETN_DAYS	05	N	9(003)	86 88
---------------	-----------	----	---	--------	-------

Days to Retain Batch Items. Number of days to retain transactions within this batch after they have been posted. An entry of **999** retains the batch and all items on the warehouse indefinitely. When the Batch Expire Date is blank, this field defaults to the Retain Days for the corresponding batch type as defined in the Institution Record. The number of days count is maintained at the individual item level and begins on the day each item is posted. When the count for an item exceeds the value specified in this field, the item is deleted from the batch. Unposted items and other items not posted for the requisite number of days remain and are available for reversal by the FCS posting preprocessor. After all items have been deleted, the batch header is deleted. This field cannot be entered if a Batch Expire Date is used.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBH-UPDT-IND	UPDT_IND	05	C	X(001)	89	89
Batch Update Indicator. Indicates whether an item in this batch has been updated since the last FCS posting cycle. For internal use only.						
FBH-BAL-IND	BAL_IND	05	C	X(001)	90	90
Batch Balance Indicator. Indicates whether the batch is in balance or in error. For internal use only. Valid entries are:						
<ul style="list-style-type: none"> b Batch balancing has not been performed. D Batch retro effective dates are out of balance. F Batch amount was forced to balance. N Batch item count or amount is out of balance. Y Batch is in balance. 						
FBH-TRAN-CODE	TRAN_CODE	05	N	9(002)	91	92
Batch Header Transaction Code. Indicates the batch header transaction code. Valid entries are:						
<ul style="list-style-type: none"> 90 Control File. 91 Report Writer. 92 General Ledger Budget Shift. 93 General Ledger Budget Annual. 94 General Ledger Budget Monthly. 95 General Ledger Budget Direct. 96 General Ledger Special. 97 General Ledger Maintenance. 98 General Ledger Dollar. 						
FBH-ITEM-COUNT	ITEM_COUNT	05	PS	S9(09)	93	97
Item Count. Total number of transactions within this batch.						
FBH-BATCH-AMT-DR	BATCH_AMT_DR	05	PS	S9(15)V9(2)	98	106
Debit Amount. Dollar total of all of the debit transactions contained within a batch when separate debit amounts are used by the institution batch balancing method. If separate debit amounts are not used, this field depends upon the specific balancing method set up by Control File Transaction 22.						
FBH-BATCH-AMT-CR	BATCH_AMT_CR	05	PS	S9(15)V9(2)	107	115
Credit Amount. Dollar total of all of the credit transactions contained within a batch when separate credit amounts are used by the institution batch balancing method. If separate credit amounts are not used, this field depends upon the specific balancing method set up by Control File Transaction 22.						

Field Name	Token Name	Level	Mode	Picture	Displacement
FBH-VRFN-OPT	VRFN_OPT	05	C	X(001)	116 116
Batch Verification. Indicates the type of verification editing prior to posting. If this field is blank, the system defaults to a value of '5'. Valid entries are:					
0 Do not perform account or cost center verification.					
1 Verify account/cost center combination. If not valid, verify the cost center from the Control File of the input institution and the account number from the batch alternate institution on the General Ledger Master File. If valid, then generate an account create transaction.					
2 Verify account number only against the institution on the General Ledger Master File.					
3 Verify cost center number only against input institution on the Control File.					
4 Verify account number against the input institution on the General Ledger Master File and the cost center number against input institution on the Control File.					
5 Verify account/cost center combination against the input institution on the GL Master File.					
FBH-VRFN-INST-NBR	VRFN_INST_NBR	05	N	9(004)	117 120
Verification Institution. Institution number used to verify account numbers and to supply account types and descriptions for generated account create transactions. Used only when Batch Verification contains '1'.					
FBH-BATCH-CODE-LIMIT	BATCH_CODE_LIMIT	05	C	X(002)	121 122
Transaction Code Limit. Limits the contents of the batch to the transaction codes specified. Any other transaction codes are rejected. If this field is blank, all the following transaction codes are acceptable. Valid entries are:					
AR Accrual/reversals only.					
CR Credits only.					
DR Debits only.					
FT Future transactions only.					
RG Regular transactions only.					
RT Retroactive transactions only.					
01 Regular debits only.					
02 Regular credits only.					
11 Accrual/reversal debits only.					
12 Accrual/reversal credits only.					
21 Retroactive debits only.					
22 Retroactive credits only.					
31 Future debits only.					
32 Future credits only.					
FBH-SUSP-PROFILE-ID	SUSP_PROFILE_ID	05	C	X(008)	123 130
Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).					
FBH-COST-CNTR-LIMIT	COST_CNTR_LIMIT	05	N	9(015)	131 145
Batch Cost Center Limit. Limits the contents of this batch to transactions for the specified cost center. Any transaction in the batch that does not match this field is rejected.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBH-APPL-NBR	APPL_NBR	05	N	9(004)	146	149
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FBH-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	150	157
Batch Operator ID. Indicates the MICM operator ID of the person that originally entered the batch header or the first person that modified a recycle batch. Only this operator or operators defined with MICM application security code '01' may update or release this batch. All other operators only have inquiry access to this batch.						
FBH-ACCUM-COUNT	ACCUM_COUNT	05	PS	S9(09)	158	162
Accumulated Item Count. Accumulated total number of items within the batch.						
FBH-ACCUM-AMT-DR	ACCUM_AMT_DR	05	PS	S9(15)V9(2)	163	171
Accumulated Debit/Credit Balance. Accumulated total amount of all items within the batch. Separate accumulators are maintained for debit items and credit items.						
FBH-ACCUM-AMT-CR	ACCUM_AMT_CR	05	PS	S9(15)V9(2)	172	180
Accumulated Debit/Credit Balance. Accumulated total amount of all items within the batch. Separate accumulators are maintained for debit items and credit items.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBH-ITEM-IND	ITEM_IND	05	C	X(001)	181	181
Batch Item Indicator. Used to indicate special types of batches entering the system which may require additional approval levels. For example, dollar batch header 98 items are checked for the presence of retroactive items posted to a prior month. These types of batches are flagged with an item indicator '1' to allow special approvals to be defined. Maintenance batch header 97 batches containing 05 and/or 06 transactions are also flagged with item indicator '1'. Valid entries are:						
0 No special items are present in the batch.						
1 Special items are present in the batch.						
FBH-APPROVAL-IND	APPROVAL_IND	05	C	X(001)	182	182
Batch Release Approval Level. Indicates the current number of management approvals that have been performed on a batch. The batch will not be released to the posting cycle until all required approvals have been performed as defined on the FCBCHRA panel. Valid entries are:						
* All required approvals have been performed and the batch will now enter the next posting cycle, or batch was released and was not in the processing window of FCBCHRA.						
b Batch has not been released.						
1 Level 1 approval complete and waiting for level 2.						
2 Level 2 approval complete and waiting for level 3.						
3 Level 3 approval complete and waiting for level 4.						
4 Level 4 approval complete and waiting for level 5.						
5 Level 5 approval complete and waiting for level 6.						
6 Level 6 approval complete and waiting for level 7.						
7 Level 7 approval complete and waiting for level 8.						
8 Level 8 approval complete and waiting for level 9.						
FBH-CA-FILLER	CA_FILLER	05	C	X(026)	183	208
Reserved for system use.						

FBR-RECORD (FBR) – Budget Rate Transactions Record

This record contains the budget rate transactions, which are part of the transaction warehouse. (Budget rate transactions are processed during a posting cycle or a maintenance only run.) Each FBR Record and has a batch header FBH Record associated with it. The transaction code determines if Monthly Budget Percents 1 – 6 or 7 – 12 are used. (A 13th Monthly Budget Percents field is reserved for future use.)

Record Statistics

Record Description

The following record description shows the format of the Budget Rate Transactions Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBR-RECORD Group Level.		01	R		1	264
FBR-GRP-KEY Group Level.	GRP_KEY	03	G		1	27
FBR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4

Field Name	Token Name	Level	Mode	Picture	Displacement
FBR-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:					
9000 – 9099	FCS institution recycle batches.				
9100 – 9149	Deposits application.				
9150 – 9199	Exception Administrator application.				
9200 – 9299	Time Investment application.				
9300 – 9399	Account Analysis application.				
9500 – 9549	Commercial Loans application.				
9550 – 9599	Installment Loans application.				
9700 – 9799	Accounts Payable application.				
9800 – 9849	Automated Clearing House application.				
9850 – 9899	MICR application.				
FBR-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9 10
Batch Type. Indicates the type of batch. Valid entries are:					
CF	Control File batch.				
GL	General Ledger batch.				
RR	Reject Recycle batch.				
RW	Report Writer batch.				
SR	Suspense Recycle batch.				
FBR-BATCH-DATE	BATCH_DATE	05	N	9(008)	11 18
Batch Date. Date on which the batch of transactions was added to the warehouse.					
FBR-ITEM-NBR	ITEM_NBR	05	N	9(009)	19 27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.					
FBR-AUDIT-GRP	AUDIT_GRP	03	G		28 51
Group Level.					
FBR-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28 32
Audit Date. Date the record was last updated.					
FBR-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33 37
Audit Time. Time the record was last updated.					
FBR-AUDIT-USER	AUDIT_USER	05	C	X(008)	38 45
Audit User. Last user (operator or program ID) that updated the record.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	46	51
FBR-GRP-DATA Group Level.	GRP_DATA	03	G		52	264
FBR-RECORD-STATUS Status. Identifies whether a transaction is generated. Valid entries are: B No transaction is generated by batch verification. G Transaction 03 is generated by batch verification.	RECORD_STATUS	05	C	X(001)	52	52
FBR-TRAN-CODE Budget Rate Transaction Code. Identifies the type of budget rate transaction. Valid entries are: 60 Monthly percentage of another year. 61 Monthly rate and account. 62 Monthly percentage and account. 63 Monthly quarter as percent of another quarter. 70 Annual percent of another year. 72 Annual percent and account. 80 Spread annual to 12 months. 81 Compute annual budget from 12 months. 82 Budget shift.	TRAN_CODE	05	N	9(002)	53	54
FBR-RECORD-TYPE Record Type. Specifies the type of record.	RECORD_TYPE	05	C	X(001)	55	55
FBR-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	56	70
FBR-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	71	72
FBR-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	73	87
FBR-HIER-NBR Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999 .	HIER_NBR	05	N	9(004)	88	91
FBR-HIER-ENTRY Cost Center or Hierarchy Entry. Specifies the hierarchy entry for budget record type 'H' or the cost center for budget record type 'C'.	HIER_ENTRY	05	C	X(020)	92	111

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBR-BDGT-PERIOD Reserved for future use.	BDGT_PERIOD	05	N	9(002)	112	113
FBR-SIGN-IND Sign Indicator. Identifies type of amount adjustment. Valid entries are: 1 Debit. 2 Credit.	SIGN_IND	05	C	X(001)	114	114
FBR-BDGT-ADJ-IND Adjustment/Replacement Identifies type of adjustment made. Valid entries are: 1 Replace amounts. 2 Add amounts. 3 Subtract amounts. 4 Reverse sign and replace amounts.	BDGT_ADJ_IND	05	C	X(001)	115	115
FBR-BDGT-NBR Budget Number. Identifies the working budget affected by this transaction. Valid entries are: 01 Working budget 1. 02 Working budget 2. 03 Working budget 3. 04 Working budget 4. 05 Working budget 5. 06 Working budget 6. 07 Working budget 7. 08 Working budget 8. 09 Working budget 9.	BDGT_NBR	05	N	9(002)	116	117
FBR-BDGT-YR-FROM Source Year. Identifies the year or budget used as a basis for this transaction. Valid entries are: 01 – 09 Specified working budget number used as basis. 10 Current year budget is used as basis. 11 Last year budget is used as basis. 12 Two years ago budget is used as basis. 13 Three years ago budget is used as basis. 14 Four years ago budget is used as basis. 15 Five years ago budget is used as basis. 20 Current year actual (annual) is used as basis. 21 Last year actual is used as basis. 22 Two years ago actual is used as basis. 23 Three years ago actual is used as basis. 24 Four years ago actual is used as basis. 25 Five years ago actual is used as basis.	BDGT_YR_FROM	05	N	9(002)	118	119

Note: You must use 01 – 15 for Transactions 80 – 82.

Field Name	Token Name	Level	Mode	Picture	Displacement
FBR-BDGT-QTR-FROM	BDGT_QTR_FROM	05	N	9(001)	120 120
Source Quarter. Indicates quarter within source year serving as basis for calculations on budget Transaction 63. Valid entries are:					
<ol style="list-style-type: none"> 1 First quarter. 2 Second quarter. 3 Third quarter. 4 Fourth quarter. 					
FBR-FROM-GLACCT-NBR	FROM_GLACCT_NBR	05	N	9(015)	121 135
Source Account Number. Identifies the General Ledger account number used as a basis for Budget Transactions 61, 62, and 72. Valid entry must be greater than zero.					
FBR-FROM-COST-CNTR	FROM_COST_CNTR	05	N	9(015)	136 150
Source Cost Center Number. Identifies the cost center associated with a source account specified on Budget Transactions 61, 62, and 72. Valid entry must be greater than zero.					
FBR-BDGT-YR-TO	BDGT_YR_TO	05	N	9(002)	151 152
Destination Year. Identifies the year or budget that is the recipient of the new budget for Transaction 82. Valid entries are:					
<ol style="list-style-type: none"> 01 – 09 Specified working budget number used as basis. 10 Current year budget is used as basis. 11 Last year budget is used as basis. 12 Two years ago budget is used as basis. 13 Three years ago budget is used as basis. 14 Four years ago budget is used as basis. 15 Five years ago budget is used as basis. 					
FBR-BDGT-QTR-TO	BDGT_QTR_TO	05	N	9(001)	153 153
Destination Quarter. Indicates quarter within receiving budget that is changed on budget transaction 63. Valid entries are:					
<ol style="list-style-type: none"> 1 First quarter. 2 Second quarter. 3 Third quarter. 4 Fourth quarter. 					
FBR-BDGT-METHOD	BDGT_METHOD	05	N	9(002)	154 155
Spread Technique. Specifies how to spread the annual budget amount to 12 monthly amounts for Transaction 80. Valid entries are:					
<ol style="list-style-type: none"> 01 Spread level using 30-day months. 02 Spread level using 365-day year. 03 Spread on given percent(s). 04 Spread based on current year actual. 05 Spread based on current year budget. 06 Spread based on last year actual. 					

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FBR-BDGT-ADJ-TYPE	BDGT_ADJ_TYPE	05	C	X(001)	156 156
-------------------	---------------	----	---	--------	---------

Shift Type. Indicates whether the budget is copied, shifted or deleted for Transaction 82. Valid entries are:

- 1 Copy (leave source budget unchanged).
- 2 Shift (delete source budget after move).
- 3 Delete source budget.

Note: This field must be 1 when the Source year is '10' (current).

FBR-NBR-PCT-IND	NBR_PCT_IND	05	C	X(001)	157 157
-----------------	-------------	----	---	--------	---------

Number of Rates Indicator. Indicates if you have provided a single constant rate or a separate rate for each month where calculations are made. Valid entries are:

- 1 A constant rate for all months has been provided in the first field. Use a calendar year (365/366 days) to convert to monthly percents for Transaction 61.
- 2 One rate has been provided for each month. Use a calendar year to convert for Transaction 61.
- 3 A constant rate has been provided in the first field. Use a 360-day year (12 equal months) to convert to monthly percents. Only valid on Transaction 61.
- 4 One rate has been provided for each month. Use a 360-day year to convert to monthly percents. Only valid on Transaction 61.

FBR-RATE-01	RATE_01	05	PS	S9(03)V9(4)	158 161
-------------	---------	----	----	-------------	---------

Monthly Budget Percents 01. Specifies the percentages (up to 12 values) used to calculate the receiving budget amount. The value should be entered as a percentage and not a decimal factor. For example, a value of 23.4 (percent) should be entered to obtain a 0.234 decimal factor. Format is nnn.nnnn.

FBR-RATE-02	RATE_02	05	PS	S9(03)V9(4)	162 165

FBT-RECORD (FBT) – Budget Dollar Transactions Record

This record contains the budget dollar transactions, which are part of the transaction warehouse. (Budget dollar transactions are processing during a posting cycle or a maintenance only run.) Each FBT Record has a batch header record FBH associated with it. The transaction code determines if Budget Period Amounts 1 – 6 or 7 – 12 are used. (A 13th Budget Period Amounts field is reserved for use.)

Record Statistics

Record ID	FBT		
Primary Key Length	0027		
Record Name	Library Name	Record Length	
FBT-RECORD	FSSFBTTK	0272 bytes	

Record Description

The following record description shows the format of the Budget Dollar Transactions Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FBT-RECORD Group Level.		01	R		1 272

FBT-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
-----------------------------	---------	----	---	--	------

FBT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
--	----------	----	---	--------	-----

FBT-BATCH-NBR Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:	BATCH_NBR	05	N	9(004)	5 8
--	-----------	----	---	--------	-----

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.

Field Name	Token Name	Level	Mode	Picture	Displacement
9500 – 9549	Commercial Loans application.				
9550 – 9599	Installment Loans application.				
9700 – 9799	Accounts Payable application.				
9800 – 9849	Automated Clearing House application.				
9850 – 9899	MICR application.				
FBT-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9 10
Batch Type. Indicates the type of batch. Valid entries are:					
CF	Control File batch.				
GL	General Ledger batch.				
RR	Reject Recycle batch.				
RW	Report Writer batch.				
SR	Suspense Recycle batch.				
FBT-BATCH-DATE	BATCH_DATE	05	N	9(008)	11 18
Batch Date. Date on which the batch of transactions was added to the warehouse.					
FBT-ITEM-NBR	ITEM_NBR	05	N	9(009)	19 27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.					
FBT-AUDIT-GRP	AUDIT_GRP	03	G		28 51
Group Level.					
FBT-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28 32
Audit Date. Date the record was last updated.					
FBT-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33 37
Audit Time. Time the record was last updated.					
FBT-AUDIT-USER	AUDIT_USER	05	C	X(008)	38 45
Audit User. Last user (operator or program ID) that updated the record.					
FBT-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	46 51
Audit Organization. DBS organization associated with this record.					
FBT-GRP-DATA	GRP_DATA	03	G		52 272
Group Level.					
FBT-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	52 52
Status. Identifies whether a transaction is generated. Valid entries are:					
b	No transaction is generated by batch verification.				
G	Transaction 03 is generated by batch verification.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBT-TRAN-CODE	TRAN_CODE	05	N	9(002)	53	54
Budget Transaction Code. Identifies the type of budget transaction. Valid entries are:						
51 Direct budget entry periods 01 – 06.						
52 Direct budget entry periods 07 – 12 and annual budget.						
FBT-GLACCT-NBR	GLACCT_NBR	05	N	9(015)	55	69
Account Number. Identifies a General Ledger Master File account number.						
FBT-GLACCT-LVL	GLACCT_LVL	05	N	9(002)	70	71
Account Level. Identifies the account header level. Valid entries are 01 – 08 .						
FBT-COST-CNTR	COST_CNTR	05	N	9(015)	72	86
Cost Center. Unique number for each accounting unit and each function in the organization.						
FBT-BDGT-PERIOD	BDGT_PERIOD	05	N	9(002)	87	88
Reserved for future use.						
FBT-SIGN-IND	SIGN_IND	05	C	X(001)	89	89
Sign Indicator. Identifies type of amount adjustment. Valid entries are:						
1 Debit.						
2 Credit.						
FBT-BDGT-ADJ-IND	BDGT_ADJ_IND	05	C	X(001)	90	90
Adjustment/Replacement. Identifies type of adjustment made. Valid entries are:						
1 Replace amounts.						
2 Add amounts.						
3 Subtract amounts.						
4 Reverse sign and replace amounts.						
FBT-BDGT-NBR	BDGT_NBR	05	N	9(002)	91	92
Budget Number. Identifies the working budget affected by this transaction. Valid entries are:						
01 Working budget 1.						
02 Working budget 2.						
03 Working budget 3.						
04 Working budget 4.						
05 Working budget 5.						
06 Working budget 6.						
07 Working budget 7.						
08 Working budget 8.						
09 Working budget 9.						
FBT-BDGT-01-AMT	BDGT_01_AMT	05	PS	S9(15)V9(2)	93	101
Budget Period Amount 01. Budget amount posted to the corresponding period.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FBT-BDGT-02-AMT Budget Period Amount 02. Budget amount posted to the corresponding period.	BDGT_02_AMT	05	PS	S9(15)V9(2)	102	110
FBT-BDGT-03-AMT Budget Period Amount 03. Budget amount posted to the corresponding period.	BDGT_03_AMT	05	PS	S9(15)V9(2)	111	119
FBT-BDGT-04-AMT Budget Period Amount 04. Budget amount posted to the corresponding period.	BDGT_04_AMT	05	PS	S9(15)V9(2)	120	128
FBT-BDGT-05-AMT Budget Period Amount 05. Budget amount posted to the corresponding period.	BDGT_05_AMT	05	PS	S9(15)V9(2)	129	137
FBT-BDGT-06-AMT Budget Period Amount 06. Budget amount posted to the corresponding period.	BDGT_06_AMT	05	PS	S9(15)V9(2)	138	146
FBT-BDGT-07-AMT Budget Period Amount 07. Budget amount posted to the corresponding period.	BDGT_07_AMT	05	PS	S9(15)V9(2)	147	155
FBT-BDGT-08-AMT Budget Period Amount 08. Budget amount posted to the corresponding period.	BDGT_08_AMT	05	PS	S9(15)V9(2)	156	164
FBT-BDGT-09-AMT Budget Period Amount 09. Budget amount posted to the corresponding period.	BDGT_09_AMT	05	PS	S9(15)V9(2)	165	173
FBT-BDGT-10-AMT Budget Period Amount 10. Budget amount posted to the corresponding period.	BDGT_10_AMT	05	PS	S9(15)V9(2)	174	182
FBT-BDGT-11-AMT Budget Period Amount 11. Budget amount posted to the corresponding period.	BDGT_11_AMT	05	PS	S9(15)V9(2)	183	191
FBT-BDGT-12-AMT Budget Period Amount 12. Budget amount posted to the corresponding period.	BDGT_12_AMT	05	PS	S9(15)V9(2)	192	200
FBT-BDGT-13-AMT Budget Period Amount 13. Budget amount posted to the corresponding period.	BDGT_13_AMT	05	PS	S9(15)V9(2)	201	209
FBT-BDGT-AMT-ANNL Budget Annual Amount. Amount posted to the annual budget. This amount is specified on the Direct Budget Entry Transaction 52.	BDGT_AMT_ANNL	05	PS	S9(15)V9(2)	210	218
FBT-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	219	242

FCA-RECORD (FCA) – Chart of Accounts Record

This record describes an account chart used for validation. An FCA Record must be established before an account header level record (FCV) and a chart of accounts rollup record (FCH) are created. This record can be used as a profile or at the institution level.

Record Statistics

Record ID	FCA		
Primary Key Length	0008		
Record Name	Library Name	Record Length	
FCA-RECORD	FSSFCATK	0120 bytes	

Record Description

The following record description shows the format of the Chart of Accounts Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCA-RECORD Group Level.		01	R		1	120
FCA-GRP-KEY Group Level.	GRP_KEY	03	G		1	8
FCA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FCA-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	CHART_NBR	05	N	9(004)	5	8
FCA-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		9	32
FCA-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	9	13
FCA-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	14	18
FCA-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	19	26

FCA-CHART-DESC Chart Description. Description for the chart of accounts definition.	CHART_DESC	05	C	X(050)	33	82
FCA-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the person responsible this chart of accounts definition. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	83	90
FCA-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(030)	91	120

FCH-RECORD (FCH) – Chart of Accounts Rollup Record

This record describes the sequence of a chart using information from account detail level FDV records and account header level FCV records. (The FDV and FCV records must be established prior to the creation of this record.) Multiple charts of accounts can be created for whatever reporting or processing sequence is required. By reading these records sequentially for a given chart, a GLR960 – General Ledger Master File List Parameters report can be produced. One alternate index is embedded in these records.

Primary Key Length	0025	
Record Name	Library Name	Record Length
FCH-RECORD	FSSFCHTK	0134 bytes

Record Description

The following record description shows the format of the Chart of Accounts Rollup Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FCH-RECORD Group Level.		01	R		1 134
FCH-GRP-KEY Group Level.	GRP_KEY	03	G		1 25
FCH-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FCH-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	CHART_NBR	05	N	9(004)	5 8
FCH-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	9 23
FCH-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	24 25
FCH-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		26 52

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCH-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	26	30
FCH-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	31	35
FCH-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	36	43
FCH-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	44	49
FCH-KEY-FILLER Reserved for system use.	KEY_FILLER	03	C	X(003)	50	52
FCH-GRP-AIX1 Group Level.	GRP_AIX1	03	G		53	92
FCH-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	53	56
FCH-AIX-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	AIX_CHART_NBR	05	N	9(004)	57	60
FCH-AIX-LVL-01-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_01_SEQ	05	B	S9(09)	61	64
FCH-AIX-LVL-02-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_02_SEQ	05	B	S9(09)	65	68
FCH-AIX-LVL-03-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_03_SEQ	05	B	S9(09)	69	72
FCH-AIX-LVL-04-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_04_SEQ	05	B	S9(09)	73	76
FCH-AIX-LVL-05-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_05_SEQ	05	B	S9(09)	77	80
FCH-AIX-LVL-06-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_06_SEQ	05	B	S9(09)	81	84

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCH-AIX-LVL-07-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_07_SEQ	05	B	S9(09)	85	88
FCH-AIX-LVL-08-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_08_SEQ	05	B	S9(09)	89	92
FCH-GRP-AIX2 Group Level.	GRP_AIX2	03	G		93	134
FCH-AIX-INST-NBR-2 Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR_2	05	N	9(004)	93	96
FCH-AIX-CHART-NBR-2 Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	AIX_CHART_NBR_2	05	N	9(004)	97	100
FCH-PAR-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	PAR_GLACCT_NBR	05	N	9(015)	101	115
FCH-PAR-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	PAR_GLACCT_LVL	05	N	9(002)	116	117
FCH-AIX-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	AIX_GLACCT_NBR	05	N	9(015)	118	132
FCH-AIX-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	AIX_GLACCT_LVL	05	N	9(002)	133	134

FCL-RECORD (FCL) – Calendar Record

This record contains date information (current fiscal year only) used throughout the system. An FCL Record is required for each institution.

Record Statistics

Record ID	FCL	
Primary Key Length	0004	
Record Name	Library Name	Record Length
FCL-RECORD	FSSFCLTK	0474 bytes

Record Description

The following record description shows the format of the Calendar Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FCL-RECORD Group Level.		01	R		1 474
FCL-GRP-KEY Group Level.	FCL_GRP_KEY	03	G		1 4
FCL-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FCL-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		5 28
FCL-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	5 9
FCL-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	10 14
FCL-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	15 22
FCL-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	23 28
FCL-GRP-DATA Group Level.	GRP_DATA	03	G		29 108

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCL-FISCAL-YR	FISCAL_YR	05	N	9(004)	29	32
This Year. Current fiscal or calendar year. Format is YYYY. This field is always equal to the current year.						
FCL-PROC-FREQ	PROC_FREQ	05	C	X(001)	33	33
Process Frequency. Indicates the run frequency of the posting cycle for this institution. Valid entries are:						
0 Daily – 5 days a week.						
1 Daily – 6 days a week.						
2 Weekly – day of week specified by week process day; if holiday first working day before.						
3 Weekly – day of week specified by week process day; if holiday first working day afterward.						
4 Monthly – first and last day of month.						
5 Monthly – last day of month.						
6 Daily – 7 days a week.						
FCL-CURR-PROC-DATE	CURR_PROC_DATE	05	N	9(008)	34	41
Current Processing Date. Date the system uses for processing. All of the storage of history, calculation of averages, and periodic reporting in the posting cycle key on this date. The next processing date can be automatically set by entering 'AUTOROLL' on the FCINSTC transaction panel or on the 11021 Control File parameter. If the 'AUTOROLL' option is not used, this field is required. Format is YYYYMMDD.						
FCL-CURR-PROC-JULN	CURR_PROC_JULN	05	N	9(003)	42	44
Current Processing Date. Date the system uses for processing. All of the storage of history, calculation of averages, and periodic reporting in the posting cycle key on this date. The next processing date can be automatically set by entering 'AUTOROLL' on the FCINSTC transaction panel or on the 11021 Control File parameter. If the 'AUTOROLL' option is not used, this field is required. Julian Day Format.						
FCL-LAST-PROC-DATE	LAST_PROC_DATE	05	N	9(008)	45	52
Last Processing Date. Date of the last valid processing date. Used by the Control File maintenance program to verify that processing days are not being skipped accidentally. This date determines how many days were skipped so that cumulatives, etc. can be adjusted. Format is YYYYMMDD.						
FCL-LAST-PROC-JULN	LAST_PROC_JULN	05	N	9(003)	53	55
Last Processing Date. Date of the last valid processing date. Used by the Control File maintenance program to verify that processing days are not being skipped accidentally. This date determines how many days were skipped so that cumulatives, etc. can be adjusted. Julian Day Format.						
FCL-EFF-PROC-DATE	EFF_PROC_DATE	05	N	9(008)	56	63
Effective Date of Processing. Last calendar day processed in a given run.						
FCL-NEXT-YR	NEXT_YR	05	N	9(004)	64	67
Next Year. Next fiscal or calendar year. Format is YYYY.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCL-M-Q-Y-IND	M_Q_Y_IND	05	C	X(001)	68	68
Month-quarter-beginning/Ending Flag. Used by daily processing to determine what special action should be taken. On the first day of the month, the month-to-date cumulative is cleared to zero. On the first day of the quarter, the QTD cumulative is also cleared. Valid entries are:						
<ul style="list-style-type: none"> 0 Normal processing day. 1 First processing day of the month. 2 Last processing day of the month. 3 First processing day of the quarter. 4 Last processing day of the quarter. 5 A nonprocessing day update is being made. This run does not update averages except for the effect of the transactions processed. 6 First nonprocessing day of month. 7 Last nonprocessing day of month. 						
FCL-DAYS-WK	DAYS_WK	05	N	9(003)	69	71
Number of Days Week-to-date. Count of the days that have elapsed since the week began. Used to compute weekly averages.						
FCL-DAYS-MTD	DAYS_MTD	05	N	9(003)	72	74
Number of Days Month-to-date. Count of the days that have elapsed since month began. Used to compute MTD averages.						
FCL-DAYS-QTD	DAYS_QTD	05	N	9(003)	75	77
Number of Days Quarter-to-date. Count of the days that have elapsed since quarter began. Used to compute QTD averages.						
FCL-DAYS-YTD	DAYS_YTD	05	N	9(003)	78	80
Number of Days Year-to-date. Count of the days that have elapsed since the year began. Used to compute YTD averages.						
FCL-WK-PROC-DAY	WK_PROC_DAY	05	N	9(001)	81	81
Weekly Processing Day. When adding or changing an institution with a weekly Processing Frequency of '2' or '3', this field indicates the weekly processing day. Valid entries are:						
<ul style="list-style-type: none"> 0 Not weekly processing. 1 Monday. 2 Tuesday. 3 Wednesday. 4 Thursday. 5 Friday. 6 Saturday. 7 Sunday. 						

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FCL-WK-BEGIN-DAY	WK_BEGIN_DAY	05	N	9(001)	82 82
------------------	--------------	----	---	--------	-------

Week Begin Day. Day of the week on which the week begins. Valid entries are:

- 1 Monday.
- 2 Tuesday.
- 3 Wednesday.
- 4 Thursday.
- 5 Friday.
- 6 Saturday.
- 7 Sunday.

FCL-WK-BEGIN-FLAG	WK_BEGIN_FLAG	05	N	9(001)	83 83
-------------------	---------------	----	---	--------	-------

Week Begin Flag. Used in the daily processing to determine when the week to date cumulative field is to be cleared to zero. Valid entries are:

- 0 Not a week begin.
- 1 Week begin (i.e., the first processing day of a week).

FCL-DAY-WEEK	DAY_WEEK	05	N	9(001)	84 84
--------------	----------	----	---	--------	-------

Day of Week. Indicates what day of the week the current day represents. Used for weekly averages (clear WTD) and for weekly SJE's.

FCL-YR-BEGIN-DAY	YR_BEGIN_DAY	05	N	9(001)	85 85
------------------	--------------	----	---	--------	-------

Year Begin Day. Day of the week on which year begins. Valid entries are:

- 1 Monday.
- 2 Tuesday.
- 3 Wednesday.
- 4 Thursday.
- 5 Friday.
- 6 Saturday.
- 7 Sunday.

FCL-YR-BEGIN-DATE	YR_BEGIN_DATE	05	N	9(008)	86 93
-------------------	---------------	----	---	--------	-------

Year Begin Date. Month, day, and year on which the current fiscal or calendar year begins. The Year Begin Day field must always represent the current year begin date. Format is MMDDYYYY.

FCL-YR-NBR-ADD-ON	YR_NBR_ADD_ON	05	N	9(001)	94 94
-------------------	---------------	----	---	--------	-------

Year Number Add On. Used if a year is called by some number other than the year number in which it began. For example, a year that begins in November of 1999 is called Fiscal Year 1999, but ends in 2000. Valid entries are:

- 0 Use the year fiscal year begins.
- 1 Use the year fiscal year ends.

FCL-YR-TYPE-1	YR_TYPE_1	05	N	9(001)	95 95
---------------	-----------	----	---	--------	-------

Year Type. Indicates whether the last (previous) fiscal year contains February 29 (Leap Year). Valid entries are:

- 0 No.
- 1 Yes.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCL-YR-TYPE-2	YR_TYPE_2	05	N	9(001)	96	96
Year Type. Indicates whether the current fiscal year contains February 29 (Leap Year). Valid entries are:						
0 No.						
1 Yes.						
FCL-RPT-YR	RPT_YR	05	N	9(002)	97	98
Year of Reports. Indicates which year of reporting is produced. The reports can be run for any past year for which data exists on the database. When reports are run for a past year, the last year columns are the prior year. Valid entries are:						
0 Current year.						
1 Last year.						
2 Two years ago.						
3 Three years ago.						
4 Four years ago.						
5 Five years ago.						
FCL-LAST-MTH-END	LAST_MTH_END	05	N	9(002)	99	100
Month of Reports. Specifies month for which reports are produced. When used with Year of Reports, monthly reports can be produced for any past month in any year that exists on the database.						
FCL-ADD-BEGIN-BAL	ADD_BEGIN_BAL	05	PS	S9(03)	101	102
Number of Times to Add Beginning Balance. The number of times that the beginning balance for an account should be added to the month, quarter, and year-to-date cumulative balances. It is set to the number of contiguous nonprocessing days in this month that immediately precede the current processing day.						
FCL-ADD-BEGIN-WK	ADD_BEGIN_WK	05	PS	S9(03)	103	104
Number of Times to Add Beginning Balance WTD. The number of times that the beginning balance for an account should be added to the week-to-date cumulative balance. It is set to the number of contiguous nonprocessing days this week that immediately precede the current processing day.						
FCL-ADD-END-BAL	ADD_END_BAL	05	PS	S9(03)	105	106
Number of Times to Add Ending Balance. The number of times that the ending balance for an account should be added to the month, quarter, and year-to-date cumulative balances. It is set to one plus the number of nonprocessing days to month-end if processing the last day of the month or quarter.						
FCL-ADD-END-WK	ADD_END_WK	05	PS	S9(03)	107	108
Number of Times to Add Ending Balance WTD. The number of times that the ending balance for an account should be added to the week-to-date cumulative balance. It is set to one plus the number of nonprocessing days to week-end if processing on the last processing day of the week.						
FCL-GRP-DAYS	GRP_DAYS	03	G		109	474
Group Level.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCL-DAY-001-090	DAY_001_090	05	C	X(090)	109	198
Day Flag. Internal number used to maintain calendars. Valid entries are:						
0 Normal processing day.						
1 First processing day of month.						
2 Last processing day of month.						
3 First processing day of quarter.						
4 Last processing day of quarter.						
5 Normal nonprocessing day.						
6 First nonprocessing day of month.						
7 Last nonprocessing day of month.						
9 Work day.						
FCL-DAY-091-180	DAY_091_180	05	C	X(090)	199	288
Day Flag. Internal number used to maintain calendars. Valid entries are:						
0 Normal processing day.						
1 First processing day of month.						
2 Last processing day of month.						
3 First processing day of quarter.						
4 Last processing day of quarter.						
5 Normal nonprocessing day.						
6 First nonprocessing day of month.						
7 Last nonprocessing day of month.						
9 Work day.						
FCL-DAY-181-270	DAY_181_270	05	C	X(090)	289	378
Day Flag. Internal number used to maintain calendars. Valid entries are:						
0 Normal processing day.						
1 First processing day of month.						
2 Last processing day of month.						
3 First processing day of quarter.						
4 Last processing day of quarter.						
5 Normal nonprocessing day.						
6 First nonprocessing day of month.						
7 Last nonprocessing day of month.						
9 Work day.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCL-DAY-271-360	DAY_271_360	05	C	X(090)	379	468
Day Flag. Internal number used to maintain calendars. Valid entries are:						
<ul style="list-style-type: none"> 0 Normal processing day. 1 First processing day of month. 2 Last processing day of month. 3 First processing day of quarter. 4 Last processing day of quarter. 5 Normal nonprocessing day. 6 First nonprocessing day of month. 7 Last nonprocessing day of month. 9 Work day. 						
FCL-DAY-361-366	DAY_361_366	05	C	X(006)	469	474
Day Flag. Internal number used to maintain calendars. Valid entries are:						
<ul style="list-style-type: none"> 0 Normal processing day. 1 First processing day of month. 2 Last processing day of month. 3 First processing day of quarter. 4 Last processing day of quarter. 5 Normal nonprocessing day. 6 First nonprocessing day of month. 7 Last nonprocessing day of month. 9 Work day. 						
FILLER		03	G		109	474
REDEFINES FCL-GRP-DAYS.						
FCL-DAY		05	C	X(001)	109	474
OCCURS 366 TIMES.						

FCM-RECORD (FCM) – Control Parameter Maintenance Record

This record is part of the transaction data warehouse and has an FBH batch header record associated with it. The 110 control parameters are written to this record depending on mode of input. A batch of 110 control parameters can be created online or loaded into the warehouse by using program FCS999. Program FCS100 processes this record.

Record Statistics

Record ID	FCM	
Primary Key Length	0027	
Record Name	Library Name	Record Length
FCM-RECORD	FSSFCMTK	0312 bytes

Record Description

The following record description shows the format of the Control Parameter Maintenance Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FCM-RECORD Group Level.		01	R		1 312
----------------------------	--	----	---	--	-------

FCM-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
-----------------------------	---------	----	---	--	------

FCM-INST-NBR	INST_NBR	05	N	9(004)	1 4
--------------	----------	----	---	--------	-----

Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

FCM-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
---------------	-----------	----	---	--------	-----

Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.
9500 – 9549	Commercial Loans application.
9550 – 9599	Installment Loans application.

Field Name	Token Name	Level	Mode	Picture	Displacement	
9700 – 9799	Accounts Payable application.					
9800 – 9849	Automated Clearing House application.					
9850 – 9899	MICR application.					
FCM-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FCM-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FCM-ITEM-NBR	ITEM_NBR	05	N	9(009)	19	27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.						
FCM-AUDIT-GRP	AUDIT_GRP	03	G		28	51
Group Level.						
FCM-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28	32
Audit Date. Date the record was last updated.						
FCM-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33	37
Audit Time. Time the record was last updated.						
FCM-AUDIT-USER	AUDIT_USER	05	C	X(008)	38	45
Audit User. Last user (operator or program ID) that updated the record.						
FCM-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	46	51
Audit Organization. DBS organization associated with this record.						
FCM-GRP-DATA	GRP_DATA	03	G		52	312
Group Level.						
FCM-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	52	52
Status. Identifies whether a transaction is generated. Valid entries are:						
b	Item has been processed.					
U	Item was rejected.					
FCM-TRAN-CODE	TRAN_CODE	05	N	9(002)	53	54
Transaction Code. Transaction code for the Control File batch item. Valid entries are 01 – 99 .						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCM-RECORD-TYPE Record Type. Specifies the type of record.	RECORD_TYPE	05	C	X(001)	55	55
FCM-ACTION-CODE Action Code. Action code for the batch system that indicates the type of transaction. Valid entries are: 1 Add a record. 2 Change a record. 3 Change a pointer. 8 Delete a record. 9 Delete all records of a given type.	ACTION_CODE	05	C	X(001)	56	56
FCM-TRAN-DATA Transaction Data Transaction record format.	TRAN_DATA	05	C	X(200)	57	256
FCM-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(026)	257	282
FCM-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	283	312

FCV-RECORD (FCV) – Account Header Level Record

This record contains data associated with account headers 1 – 7. It is a pool of header accounts assigned a chart number that is used for reporting and header level totaling. Multiple pools can be created using different chart numbers. Profiling is available for this data.

Record Statistics

Record ID	FCV	
Primary Key Length	0025	
Record Name	Library Name	Record Length
FCV-RECORD	FSSFCVTK	0192 bytes

Record Description

The following record description shows the format of the Account Header Level Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FCV-RECORD Group Level.		01	R		1 192
FCV-GRP-KEY Group Level.	GRP_KEY	03	G		1 25
FCV-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FCV-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	CHART_NBR	05	N	9(004)	5 8
FCV-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	9 23
FCV-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	24 25
FCV-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		26 49
FCV-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	26 30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCV-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	31	35
FCV-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	36	43
FCV-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	44	49
FCV-GRP-DATA Group Level.	GRP_DATA	03	G		50	192
FCV-GLACCT-STATUS Account Status. Status of account. Valid entries are: 0 Record is open. 1 Record is closed.	GLACCT_STATUS	05	C	X(001)	50	50
FCV-OPEN-DATE Open Date. Date on which the account was added by Transaction 03, 23, 45, 47, or 48 (create), or the date on which it was last changed from closed to open status.	OPEN_DATE	05	N	9(008)	51	58
FCV-CLOSE-DATE Close Date. Date on which the account was last changed from open to closed status by Transaction 03 or 23.	CLOSE_DATE	05	N	9(008)	59	66
FCV-RECORD-ATTR Record Attributes. User-defined data associated with this account.	RECORD_ATTR	05	C	X(008)	67	74
FCV-GLACCT-TYPE Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid entries are: 01 Assets. 05 Liabilities. 10 Capital. 20 Income. 25 Expense. 30 Taxes. 35 Nonoperating income. 40 Nonoperating expense. 90 Memo – balance account. 95 Memo – activity account.	GLACCT_TYPE	05	C	X(002)	75	76
FCV-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	77	84

Field Name	Token Name	Level	Mode	Picture	Displacement	
FCV-GLACCT-DESC Account Description. Description of the account.	GLACCT_DESC	05	C	X(050)	85	134
FCV-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(028)	135	162
FCV-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	163	192

FDP-RECORD (FDP) – Distribution Profile Record

This record is used to aid in report distribution. For example, the responsible person identifier in this record can be used to identify where a person is located. Many of the datastrings used in the creation of a report include a distribution profile, if available.

Record Statistics

Record ID	FDP	
Primary Key Length	0014	
Record Name	Library Name	Record Length
FDP-RECORD	FSSFDP TK	0152 bytes

Record Description

The following record description shows the format of the Distribution Profile Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FDP-RECORD Group Level.		01	R		1 152
FDP-GRP-KEY Group Level.	GRP_KEY	03	G		1 14
FDP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FDP-DIST-CODE Distribution Code. Designates receiving location for reports printed in remote or local data centers. A distribution code can be stored in the institution, cost center, and hierarchy records. This is in the key of the Distribution Profile Record (FDP).	DIST_CODE	05	C	X(010)	5 14
FDP-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		15 38
FDP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	15 19
FDP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	20 24
FDP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	25 32

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	33	38
FDP-GRP-DATA Group Level.	GRP_DATA	03	G		39	152
FDP-PROFILE-NAME Distribution Profile Name. Name assigned to the distribution profile.	PROFILE_NAME	05	C	X(050)	39	88
FDP-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the person responsible for this institution. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	89	96
FDP-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(026)	97	122
FDP-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	123	152

FDT-RECORD (FDT) – Dollar Transaction Record

This record is part of the transaction data warehouse and has an FBH batch header record associated with it. Transaction codes 01, 02, 11, 12, 21, 22, 31, and 32 data is written in these records. This record remains on file after processing, based on the Number of Days indicated on the FIN Record.

Record Statistics

Record ID	FDT		
Primary Key Length	0027		
Record Name	Library Name	Record Length	
FDT-RECORD	FSSFDTTK	0424 bytes	

Record Description

The following record description shows the format of the Dollar Transactions Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FDT-RECORD Group Level.		01	R		1 424
----------------------------	--	----	---	--	-------

FDT-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
-----------------------------	---------	----	---	--	------

FDT-INST-NBR	INST_NBR	05	N	9(004)	1 4
--------------	----------	----	---	--------	-----

Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

FDT-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
---------------	-----------	----	---	--------	-----

Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.
9500 – 9549	Commercial Loans application.
9550 – 9599	Installment Loans application.
9700 – 9799	Accounts Payable application.
9800 – 9849	Automated Clearing House application.
9850 – 9899	MICR application.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDT-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FDT-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FDT-ITEM-NBR	ITEM_NBR	05	N	9(009)	19	27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.						
FDT-AUDIT-GRP	AUDIT_GRP	03	G		28	51
Group Level.						
FDT-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28	32
Audit Date. Date the record was last updated.						
FDT-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33	37
Audit Time. Time the record was last updated.						
FDT-AUDIT-USER	AUDIT_USER	05	C	X(008)	38	45
Audit User. Last user (operator or program ID) that updated the record.						
FDT-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	46	51
Audit Organization. DBS organization associated with this record.						
FDT-GRP-DATA	GRP_DATA	03	G		52	424
Group Level.						
FDT-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	52	52
Status. Indicates the status of a dollar transaction. Valid entries are:						
b	Dollar item has not been posted if batch header status is space. Otherwise, dollar item has been posted.					
G	Generated on Transaction 03 for the account/cost center combination.					
U	Dollar item is either a future item or a future reversal after posting an accrual.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDT-TRAN-CODE	TRAN_CODE	05	N	9(002)	53	54
Dollar Transaction Code. Identifies the type of dollar transaction. Valid entries are:						
01	Regular debit.					
02	Regular credit.					
11	Accrual debit.					
12	Accrual credit.					
21	Retroactive debit.					
22	Retroactive credit.					
31	Future debit.					
32	Future credit.					
FDT-GLACCT-NBR	GLACCT_NBR	05	N	9(015)	55	69
Account Number. Identifies a General Ledger Master File account number.						
FDT-GLACCT-LVL	GLACCT_LVL	05	N	9(002)	70	71
Account Level. Identifies the account header level. Valid entries are 01 – 08 .						
FDT-COST-CNTR	COST_CNTR	05	N	9(015)	72	86
Cost Center. Unique number for each accounting unit and each function in the organization.						
FDT-DOC-NBR	DOC_NBR	05	C	X(015)	87	101
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by you. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FDT-SUBL-NBR	SUBL_NBR	05	N	9(002)	102	103
Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:						
00	No subledger.					
01	Payment to vendor.					
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.					
03	Payment to employee for expense.					
04	Teller over/short.					
05	Subledger-5.					
06	Subledger-6.					
07	Subledger-7.					
08	Subledger-8.					
09	Subledger-9.					
FDT-TRAN-DATE	TRAN_DATE	05	N	9(008)	104	111
Transaction Date. Date associated with a transaction that was entered by the operator.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDT-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	112	119
Transaction Effective Date. Identifies the month, day, and year that a retroactive or future transaction is effective. This date matches the current processing date for regular debits and credits.						
FDT-POST-DATE	POST_DATE	05	N	9(008)	120	127
Transaction Post Date. Identifies the month, day, and year that this transaction was posted. This date matches the current processing date for regular debits and credits.						
FDT-SUBL-ACCT-NBR-1	SUBL_ACCT_NBR_1	05	N	9(015)	128	142
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FDT-SUBL-ACCT-NBR-2	SUBL_ACCT_NBR_2	05	N	9(015)	143	157
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FDT-TRAN-AMT	TRAN_AMT	05	PS	S9(15)V9(2)	158	166
Dollar Transaction Amount. Identifies the dollar amount posted to the GL Master for this transaction.						
FDT-TRAN-DESC	TRAN_DESC	05	C	X(050)	167	216
Transaction Description. Description of the transaction being posted.						
FDT-REVERSAL-DATE	REVERSAL_DATE	05	N	9(008)	217	224
Reversal Date. Identifies the month, day, and year that this transaction is to be reversed.						
FDT-REVERSAL-DAYS	REVERSAL_DAYS	05	N	9(003)	225	227
Reversal Days. Identifies the Number of Days from the current transaction date until the transaction is reversed.						
FDT-ORIG-GLACCT-NBR	ORIG_GLACCT_NBR	05	N	9(015)	228	242
Account Number. Identifies a General Ledger Master File account number.						
FDT-ORIG-COST-CNTR	ORIG_COST_CNTR	05	N	9(015)	243	257
Cost Center. Unique number for each accounting unit and each function in the organization.						
FDT-SUSP-GLACCT-NBR	SUSP_GLACCT_NBR	05	N	9(015)	258	272
Suspense Account Number. Account number of the suspense account used for items rejected during posting. The rejected transaction account number is matched against the low and high account number ranges. The suspense account for the matching range is used to post the rejected dollar amount.						
FDT-SUSP-COST-CNTR	SUSP_COST_CNTR	05	N	9(015)	273	287
Suspense Cost Center ID. If suspense processing is used and a dollar transaction rejects, an attempt is made to post it to a suspense account with its original cost center ID. If that attempt fails, this cost center is substituted for the original center and another attempt is made.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDT-TRAN-SRCE	TRAN_SRCE	05	C	X(008)	288	295
Transaction Source. Documents the source of each dollar transaction. It is especially useful for audit and transaction tracing.						
GEN-CLOS	Generated by closing program.					
GEN-FRCE	Generated to force balance a batch of transactions.					
GEN-POST	Generated by the main post – undivided profits.					
GEN-SUSP	Generated by suspense post – undivided profits.					
GEN-VRFY	Generated by batch verification.					
I/C-nnnn	Intercompany transaction from institution nnnn.					
INPUT	Input to or generated by edit and entry.					
ONLINE	Input from the online system.					
PENDING	Release from a pending batch.					
SJE	This is a generated standard journal entry.					
FDT-GEN-DOC-NBR	GEN_DOC_NBR	05	C	X(015)	296	310
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by you. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FDT-APPL-NBR	APPL_NBR	05	N	9(004)	311	314
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FDT-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	315	322
Operator ID. Online signon key.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDT-PRODUCT-CODE Product Code. Documents the product code associated with a dollar transaction. It is optional and user-defined.	PRODUCT_CODE	05	C	X(010)	323	332
FDT-CURN-EXCH-AMT Reserved for future use.	CURN_EXCH_AMT	05	PS	S9(15)V9(2)	333	341
FDT-CURN-EXCH-RATE Reserved for future use.	CURN_EXCH_RATE	05	PS	S9(03)V9(4)	342	345
FDT-CURN-EXCH-DATE Reserved for future use.	CURN_EXCH_DATE	05	N	9(008)	346	353
FDT-CURN-EXCH-TBL Reserved for future use.	CURN_EXCH_TBL	05	C	X(008)	354	361
FDT-CURN-EXCH-QLFY Reserved for future use.	CURN_EXCH_QLFY	05	C	X(003)	362	364
FDT-POST-STATUS Post Status. Indicates the status of an online realtime posted item. Valid entries for intercompany or undivided profits generated items are: 2 Item posted with no error. 3 Item rejected. Valid entries for all other items are: 0 Item posted with no error. 1 Item rejected.	POST_STATUS	05	C	X(001)	365	365
FDT-MESSAGE-CODE Message Code. Indicates the online realtime post error message code.	MESSAGE_CODE	05	C	X(005)	366	370
FDT-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	371	394
FDT-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	395	424

FDV-RECORD (FDV) – Account Detail Level Record

This record contains data associated with 8 level detail accounts only. All accounts that are valid for an institution must be in the table. The description of an account is located in this record only. Edit criteria used in the posting process is located in this record. Data from this record is used to establish the account cost center level records. Normally, the account specified in this record is defined in the FCH chart of account rollup record.

Record Statistics

Record ID	FDV		
Primary Key Length	0021		
Record Name	Library Name	Record Length	
FDV-RECORD	FSSFDTVTK	0264 bytes	

Record Description

The following record description shows the format of the Account Detail Level Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDV-RECORD Group Level.		01	R		1	264
FDV-GRP-KEY Group Level.	GRP_KEY	03	G		1	21
FDV-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FDV-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5	19
FDV-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20	21
FDV-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		22	45
FDV-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	22	26
FDV-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	27	31

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDV-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	32	39
FDV-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	40	45
FDV-GRP-DATA Group Level.	GRP_DATA	03	G		46	264
FDV-GLACCT-STATUS Account Status. Status of account. Valid entries are: 0 Record is open. 1 Record is closed.	GLACCT_STATUS	05	C	X(001)	46	46
FDV-OPEN-DATE Open Date. Date on which the account was added by Transaction 03, 23, 45, 47, or 48 (create), or the date on which it was last changed from closed to open status.	OPEN_DATE	05	N	9(008)	47	54
FDV-CLOSE-DATE Close Date. Date on which the account was last changed from open to closed status by Transaction 03 or 23.	CLOSE_DATE	05	N	9(008)	55	62
FDV-RECORD-ATTR Record Attributes. User-defined data associated with this account.	RECORD_ATTR	05	C	X(008)	63	70
FDV-GLACCT-TYPE Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid entries are: 01 Assets. 05 Liabilities. 10 Capital. 20 Income. 25 Expense. 30 Taxes. 35 Nonoperating income. 40 Nonoperating expense. 90 Memo – balance account. 95 Memo – activity account.	GLACCT_TYPE	05	C	X(002)	71	72
FDV-FUNC-CODE Related Function Code. At the account/cost center detail level, this field relates an account to a specific function and can be substituted for the cost center during cost allocation processing. It is used to redefine account relationships previously established by means of the cost center.	FUNC_CODE	05	N	9(015)	73	87

At the chart of accounts detail level, this field is used as the cost center for intercompany eliminations. The input cost center on the dollar transaction is used for intercompany elimination entries if this field is zero.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDV-ANNL-METHOD	ANNL_METHOD	05	N	9(004)	88	91
Annualizing Technique. Used to compare incomplete current year actual data to future budgets. Valid entries are:						
0001	Actual + budget.					
0002	Actual + average actual.					
0003	Actual + budget adjusted by past variance.					
0004	Actual + budget + average variance.					
0005	Actual + last month times number of months remaining.					
0006	Actual + projected actual based on last year actual.					
FDV-DESC-EDIT-FLAG	DESC_EDIT_FLAG	05	C	X(001)	92	92
Description Edit Flag. Forces all transactions against an account to contain a description. Valid entries are:						
1	Description required on transactions.					
2	Description not required.					
FDV-SUBL-EDIT-FLAG	SUBL_EDIT_FLAG	05	C	X(001)	93	93
Subledger Edit Flag. Forces all transactions against an account to have a subledger number. Valid entries are:						
1	Transaction must have subledger number.					
2	Number not required.					
3	Transaction must have 2 subledger fields coded.					
FDV-NORM-BAL-FLAG	NORM_BAL_FLAG	05	C	X(001)	94	94
Normal Balance Flag. Causes an account appear on the exception report if it changes unexpectedly. Valid entries are:						
1	Debit or credit balance.					
2	Debit balance expected.					
3	Credit balance expected.					
FDV-NORM-TRAN-FLAG	NORM_TRAN_FLAG	05	C	X(001)	95	95
Normal Transaction Flag. Causes any transaction with an unexpected sign to appear on the exception report. Valid entries are:						
1	Debits and credits expected.					
2	Debits only expected.					
3	Credits only expected.					
FDV-MIN-NBR-TRAN	MIN_NBR_TRAN	05	PS	S9(07)	96	99
Minimum Number of Transactions. Minimum expected number of transactions received in 1 day. If the number is not met, the account appears on an exception report.						
FDV-MIN-DLS-TRAN	MIN_DLS_TRAN	05	PS	S9(15)	100	107
Minimum Transaction Dollars. Minimum expected dollar amount of any 1 transaction processed against this account. Transactions with a smaller dollar amount appear on an exception report.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDV-MIN-GLACCT-BAL	MIN_GLACCT_BAL	05	PS	S9(15)	108	115
Minimum Account Balance. Minimum expected balance for this account. If the balance falls below this amount, the account appears on an exception report.						
FDV-MAX-NBR-TRAN	MAX_NBR_TRAN	05	PS	S9(07)	116	119
Maximum Number of Transactions. Maximum expected number of transactions received in 1 day. If the number is exceeded, the account appears on an exception report.						
FDV-MAX-DLS-TRAN	MAX_DLS_TRAN	05	PS	S9(15)	120	127
Maximum Transaction Dollars. Maximum expected dollar amount of any 1 transaction processed against this account. Transactions with a larger dollar amount appear on an exception report.						
FDV-MAX-GLACCT-BAL	MAX_GLACCT_BAL	05	PS	S9(15)	128	135
Maximum Account Balance. Maximum expected balance for this account. If the balance exceeds this amount, the account appears on an exception report.						
FDV-EDIT-CONTROL	EDIT_CONTROL	05	N	9(004)	136	139
Edit Control. Internal code generated to control exception testing. The following table indicates which edits are performed where T = number of transactions, D = transaction dollar, B = account balance, and N = normal balance.						
Value	Edits	Value	Edits			
01	----	09	--- N			
02	T---	10	T-- N			
03	-D--	11	-D- N			
04	TD--	12	TD- N			
05	--B-	13	--B N			
06	T-B-	14	T-B N			
07	-DB-	15	-DB N			
08	TDB-	16	TDB N			
FDV-RESP-PERSON-ID	RESP_PERSON_ID	05	C	X(008)	140	147
Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).						
FDV-GLACCT-DESC	GLACCT_DESC	05	C	X(050)	148	197
Account Description. Description of the account.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDV-DAYS-RETN-INAC	DAYS_RETN_INAC	05	N	9(003)	198	200
Days to Retain Inactive Account. The number of days to retain a General Ledger account/cost center when no activity has been posted to the account and the account has zero balances. An entry of 999 retains the records indefinitely even when no activity has occurred. If the last activity date is zero (i.e., the account has never had activity), the open date is used as the last activity date. Accounts that are determined to be inactive do not have to be closed in order to be purged.						
Note: This field is ignored and zero-balance accounts are purged immediately when closed if the Institution Erase Zero Close Record indicator is set.						
FDV-ICMP-INST-NBR	ICMP_INST_NBR	05	N	9(004)	201	204
Intercompany Institution Number. The institution number to be used for intercompany elimination transactions. The related function code (if entered) is used as the intercompany transaction cost center. An offset is generated only if an intercompany account number has been specified.						
FDV-ICMP-GLACCT-NBR	ICMP_GLACCT_NBR	05	N	9(015)	205	219
Intercompany Account Number. The General Ledger account to be used for an intercompany elimination offset. If this field is zero and an intercompany institution has been specified, a one-sided entry is generated without an offset transaction. The related function code (if entered) is used as the offset transaction cost center.

FDY-RECORD (FDY) – Days Per Period Record

This record contains the Number of Days assigned to each of the 12 accounting periods. There is a record for each fiscal year established for an institution. This record is part of the calendar setup and is used during the posting process.

Record Statistics

Record ID	FDY	
Primary Key Length	0008	
Record Name	Library Name	Record Length
FDY-RECORD	FSSFDYTK	0071 bytes

Record Description

The following record description shows the format of the Days Per Period Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FDY-RECORD Group Level.		01	R		1 71
FDY-GRP-KEY Group Level.	GRP_KEY	03	G		1 8
FDY-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FDY-FISCAL-YR Fiscal Year. Fiscal year for which an accounting period is defined. Format is YYYY.	FISCAL_YR	05	N	9(004)	5 8
FDY-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		9 32
FDY-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	9 13
FDY-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	14 18
FDY-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	19 26

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDY-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	27	32
FDY-GRP-DATA Period Number of Days. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	GRP_DATA	03	G		33	71
FDY-PERIOD-01-DAYS Period Number of Days 01. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_01_DAYS	05	N	9(003)	33	35
FDY-PERIOD-02-DAYS Period Number of Days 02. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_02_DAYS	05	N	9(003)	36	38
FDY-PERIOD-03-DAYS Period Number of Days 03. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_03_DAYS	05	N	9(003)	39	41
FDY-PERIOD-04-DAYS Period Number of Days 04. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_04_DAYS	05	N	9(003)	42	44
FDY-PERIOD-05-DAYS Period Number of Days 05. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_05_DAYS	05	N	9(003)	45	47
FDY-PERIOD-06-DAYS Period Number of Days 06. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_06_DAYS	05	N	9(003)	48	50
FDY-PERIOD-07-DAYS Period Number of Days 07. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_07_DAYS	05	N	9(003)	51	53
FDY-PERIOD-08-DAYS Period Number of Days 08. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_08_DAYS	05	N	9(003)	54	56
FDY-PERIOD-09-DAYS Period Number of Days 09. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.	PERIOD_09_DAYS	05	N	9(003)	57	59

Field Name	Token Name	Level	Mode	Picture	Displacement	
FDY-PERIOD-10-DAYS	PERIOD_10_DAYS	05	N	9(003)	60	62
Period Number of Days 10. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.						
FDY-PERIOD-11-DAYS	PERIOD_11_DAYS	05	N	9(003)	63	65
Period Number of Days 11. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.						
FDY-PERIOD-12-DAYS	PERIOD_12_DAYS	05	N	9(003)	66	68
Period Number of Days 12. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.						
FDY-PERIOD-13-DAYS	PERIOD_13_DAYS	05	N	9(003)	69	71
Period Number of Days 13. Indicates the Number of Days within a calendar period. The value is automatically set when the last day of each period is entered for a fiscal year.						

FEN-RECORD (FEN) – Environment Record

This record defines the maximum number of accounts and cost centers for any institution. This record is used to dynamically acquire space for internal tables used in programs to prevent abending if the table limits are exceeded. If these values are too small and additional table space is needed during the execution of a program, a message is displayed in sysout. The program allocates additional space and continues processing.

Record Statistics

Record ID	FEN	
Primary Key Length	0004	
Record Name	Library Name	Record Length
FEN-RECORD	FSSFENTK	0080 bytes

Record Description

The following record description shows the format of the Environment Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FEN-RECORD Group Level.		01	R		1	80
FEN-GRP-KEY Group Level.	GRP_KEY	03	G		1	4
FEN-ZERO-NBR Zero Number. Key institution always set to zero.	ZERO_NBR	05	N	9(004)	1	4
FEN-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		5	28
FEN-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	5	9
FEN-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	10	14
FEN-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	15	22
FEN-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	23	28

Field Name	Token Name	Level	Mode	Picture	Displacement	
FEN-GRP-DATA Group Level.	GRP_DATA	03	G		29	80
FEN-GLACCT-LEN Account Number Length. Specifies the maximum number of positions used in the General Ledger Account Number field. Valid entries are 001 – 015 .	GLACCT_LEN	05	PS	S9(03)	29	30
FEN-COST-CNTR-LEN Cost Center Length. Specifies the maximum number of positions used in the Control File Cost Center number field. Valid entries are 001 – 015 .	COST_CNTR_LEN	05	PS	S9(03)	31	32
FEN-MAX-NBR-CNTR Maximum Number of Cost Centers. Specifies the maximum number of cost centers defined for an institution. This number is used to set FCS table limits.	MAX_NBR_CNTR	05	PS	S9(07)	33	36
FEN-MAX-NBR-HIER Maximum Number of Hierarchies. Specifies the maximum number of hierarchy entries defined for an institution. This number is used to set FCS table limits.	MAX_NBR_HIER	05	PS	S9(07)	37	40
FEN-MAX-NBR-DETL Maximum Number of Details Accounts. Specifies the maximum number of detail level accounts defined for an institution. This number refers to the detail chart of accounts and not to the number of accounts open to various cost centers. It is used to set FCS table limits.	MAX_NBR_DETL	05	PS	S9(07)	41	44
FEN-COMMIT-COUNT Commit Count. Specifies the number of updates to perform before committing the database. Updates are only rolled back to the prior commit point. A value of zero indicates that no commits are to be performed. When a non-zero value is entered, commits are issued when the count is exceeded and also at the end of a logical unit of work. Job restart/recovery can be performed from a program abend commit point without restoring the database and restarting from the beginning. Therefore, this field should normally be set to a non-zero value. The value stored in the Environment Record can be overridden by the CTL00 parameter. This allows different commit thresholds to be specified at execution time for all FCS batch update programs.	COMMIT_COUNT	05	PS	S9(09)	45	49
FEN-VERSION-NBR Version Number. Indicates the last FCS release in which a file conversion was performed against the database.	VERSION_NBR	05	C	X(006)	50	55
FEN-ONLINE-IND Online Indicator. Indicates whether reports can be directed to the online files. Also controls report writer extracts. Valid entries are: 0 FCS online report modes and extracts not allowed. 1 FCS online report modes and extracts allowed.	ONLINE_IND	05	C	X(001)	56	56
FEN-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	57	80

FFA-RECORD (FFA) – Related Function to Account Record

This key only record identifies the account numbers assigned to a related function code. This record's key contains institution number, function code, account number, and account level.

Record Statistics

Record ID	FFA	
Primary Key Length	0036	
Record Name	Library Name	Record Length
FFA-RECORD	FSSFFATK	0060 bytes

Record Description

The following record description shows the format of the Related Function to Account Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FFA-RECORD Group Level.		01	R		1 60
FFA-GRP-KEY Group Level.	GRP_KEY	03	G		1 36
FFA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FFA-FUNC-CODE Related Function Code. Relates an account to a specific function and can be substituted for the cost center during cost allocation processing. It is used to redefine account relationships previously established by means of the cost center.	FUNC_CODE	05	N	9(015)	5 19
FFA-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	20 34
FFA-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	35 36
FFA-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		37 60
FFA-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	37 41

Field Name	Token Name	Level	Mode	Picture	Displacement	
FFA-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	42	46
FFA-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	47	54
FFA-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	55	60

FGE-RECORD (FGE) – Hierarchy Option to Hierarchy Entry Record

This key only record matches the hierarchy entries with the appropriate hierarchy option record. When an FHE Record is established, this record is automatically created.

Record Statistics

Record ID	FGE	
Primary Key Length	0032	
Record Name	Library Name	Record Length
FGE-RECORD	FSSFGETK	0056 bytes

Record Description

The following record description shows the format of the Hierarchy Option to Hierarchy Entry Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FGE-RECORD Group Level.		01	R		1 56
FGE-GRP-KEY Group Level.	GRP_KEY	03	G		1 32
FGE-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FGE-OPT-PROFILE-ID Hierarchy Options Profile ID. Identification number assigned to the hierarchy options profile. This ID is in the key of the Hierarchy Option Profile Comments Record (FVL).	OPT_PROFILE_ID	05	C	X(008)	5 12
FGE-HIER-ENTRY Cost Center or Hierarchy Entry. Specifies the hierarchy entry for budget record type 'H' or the cost center for budget record type 'C'.	HIER_ENTRY	05	C	X(020)	13 32
FGE-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		33 56
FGE-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	33 37
FGE-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	38 42

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGE-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	43	50
FGE-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	51	56

FGI-RECORD (FGI) – Group to Institution Record

This key only record matches an institution with the appropriate group. This record's key contains Institution Zero, a group identifier, and a valid institution number.

Record Statistics

Record ID	FGI	
Primary Key Length	0016	
Record Name	Library Name	Record Length
FGI-RECORD	FSSFGITK	0040 bytes

Record Description

The following record description shows the format of the Group to Institution Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGI-RECORD Group Level.		01	R		1	40
FGI-GRP-KEY Group Level.	GRP_KEY	03	G		1	16
FGI-ZERO-NBR Zero Institution Indicator. Determines how records defined for Institution Zero are used by this institution. Valid entries are:	ZERO_NBR	05	N	9(004)	1	4
N No records from Institution Zero are merged with records defined for this institution.						
Y Records defined for this institution overrides or merges with any zero institution records.						
Z Only Institution Zero records are accessed by this institution.						
FGI-GROUP-ID Group ID. User-assigned code used to identify a list of institutions processed together.	GROUP_ID	05	C	X(008)	5	12
FGI-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	13	16
FGI-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		17	40
FGI-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	17	21

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGI-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	22	26
FGI-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	27	34
FGI-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	35	40

FGM-RECORD (FGM) – GL Maintenance Transaction Record

This record is part of the transaction warehouse and has an FBH Record associated with it. This record can be created online and is processed during a normal posting cycle or maintenance only run.

Record Statistics

Record ID	FGM		
Primary Key Length	0027		
Record Name	Library Name	Record Length	
FGM-RECORD	FSSFGMTK	0352 bytes	

Record Description

The following record description shows the format of the GL Maintenance Transaction Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FGM-RECORD Group Level.		01	R		1 352
FGM-GRP-KEY Group Level.	GRP_KEY	03	G		1 27

FGM-INST-NBR	INST_NBR	05	N	9(004)	1 4
--------------	----------	----	---	--------	-----

Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

FGM-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
---------------	-----------	----	---	--------	-----

Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.
9500 – 9549	Commercial Loans application.
9550 – 9599	Installment Loans application.
9700 – 9799	Accounts Payable application.
9800 – 9849	Automated Clearing House application.
9850 – 9899	MICR application.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGM-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF Control File batch.						
GL General Ledger batch.						
RR Reject Recycle batch.						
RW Report Writer batch.						
SR Suspense Recycle batch.						
FGM-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FGM-ITEM-NBR	ITEM_NBR	05	N	9(009)	19	27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.						
FGM-AUDIT-GRP	AUDIT_GRP	03	G		28	51
Group Level.						
FGM-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28	32
Audit Date. Date the record was last updated.						
FGM-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33	37
Audit Time. Time the record was last updated.						
FGM-AUDIT-USER	AUDIT_USER	05	C	X(008)	38	45
Audit User. Last user (operator or program ID) that updated the record.						
FGM-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	46	51
Audit Organization. DBS organization associated with this record.						
FGM-GRP-DATA	GRP_DATA	03	G		52	352
Group Level.						
FGM-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	52	52
Status. Identifies whether a transaction is generated. Valid entries are:						
B No transaction is generated by batch verification.						
G Transaction 03 is generated by batch verification.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGM-TRAN-CODE	TRAN_CODE	05	N	9(002)	53	54
Batch Header Transaction Code. Indicates the batch header transaction code. Valid entries are:						
90	Control File.					
91	Report Writer.					
92	General Ledger Budget Shift.					
93	General Ledger Budget Annual.					
94	General Ledger Budget Monthly.					
95	General Ledger Budget Direct.					
96	General Ledger Special.					
97	General Ledger Maintenance.					
98	General Ledger Dollar.					
FGM-RECORD-TYPE	RECORD_TYPE	05	C	X(001)	55	55
Record Type. Specifies the type of record.						
FGM-ACTION-CODE	ACTION_CODE	05	C	X(001)	56	56
Action Code. Action code for the batch system that indicates the type of transaction. Valid entries are:						
1	Add a record.					
2	Change a record.					
3	Change a pointer.					
8	Delete a record.					
9	Delete all records of a given type.					
FGM-GLACCT-NBR	GLACCT_NBR	05	N	9(015)	57	71
Account Number. Identifies a General Ledger Master File account number.						
FGM-GLACCT-LVL	GLACCT_LVL	05	N	9(002)	72	73
Account Level. Identifies the account header level. Valid entries are 01 – 08 .						
FGM-COST-CNTR	COST_CNTR	05	N	9(015)	74	88
Cost Center. Unique number for each accounting unit and each function in the organization.						
FGM-TRAN-DATA	TRAN_DATA	05	C	X(198)	89	286
Transaction Data. Transaction record format.						
FGM-CA-FILLER	CA_FILLER	05	C	X(036)	287	322
Reserved for system use.						
FGM-USER-FILLER	USER_FILLER	05	C	X(030)	323	352
User-defined.						

FGP-RECORD (FGP) – Group Record

This record contains information about a reporting or update group. Consolidation reporting fields are included in this record. This record is not directly associated to any institutions.

Note: The institution number in the key is zero.

Record Statistics

Record ID	FGP	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FGP-RECORD	FSSFGPTK	0136 bytes

Record Description

The following record description shows the format of the Group Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FGP-RECORD Group Level.		01	R		1 136
FGP-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FGP-ZERO-NBR Zero Number. Key institution always set to zero.	ZERO_NBR	05	N	9(004)	1 4
FGP-GROUP-ID Group ID. User-assigned code used to identify a list of institutions processed together.	GROUP_ID	05	C	X(008)	5 12
FGP-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36
FGP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13 17
FGP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18 22
FGP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23 30
FGP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31 36

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGP-GRP-DATA Group Level.	GRP_DATA	03	G		37	136
FGP-GROUP-STATUS Group Status Switch. Gives the current status of the update group. It is used in daily processing to determine what type of run is being made. Valid entries are: 0 Group has not been processed today. 1 One or more runs have been completed.	GROUP_STATUS	05	C	X(001)	37	37
FGP-GROUP-TYPE Group Type. Identifies type of group. Valid entries are: 1 Posting group. 2 Report group.	GROUP_TYPE	05	C	X(001)	38	38
FGP-GROUP-NAME Group Name. Name used on reports.	GROUP_NAME	05	C	X(050)	39	88
FGP-RUN-TYPE Run Type. Type of daily run made. Valid entries are: 0 First run of day, set by system with Transaction 21. 1 Subsequent run automatically set by the system upon successful completion of a first run. 8 Report update run for online realtime posted items. 9 Maintenance only run.	RUN_TYPE	05	C	X(001)	89	89
FGP-AUTO-DATE-ROLL Automatic Date Roll Option. Indicates whether the processing date can be automatically set for institutions in this group. Valid entries are: N Auto date roll not allowed. Y Auto date roll is allowed.	AUTO_DATE_ROLL	05	C	X(001)	90	90
FGP-RPT-FILE-SEQ Reports File Sequence Number. Ensures that the correct reports file is mounted as input to the daily stream. This field is only used in a subsequent run.	RPT_FILE_SEQ	05	PS	S9(07)	91	94

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGP-BAL-LVL	BAL_LVL	05	N	9(002)	95	96
Consolidated Institution Balance Sheet Level. Level at which to produce the consolidated balance sheet for this group. Valid entries are:						
00	Do not produce report.					
01	Produce report at header level 1.					
02	Produce report at header level 2.					
03	Produce report at header level 3.					
04	Produce report at header level 4.					
05	Produce report at header level 5.					
06	Produce report at header level 6.					
07	Produce report at header level 7.					
08	Produce report at header level 8.					
FGP-INC-LVL	INC_LVL	05	N	9(002)	97	98
Consolidated Institution Income Statement Level. Level at which to produce the consolidated income statement for this group. Valid entries are:						
00	Do not produce report.					
01	Produce report at header level 1.					
02	Produce report at header level 2.					
03	Produce report at header level 3.					
04	Produce report at header level 4.					
05	Produce report at header level 5.					
06	Produce report at header level 6.					
07	Produce report at header level 7.					
08	Produce report at header level 8.					
FGP-INC-COMP-OPT	INC_COMP_OPT	05	C	X(001)	99	99
Consolidated Comparative Income Statement Option. Report option for the comparative income statement for this group of institutions. Valid entries are:						
0	Do not produce the report.					
1	Produce the report.					
FGP-HIER-NBR	HIER_NBR	05	N	9(004)	100	103
Consolidated Institution Hierarchy Structure. Hierarchy structure number to use for reporting levels when responsibility reports are prepared ignoring institution number. The institution to use is the same as the institution being used for account headers.						
FGP-INST-NBR	INST_NBR	05	N	9(004)	104	107
Consolidated Header Institution Number. Institution number used for consolidated Report Writer and budget reporting. Valid entries are 0001 – 9999.						
FGP-CA-FILLER	CA_FILLER	05	C	X(029)	108	136
Reserved for system use.						

FGR-RECORD (FGR) – Reports to Hierarchy Entry Record

This key only record matches a hierarchy entry to the appropriate hierarchy report profile. This record's key contains institution number, report profile identifier, and hierarchy entry.

Record Statistics

Record ID	FGR	
Primary Key Length	0032	
Record Name	Library Name	Record Length
FGR-RECORD	FSSFGRTK	0056 bytes

Record Description

The following record description shows the format of the Reports to Hierarchy Entry Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FGR-RECORD Group Level.		01	R		1 56
FGR-GRP-KEY Group Level.	GRP_KEY	03	G		1 32
FGR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FGR-RPT-PROFILE-ID Hierarchy Reports Profile ID. Identification number for the cost center reports profile. This ID is in the key of the Hierarchy Reports Record (FHR).	RPT_PROFILE_ID	05	C	X(008)	5 12
FGR-HIER-ENTRY Hierarchy Entry. Alphanumeric field is used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	HIER_ENTRY	05	C	X(020)	13 32
FGR-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		33 56
FGR-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	33 37
FGR-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	38 42

Field Name	Token Name	Level	Mode	Picture	Displacement	
FGR-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	43	50
FGR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	51	56

FHE-RECORD (FHE) – Hierarchy Entry Record

This record contains information about an each hierarchy entry. Only the hierarchies entries located in this record are valid for an institution. This pool of hierarchy entry records can be used at a profile level. The report and option profile identifiers are used to create the FGE, FHH, FHT, and FGR records.

Record Statistics

Record ID	FHE	
Primary Key Length	0024	
Record Name	Library Name	Record Length
FHE-RECORD	FSSFHETK	0160 bytes

Record Description

The following record description shows the format of the Hierarchy Entry Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FHE-RECORD Group Level.		01	R		1 160
FHE-GRP-KEY Group Level.	GRP_KEY	03	G		1 24
FHE-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FHE-HIER-ENTRY Hierarchy Entry. Alphanumeric field is used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	HIER_ENTRY	05	C	X(020)	5 24
FHE-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		25 48
FHE-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	25 29
FHE-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	30 34
FHE-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	35 42

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHE-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	43	48
FHE-GRP-DATA Group Level.	GRP_DATA	03	G		49	160
FHE-OPT-PROFILE-ID Hierarchy Options Profile ID. Identification number assigned to the hierarchy options profile.	OPT_PROFILE_ID	05	C	X(008)	49	56
FHE-RPT-PROFILE-ID Hierarchy Options Profile Name. Name assigned to the hierarchy options profile.	RPT_PROFILE_ID	05	C	X(008)	57	64
FHE-HIER-ENTRY-NAME Hierarchy Entry Name. Name of organization unit or function.	HIER_ENTRY_NAME	05	C	X(050)	65	114
FHE-HIER-TYPE Hierarchy Type. Identifies the type of hierarchy entry. Valid entries are: 1 Cost center hierarchy entry. 2 Function hierarchy entry.	HIER_TYPE	05	C	X(001)	115	115
FHE-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	116	123
FHE-DIST-CODE Distribution Code. Designates receiving location for reports printed in remote or local data centers. A distribution code can be stored in the institution, cost center, and hierarchy records. This code is in the key of the Distribution Profile Record (FDP).	DIST_CODE	05	C	X(010)	124	133
FHE-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(027)	134	160

FHH-RECORD (FHH) – Hierarchy Entry Rollup Record

This record defines a hierarchy structure and is equivalent to the FCH Record. Two alternate keys are available.

Note: When adding an entry to this record, the entry must have an existing FHE Record.

Record Statistics

Record ID	FHH		
Primary Key Length	0028		
Record Name	Library Name	Record Length	
FHH-RECORD	FSSFHHTK	0188 bytes	

Record Description

The following record description shows the format of the Hierarchy Entry Rollup Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FHH-RECORD Group Level.		01	R		1 188
FHH-GRP-KEY Group Level.	GRP_KEY	03	G		1 28
FHH-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FHH-HIER-NBR Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999.	HIER_NBR	05	N	9(004)	5 8
FHH-HIER-ENTRY Hierarchy Entry. Alphanumeric field is used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	HIER_ENTRY	05	C	X(020)	9 28
FHH-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		29 52
FHH-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	29 33

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHH-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	34	38
FHH-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	39	46
FHH-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	47	52
FHH-GRP-AIX1 Group Level.	GRP_AIX1	03	G		53	140
FHH-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	53	56
FHH-AIX-HIER-NBR Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999 .	AIX_HIER_NBR	05	N	9(004)	57	60
FHH-AIX-LVL-01-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_01_SEQ	05	B	S9(09)	61	64
FHH-AIX-LVL-02-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_02_SEQ	05	B	S9(09)	65	68
FHH-AIX-LVL-03-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_03_SEQ	05	B	S9(09)	69	72
FHH-AIX-LVL-04-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_04_SEQ	05	B	S9(09)	73	76
FHH-AIX-LVL-05-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_05_SEQ	05	B	S9(09)	77	80
FHH-AIX-LVL-06-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_06_SEQ	05	B	S9(09)	81	84
FHH-AIX-LVL-07-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_07_SEQ	05	B	S9(09)	85	88
FHH-AIX-LVL-08-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_08_SEQ	05	B	S9(09)	89	92

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHH-AIX-LVL-09-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_09_SEQ	05	B	S9(09)	93	96
FHH-AIX-LVL-10-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_10_SEQ	05	B	S9(09)	97	100
FHH-AIX-LVL-11-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_11_SEQ	05	B	S9(09)	101	104
FHH-AIX-LVL-12-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_12_SEQ	05	B	S9(09)	105	108
FHH-AIX-LVL-13-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_13_SEQ	05	B	S9(09)	109	112
FHH-AIX-LVL-14-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_14_SEQ	05	B	S9(09)	113	116
FHH-AIX-LVL-15-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_15_SEQ	05	B	S9(09)	117	120
FHH-AIX-LVL-16-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_16_SEQ	05	B	S9(09)	121	124
FHH-AIX-LVL-17-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_17_SEQ	05	B	S9(09)	125	128
FHH-AIX-LVL-18-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_18_SEQ	05	B	S9(09)	129	132
FHH-AIX-LVL-19-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_19_SEQ	05	B	S9(09)	133	136
FHH-AIX-LVL-20-SEQ Level Sequence Number. Internal number used to maintain rollup structures.	AIX_LVL_20_SEQ	05	B	S9(09)	137	140
FHH-GRP-AIX2 Group Level.	GRP_AIX2	03	G		141	188
FHH-AIX-INST-NBR-2 Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR_2	05	N	9(004)	141	144

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHH-AIX-HIER-NBR-2	AIX_HIER_NBR_2	05	N	9(004)	145	148
Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999 .						
FHH-PAR-HIER-ENTRY	PAR_HIER_ENTRY	05	C	X(020)	149	168
Parent Hierarchy Entry. Identifies the hierarchy entry to which another hierarchy reports. It is displayed for informational purposes only and cannot be directly modified. It is internally maintained based upon the hierarchy level and the sequential position, of each child hierarchy entry.						
FHH-AIX-HIER-ENTRY	AIX_HIER_ENTRY	05	C	X(020)	169	188
Hierarchy Entry. Alphanumeric field used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.						

FHP-RECORD (FHP) – Hierarchy Option Profile Record

This record contains the options and modes for the 20 levels of reporting. Each level has its own option and mode. The FCS Report Writer uses these records. Any number of profiles can be maintained.

Record Statistics

Record ID	FHP		
Primary Key Length	0012		
Record Name	Library Name	Record Length	
FHP-RECORD	FSSFHPTK	0152 bytes	

Record Description

The following record description shows the format of the Hierarchy Option Profile Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHP-RECORD Group Level.		01	R		1	152
FHP-GRP-KEY Group Level.	GRP_KEY	03	G		1	12
FHP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FHP-OPT-PROFILE-ID Hierarchy Options Profile ID. Identification number assigned to the hierarchy options profile. This ID is in the key of the Hierarchy Option Profile Comments Record (FVL).	OPT_PROFILE_ID	05	C	X(008)	5	12
FHP-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13	36
FHP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13	17
FHP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18	22
FHP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FHP-GRP-DATA Group Level.	GRP_DATA	03	G		37	152
FHP-PROFILE-NAME Hierarchy Options Profile Name. Name assigned to the hierarchy options profile.	PROFILE_NAME	05	C	X(050)	37	86
FHP-HIER-01-MODE Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	HIER_01_MODE	05	C	X(001)	87	87
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						
FHP-HIER-01-OPT Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:	HIER_01_OPT	05	C	X(001)	88	88
<ul style="list-style-type: none"> 0 Do not produce the report. 1 Produce the report for this hierarchy entry. 						
FHP-HIER-02-MODE Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	HIER_02_MODE	05	C	X(001)	89	89
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FHP-HIER-02-OPT	HIER_02_OPT	05	C	X(001)	90 90
-----------------	-------------	----	---	--------	-------

Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:

- 0 Do not produce the report.
- 1 Produce the report for this hierarchy entry.

FHP-HIER-03-MODE	HIER_03_MODE	05	C	X(001)	91 91
------------------	--------------	----	---	--------	-------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FHP-HIER-03-OPT	HIER_03_OPT	05	C	X(001)	92 92
-----------------	-------------	----	---	--------	-------

Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:

- 0 Do not produce the report.
- 1 Produce the report for this hierarchy entry.

FHP-HIER-04-MODE	HIER_04_MODE	05	C	X(001)	93 93
------------------	--------------	----	---	--------	-------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHP-HIER-04-OPT	HIER_04_OPT	05	C	X(001)	94	94
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:						
0 Do not produce the report.						
1 Produce the report for this hierarchy entry.						
FHP-HIER-05-MODE	HIER_05_MODE	05	C	X(001)	95	95
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0 Do not output the report.						
1 Printer output.						
2 Tape output without distribution code.						
3 Tape output with distribution code from cost center record.						
4 Tape output with distribution code from institution record.						
5 – 6 Other.

Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:					
0 Do not produce the report.					
1 Produce the report for this hierarchy entry.					
FHP-HIER-12-MODE	HIER_12_MODE	05	C	X(001)	109 109
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0 Do not output the report.					
1 Printer output.					
2 Tape output without distribution code.					
3 Tape output with distribution code from cost center record.					
4 Tape output with distribution code from institution record.					
5 – 6 Other.					
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q Same as 0 – 6, respectively, but with deferred online output.					

Field Name	Token Name	Level	Mode	Picture	Displacement
FHP-HIER-12-OPT	HIER_12_OPT	05	C	X(001)	110 110
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:					
0 Do not produce the report.					
1 Produce the report for this hierarchy entry.					
FHP-HIER-13-MODE	HIER_13_MODE	05	C	X(001)	111 111
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0 Do not output the report.					
1 Printer output.					
2 Tape output without distribution code.					
3 Tape output with distribution code from cost center record.					
4 Tape output with distribution code from institution record.					
5 – 6 Other.					
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q Same as 0 – 6, respectively, but with deferred online output.					
FHP-HIER-13-OPT	HIER_13_OPT	05	C	X(001)	112 112
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:					
0 Do not produce the report.					
1 Produce the report for this hierarchy entry.					
FHP-HIER-14-MODE	HIER_14_MODE	05	C	X(001)	113 113
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0 Do not output the report.					
1 Printer output.					
2 Tape output without distribution code.					
3 Tape output with distribution code from cost center record.					
4 Tape output with distribution code from institution record.					
5 – 6 Other.					
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q Same as 0 – 6, respectively, but with deferred online output.					

Field Name	Token Name	Level	Mode	Picture	Displacement
FHP-HIER-14-OPT	HIER_14_OPT	05	C	X(001)	114 114
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:					
0 Do not produce the report.					
1 Produce the report for this hierarchy entry.					
FHP-HIER-15-MODE	HIER_15_MODE	05	C	X(001)	115 115
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0 Do not output the report.					
1 Printer output.					
2 Tape output without distribution code.					
3 Tape output with distribution code from cost center record.					
4 Tape output with distribution code from institution record.					
5 – 6 Other.					
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q Same as 0 – 6, respectively, but with deferred online output.					
FHP-HIER-15-OPT	HIER_15_OPT	05	C	X(001)	116 116
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:					
0 Do not produce the report.					
1 Produce the report for this hierarchy entry.					
FHP-HIER-16-MODE	HIER_16_MODE	05	C	X(001)	117 117
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0 Do not output the report.					
1 Printer output.					
2 Tape output without distribution code.					
3 Tape output with distribution code from cost center record.					
4 Tape output with distribution code from institution record.					
5 – 6 Other.					
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q Same as 0 – 6, respectively, but with deferred online output.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHP-HIER-16-OPT	HIER_16_OPT	05	C	X(001)	118	118
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:						
0 Do not produce the report.						
1 Produce the report for this hierarchy entry.						
FHP-HIER-17-MODE	HIER_17_MODE	05	C	X(001)	119	119
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0 Do not output the report.						
1 Printer output.						
2 Tape output without distribution code.						
3 Tape output with distribution code from cost center record.						
4 Tape output with distribution code from institution record.						
5 – 6 Other.						
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.						
K – Q Same as 0 – 6, respectively, but with deferred online output.						
FHP-HIER-17-OPT	HIER_17_OPT	05	C	X(001)	120	120
Report Writer Report Option. Determines which hierarchy points are included in Report Writer reports. The report option used (01 – 20) is determined by the report indicator specified on the Type 1 parameter. Valid entries are:						
0 Do not produce the report.						
1 Produce the report for this hierarchy entry.						
FHP-HIER-18-MODE	HIER_18_MODE	05	C	X(001)	121	121
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0 Do not output the report.						
1 Printer output.						
2 Tape output without distribution code.						
3 Tape output with distribution code from cost center record.						
4 Tape output with distribution code from institution record.						
5 – 6 Other.						
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.						
K – Q Same as 0 – 6, respectively, but with deferred online output.

FHR-RECORD (FHR) – Hierarchy Reports Record

This record contains the option, level, and modes that are used in producing hierarchy reports. An institution number and report profile identifier are part of its key. Any number of report profiles can be built.

Record Statistics

Record ID	FHR		
Primary Key Length	0012		
Record Name	Library Name	Record Length	
FHR-RECORD	FSSFHRTK	0192 bytes	

Record Description

The following record description shows the format of the Hierarchy Reports Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-RECORD Group Level.		01	R		1	192
FHR-GRP-KEY Group Level.	GRP_KEY	03	G		1	12
FHR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FHR-RPT-PROFILE-ID Hierarchy Reports Profile ID. Identification number for the cost center reports profile. This ID is in the key of the Hierarchy Reports Record (FHR).	RPT_PROFILE_ID	05	C	X(008)	5	12
FHR-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13	36
FHR-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13	17
FHR-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18	22
FHR-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FHR-GRP-DATA Group Level.	GRP_DATA	03	G		37	192
FHR-PROFILE-NAME Hierarchy Reports Profile Name. Name assigned to the hierarchy reports profile.	PROFILE_NAME	05	C	X(050)	37	86
FHR-DALY-BAL-MODE Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	DALY_BAL_MODE	05	C	X(001)	87	87
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						
FHR-DALY-BAL-OPT GLR281 – Responsibility Balance Sheet Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:	DALY_BAL_OPT	05	C	X(001)	88	88
<ul style="list-style-type: none"> 0 Do not print. 1 Print report. 						
FHR-DALY-BAL-LVL GLR281 – Responsibility Balance Sheet Report Level. Identifies the amount of detail to print on the corresponding hierarchy report. Valid entries are:	DALY_BAL_LVL	05	N	9(002)	89	90
<ul style="list-style-type: none"> 00 Do not print. 01 Print at header level 1. 02 Print at header level 2. 03 Print at header level 3. 04 Print at header level 4. 05 Print at header level 5. 06 Print at header level 6. 07 Print at header level 7. 08 Print at header level 8. 						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-DALY-INC-MODE	DALY_INC_MODE	05	C	X(001)	91	91
GLR282 – Responsibility Income Statement Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FHR-DALY-INC-OPT	DALY_INC_OPT	05	C	X(001)	92	92
GLR282 – Responsibility Income Statement Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					
FHR-DALY-INC-LVL	DALY_INC_LVL	05	N	9(002)	93	94
GLR282 – Responsibility Income Statement Report Level. Identifies the amount of detail to print on the corresponding hierarchy report. Valid entries are:						
00	Do not print.					
01	Print at header level 1.					
02	Print at header level 2.					
03	Print at header level 3.					
04	Print at header level 4.					
05	Print at header level 5.					
06	Print at header level 6.					
07	Print at header level 7.					
08	Print at header level 8.					
FHR-MTH-BAL-MODE	MTH_BAL_MODE	05	C	X(001)	95	95
GLR310 – Responsibility Unit Balance Sheet Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					

Field Name	Token Name	Level	Mode	Picture	Displacement
FHR-MTH-BAL-OPT	MTH_BAL_OPT	05	C	X(001)	96 96
GLR310 – Responsibility Unit Balance Sheet Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:					
<ul style="list-style-type: none"> 0 Do not print. 1 Print full report at the specified level. 2 Print an exception report. 					
FHR-MTH-BAL-LVL	MTH_BAL_LVL	05	N	9(002)	97 98
GLR310 – Responsibility Unit Balance Sheet Report Level. Indicates the print level for the report. If a full report is specified by the Responsibility Unit Balance Sheet Report Option, this code gives the level of the report. If an exception report is specified, this code gives the level at which all accounts are printed regardless of the exception limits. Valid entries are:					
<ul style="list-style-type: none"> 00 Do not print. 01 Print at header level 1. 02 Print at header level 2. 03 Print at header level 3. 04 Print at header level 4. 05 Print at header level 5. 06 Print at header level 6. 07 Print at header level 7. 08 Print at header level 8, one line per account. 09 Print every account/cost center combination. 					
FHR-MTH-INC-MODE	MTH_INC_MODE	05	C	X(001)	99 99
GLR311 – Responsibility Unit Income Statement Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 					
FHR-MTH-INC-OPT	MTH_INC_OPT	05	C	X(001)	100 100
GLR311 – Responsibility Unit Income Statement Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:					
<ul style="list-style-type: none"> 0 Do not print. 1 Print full report at the specified level. 2 Print an exception report. 					

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FHR-MTH-INC-LVL	MTH_INC_LVL	05	N	9(002)	101 102
-----------------	-------------	----	---	--------	---------

GLR311 – Responsibility Unit Income Statement Report Level. Indicates the print level for the report. If a full report is specified by the Responsibility Unit Income Statement Report Option, this code gives the level of the report. If an exception report is specified, this code gives the level at which all accounts are printed regardless of the exception limits. Valid entries are:

- 00 Do not print.
- 01 Print at header level 1.
- 02 Print at header level 2.
- 03 Print at header level 3.
- 04 Print at header level 4.
- 05 Print at header level 5.
- 06 Print at header level 6.
- 07 Print at header level 7.
- 08 Print at header level 8, one line per account.
- 09 Print every account/cost center combination.

FHR-MTH-RESP-MODE	MTH_RESP_MODE	05	C	X(001)	103 103
-------------------	---------------	----	---	--------	---------

GLR312 – Responsibility Unit Comparative Income Statement Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FHR-MTH-RESP-OPT	MTH_RESP_OPT	05	C	X(001)	104 104
------------------	--------------	----	---	--------	---------

GLR312 – Responsibility Unit Comparative Income Statement Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print report.

FHR-MTH-RESP-LVL	MTH_RESP_LVL	05	N	9(002)	105 106
------------------	--------------	----	---	--------	---------

GLR312 – Responsibility Unit Comparative Income Statement Report Level. Determines the print level for the Responsibility Unit Comparative Income Statement. Valid entries are:

- 00 Do not print.
- 01 Print at header level 1.
- 02 Print at header level 2.
- 03 Print at header level 3.
- 04 Print at header level 4.
- 05 Print at header level 5.

Field Name	Token Name	Level	Mode	Picture	Displacement	
06 Print at header level 6.						
FHR-BDGT-MODE	BDGT_MODE	05	C	X(001)	107	107
GLR512 – Actual Balances Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FHR-BDGT-OPT	BDGT_OPT	05	C	X(001)	108	108
GLR512 – Actual Balances Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					
FHR-BDGT-LVL	BDGT_LVL	05	N	9(002)	109	110
GLR512 – Actual Balances Report Level. Determines the amount of detail printed on the 12-month budget spread. Valid entries are:						
00	Do not print.					
01	Print at header level 1.					
02	Print at header level 2.					
03	Print at header level 3.					
04	Print at header level 4.					
05	Print at header level 5.					
06	Print at header level 6.					
07	Print at header level 7.					
08	Print at header level 8, one line per account.					
09	Print every account/cost center combination.					
FHR-BDGT-COMP-MODE	BDGT_COMP_MODE	05	C	X(001)	111	111
GLR513 – Comparative Analysis Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					

Field Name	Token Name	Level	Mode	Picture	Displacement
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.				
K – Q	Same as 0 – 6, respectively, but with deferred online output.				

FHR-BDGT-COMP-OPT	BDGT_COMP_OPT	05	C	X(001)	112	112
-------------------	---------------	----	---	--------	-----	-----

GLR513 – Comparative Analysis Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print full report at the specified level.
- 2 Print an exception report.

FHR-BDGT-COMP-LVL	BDGT_COMP_LVL	05	N	9(002)	113	114
-------------------	---------------	----	---	--------	-----	-----

GLR513 – Comparative Analysis Report Level. Indicates the print level for the budget comparison report. If a full report is specified by the budget comparison option, this code gives the level at which all accounts are printed regardless of the exception limits. Valid entries are:

- 00 Do not print.
- 01 Print at header level 1.
- 02 Print at header level 2.
- 03 Print at header level 3.
- 04 Print at header level 4.
- 05 Print at header level 5.
- 06 Print at header level 6.
- 07 Print at header level 7.
- 08 Print at header level 8, one line per account.
- 09 Print every account/cost center combination.

FHR-ALOC-INC-MODE	ALOC_INC_MODE	05	C	X(001)	115	115
-------------------	---------------	----	---	--------	-----	-----

GLR484 – Post Allocations Income Statement Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FHR-ALOC-INC-OPT	ALOC_INC_OPT	05	C	X(001)	116	116
------------------	--------------	----	---	--------	-----	-----

GLR484 – Post Allocations Income Statement Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print report.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-ALOC-INC-LVL-D	ALOC_INC_LVL_D	05	N	9(002)	117	118
GLR484 – Post Allocations Income Statement Report Level. Report level used for direct items on the post allocation income statement. Valid entries are:						
00	Do not print.					
01	Print at header level 1.					
02	Print at header level 2.					
03	Print at header level 3.					
04	Print at header level 4.					
05	Print at header level 5.					
06	Print at header level 6.					
07	Print at header level 7.					
08	Print at header level 8.					
FHR-ALOC-INC-LVL	ALOC_INC_LVL	05	N	9(002)	119	120
GLR484 – Post Allocations Income Statement Allocation Level. Indicates the report level used for allocated items on the post allocation income statements. Valid entries are:						
0	Do not print allocations.					
1	Print only generation totals.					
2	Print account type totals.					
3	Print totals for allocations in and out.					
4	Summarize allocations on equal key.					
5	Print all allocations.					
FHR-ALOC-BAL-MODE	ALOC_BAL_MODE	05	C	X(001)	121	121
GLR482 – Post Allocation Balance Sheet Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FHR-ALOC-BAL-OPT	ALOC_BAL_OPT	05	C	X(001)	122	122
GLR482 – Post Allocation Balance Sheet Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-ALOC-BAL-LVL-D	ALOC_BAL_LVL_D	05	N	9(002)	123	124
GLR482 – Post Allocation Balance Sheet Report Level. Report level used for direct items on the post allocation balance sheet. Valid entries are:						
00	Do not print.					
01	Print at header level 1.					
02	Print at header level 2.					
03	Print at header level 3.					
04	Print at header level 4.					
05	Print at header level 5.					
06	Print at header level 6.					
07	Print at header level 7.					
08	Print at header level 8.					
FHR-ALOC-BAL-LVL	ALOC_BAL_LVL	05	N	9(002)	125	126
GLR482 – Post Allocation Balance Sheet Allocation Level. Indicates the report level used for allocated items on the post allocation balance sheet. Valid entries are:						
0	Do not print allocations.					
1	Print only generation totals.					
2	Print account type totals.					
3	Print totals for allocations in and out.					
4	Summarize allocations on equal key.					
5	Print all allocations.					
FHR-M-BAL-EXCP-LVL	M_BAL_EXCP_LVL	05	N	9(002)	127	128
GLR310 – Responsibility Unit Balance Sheet Exception Level. If an exception report is specified by the Responsibility Unit Balance Sheet Option, this code gives the level to check for an exception. Valid entries are:						
00	Do not print.					
01	Check for exception at header level 1.					
02	Check for exception at header level 2.					
03	Check for exception at header level 3.					
04	Check for exception at header level 4.					
05	Check for exception at header level 5.					
06	Check for exception at header level 6.					
07	Check for exception at header level 7.					
08	Check for exception at header level 8.					
FHR-M-BAL-EXCP-AMT	M_BAL_EXCP_AMT	05	PS	S9(15)	129	136
GLR310 – Responsibility Unit Balance Sheet Exception Dollars. If an exception report is specified by the Responsibility Unit Balance Sheet Option, a line is printed whenever the variance exceeds the amount specified here. The format is a whole dollar amount without a decimal.						
FHR-M-BAL-EXCP-PCT	M_BAL_EXCP_PCT	05	PS	S9(03)V9(4)	137	140
GLR310 – Responsibility Unit Balance Sheet Exception Percentage. If an exception report is specified by the Responsibility Unit Balance Sheet Report Option, a line is printed whenever the variance from budget exceeds the percentage specified here.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHR-M-INC-EXCP-LVL	M_INC_EXCP_LVL	05	N	9(002)	141	142
GLR311 – Responsibility Unit Income Statement Exception Level. If an exception report is specified by the Responsibility Unit Income Statement, this code gives the level to check for an exception. Valid entries are:						
00	Do not print.					
01	Check for exception at header level 1.					
02	Check for exception at header level 2.					
03	Check for exception at header level 3.					
04	Check for exception at header level 4.					
05	Check for exception at header level 5.					
06	Check for exception at header level 6.					
07	Check for exception at header level 7.					
08	Check for exception at header level 8.					
FHR-M-INC-EXCP-AMT	M_INC_EXCP_AMT	05	PS	S9(15)	143	150
GLR311 – Responsibility Unit Income Statement Exception Dollar. If an exception report is specified by the Responsibility Unit Income Statement Report Option, a line is printed whenever the variance from budget exceeds the amount specified here. The format is a whole dollar amount without a decimal.						
FHR-M-INC-EXCP-PCT	M_INC_EXCP_PCT	05	PS	S9(03)V9(4)	151	154
GLR311 – Responsibility Unit Income Statement Exception Percentage. If an exception report is specified by the Responsibility Unit Income Statement Report Option, a line is printed whenever the variance from budget exceeds the percentage specified here.						
FHR-COMP-EXCP-LVL	COMP_EXCP_LVL	05	N	9(002)	155	156
GLR513 – Comparative Analysis Exception Level. If an exception report is specified by the Comparative Analysis Report Option, this code gives the level to check for an exception. Valid entries are:						
00	Do not print.					
01	Check for exception at header level 1.					
02	Check for exception at header level 2.					
03	Check for exception at header level 3.					
04	Check for exception at header level 4.					
05	Check for exception at header level 5.					
06	Check for exception at header level 6.					
07	Check for exception at header level 7.					
08	Check for exception at header level 8.					
FHR-COMP-EXCP-AMT	COMP_EXCP_AMT	05	PS	S9(15)	157	164
GLR513 – Comparative Analysis Exception Dollars. If an exception report is specified by the Comparative Analysis Report Option, a line is printed whenever the variance from budget exceeds the amount specified here. The format is a whole dollar amount without a decimal.						
FHR-COMP-EXCP-PCT	COMP_EXCP_PCT	05	PS	S9(03)V9(4)	165	168
GLR513 – Comparative Analysis Exception Percentage. If an exception report is specified by the Comparative Analysis Report Option, a line is printed whenever the variance from budget exceeds the percentage specified here.

FHR-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	169	192

FHT-RECORD (FHT) – Hierarchy Entry to Cost Center Record

This key only record matches a cost center to the appropriate hierarchy entry. This record contains alternate keys.

Record Statistics

Record ID	FHT	
Primary Key Length	0039	
Record Name	Library Name	Record Length
FHT-RECORD	FSSFHTTK	0102 bytes

Record Description

The following record description shows the format of the Hierarchy Entry to Cost Center Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHT-RECORD Group Level.		01	R		1	102
FHT-GRP-KEY Group Level.	GRP_KEY	03	G		1	39
FHT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FHT-HIER-ENTRY Hierarchy Entry. Alphanumeric field used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	HIER_ENTRY	05	C	X(020)	5	24
FHT-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	25	39
FHT-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		40	63
FHT-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	40	44
FHT-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	45	49

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHT-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	50	57
FHT-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	58	63
FHT-GRP-AIX1 Group Level.	GRP_AIX1	03	G		64	102
FHT-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	64	67
FHT-AIX-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	AIX_COST_CNTR	05	N	9(015)	68	82
FHT-AIX-HIER-ENTRY Hierarchy Entry. Alphanumeric field used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	AIX_HIER_ENTRY	05	C	X(020)	83	102

FHY-RECORD (FHY) – Hierarchy Structure Record

This record identifies the hierarchy structures being used. Before setting up the hierarchy rollup records, this record must be established. This record contains the hierarchy name, alternate institution name, and responsible person identifier.

Record Statistics

Record ID	FHY	
Primary Key Length	0008	
Record Name	Library Name	Record Length
FHY-RECORD	FSSFHYTK	0168 bytes

Record Description

The following record description shows the format of the Hierarchy Structure Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FHY-RECORD Group Level.		01	R		1 168
FHY-GRP-KEY Group Level.	GRP_KEY	03	G		1 8
FHY-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FHY-HIER-NBR Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999 .	HIER_NBR	05	N	9(004)	5 8
FHY-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		9 32
FHY-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	9 13
FHY-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	14 18
FHY-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	19 26

Field Name	Token Name	Level	Mode	Picture	Displacement	
FHY-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	27	32
FHY-GRP-DATA Group Level.	GRP_DATA	03	G		33	168
FHY-HIER-NAME Hierarchy Structure Name. Name of organization rollup structure.	HIER_NAME	05	C	X(050)	33	82
FHY-ALT-INST-NAME Alternate Institution Name. Used in place of the institution name on responsibility type reports. If this field is blank, the institution name from the institution record is used.	ALT_INST_NAME	05	C	X(050)	83	132
FHY-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the person responsible for this hierarchy structure. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	133	140
FHY-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(028)	141	168

FIN-RECORD (FIN) – Institution Record

This record contains data (e.g., controls) about each unique institution. When adding a new institution to the database, this record is required and must be the first record created.

Record Statistics

Record ID	FIN	
Primary Key Length	0004	
Record Name	Library Name	Record Length
FIN-RECORD	FSSFINTK	0784 bytes

Record Description

The following record description shows the format of the Institution Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FIN-RECORD Group Level.		01	R		1 784
FIN-GRP-KEY Group Level.	GRP_KEY	03	G		1 4
FIN-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FIN-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		5 28
FIN-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	5 9
FIN-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	10 14
FIN-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	15 22
FIN-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	23 28
FIN-GRP-DATA Group Level.	GRP_DATA	03	G		29 784

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-RECORD-ATTR	RECORD_ATTR	05	C	X(008)	29	36
Record Attributes. User-defined data associated with this institution.						
FIN-ZERO-INST-IND	ZERO_INST_IND	05	C	X(001)	37	37
Zero Institution Indicator. Determines how records defined for Institution Zero are used by this institution.						
Valid entries are:						
N No records from Institution Zero are merged with records defined for this institution.						
Y Records defined for this institution overrides or merges with any zero institution records.						
Z Only Institution Zero records are accessed by this institution.						
FIN-GROUP-ID	GROUP_ID	05	C	X(008)	38	45
Posting Group ID. Group identification used to post transactions for this institution.						
FIN-BEGIN-BATCH-NBR	BEGIN_BATCH_NBR	05	N	9(004)	46	49
Beginning Batch Number. Detects a duplicate key when entering a batch header for General Ledger transactions. The key is always institution number, batch number, and date. The beginning range of batch numbers is used for duplicate batches. Valid entries are 0001 – 8999 .						
Note: Beginning batch numbers must be less than ending batch numbers.						
FIN-END-BATCH-NBR	END_BATCH_NBR	05	N	9(004)	50	53
Ending Batch Number. Ending number of the range of batch numbers is used for duplicate batches. After the ending batch number is used, the system starts again with the beginning batch number. Valid entries are 0001 – 8999 .						
Note: Ending batch numbers must be greater than beginning batch numbers.						
FIN-NEXT-BATCH-NBR	NEXT_BATCH_NBR	05	N	9(004)	54	57
Next Batch Number. Next Batch Number. Controls automatic batch number assignment.						
FIN-HIER-INST-NBR	HIER_INST_NBR	05	N	9(004)	58	61
Hierarchy Institution Number. Determines the institution number used as a key to this institution hierarchy rollup structure.						
FIN-HIER-NBR	HIER_NBR	05	N	9(004)	62	65
Hierarchy Structure Number. Number of the organization structure used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999 .						
FIN-RESP-PERSON-ID	RESP_PERSON_ID	05	C	X(008)	66	73
Responsible Person ID. Identification number assigned to the person responsible for this hierarchy structure. This ID is in the key of the Responsible Person Record (FRP).						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-DIST-CODE	DIST_CODE	05	C	X(010)	74	83
Distribution Code. Designates receiving location for reports printed in remote or local data centers. A distribution code can be stored in the institution, cost center, and hierarchy records. This is in the key of the Distribution Profile Record (FDP).						
FIN-CHART-INST-NBR	CHART_INST_NBR	05	N	9(004)	84	87
Chart of Accounts Institution Number. Determines the institution number used as a key to this institution chart of accounts definition.						
FIN-CHART-NBR	CHART_NBR	05	N	9(004)	88	91
Chart of Accounts Chart Number. Determines the chart number used as a key to this institution chart of accounts definition. Valid entries are 0001 – 9999 .						
FIN-PROC-IND	PROC_IND	05	C	X(001)	92	92
In-process-switch. Turned on when the update of a company begins and turned off when the update is finished. Valid entries are:						
0 Not in process.						
1 In process.						
FIN-INPT-MTCH-PRCS	INPT_MTCH_PRCS	05	C	X(001)	93	93
Input Match Preprocessor. If this field contains 1 , all debit and credit transactions that are input through the posting cycle are matched against the preprocessor account control records for Application code '0000'. If they match, the action specified in the account control records is taken. See Account Control records 02 and 81 – 86. Valid entries are:						
0 Do not match.						
1 Match all input against the preprocessor parameters.						
FIN-INPT-VRFY-PRCS	INPT_VRFY_PRCS	05	C	X(001)	94	94
Input Verify Preprocessor. Reserved for future use.						
FIN-SUSP-PROC-IND	SUSP_PROC_IND	05	C	X(004)	95	98
Suspense Processing Indicator. Determines whether or not suspense and/or rejected items are recycled into the warehouse for this institution. It also controls the number of recycle batches generated. A single recycle batch can be generated for each institution or the recycle batch number can match the input. Valid entries are:						
0000 Do not build suspense or reject recycle batches.						
0001 Build suspense recycle batches only using the institution recycle batch number.						
0002 Build reject recycle batches only using the institution recycle batch number.						
0003 Build both suspense and reject recycle batches using the institution recycle batch number.						
0101 Build suspense recycle batches only using the input batch as the recycle batch number.						
0102 Build reject recycle batches only using the input batch as the recycle batch number.						
0103 Build both suspense and reject recycle batches using the input batch as the recycle batch number.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-SUSP-REJ-IND	SUSP_REJ_IND	05	C	X(001)	99	99
Suspense Reject Indicator. If this field contains 1 , an attempt is made to post all rejects that occur during posting to a suspense account. Valid entries are:						
0 Do not post rejects to suspense.						
1 Post rejects to suspense.						
FIN-RETRO-NBR-DAYS	RETRO_NBR_DAYS	05	N	9(003)	100	102
Retroactive Number of Days. Used only when the Retroactive Transactions Indicator is '2' or '3'. This field provides additional control for retroactive transactions with effective dates into the month prior to the current processing month. When the number of processing (not calendar) days into the current month has exceeded the Number of Days specified in this field, retros into the prior month are disallowed. Zero can be specified to only allow retros within the current processing month. Valid entries are 00 – 99 .						
Note: This field can be extended to the operator level in an online environment. See Application Security Code 1 in the MICM Operator Record (MIOPR) for further information.						
FIN-BATCH-METHOD	BATCH_METHOD	05	N	9(004)	103	106
Dollar Batch Balancing Technique. Indicates the technique used to determine whether the batch is in balance. Valid entries are:						
0001 Debits and credits (net in header).						
0002 Separate debit and credit totals (2 amounts in header).						
0003 Separate debit or credit total (1 amount in header).						
0004 Debits plus credits (total in header).						
0011 Same as 0001 with addition of item counts.						
0012 Same as 0002 with addition of item counts.						
0013 Same as 0003 with addition of item counts.						
0014 Same as 0004 with addition of item counts.						
FIN-MNTN-BAL-METHOD	MNTN_BAL_METHOD	05	N	9(004)	107	110
Maintenance Batch Balancing Technique. Indicates the technique used to determine whether the batch is in balance. Valid entries are:						
0000 No balancing.						
0001 Item counts only (1 count).						
0002 If the monetary amount in the batch header is nonzero, all the monetary values in the batched transactions are added together and balanced to the header.						
0003 Same as 0002 but with item counts also tested.						
FIN-ACCT-CHK-DIGIT	ACCT_CHK_DIGIT	05	N	9(001)	111	111
Account Number Check Digit. Indicates whether the corresponding field is edited for a valid check digit. Valid entries are:						
0 No check digit test.						
1 Standard modulus 10 verification.						
2 Standard modulus 11 verification.						
3 Geometric modulus 11 verification.						

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FIN-CNTR-CHK-DIGIT	CNTR_CHK_DIGIT	05	N	9(001)	112 112
--------------------	----------------	----	---	--------	---------

Cost Center Check Digit. Indicates whether the corresponding field is edited for a valid check digit. Valid entries are:

- 0 No check digit test.
- 1 Standard modulus 10 verification.
- 2 Standard modulus 11 verification.
- 3 Geometric modulus 11 verification.

FIN-SUBL-CHK-DIGIT	SUBL_CHK_DIGIT	05	N	9(001)	113 113
--------------------	----------------	----	---	--------	---------

Subledger 1 Check Digit. Indicates whether the corresponding field is edited for a valid check digit. Valid entries are:

- 0 No check digit test.
- 1 Standard modulus 10 verification.
- 2 Standard modulus 11 verification.
- 3 Geometric modulus 11 verification.

FIN-VEND-CHK-DIGIT	VEND_CHK_DIGIT	05	N	9(001)	114 114
--------------------	----------------	----	---	--------	---------

Subledger 2 Check Digit. Indicates whether the corresponding field is edited for a valid check digit. Valid entries are:

- 0 No check digit test.
- 1 Standard modulus 10 verification.
- 2 Standard modulus 11 verification.
- 3 Geometric modulus 11 verification.

FIN-MOD-11-WEIGHT	MOD_11_WEIGHT	05	N	9(015)	115 129
-------------------	---------------	----	---	--------	---------

Modulus 11 Weights. Weights used in a modulus 11 check routine on account and/or cost center numbers. Each field is right justified and the digits are paired from right to left. If geometric weights are specified, zero weights are replaced with weights of 10 before processing. The weights must be numeric and nonzero.

FIN-DOC-NBR-GEN	DOC_NBR_GEN	05	N	9(004)	130 133
-----------------	-------------	----	---	--------	---------

Document Number Generation. An external document number may be specified on input dollar transactions and is not modified by the system. It is used for informational or account reconciliation matching purposes. A separate internal document number is generated for all input dollar transactions and is used for tracking a transaction through the system. This field determines generated internal document number format. The sequence portion of the number is reset on batch (if applicable) and institution changes.

Note: Generated intercompany items do not use this field to format the internal document number. They use a high sequence number starting with 90000000001.

Valid entries are:

- 0001 DDD, batch, seq.
- 0002 YYDDD, batch, seq.
- 0003 MMDD, batch, seq.
- 0004 MMDDYY, batch, seq.
- 0005 YYDDD, seq.

Field Name	Token Name	Level	Mode	Picture	Displacement
0006	MMDDYY, seq.				
0007	Batch, DDD, seq.				
0008	Batch, YYDDD, seq.				
0009	Sequence number.				

FIN-CLOSE-FREQ	CLOSE_FREQ	05	C	X(001)	134	134
----------------	------------	----	---	--------	-----	-----

Closing Frequency. Indicates the frequency with which the books of the institution are closed (net income transferred to undivided profits). Valid entries are:

- 1 Books closed monthly.
- 2 Books closed quarterly.
- 3 Books closed semiannually.
- 4 Books closed annually.

FIN-MEMO-RPT-OPT	MEMO_RPT_OPT	05	C	X(001)	135	135
------------------	--------------	----	---	--------	-----	-----

Memo Report Option. Determines whether memo accounts are reported. Valid entries are:

- 0 No.
- 1 Yes.

FIN-RETRO-TRAN-IND	RETRO_TRAN_IND	05	C	X(001)	136	136
--------------------	----------------	----	---	--------	-----	-----

Retroactive Transactions Indicator. Indicates to the system how to limit the time period for retroactive transactions. Prior month retros can be restricted further by specifying a value in the Retro Number of Days field. Valid entries are:

- 0 Allow transactions within the current year only.
- 1 Allow transactions within the current year and into last year.
- 2 Allow transactions into last month only up until the Retro Number of Days has elapsed.
- 3 Allow transactions into last month only up until the Retro Number of Days has elapsed, but do not allow transactions into last year.

Note: This field can be extended to the operator level in an online environment. See Application Security Code 1 in the MICM Operator Record (MIOPR) for further information.

FIN-DEL-ZERO-CLSD	DEL_ZERO_CLSD	05	C	X(001)	137	137
-------------------	---------------	----	---	--------	-----	-----

Erase Zero Close Record. If this field equals 1, all account records are examined during the first run of each day. If the account status is closed and all amount fields are zero, the account record is erased. If this field is 0, zero balance accounts remain in a closed status. If a record is all zeros and closed, it is erased at year-end closing. Valid entries are:

- 0 Do not erase zero balance closed accounts.
- 1 Erase zero balance closed accounts during first run.

Note: Zero-balance accounts may also be automatically purged, based on last activity. Refer to the Days to Retain Inactive field in the Detail Chart of Accounts record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-YR-HIST	YR_HIST	05	N	9(002)	138	139
Years of History Retained. Maximum number of years of actual history retained on any record on the master file when the General Ledger closing program is run at year-end. Valid entries are:						
<ul style="list-style-type: none"> 0 Retain no history. 1 Retain 1 year of history. 2 Retain 2 years of history. 3 Retain 3 years of history. 4 Retain 4 years of history. 5 Retain 5 years of history. 						
FIN-YR-BDGT	YR_BDGT	05	N	9(002)	140	141
Years of Budget Retained. Maximum number of years of budget history retained on any record on the GL master file when the General Ledger closing program is run at year-end. Valid entries are:						
<ul style="list-style-type: none"> 0 Retain no budget history. 1 Retain 1 year of budget history. 2 Retain 2 years of budget history. 3 Retain 3 years of budget history. 4 Retain 4 years of budget history. 5 Retain 5 years of budget history. 						
FIN-SUBL-1-DESC	SUBL_1_DESC	05	C	X(050)	142	191
Subledger Description. Description used on reports for the corresponding subledger number.						
FIN-SUBL-1-YR-HIST	SUBL_1_YR_HIST	05	N	9(002)	192	193
Subledger-1 Years of History. Number of years history to retain for the corresponding subledger number. Up to 5 years of history can be retained.						
FIN-SUBL-1-YR-BDGT	SUBL_1_YR_BDGT	05	N	9(002)	194	195
Subledger-1 Years of Budget. Number of years budget history to retain for the corresponding subledger number. Up to 5 years of budget history can be retained.						
FIN-SUBL-2-DESC	SUBL_2_DESC	05	C	X(050)	196	245
Subledger-2 Description. Description used on reports for the corresponding subledger number.						
FIN-SUBL-2-YR-HIST	SUBL_2_YR_HIST	05	N	9(002)	246	247
Subledger-2 Years of History. Number of years history to retain for the corresponding subledger number. Up to 5 years of history can be retained.						
FIN-SUBL-2-YR-BDGT	SUBL_2_YR_BDGT	05	N	9(002)	248	249
Subledger-2 Years of Budget. Number of years budget history to retain for the corresponding subledger number. Up to 5 years of budget history can be retained.						
FIN-SUBL-3-DESC	SUBL_3_DESC	05	C	X(050)	250	299

FIN-SUBL-9-DESC	SUBL_9_DESC	05	C	X(050)	574	623
Subledger-9 Description. Description used on reports for the corresponding subledger number.						
FIN-SUBL-9-YR-HIST	SUBL_9_YR_HIST	05	N	9(002)	624	625
Subledger-9 Years of History. Number of years history to retain for the corresponding subledger number. Up to 5 years of history can be retained.						
FIN-SUBL-9-YR-BDGT	SUBL_9_YR_BDGT	05	N	9(002)	626	627
Subledger-9 Years of Budget. Number of years budget history to retain for the corresponding subledger number. Up to 5 years of budget history can be retained.						
FIN-DAYS-RETN-CNTL	DAYS_RETN_CNTL	05	N	9(003)	628	630
Days to Retain Control File Transactions. Number of Days to retain control file transactions on the warehouse after they have been processed. A value of 999 retains the records indefinitely.						
FIN-DAYS-RETN-MNTN	DAYS_RETN_MNTN	05	N	9(003)	631	633
Days to Retain GL Maintenance Transactions. Number of Days to retain General Ledger maintenance transactions on the warehouse after they have been processed. An entry of 999 retains the records indefinitely.						
FIN-DAYS-RETN-TRAN	DAYS_RETN_TRAN	05	N	9(003)	634	636
Days to Retain GL Dollar Transactions. Number of Days to retain General Ledger dollar transactions on the warehouse after they have been posted. An entry of 999 retains the records indefinitely.						
FIN-DAYS-RETN-BDGT	DAYS_RETN_BDGT	05	N	9(003)	637	639
Days to Retain Budget Transactions. Number of Days to retain budget transactions on the warehouse after they have been posted. An entry of 999 retains the records indefinitely.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-DAYS-RETN-PARM	DAYS_RETN_PARM	05	N	9(003)	640	642
Days To Retain Report Writer Parameters. Number of Days to retain report writer parameters on the warehouse. An entry of 999 retains the records indefinitely.						
FIN-DAYS-RETN-RULE	DAYS_RETN_RULE	05	N	9(003)	643	645
Days to Retain Cost Allocation Rules. Number of Days to retain cost allocation rules on the warehouse. An entry of 999 retains the records indefinitely. Reserved for future use.						
FIN-PRT-RPT-SUBS	PRT_RPT_SUBS	05	C	X(001)	646	646
Print Reports Subsequent Run. Controls the printing of reports during a subsequent or report update run when no activity exists for the institution; that is, when all GLR215 transaction counts are zero. When report printing is suppressed, GLF290 records are still generated and are available for printing through a stand-alone FCS290 reprint. Valid entries are:						
0 Suppress all report print after GLR210 during a subsequent or report update run with no activity.						
1 Produce all reports during subsequent and report update runs.						
FIN-PRE-MTH-END	PRE_MTH_END	05	C	X(001)	647	647
Balance Sheet Preliminary Option. Institution monthly preliminary option that determines if the month-to-date and year-to-date current information is used to produce the monthly GLR300, GLR301, and GLR302 reports. Valid entries are:						
N Print month-end reports.						
Y Print month-to-date reports.						
FIN-ANLY-DATE-OPT	ANLY_DATE_OPT	05	C	X(001)	648	648
Transaction Analysis Date Selection. Determines whether to use transaction date or effective date for selecting transactions from the history file for transaction analysis and subledger reporting. Valid entries are:						
0 Select by effective date.						
1 Select by transaction date.						
2 Select by posted date.						
3 Select by all dates.						
FIN-ANLY-BEGIN-DATE	ANLY_BEGIN_DATE	05	N	9(008)	649	656
Transaction Analysis Begin Date. Start date used to produce the transaction analysis and subledger reports. This date determines the beginning balance to use and the transactions to select from the Transaction History File for reporting. Format is YYYYMMDD.						
FIN-ANLY-END-DATE	ANLY_END_DATE	05	N	9(008)	657	664
Transaction Analysis Ending Date. End date used to produce the transaction analysis and subledger reports. This date determines the ending balance to use and the transactions to select from the Transaction History File for reporting. Format is YYYYMMDD.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-HIST-CTOF-DATE	HIST_CTOF_DATE	05	N	9(008)	665	672
Transaction History Cutoff Date. Date used for the accumulation of transactions on the Transaction History Cutoff file. This date is updated on a final run of the History Cutoff program. Refer to the History Cutoff Number of Days field for information on controlling the amount of history retained for online viewing.						
FIN-HIST-CTOF-DAYS	HIST_CTOF_DAYS	05	N	9(003)	673	675
History Cutoff Number of Days. Used in conjunction with the History Cutoff Date to retain transaction history for online viewing. Transactions are retained for this number of days prior to the current history cutoff date. In addition, all current month-to-date history is available for online viewing. If this field is zero, no transaction history is retained prior to the current history cutoff date. A value of 999 causes all history to be retained online indefinitely.						
FIN-CPTL-GLACCT-NBR	CPTL_GLACCT_NBR	05	N	9(015)	676	690
Undivided Profit Account. Account number to which the net income is posted. This account must be a liability or capital account and it must be open on the master file. It must be numeric and the account/cost center must exist on the GL master file.						
FIN-CPTL-COST-CNTR	CPTL_COST_CNTR	05	N	9(015)	691	705
Undivided Profit Cost Center Number. Cost center number within the account specified in the Undivided Profit Account field to which the net income is posted. This center must exist and must be open to the account specified in the Undivided Profit Account field.						
FIN-CPTL-DALY-OPT	CPTL_DALY_OPT	05	C	X(001)	706	706
Daily Undivided Profit Option. If this option is activated, transactions are generated to post net income to undivided profits during every run of that posting cycle. One transaction is created to post the net effect on all regular debits and credits; one transaction is generated for each retroactive transaction posted to income or expense. This results in an accurate average in the undivided profits account and daily closing of the books. In addition, offsetting transactions can be generated to a second account. Valid entries are:						
<ul style="list-style-type: none"> 0 Do not post undivided profits daily. 1 Post undivided profits daily to the specified account/cost center. 2 Same as option 1 but also generate offsetting transactions to the specified offset account using the undivided profits cost center. 						
FIN-CPTL-OFFS	CPTL_OFFS	05	N	9(015)	707	721
Undivided Profit Offset Account. Used in the daily cycle with the Undivided Profit Account field when the generation of transactions to undivided profits was specified and offsets were requested. You must ensure that this account exists for the center specified by Undivided Profit Cost Center Number. If it does not exist and offsets are requested, the generated transactions are rejected.						
FIN-CA-FILLER-8	CA_FILLER_8	05	C	X(008)	722	729
Reserved for system use.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-ACCT-TYPE-SEL	ACCT_TYPE_SEL	05	C	X(001)	730	730
Account Type Selection. Specifies the account types used on consolidated reports. Valid entries are:						
1 Balance sheet accounts.						
2 Income statement accounts.						
3 Statistical accounts only.						
4 All balance type accounts.						
5 All activity type accounts.						
6 All accounts.						
7 All nonstatistical accounts.						
FIN-DPLY-AVG-FLDS	DPLY_AVG_FLDS	05	C	X(001)	731	731
Reserved for future use.						
FIN-ONLINE-EDIT-IND	ONLINE_EDIT_IND	05	C	X(001)	732	732
Reserved for future use.						
FIN-SECURITY-IND	SECURITY_IND	05	C	X(001)	733	733
Security Indicator. Indicates whether field-level security is invoked for this institution. Valid entries are:						
0 Do not verify fields against the MICM ORA records during data entry and inquiry.						
1 Verify that all fields accessed by the operator are authorized by a MICM ORA record.						
FIN-SECURITY-LVL	SECURITY_LVL	05	C	X(001)	734	734
Reserved for future use.						
FIN-LOG-SECURITY	LOG_SECURITY	05	C	X(001)	735	735
Reserved for future use.						
FIN-LOG-BATCH-AUDIT	LOG_BATCH_AUDIT	05	C	X(001)	736	736
FIN-CHK-INST-RW	CHK_INST_RW	05	C	X(001)	737	737
Reserved for future use.						
FIN-RPT-PROFILE-ID	RPT_PROFILE_ID	05	C	X(008)	738	745
Institution Report Profile ID. Identification number for the institution reports profile. This ID is in the key on the Institution Reports Record (FIR).						
Note: The online FCINSTR transaction or the 11032 Control File parameter is used to add/delete report profiles.						
FIN-SUSP-PROFILE-ID	SUSP_PROFILE_ID	05	C	X(008)	746	753
Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).						
FIN-LAST-CLOSE-DATE	LAST_CLOSE_DATE	05	N	9(008)	754	761
Last Close Date. Indicates the last date on which the books of the institution were closed (net income transferred to undivided profits). The current processing effective date is moved to this field when FCS990 is executed.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIN-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(023)	762	784

FIR-RECORD (FIR) – Institution Reports Record

This record contains the option, level, and modes for the daily reports. The key consists of an institution number and profile identifier. Any number of report profiles can be built. The utilization of report profiling eliminates maintenance and ensures standardization of reports.

Record Statistics

Record ID	FIR	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FIR-RECORD	FSSFIRTK	0296 bytes

Record Description

The following record description shows the format of the Institution Reports Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FIR-RECORD Group Level.		01	R		1 296
FIR-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FIR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FIR-PROFILE-ID Institution Report Profile ID. Identification number for the institution reports profile. This ID is in the key on the Institution Reports Record (FIR).	PROFILE_ID	05	C	X(008)	5 12
Note: The online FCINSTR transaction or the 11032 Control File parameter is used to add/delete report profiles.					
FIR-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36
FIR-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13 17
FIR-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18 22

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIR-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30
FIR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FIR-GRP-DATA Group Level.	GRP_DATA	03	G		37	296
FIR-PROFILE-NAME Institution Reports Profile Name. The name assigned to the Institution Reports Profile Name.	PROFILE_NAME	05	C	X(050)	37	86
FIR-CNTR-JRNL-TYPE Posting Journal Type. This option selects the type of accounts that are to appear on the cost center posting journals. Also used to control the volume of detail printed on account sequence and/or cost center sequence-posting journals. The memo report option on the 11023 transaction controls whether memo accounts are to appear on GLR240 and GLR250. Valid entries are:	CNTR_JRNL_TYPE	05	C	X(001)	87	87
<ul style="list-style-type: none"> 0 All accounts. 1 Balance sheet accounts (types 01 – 10). 2 Income statements (types 20 – 40). 3 Memo accounts (types 90 – 95). 6 All dollar accounts (types 01 – 40). 7 All accounts with month-to-date detail on GLR240. 8 All accounts with month-to-date detail on GLR250. 9 All accounts with month-to-date detail on GLR240/250. 						
FIR-PRCS-PARM-MODE GLR200 – Preprocessor Reversal and Alternate Input Parameters Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	PRCS_MODE	05	C	X(001)	88	88
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						
FIR-PRCS-PARM-OPT GLR200 – Preprocessor Reversal and Alternate Input Parameters Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:	PRCS_PARM_OPT	05	C	X(001)	89	89
<ul style="list-style-type: none"> 0 Do not produce the report. 1 Produce the complete report. 2 Produce a totals-only report.

GLR201 – Preprocessor Input Transactions Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FIR-PRCS-INPT-OPT	PRCS_INPT_OPT	05	C	X(001)	91 91
-------------------	---------------	----	---	--------	-------

GLR201 – Preprocessor Input Transactions Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:

- 0 Do not produce the report.
- 1 Produce the complete report.
- 2 Produce a totals-only report.

FIR-PRCS-RVSL-MODE	PRCS_RVSL_MODE	05	C	X(001)	92 92
--------------------	----------------	----	---	--------	-------

GLR202 – Preprocessor Reversal Detail Transactions Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FIR-PRCS-RVSL-OPT	PRCS_RVSL_OPT	05	C	X(001)	93 93
-------------------	---------------	----	---	--------	-------

GLR202 – Preprocessor Reversal Detail Transactions Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:

- 0 Do not produce the report.
- 1 Produce the complete report.
- 2 Produce a totals-only report.

Field Name	Token Name	Level	Mode	Picture	Displacement
FIR-PRCS-DSPN-MODE	PRCS_DSPN_MODE	05	C	X(001)	94 94
GLR204 – Preprocessor Transaction Disposition Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0	Do not output the report.				
1	Printer output.				
2	Tape output without distribution code.				
3	Tape output with distribution code from cost center record.				
4	Tape output with distribution code from institution record.				
5 – 6	Other.				
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.				
K – Q	Same as 0 – 6, respectively, but with deferred online output.				
FIR-PRCS-DSPN-OPT	PRCS_DSPN_OPT	05	C	X(001)	95 95
GLR204 – Preprocessor Transaction Disposition Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:					
0	Do not produce the report.				
1	Produce the complete report.				
2	Produce a totals-only report.				
FIR-PRCS-ERR-MODE	PRCS_ERR_MODE	05	C	X(001)	96 96
GLR205 – Preprocessor Transaction Edit Errors Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:					
0	Do not output the report.				
1	Printer output.				
2	Tape output without distribution code.				
3	Tape output with distribution code from cost center record.				
4	Tape output with distribution code from institution record.				
5 – 6	Other.				
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.				
K – Q	Same as 0 – 6, respectively, but with deferred online output.				
FIR-PRCS-ERR-OPT	PRCS_ERR_OPT	05	C	X(001)	97 97
GLR205 – Preprocessor Transaction Edit Errors Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:					
0	Do not produce the report.				
1	Produce the complete report.				
2	Produce a totals-only report.				

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FIR-PRCS-TRAN-MODE	PRCS_TRAN_MODE	05	C	X(001)	98 98
--------------------	----------------	----	---	--------	-------

GLR206 – Preprocessor Accepted and Error Transactions Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FIR-PRCS-TRAN-OPT	PRCS_TRAN_OPT	05	C	X(001)	99 99
-------------------	---------------	----	---	--------	-------

GLR206 – Preprocessor Accepted and Error Transactions Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:

- 0 Do not produce the report.
- 1 Produce the complete report.
- 2 Produce a totals-only report.

FIR-PRCS-TOT-MODE	PRCS_TOT_MODE	05	C	X(001)	100 100
-------------------	---------------	----	---	--------	---------

GLR207 – Preprocessor Transaction Totals by Effective Date Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FIR-PRCS-TOT-OPT	PRCS_TOT_OPT	05	C	X(001)	101 101

GLR301 – Detail Statement of Earnings Exception Level. If an exception report was specified by the corresponding option, this code gives the level to check for an exception. Valid entries are:

- 00 Do not print the report.
- 01 Check for exception at header level 1.
- 02 Check for exception at header level 2.
- 03 Check for exception at header level 3.
- 04 Check for exception at header level 4.
- 05 Check for exception at header level 5.
- 06 Check for exception at header level 6.
- 07 Check for exception at header level 7.
- 08 Check for exception at header level 8.

FIR-INC-EXCP-AMT	INC_EXCP_AMT	05	PS	S9(15)	253	260
------------------	--------------	----	----	--------	-----	-----

GLR301 – Detail Statement of Earnings Exception Dollars. If Detail Statement of Earnings Report Option specifies an exception report, a line is printed whenever the variance from budget exceeds the amount specified here. The format is a whole dollar amount without a decimal.

FIR-INC-EXCP-PCT	INC_EXCP_PCT	05	PS	S9(03)V9(4)	261	264
------------------	--------------	----	----	-------------	-----	-----

GLR301 – Detail Statement of Earnings Exception Percentage. If Detail Statement of Earnings Report Option specifies an exception report, a line is printed whenever the variances from budget exceed the percentage specified here. The format includes 3 decimal positions.

FIR-SUMM-INC-MODE	SUMM_INC_MODE	05	C	X(001)	265	265
-------------------	---------------	----	---	--------	-----	-----

GLR302 – Summary Statement of Earnings Report Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FIR-SUMM-INC-OPT	SUMM_INC_OPT	05	C	X(001)	266	266
GLR302 – Summary Statement of Earnings Report Option. Determines which daily cycle runs, if any, produce the report. Valid entries are:						
<ul style="list-style-type: none"> 0 Do not print the report. 1 Print the full report at specified level. 2 Print exception report. 						
FIR-SUMM-INC-LVL	SUMM_INC_LVL	05	N	9(002)	267	268
GLR302 – Summary Statement of Earnings Report Level. Determines the print level for the Total Institution Income Statement. If a full report was specified by the Summary Statement of Earnings Report Option, the code gives the level of the report. If an exception report was specified, this code gives the level at which all accounts are printed. Valid entries are:						
<ul style="list-style-type: none"> 00 Do not print. 01 Print at header level 1. 02 Print at header level 2. 03 Print at header level 3. 04 Print at header level 4. 05 Print at header level 5. 06 Print at header level 6. 07 Print at header level 7. 08 Print at header level 8, one line per account. 09 Print every account/cost center combination. 						
FIR-SUMM-EXCP-LVL	SUMM_EXCP_LVL	05	N	9(002)	269	270
GLR302 – Summary Statement of Earnings Exception Level. If an exception report was specified by the corresponding option, this code gives the level to check for an exception. Valid entries are:						
<ul style="list-style-type: none"> 00 Do not print the report. 01 Check for exception at header level 1. 02 Check for exception at header level 2. 03 Check for exception at header level 3. 04 Check for exception at header level 4. 05 Check for exception at header level 5. 06 Check for exception at header level 6. 07 Check for exception at header level 7. 08 Check for exception at header level 8. 						
FIR-SUMM-EXCP-AMT	SUMM_EXCP_AMT	05	PS	S9(15)	271	278
GLR302 – Summary Statement of Earnings Exception Dollars. If an exception report was specified by Summary Statement of Earnings Report Option, a line is printed whenever the variance from budget exceeds the amount specified here. The format is a whole dollar amount without a decimal.						
FIR-SUMM-EXCP-PCT	SUMM_EXCP_PCT	05	PS	S9(03)V9(4)	279	282
GLR302 – Summary Statement of Earnings Exception Percentage. If Summary Statement of Earnings Report Option specifies an exception report, a line is printed whenever the variance from budget exceeds the percentage specified here. The format includes 3 decimal positions.

FLB-RECORD (FLB) – Subledger Account Detail Budget Set Record

This record contains a budget amount field for each accounting period (up to 12). In addition, this record contains an amount type field, which determines the history year of the record. FLB is similar to the account detail budget amount set.

Record Statistics

Record ID	FLB	
Primary Key Length	0058	
Record Name	Library Name	Record Length
FLB-RECORD	FSSFLBTK	0208 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Budget Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FLB-RECORD Group Level.		01	R		1 208
FLB-GRP-KEY Group Level.	GRP_KEY	03	G		1 58
FLB-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FLB-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5 6
00	No subledger.				
01	Payment to vendor.				
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.				
03	Payment to employee for expense.				
04	Teller over/short.				
05	Subledger-5.				
06	Subledger-6.				
07	Subledger-7.				
08	Subledger-8.				
09	Subledger-9.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FLB-SUBL-ACCT-NBR Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.	SUBL_ACCT_NBR	05	N	9(015)	7	21
FLB-SUBL-ACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	SUBL_ACCT_LVL	05	N	9(002)	22	23
FLB-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	24	38
FLB-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	39	53
FLB-AMT-TYPE Budget Amount Type. Type of amount represented in the corresponding budget periods. Valid entries are: CYBUD Current year budget. H1BUD Last year budget. H2BUD Two years ago budget. H3BUD Three years ago budget. H4BUD Four years ago budget. H5BUD Five years ago budget. W1BUD Working budget 1. W2BUD Working budget 2. W3BUD Working budget 3. W4BUD Working budget 4. W5BUD Working budget 5. W6BUD Working budget 6. W7BUD Working budget 7. W8BUD Working budget 8. W9BUD Working budget 9.	AMT_TYPE	05	C	X(005)	54	58
FLB-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		59	82
FLB-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	59	63
FLB-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	64	68
FLB-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	69	76

Field Name	Token Name	Level	Mode	Picture	Displacement	
FLB-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	77	82
FLB-GRP-DATA Group Level.	GRP_DATA	03	G		83	208
FLB-PERIOD-01-AMT Subledger Budget Period Amount. Total budget amount posted to the corresponding subledger period.	PERIOD_01_AMT	05	PS	S9(15)V9(2)	83	91
FLB-PERIOD-02-AMT Subledger Budget Period Amount. Total budget amount posted to the corresponding subledger period.	PERIOD_02_AMT	05	PS	S9(15)V9(2)	92	100

FNT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FNT-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FNT-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FNT-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FNT-DOC-NBR Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. The external document number matches and clears account reconciliation open items.	DOC_NBR	05	C	X(015)	37 51

Field Name	Token Name	Level	Mode	Picture	Displacement	
FNT-UNIQUE-SEQ-NBR Unique Sequence Number. Sequential number used to make the record key unique when multiple reconciliation open items exist for the same general ledger account, cost center, and document number. If this number is not entered on Transaction 44, all items for the document number are cleared. Otherwise, only the one item with the specified sequence number is cleared.	UNIQUE_SEQ_NBR	05	N	9(009)	52	60
FNT-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		61	84
FNT-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	61	65
FNT-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	66	70
FNT-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	71	78
FNT-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	79	84
FNT-GRP-AIX1 Group Level.	GRP_AIX1	03	G		85	144
FNT-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	85	88
FNT-AIX-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	AIX_GLACCT_NBR	05	N	9(015)	89	103
FNT-AIX-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	AIX_GLACCT_LVL	05	N	9(002)	104	105
FNT-AIX-DOC-NBR Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. The external document number is used to match and clear account reconciliation open items.	AIX_DOC_NBR	05	C	X(015)	106	120
FNT-AIX-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	AIX_COST_CNTR	05	N	9(015)	121	135

Field Name	Token Name	Level	Mode	Picture	Displacement	
FNT-AIX-UNIQUE-SEQ	AIX_UNIQUE_SEQ	05	N	9(009)	136	144
Unique Sequence Number. Sequential number used to make the record key unique when multiple SJE's exist for the same General Ledger account and cost center.						
FNT-GRP-DATA	GRP_DATA	03	G		145	464
Group Level.						
FNT-DAYS-ON-FILE	DAYS_ON_FILE	05	N	9(009)	145	153
Number of Days on File. A count of the processing days that this item has been on the open item file. It is incremented in the input routine on the first update run of the day. If an institution is processed weekly, in effect this becomes a count of weeks that the item has been open. It is used in conjunction with Days to Past Due to determine whether an item is past due.						
FNT-TRAN-CODE	TRAN_CODE	05	N	9(002)	154	155
Dollar Transaction Code. Identifies the type of dollar transaction. Valid entries are:						
01 Regular debit.						
02 Regular credit.						
11 Accrual debit.						
12 Accrual credit.						
21 Retroactive debit.						
22 Retroactive credit.						
31 Future debit.						
32 Future credit.						
FNT-SUBL-NBR	SUBL_NBR	05	N	9(002)	156	157
Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:						
00 No subledger.						
01 Payment to vendor.						
02 Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.						
03 Payment to employee for expense.						
04 Teller over/short.						
05 Subledger-5.						
06 Subledger-6.						
07 Subledger-7.						
08 Subledger-8.						
09 Subledger-9.						
FNT-TRAN-DATE	TRAN_DATE	05	N	9(008)	158	165
Transaction Date. Date associated with a transaction that was entered by the operator.						
FNT-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	166	173
Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FNT-POST-DATE	POST_DATE	05	N	9(008)	174	181
Transaction Post Date. Identifies the month, day, and year that this transaction was posted. This date matches the current processing date for regular debits and credits.						
FNT-SUBL-ACCT-NBR-1	SUBL_ACCT_NBR_1	05	N	9(015)	182	196
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FNT-SUBL-ACCT-NBR-2	SUBL_ACCT_NBR_2	05	N	9(015)	197	211
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FNT-TRAN-AMT	TRAN_AMT	05	PS	S9(15)V9(2)	212	220
Dollar Transaction Amount. Identifies the dollar amount posted to the General Ledger Master File for this transaction.						
FNT-TRAN-DESC	TRAN_DESC	05	C	X(050)	221	270
Transaction Description. Description of the transaction being posted.						
FNT-GEN-DOC-NBR	GEN_DOC_NBR	05	C	X(015)	271	285
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FNT-ORIG-GLACCT-NBR	ORIG_GLACCT_NBR	05	N	9(015)	286	300
Account Number. Identifies a General Ledger Master File account number.						
FNT-ORIG-COST-CNTR	ORIG_COST_CNTR	05	N	9(015)	301	315
Cost Center. Unique number for each accounting unit and each function in the organization.						
FNT-SUSP-GLACCT-NBR	SUSP_GLACCT_NBR	05	N	9(015)	316	330
Suspense Account Number. Account number of the suspense account used for items rejected during posting. The rejected transaction account number is matched against the low and high account number ranges. The suspense account for the matching range is used to post the rejected dollar amount.						
FNT-SUSP-COST-CNTR	SUSP_COST_CNTR	05	N	9(015)	331	345
Suspense Cost Center ID. If suspense processing is used and a dollar transaction rejects, an attempt is made to post it to a suspense account with its original cost center ID. If that attempt fails, this cost center is substituted for the original center and another attempt is made.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FNT-TRAN-SRCE	TRAN_SRCE	05	C	X(008)	346	353
Transaction Source. Documents the source of each dollar transaction. It is especially useful for audit and transaction tracing.						
GEN-CLOS	Generated by closing program.					
GEN-FRCE	Generated to force balance a batch of transactions.					
GEN-POST	Generated by the main post – undivided profits.					
GEN-SUSP	Generated by suspense post – undivided profits.					
GEN-VRFY	Generated by batch verification.					
I/C-nnnn	Intercompany transaction from institution nnnn.					
INPUT	Input to or generated by edit and entry.					
ONLINE	Input from the online system.					
PENDING	Release from a pending batch.					
SJE	This is a generated standard journal entry.					
FNT-APPL-NBR	APPL_NBR	05	N	9(004)	354	357
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FNT-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	358	365
Operator ID. Online user signon key.						
FNT-PRODUCT-CODE	PRODUCT_CODE	05	C	X(010)	366	375
Product Code. Documents the product code associated with a dollar transaction. It is optional and user-defined.						
FNT-CURN-EXCH-AMT	CURN_EXCH_AMT	05	PS	S9(15)V9(2)	376	384
Reserved for future use.						
FNT-CURN-EXCH-RATE	CURN_EXCH_RATE	05	PS	S9(03)V9(4)	385	388
Reserved for future use.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FNT-CURN-EXCH-DATE Reserved for future use.	CURN_EXCH_DATE	05	N	9(008)	389	396
FNT-CURN-EXCH-TBL Reserved for future use.	CURN_EXCH_TBL	05	C	X(008)	397	404
FNT-CURN-EXCH-QLFY Reserved for future use.	CURN_EXCH_QLFY	05	C	X(003)	405	407
FNT-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(027)	408	434
FNT-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	435	464

FOA-RECORD (FOA) – Online Report to Account Record

This record is created using the GLF312 file. The online reports to account number records are used to post online month-end adjustments. The GLF312 file is matched with these records and records are added, changed, or deleted as needed.

Record Statistics

Record ID	FOA	
Primary Key Length	0033	
Record Name	Library Name	Record Length
FOA-RECORD	FSSFOATK	0795 bytes

Record Description

The following record description shows the format of the Online Report to Account Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FOA-RECORD Group Level.		01	R		1 795
FOA-GRP-KEY Group Level.	GRP_KEY	03	G		1 33
FOA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FOA-GRP-AIX1 Group Level.	GRP_AIX1	04	G		5 33
FOA-RPT-NBR Report Number. Indicates the report number from which an inquiry is started.	RPT_NBR	05	N	9(003)	5 7
FOA-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	8 11
FOA-RPT-TYPE Report Type. Indicates the type of report requested. Valid entries are: 1 Standard report. 2 Report Writer.	RPT_TYPE	05	C	X(001)	12 12

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOA-RPT-DATE Report Date. Indicates the date the report was added to the online reports file. The same report may be stored online for many different run dates.	RPT_DATE	05	N	9(008)	13	20
FOA-RPT-PAGE-NBR Page. Page number of the displayed report.	RPT_PAGE_NBR	05	N	9(009)	21	29
FOA-RPT-LINE-NBR Line. Line number within the displayed page.	RPT_LINE_NBR	05	N	9(004)	30	33
FOA-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		34	57
FOA-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	34	38
FOA-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	39	43
FOA-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	44	51
FOA-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	52	57
FOA-GRP-DATA Group Level	GRP_DATA	03	G		58	195
FOA-CHART-INST-NBR	CHART_INST_NBR	05	N	9(004)	58	61
FOA-CHART-NBR	CHART_NBR	05	N	9(004)	62	65
FOA-GLACCT-LVL-LEN	GLACCT_LVL_LEN	05	N	9(002)	66	67
FOA-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	68	82
FOA-HIER-INST-NBR Hierarchy Institution Number. Determines the institution number used as a key to this institution hierarchy rollup structure.	HIER_INST_NBR	05	N	9(004)	83	86
FOA-HIER-NBR Hierarchy Structure Number. Number of the organization structure used in responsibility reporting. The system allows up to 999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999.	HIER_NBR	05	N	9(004)	87	90

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOA-GRP-HIER-SEQ	GRP_HIER_SEQ	05	G		91	170
FOA-LVL-01-SEQ	HIER_LVL_01_SEQ	10	B	S9(09)	91	94
FOA-LVL-02-SEQ	HIER_LVL_02_SEQ	10	B	S9(09)	95	98
FOA-LVL-03-SEQ	HIER_LVL_03_SEQ	10	B	S9(09)	99	102
FOA-LVL-04-SEQ	HIER_LVL_04_SEQ	10	B	S9(09)	103	106
FOA-LVL-05-SEQ	HIER_LVL_05_SEQ	10	B	S9(09)	107	110
FOA-LVL-06-SEQ	HIER_LVL_06_SEQ	10	B	S9(09)	111	114
FOA-LVL-07-SEQ	HIER_LVL_07_SEQ	10	B	S9(09)	115	118
FOA-LVL-08-SEQ	HIER_LVL_08_SEQ	10	B	S9(09)	119	122
FOA-LVL-09-SEQ	HIER_LVL_09_SEQ	10	B	S9(09)	123	126
FOA-LVL-10-SEQ	HIER_LVL_10_SEQ	10	B	S9(09)	127	130
FOA-LVL-11-SEQ	HIER_LVL_11_SEQ	10	B	S9(09)	131	134
FOA-LVL-12-SEQ	HIER_LVL_12_SEQ	10	B	S9(09)	135	138
FOA-LVL-13-SEQ	HIER_LVL_13_SEQ	10	B	S9(09)	139	142
FOA-LVL-14-SEQ	HIER_LVL_14_SEQ	10	B	S9(09)	143	146
FOA-LVL-15-SEQ	HIER_LVL_15_SEQ	10	B	S9(09)	147	150
FOA-LVL-16-SEQ	HIER_LVL_16_SEQ	10	B	S9(09)	151	154
FOA-LVL-17-SEQ	HIER_LVL_17_SEQ	10	B	S9(09)	155	158
FOA-LVL-18-SEQ	HIER_LVL_18_SEQ	10	B	S9(09)	159	162
FOA-LVL-19-SEQ	HIER_LVL_19_SEQ	10	B	S9(09)	163	166
FOA-LVL-20-SEQ	HIER_LVL_20_SEQ	10	B	S9(09)	167	170
FOA-HIER-LVL-LEN	HIER_LVL_LEN	05	N	9(002)	171	172

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOA-RPT-HIER-ENTRY	RPT_HIER_ENTRY	05	C	X(020)	173	192
Hierarchy Entry. Alphanumeric field is used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.						
FOA-FORMAT-SWITCH	FORMAT_SWITCH	05	C	X(003)	193	195
Format Switch. Reformatter switch.						
FOA-GRP-RPT-DATA	GRP_RPT_DATA	03	G		196	795
FOA-IN-GLACCT-NBR	IN_GLACCT_NBR	05	N	9(015)	196	210

FOR-RECORD (FOR) – Online Report Record

This record contains print lines from reports that have been added online based on report modes. For each print line in a report, an FOR record is written. The volume of FOR records depends on the number of reports, size of reports, and the number of days reports remain in this record.

Record Statistics

Record ID	FLB	
Primary Key Length	0033	
Record Name	Library Name	Record Length
FLB-RECORD	FSSFLBTK	0190 bytes

Record Description

The following record description shows the format of the Online Report Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FOR-RECORD Group Level.		01	R		1 190
FOR-GRP-KEY Group Level.	GRP_KEY	03	G		1 4
FOR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FOR-GRP-AIX1 Group Level.	GRP_AIX1	04	G		5 33
FOR-RPT-NBR Report Number. Indicates the report number from which an inquiry is started.	RPT_NBR	05	N	9(003)	5 7
FOR-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	8 11
FOR-RPT-TYPE Report Type. Indicates the type of report requested. Valid entries are: 1 Standard report. 2 Report Writer.	RPT_TYPE	05	C	X(001)	12 12

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOR-RPT-DATE Report Date. Indicates the date the report was added to the online reports file. The same report may be stored online for many different run dates.	RPT_DATE	05	N	9(008)	13	20
FOR-RPT-PAGE-NBR Page. Page number of the displayed report.	RPT_PAGE_NBR	05	N	9(009)	21	29
FOR-RPT-LINE-NBR Line. Line number within the displayed page.	RPT_LINE_NBR	05	N	9(004)	30	33
FOR-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		34	57
FOR-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	34	38
FOR-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	39	43
FOR-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	44	51
FOR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	52	57
FOR-GRP-DATA Group Level.	GRP_DATA	03	G		58	190
FOR-RPT-LINE-DATA Transaction Data. Transaction record format.	RPT_LINE_DATA	05	C	X(133)	58	190

FOX-RECORD (FOX) – Online Report Index Record

This record is used select reports for viewing online. A FOX record is created for each report added to the FOR Record.

Record Statistics

Record ID	FOX		
Primary Key Length	0020		
Record Name	Library Name	Record Length	
FOX-RECORD	FSSFOXTK	0200 bytes	

Record Description

The following record description shows the format of the Online Report Index Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOX-RECORD Group Level.		01	R		1	200
FOX-GRP-KEY Group Level.	GRP_KEY	03	G		1	20
FOX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FOX-GRP-AIX1 Group Level.	GRP_AIX1	04	G		5	20
FOX-RPT-NBR Report Number. Indicates the report number from which an inquiry is started.	RPT_NBR	05	N	9(003)	5	7
FOX-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	8	11
FOX-RPT-TYPE Report Type. Indicates the type of report requested. Valid entries are: 1 Standard report. 2 Report Writer.	RPT_TYPE	05	C	X(001)	12	12

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOX-RPT-DATE Report Date. Indicates the date the report was added to the online reports file. The same report can be stored online for many different run dates.	RPT_DATE	05	N	9(008)	13	20
FOX-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		21	44
FOX-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	21	25
FOX-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	26	30
FOX-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	31	38
FOX-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	39	44
FOX-GRP-DATA Group Level.	GRP_DATA	03	G		45	200
FOX-RPT-CREATE-DATE Report Create Date. The current IPL date on which the report was added to the online reports file.	RPT_CREATE_DATE	05	N	9(008)	45	52
FOX-DAYS-RETN-RPT Days to Retain Report. Indicates the number of days that the corresponding report is to remain on the online reports file. The report is automatically purged after the specified number of days elapse. An entry of 999 retains the report indefinitely.	DAYS_RETN_RPT	05	N	9(003)	53	55
FOX-NBR-PAGE Number of Pages. Number of pages contained within the report.	NBR_PAGE	05	PS	S9(09)	56	60
FOX-NBR-LINE Number of Lines. Total number of lines within the report.	NBR_LINE	05	PS	S9(09)	61	65
FOX-LAST-PAGE-LINE Line. Last line on last page of the displayed report.	LAST_PAGE_LINE	05	N	9(004)	66	69
FOX-RPT-TIME Report Time. Hour and minute that the report was added to the online reports file.	RPT_TIME	05	C	X(008)	70	77

Note: The index date and time cannot be the same as the date and time displayed within the report text.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FOX-RPT-START-PAGE	RPT_START_PAGE	05	N	9(009)	78	86
Start Page. Indicates the page number on which the online reports file inquiry is to begin for the corresponding report.						
FOX-RPT-START-LINE	RPT_START_LINE	05	N	9(004)	87	90
Start Line. Indicates the line number within each page on which the online reports file inquiry is to begin for the corresponding report. The display begins on this line for every page while scrolling through a report.						
FOX-RPT-MARGIN	RPT_MARGIN	05	C	X(050)	91	140
Set Margins. Indicates up to 5 current report margins in use. May be changed to dynamically reformat reports as follows: SSS,LL/SSS,LL/SSS,LL/SSS,LL/SSS,LL where:						
SSS Starting column number of displayed report margin.						
LL Length (number of characters) displayed from the corresponding start position. For example, 001,20/120,12/095,10 displays the first 20 characters of each report line, followed by 12 characters from report line columns 120 – 131, followed by 10 characters from report line columns 95 – 104.						
Other valid entries are:						
FIND/ccc/ or FIND ALL/ccc Search for a (variable length) string of characters within the current margin settings.						
ALT or ALTERNATE Alternate the margin settings from 001,79 (left side of report page) to 054,79 (right side of report page).						
FOX-RPT-SPACE-IND	RPT_SPACE_IND	05	C	X(001)	141	141
Spacing. Indicates whether vertical spacing is used for report displays. Valid entries are:						
N Do not display blank lines when double or triple spacing is indicated.						
Y Display all blank lines when double or triple spacing is indicated within the report.						
FOX-RPT-TITLE	RPT_TITLE	05	C	X(050)	142	191
Report Title. User-defined title associated with the report and stored in the online report index.						
FOX-CA-FILLER	CA_FILLER	05	C	X(009)	192	200
Reserved for system use.						

FPA-RECORD (FPA) – Preprocessor Account Record

This record changes an account number to a different value. It also contains information that creates direct and offset posting monetary transactions. FPA can be established as a profile or at an institution level.

Record Statistics

Record ID	FPA	
Primary Key Length	0038	
Record Name	Library Name	Record Length
FPA-RECORD	FSSFPA TK	0304 bytes

Record Description

The following record description shows the format of the Preprocessor Account Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FPA-RECORD Group Level.		01	R		1 304
FPA-GRP-KEY Group Level.	GRP_KEY	03	G		1 38
FPA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FPA-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:	APPL_NBR	05	N	9(004)	5 8
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.				
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)				
0100	Deposits application.				
0150	Exception Administrator application.				
0200	Time Investment application.				
0300	Account Analysis application.				
0500	Commercial Loans application.				
0550	Installment Loans application.				

Field Name	Token Name	Level	Mode	Picture	Displacement
0600	Teller application.				
0700	Accounts Payable application.				
0800	Automated Clearing House application.				
0850	MICR application.				
0900	FCS online application.				
0901	FCS batch application.				

FPA-SRCE-GLACCT-NBR SRCE_GLACCT_NBR 05 C X(015) 9 23
Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes ~~bb~~123, ~~b~~123~~b~~, and 123~~bb~~ to be the same numeric value (00123). However, ~~bb~~ABC, ~~b~~ABC~~b~~, and ABC~~bb~~ are 3 separate unique character values.

FPA-SRCE-BRCH-DEPT SRCE_BRCH_DEPT 05 C X(015) 24 38
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes ~~bb~~123, ~~b~~123~~b~~, and 123~~bb~~ to be the same numeric value (00123). However, ~~bb~~ABC, ~~b~~ABC~~b~~, and ABC~~bb~~ are 3 separate unique character values.

FPA-AUDIT-GRP AUDIT_GRP 03 G 39 62
Group Level.

FPA-AUDIT-DATE AUDIT_DATE 05 PS S9(09) 39 43
Audit Date. Date the record was last updated.

FPA-AUDIT-TIME AUDIT_TIME 05 PS S9(09) 44 48
Audit Time. Time the record was last updated.

FPA-AUDIT-USER AUDIT_USER 05 C X(008) 49 56
Audit User. Last user (operator or program ID) that updated the record.

FPA-AUDIT-ORG AUDIT_ORG 05 C X(006) 57 62
Audit Organization. DBS organization associated with this record.

FPA-GRP-AIX1 GRP_AIX1 03 G 63 100
Group Level.

FPA-AIX-INST-NBR AIX_INST_NBR 05 N 9(004) 63 66
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPA-AIX-SRCE-GLACCT	AIX_SRCE_GLACCT	05	C	X(015)	67	81
Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb123 , b123b , and 123bb to be the same numeric value (00123). However, bbABC , bABCb , and ABCbb are 3 separate unique character values.						
FPA-AIX-SRCE-BRCH	AIX_SRCE_BRCH	05	C	X(015)	82	96
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb123 , b123b , and 123bb to be the same numeric value (00123). However, bbABC , bABCb , and ABCbb are 3 separate unique character values.						
FPA-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	97	100
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPA-GRP-DATA	GRP_DATA	03	G		101	304
Group Level.						
FPA-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	101	108
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPA-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	109	116
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FPA-DRCT-DSPN-CODE	DRCT_DSPN_CODE	05	C	X(002)	117	118
Disposition Code. Determines the technique used to handle transactions that match an account control record. The values applied to the direct side are independent of those applied to the offset side. Valid entries are:						
00 Eliminate all transactions.						
01 Output a transaction for each input transaction.						
02 Consolidate all output transactions on account, cost center, transaction code, effective date, and direct/offset code and produce 1 transaction for each unique set.						
05 Prorate across institutions.						
06 Prorate across time – calendar days.						
07 Prorate across time – processing days.						
08 Prorate each transaction to produce as many transactions as indicated by the proration fields; institution number and date remain unchanged in this proration.						
FPA-DRCT-GLACCT-TO	DRCT_GLACCT_TO	05	N	9(015)	119	133
Destination Account Number. Identifies General Ledger Master File account number to which released transactions are posted. If zero is specified, the source account is used as the destination account number.						
FPA-DRCT-CNTR-TO	DRCT_CNTR_TO	05	N	9(015)	134	148
Destination Cost Center. Identifies GL cost center number used for posting released transactions. If zero is specified, the source cost center is used as the destination cost center number.						
FPA-DRCT-TRAN-DESC	DRCT_TRAN_DESC	05	C	X(050)	149	198
Transaction Description. Description (from the account control record) inserted in all output transactions that result from the consolidation of 2 or more transactions. It is also inserted in any transaction that would otherwise have a blank description.						
FPA-OFFS-DSPN-CODE	OFFS_DSPN_CODE	05	C	X(002)	199	200
Disposition Code. Determines the technique used to handle transactions that match an account control record. The values applied to the direct side are independent of those applied to the offset side. Valid entries are:						
00 Eliminate all transactions.						
01 Output a transaction for each input transaction.						
02 Consolidate all output transactions on account, cost center, transaction code, effective date, and direct/offset code and produce 1 transaction for each unique set.						
05 Prorate across institutions.						
06 Prorate across time – calendar days.						
07 Prorate across time – processing days.						
08 Prorate each transaction to produce as many transactions as indicated by the proration fields; institution number and date remain unchanged in this proration.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPA-OFFS-GLACCT-TO Destination Account Number. Identifies General Ledger Master File account number to which released transactions are posted. If zero is specified, the source account is used as the destination account number.	OFFS_GLACCT_TO	05	N	9(015)	201	215
FPA-OFFS-CNTR-TO Destination Cost Center. Identifies GL cost center number used for posting released transactions. If zero is specified, the source cost center is used as the destination cost center number.	OFFS_CNTR_TO	05	N	9(015)	216	230
FPA-OFFS-TRAN-DESC Transaction Description. Description (from the account control record) inserted in all output transactions that result from the consolidation of 2 or more transactions. It is also inserted in any transaction that would otherwise have a blank description.	OFFS_TRAN_DESC	05	C	X(050)	231	280
FPA-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	281	304

FPB-RECORD (FPB) – Preprocessor Branch Department Record

This record changes branch department numbers. (Branch department is equivalent to cost centers.) This record can be established as a profile record or at an institution level.

Record Statistics

Record ID	FPB		
Primary Key Length	0023		
Record Name	Library Name	Record Length	
FPB-RECORD	FSSFPBTK	0128 bytes	

Record Description

The following record description shows the format of the Preprocessor Branch Department Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPB-RECORD Group Level.		01	R		1	128
FPB-GRP-KEY Group Level.	GRP_KEY	03	G		1	23
FPB-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FPB-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5	8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPB-SRCE-BRCH-DEPT	SRCE_BRCH_DEPT	05	C	X(015)	9	23
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FPB-AUDIT-GRP	AUDIT_GRP	03	G		24	47
Group Level.						
FPB-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	24	28
Audit Date. Date the record was last updated.						
FPB-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	29	33
Audit Time. Time the record was last updated.						
FPB-AUDIT-USER	AUDIT_USER	05	C	X(008)	34	41
Audit User. Last user (operator or program ID) that updated the record.						
FPB-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	42	47
Audit Organization. DBS organization associated with this record.						
FPB-GRP-AIX1	GRP_AIX1	03	G		48	70
Group Level.						
FPB-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	48	51
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.						
FPB-AIX-SRCE-BRCH	AIX_SRCE_BRCH	05	C	X(015)	52	66
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPB-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	67	70
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.

FPC-RECORD (FPC) – Preprocessor Transaction Code Record

This record changes transaction codes to another value. FPC can be established as a profile record or at an institution level.

Record Statistics

Record ID	FPC	
Primary Key Length	0016	
Record Name	Library Name	Record Length
FPC-RECORD	FSSFPCTK	0104 bytes

Record Description

The following record description shows the format of the Preprocessor Transaction Code Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FPC-RECORD Group Level.		01	R		1 104
FPC-GRP-KEY Group Level.	GRP_KEY	03	G		1 16
FPC-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FPC-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application. 0700 Accounts Payable application. 0800 Automated Clearing House application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPC-SRCE-TRAN-CODE	SRCE_TRAN_CODE	05	C	X(008)	9	16
Source Transaction Code. Identifies an input transaction code converted by the preprocessor.						
FPC-AUDIT-GRP	AUDIT_GRP	03	G		17	40
Group Level.						
FPC-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	17	21
Audit Date. Date the record was last updated.						
FPC-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	22	26
Audit Time. Time the record was last updated.						
FPC-AUDIT-USER	AUDIT_USER	05	C	X(008)	27	34
Audit User. Last user (operator or program ID) that updated the record.						
FPC-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	35	40
Audit Organization. DBS organization associated with this record.						
FPC-GRP-AIX1	GRP_AIX1	03	G		41	56
Group Level.						
FPC-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	41	44
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.						
FPC-AIX-SRCE-CODE	AIX_SRCE_CODE	05	C	X(008)	45	52
Source Transaction Code. Identifies an input transaction code converted by the preprocessor.						
FPC-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	53	56
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					

Field Name	Token Name	Level	Mode	Picture	Displacement	
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPC-GRP-DATA Group Level.	GRP_DATA	03	G		57	104
FPC-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	57	64
FPC-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	65	72
FPC-TRAN-CODE Transaction Code. Identifies the type of transaction output from the preprocessor. Must be a valid numeric FCS transaction code.	TRAN_CODE	05	N	9(002)	73	74
FPC-SIGN-IND Sign Indicator. Indicates the action taken in processing transactions for the corresponding input source code. Valid entries are: N Do not perform sign and code reversal. Y Perform sign and code reversal.	SIGN_IND	05	C	X(001)	75	75
FPC-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(029)	76	104

FPI-RECORD (FPI) – Preprocessor Institution Number Change Record

This record changes input institution numbers to a different value. This preprocessor rule is applied to transaction in the transaction warehouse regardless of the institution number on those transactions.

Note: The institution number in the key is zero.

Record Statistics

Record ID	FPI	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FPI-RECORD	FSSFPITK	0080 bytes

Record Description

The following record description shows the format of the Preprocessor Institution Number Change Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FPI-RECORD Group Level.		01	R		1 80
FPI-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FPI-ZERO-NBR Zero Number. Key institution always set to zero.	ZERO_NBR	05	N	9(004)	1 4
FPI-SRCE-INST-NBR Source Institution Number. Identifies an input institution number converted by the preprocessor.	SRCE_INST_NBR	05	C	X(008)	5 12
FPI-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36
FPI-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13 17
FPI-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18 22
FPI-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23 30
FPI-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31 36

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPI-GRP-DATA Group Level.	GRP_DATA	03	G		37	80
FPI-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	37	44
FPI-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	45	52
FPI-INST-NBR Institution Number. Used as output from a preprocessor institution number conversion.	INST_NBR	05	N	9(004)	53	56
FPI-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	57	80

FPN-RECORD (FPN) – Preprocessor Application Change Record

This record changes input application codes to another value. This record can be established as a profile record or at the institution level.

Record Statistics

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPN-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	37	40
FPN-GRP-DATA Group Level.	GRP_DATA	03	G		41	144
FPN-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	41	48
FPN-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	49	56
FPN-APPL-DESC Application Description. Alphabetic name or description of the source application.	APPL_DESC	05	C	X(050)	57	106
FPN-SUSP-PROC-IND Suspense Processing Indicator. Determines whether or not suspense and/or rejected items are recycled into the warehouse for this institution. It also controls the number of recycle batches generated. A single recycle batch can be generated for each institution or the recycle batch number can match the input. Valid entries are: 0000 Do not build suspense or reject recycle batches. 0001 Build suspense recycle batches only using the institution recycle batch number. 0002 Build reject recycle batches only using the institution recycle batch number. 0003 Build both suspense and reject recycle batches using the institution recycle batch number. 0101 Build suspense recycle batches only using the input batch as the recycle batch number. 0102 Build reject recycle batches only using the input batch as the recycle batch number. 0103 Build both suspense and reject recycle batches using the input batch as the recycle batch number.	SUSP_PROC_IND	05	C	X(004)	107	110

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FPN-SUSP-PROFILE-ID	SUSP_PROFILE_ID	05	C	X(008)	111 118
---------------------	-----------------	----	---	--------	---------

Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).

Suspense profiles are used in three different areas of the system. The preprocessor application suspense profile ID determines the accounts used when an account control record does not exist for an input account number. The institution suspense profile ID is used during the posting cycle to determine the suspense account for posting rejected dollar amounts. The third use of the suspense profile is to force balance a batch of dollar transactions.

The preprocessor and posting cycle match against the profile beginning and ending account range to determine the suspense account numbers. Dollar batch force balancing always uses the very first range defined for the suspense profile (FSP).

FPN-CA-FILLER	CA_FILLER	05	C	X(026)	119 144
---------------	-----------	----	---	--------	---------

Reserved for system use.

FPP-RECORD (FPP) – Preprocessor Account Proration Record

This record creates additional dollar transactions using a prorate percent. This record contains an alternate key.

Record Statistics

Record ID	FPP	
Primary Key Length	0073	
Record Name	Library Name	Record Length
FPP-RECORD	FSSFPTK	0184 bytes

Record Description

The following record description shows the format of the Preprocessor Account Proration Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FPP-RECORD Group Level.		01	R		1 184
FPP-GRP-KEY Group Level.	GRP_KEY	03	G		1 73
FPP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FPP-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement
0600	Teller application.				
0700	Accounts Payable application.				
0800	Automated Clearing House application.				
0850	MICR application.				
0900	FCS online application.				
0901	FCS batch application.				

FPP-SRCE-GLACCT-NBR SRCE_GLACCT_NBR 05 C X(015) 9 23
Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes ~~bb~~123, ~~b~~123~~b~~, and 123~~bb~~ to be the same numeric value (00123). However, ~~bb~~ABC, ~~b~~ABC~~b~~, and ABC~~bb~~ are 3 separate unique character values.

FPP-SRCE-BRCH-DEPT SRCE_BRCH_DEPT 05 C X(015) 24 38
Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes ~~bb~~123, ~~b~~123~~b~~, and 123~~bb~~ to be the same numeric value (00123). However, ~~bb~~ABC, ~~b~~ABC~~b~~, and ABC~~bb~~ are 3 separate unique character values.

FPP-DRCT-OFFS-IND DRCT_OFFS_IND 05 C X(001) 39 39
Direct Offset Code. Identifies each of the proration fields as direct or offset prorations. This code is used by the preprocessor to identify direct and offset prorations. Valid entries are:

- 1 Apply parameter field to the direct side of transaction.
- 2 Apply parameter field to the offset side of transaction.

FPP-PRAT-INST-NBR PRAT_INST_NBR 05 N 9(004) 40 43
Proration Institution Number. Indicates the institution number that receives the transaction from the results of proration.

FPP-PRAT-GLACCT-NBR PRAT_GLACCT_NBR 05 N 9(015) 44 58
Prorate Account Number. Specifies the General Ledger account number to which the released transactions are posted. This number must be a valid account number existing on the master file.

FPP-PRAT-COST-CNTR PRAT_COST_CNTR 05 N 9(015) 59 73
Proration Cost Center Number. Specifies the cost center for posting proration transactions. Must be a valid FCS cost center existing on the Control File. If all nines are specified in this field, the input cost center is used in the generated proration transaction.

FPP-AUDIT-GRP AUDIT_GRP 03 G 74 97
Group Level.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	74	78
FPP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	79	83
FPP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	84	91
FPP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	92	97
FPP-GRP-AIX1 Group Level.	GRP_AIX1	03	G		98	135
FPP-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	98	101
FPP-AIX-SRCE-GLACCT Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.	AIX_SRCE_GLACCT	05	C	X(015)	102	116
FPP-AIX-SRCE-BRCH Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.	AIX_SRCE_BRCH	05	C	X(015)	117	131

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPP-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	132	135
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPP-GRP-DATA	GRP_DATA	03	G		136	184
Group Level.						
FPP-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	136	143
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FPP-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	144	151
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FPP-PRAT-PCT	PRAT_PCT	05	PS	S9(03)V9(4)	152	155
Proration Percentage. Percentage applied to the input transaction amount to compute the amount field of the transaction released to the specified General Ledger account. Multiple prorations can be applied to 1 input transaction. For example, enter 100.0000 for 100%. Valid entry must be numeric.						
FPP-PRAT-DAYS	PRAT_DAYS	05	N	9(003)	156	158
Proration Number of Days. Generates future-dated transactions that are released 1 through 365 days from the date they are generated. This field is the number of days into the future that the generated transaction should be released. Because transactions are generated for each transaction coming through, the audit trail is complete and reconciliation can be used on the account. Valid entry must be numeric.

Audit User. Last user (operator or program ID) that updated the record.						
FPS-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	44	49
Audit Organization. DBS organization associated with this record.						
FPS-GRP-AIX1	GRP_AIX1	03	G		50	74
Group Level.						
FPS-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	50	53
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPS-AIX-SUBL-NBR	AIX_SUBL_NBR	05	N	9(002)	54	55
Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:						
00	No subledger.					
01	Payment to vendor.					
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.					
03	Payment to employee for expense.					
04	Teller over/short.					
05	Subledger-5.					
06	Subledger-6.					
07	Subledger-7.					
08	Subledger-8.					
09	Subledger-9.					
FPS-AIX-SRCE-SUBL	AIX_SRCE_SUBL	05	C	X(015)	56	70
Source Subledger Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FPS-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	71	74
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPS-GRP-DATA	GRP_DATA	03	G		75	128
Group Level.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPS-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	75	82
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FPS-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	83	90
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FPS-SUBL-ACCT-NBR	SUBL_ACCT_NBR	05	N	9(015)	91	105
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FPS-CA-FILLER	CA_FILLER	05	C	X(023)	106	128
Reserved for system use.						

FPT-RECORD (FPT) – Preprocessor Transaction Type Change Record

This record changes an input transaction type to another value. This record contains an alternate key.

Record Statistics

Record ID	FPT	
Primary Key Length	0016	
Record Name	Library Name	Record Length
FPT-RECORD	FSSFPTTK	0104 bytes

Record Description

The following record description shows the format of the Preprocessor Transaction Type Change Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FPT-RECORD Group Level.		01	R		1 104
FPT-GRP-KEY Group Level.	GRP_KEY	03	G		1 16
FPT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FPT-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPT-SRCE-TRAN-TYPE	SRCE_TRAN_TYPE	05	C	X(008)	9	16
Source Transaction Type. Identifies an input transaction type converted by the preprocessor.						
FPT-AUDIT-GRP	AUDIT_GRP	03	G		17	40
Group Level.						
FPT-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	17	21
Audit Date. Date the record was last updated.						
FPT-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	22	26
Audit Time. Time the record was last updated.						
FPT-AUDIT-USER	AUDIT_USER	05	C	X(008)	27	34
Audit User. Last user (operator or program ID) that updated the record.						
FPT-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	35	40
Audit Organization. DBS organization associated with this record.						
FPT-GRP-AIX1	GRP_AIX1	03	G		41	56
Group Level.						
FPT-AIX-INST-NBR	AIX_INST_NBR	05	N	9(004)	41	44
Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.						
FPT-AIX-SRCE-TYPE	AIX_SRCE_TYPE	05	C	X(008)	45	52
Source Transaction Type. Identifies an input transaction type converted by the preprocessor.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FPT-AIX-APPL-NBR	AIX_APPL_NBR	05	N	9(004)	53	56
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FPT-GRP-DATA	GRP_DATA	03	G		57	104
Group Level.						
FPT-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	57	64
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FPT-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	65	72
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FPT-SUBL-NBR	SUBL_NBR	05	N	9(002)	73	74
Source Subledger Number. Numeric field identifying an input subledger number converted by the preprocessor.						
FPT-CA-FILLER	CA_FILLER	05	C	X(030)	75	104
Reserved for system use.						

FRA-RECORD (FRA) – Batch Release Approval

This record defines Batch Release Approval rules for different batch headers and applications.

Record Statistics

Record ID	FRA	
Primary Key Length	0011	
Record Name	Library Name	Record Length
FRA-RECORD	FSSFRATK	0128 bytes

Record Description

The following record description shows the format of the Batch Release Approval record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FRA-RECORD Group Level.		01	R		1 128
FRA-GRP-KEY Group Level.	GRP_KEY	03	G		1 11
FRA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FRA-TRAN_CODE Transaction Code. Indicates the batch header transaction code.	TRAN_CODE	05	N	9(002)	5 6
FRA-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:	APPL_NBR	05	N	9(004)	7 10
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.				
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)				
0100	Deposits application.				
0150	Exception Administrator application.				
0200	Time Investment application.				
0300	Account Analysis application.				
0500	Commercial Loans application.				
0550	Installment Loans application.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FRA-ITEM-IND	ITEM_IND	05	C	X(001)	11	11
Item Indicator. The batch item indicator is used to indicate special types of batches entering the system which may require additional approval levels.						
FRA-AUDIT-GRP	AUDIT_GRP	03	G		12	35
Group Level.						
FRA-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	12	16
Audit Date. Date the record was last updated.						
FRA-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	17	21
Audit Time. Time the record was last updated.						
FRA-AUDIT-USER	AUDIT_USER	05	C	X(008)	22	29
Audit User. Last user (operator or program ID) that updated the record.						
FRA-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	30	35
Audit Organization. DBS organization associated with this record.						
FRA-GRP-DATA	GRP_DATA	03	G		36	128
Group Data.						
FRA-START-DAY-01	START_DAY_01	05	N	9(002)	36	37
Start Day 01. The start day is used to indicate when batch approvals are to start for month 01, January.						
FRA-APPROVAL-LVL-01	APPROVAL_LVL_01	05	N	9(001)	38	38
Approval Level 01. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.						
FRA-START-DAY-02	START_DAY_02	05	N	9(002)	39	40
Start Day 02. The start day is used to indicate when batch approvals are to start for month 02, February.						
FRA-APPROVAL-LVL-02	APPROVAL_LVL_02	05	N	9(001)	41	41
Approval Level 02. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRA-START-DAY-03 Start Day 03. The start day is used to indicate when batch approvals are to start for month 03, March.	START_DAY_03	05	N	9(002)	42	43
FRA-APPROVAL-LVL-03 Approval Level 03. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_03	05	N	9(001)	44	44
FRA-START-DAY-04 Start Day 04. The start day is used to indicate when batch approvals are to start for month 04, April.	START_DAY_04	05	N	9(002)	45	46
FRA-APPROVAL-LVL-04 Approval Level 04. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_04	05	N	9(001)	47	47
FRA-START-DAY-05 Start Day 05. The start day is used to indicate when batch approvals are to start for month 05, May.	START_DAY_05	05	N	9(002)	48	49
FRA-APPROVAL-LVL-05 Approval Level 05. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_05	05	N	9(001)	50	50
FRA-START-DAY-06 Start Day 06. The start day is used to indicate when batch approvals are to start for month 06, June.	START_DAY_06	05	N	9(002)	51	52
FRA-APPROVAL-LVL-06 Approval Level 06. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_06	05	N	9(001)	53	53
FRA-START-DAY-07 Start Day 07. The start day is used to indicate when batch approvals are to start for month 07, July.	START_DAY_07	05	N	9(002)	54	55
FRA-APPROVAL-LVL-07 Approval Level 07. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_07	05	N	9(001)	56	56
FRA-START-DAY-08 Start Day 08. The start day is used to indicate when batch approvals are to start for month 08, August.	START_DAY_08	05	N	9(002)	57	58
FRA-APPROVAL-LVL-08 Approval Level 08. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.	APPROVAL_LVL_08	05	N	9(001)	59	59

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRA-START-DAY-09	START_DAY_09	05	N	9(002)	60	61
Start Day 09. The start day is used to indicate when batch approvals are to start for month 09, September.						
FRA-APPROVAL-LVL-09	APPROVAL_LVL_09	05	N	9(001)	62	62
Approval Level 09. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.						
FRA-START-DAY-10	START_DAY_10	05	N	9(002)	63	64
Start Day 10. The start day is used to indicate when batch approvals are to start for month 10, October.						
FRA-APPROVAL-LVL-10	APPROVAL_LVL_10	05	N	9(001)	65	65
Approval Level 10. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.						
FRA-START-DAY-11	START_DAY_11	05	N	9(002)	66	67
Start Day 11. The start day is used to indicate when batch approvals are to start for month 11, November.						
FRA-APPROVAL-LVL-11	APPROVAL_LVL_11	05	N	9(001)	68	68
Approval Level 11. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.						
FRA-START-DAY-12	START_DAY_12	05	N	9(002)	69	70
Start Day 12. The start day is used to indicate when batch approvals are to start for month 12, December.						
FRA-APPROVAL-LVL-12	APPROVAL_LVL_12	05	N	9(001)	71	71
Approval Level 12. The approval level indicates the number of management approvals, 1 – 9, required before a batch of transactions can be posted.

Reserved for System use.						
FRA-USER-FILLER	USER_FILLER	05	C	X(030)	99	128
User-defined.						

FRF-RECORD (FRF) – Related Function Definition Record

This record is used by cost allocation. The key to this record is institution number and function code. In addition, this record contains the function name.

Record Statistics

Record ID	FRF	
Primary Key Length	0019	
Record Name	Library Name	Record Length
FRF-RECORD	FSSFRFTK	0120 bytes

Record Description

The following record description shows the format of the Related Function Definition Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRF-RECORD Group Level.		01	R		1	120
FRF-GRP-KEY Group Level.	GRP_KEY	03	G		1	19
FRF-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FRF-FUNC-CODE Related Function Code. Relates an account to a specific function and can be substituted for the cost center during cost allocation processing. It is used to redefine account relationships previously established by means of the cost center.	FUNC_CODE	05	N	9(015)	5	19
FRF-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		20	43
FRF-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	20	24
FRF-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	25	29
FRF-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	30	37

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRF-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	38	43
FRF-GRP-DATA Group Level.	GRP_DATA	03	G		44	120
FRF-FUNC-NAME Cost Center Name. Name of the organization unit represented by this cost center.	FUNC_NAME	05	C	X(050)	44	93
FRF-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(027)	94	120

FRP-RECORD (FRP) – Responsible Person Record

This record contains information such as a person's name, title, phone number, and email address, which can be used for report distribution.

Record Statistics

Record ID	FRP	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FRP-RECORD	FSSFRPTK	0224 bytes

Record Description

The following record description shows the format of the Responsible Person Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRP-RECORD Group Level.		01	R		1	224
FRP-GRP-KEY Group Level.	GRP_KEY	03	G		1	12
FRP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FRP-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	5	12
FRP-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13	36
FRP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13	17
FRP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18	22
FRP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FRP-GRP-DATA Group Level.	GRP_DATA	03	G		37	224
FRP-PERSON-NAME Responsible Person Name. Name of the person responsible for this cost center. This name is in the key of the Responsible Person Record (FRP).	PERSON_NAME	05	C	X(050)	37	86
FRP-PERSON-TITLE Responsible Person Title. Title of this responsible person within the organization.	PERSON_TITLE	05	C	X(050)	87	136
FRP-PHONE-NBR Responsible Person Phone Number. Phone number for this responsible person. The field is automatically formatted with dashes as implied by the number of digits entered.	PHONE_NBR	05	N	9(011)	137	147
FRP-E-MAIL-ADDR Responsible Person e-mail Address. E-mail or Internet address for this responsible person.	E_MAIL_ADDR	05	C	X(050)	148	197
FRP-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(027)	198	224

FRR-RECORD (FRR) – Report Writer Report Record

This record contains report writer parameter transaction types 0 – 6. Each FRR Record is part of the transaction data warehouse and has a batch header associated with it.

Record Statistics

Record ID	FRR	
Primary Key Length	0026	
Record Name	Library Name	Record Length
FRR-RECORD	FSSFRRTK	0280 bytes

Record Description

The following record description shows the format of the Report Writer Report Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FRR-RECORD Group Level.		01	R		1 280
----------------------------	--	----	---	--	-------

FRR-GRP-KEY Group Level.	GRP_KEY	03	G		1 26
-----------------------------	---------	----	---	--	------

FRR-INST-NBR	INST_NBR	05	N	9(004)	1 4
--------------	----------	----	---	--------	-----

Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

FRR-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
---------------	-----------	----	---	--------	-----

Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.
9500 – 9549	Commercial Loans application.
9550 – 9599	Installment Loans application.
9700 – 9799	Accounts Payable application.
9800 – 9849	Automated Clearing House application.
9850 – 9899	MICR application.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRR-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FRR-RPT-NBR	RPT_NBR	05	N	9(003)	11	13
Report Number. User-defined number to identify a report. Must be a numeric value greater than zero. It is recommended that a 600 series report number be used for Report Writer reports.						
FRR-PARM-SET-NBR	PARM_SET_NBR	05	N	9(004)	14	17
Parameter Set Number. Identifies a set of extract or report parameters. It can be used to select sets of parameters from different reports in order to build new reports with similar extract or reporting requirements. This field must be numeric and greater than zero.						
Note: Zero can be used to display all parameter sets within a batch/report.						
FRR-ITEM-NBR	ITEM_NBR	05	N	9(009)	18	26
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.						
FRR-AUDIT-GRP	AUDIT_GRP	03	G		27	50
Group Level.						
FRR-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	27	31
Audit Date. Date the record was last updated.						
FRR-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	32	36
Audit Time. Time the record was last updated.						
FRR-AUDIT-USER	AUDIT_USER	05	C	X(008)	37	44
Audit User. Last user (operator or program ID) that updated the record.						
FRR-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	45	50
Audit Organization. DBS organization associated with this record.						
FRR-GRP-DATA	GRP_DATA	03	G		51	280
Group Level.						
FRR-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	51	51
Reserved for future use.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRR-PARM-TYPE	PARM_TYPE	05	C	X(002)	52	53
Parameter Type. Optional field used to specify a particular type of parameter to copy. All parameters of the same type number are copied. If used, Parameter Set Number From and Parameter Set Number To must be specified. Valid entries are:						
1 Field select parameter.						
2 Account selection parameter.						
3 Company print parameter.						
4 Math parameter.						
5 Detail line print and code translation parameters.						
6 Report text, format style, and print control parameters.						
FRR-TRAN-DATA	TRAN_DATA	05	C	X(200)	54	253
Transaction Data. Transaction record format.						
FRR-CA-FILLER	CA_FILLER	05	C	X(027)	254	280
Reserved for system use.						

FRW-RECORD (FRW) – Report Writer Parameter Set Record

This record contains information about the number of parameters used for a given institution, batch, and parameter set number. This record is an index to the report writer parameters and part of the transaction data warehouse.

Record Statistics

Record ID	FRW	
Primary Key Length	0017	
Record Name	Library Name	Record Length
FRW-RECORD	FSSFRWTK	0200 bytes

Record Description

The following record description shows the format of the Report Writer Parameter Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FRW-RECORD Group Level.		01	R		1 200
FRW-GRP-KEY Group Level.	GRP_KEY	03	G		1 17
FRW-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FRW-BATCH-NBR Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:	BATCH_NBR	05	N	9(004)	5 8
9000 – 9099	FCS institution recycle batches.				
9100 – 9149	Deposits application.				
9150 – 9199	Exception Administrator application.				
9200 – 9299	Time Investment application.				
9300 – 9399	Account Analysis application.				
9500 – 9549	Commercial Loans application.				
9550 – 9599	Installment Loans application.				
9700 – 9799	Accounts Payable application.				
9800 – 9849	Automated Clearing House application.				
9850 – 9899	MICR application.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRW-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF Control File batch.						
GL General Ledger batch.						
RR Reject Recycle batch.						
RW Report Writer batch.						
SR Suspense Recycle batch.						
FRW-RPT-NBR	RPT_NBR	05	N	9(003)	11	13
Report Number. User-defined number to identify a report. Must be a numeric value greater than zero. It is recommended that a 600 series report number be used for Report Writer reports.						
FRW-PARM-SET-NBR	PARM_SET_NBR	05	N	9(004)	14	17
Parameter Set Number. Identifies a set of extract or report parameters. It can be used to select sets of parameters from different reports in order to build new reports with similar extract or reporting requirements. This field must be numeric and greater than zero.						
Note: Zero can be used to display all parameter sets within a batch/report.						
FRW-AUDIT-GRP	AUDIT_GRP	03	G		18	41
Group Level.						
FRW-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	18	22
Audit Date. Date the record was last updated.						
FRW-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	23	27
Audit Time. Time the record was last updated.						
FRW-AUDIT-USER	AUDIT_USER	05	C	X(008)	28	35
Audit User. Last user (operator or program ID) that updated the record.						
FRW-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	36	41
Audit Organization. DBS organization associated with this record.						
FRW-GRP-DATA	GRP_DATA	03	G		42	200
Group Level.						
FRW-RECORD-STATUS	RECORD_STATUS	05	C	X(001)	42	42
Reserved for future use.						
FRW-PARM-SET-DESC	PARM_SET_DESC	05	C	X(050)	43	92
Transaction Data. Transaction record format.						
FRW-PARM-0-COUNT	PARM_0_COUNT	05	PS	S9(07)	93	96
Transaction Data. Transaction record format.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FRW-PARM-1-COUNT Transaction Data. Transaction record format.	PARM_1_COUNT	05	PS	S9(07)	97	100
FRW-PARM-2-COUNT Transaction Data. Transaction record format.	PARM_2_COUNT	05	PS	S9(07)	101	104
FRW-PARM-3-COUNT Transaction Data. Transaction record format.	PARM_3_COUNT	05	PS	S9(07)	105	108
FRW-PARM-4-COUNT Transaction Data. Transaction record format.	PARM_4_COUNT	05	PS	S9(07)	109	112
FRW-PARM-5-R-COUNT Transaction Data. Transaction record format.	PARM_5_R_COUNT	05	PS	S9(07)	113	116
FRW-PARM-5-T-COUNT Transaction Data. Transaction record format.	PARM_5_T_COUNT	05	PS	S9(07)	117	120
FRW-PARM-6-C-COUNT Transaction Data. Transaction record format.	PARM_6_C_COUNT	05	PS	S9(07)	121	124
FRW-PARM-6-T-COUNT Transaction Data. Transaction record format.	PARM_6_T_COUNT	05	PS	S9(07)	125	128
FRW-PARM-6-F-COUNT Transaction Data. Transaction record format.	PARM_6_F_COUNT	05	PS	S9(07)	129	132
FRW-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	133	140
FRW-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(030)	141	170
FRW-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	171	200

FSA-RECORD (FSA) – Suspense Account Record

This record defines a suspense account for a range of accounts and is used in the posting process. The key to this record is institution number and high account number. The low account number is in the data portion of the record to complete the range.

Record Statistics

Record ID	FSA		
Primary Key Length	0019		
Record Name	Library Name	Record Length	
FSA-RECORD	FSSFSA TK	0176 bytes	

Record Description

The following record description shows the format of the Suspense Account Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSA-RECORD Group Level.		01	R		1	176
FSA-GRP-KEY Group Level.	GRP_KEY	03	G		1	19
FSA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FSA-HIGH-GLACCT-NBR High Account Number. Ending range of accounts used to match rejected transaction account numbers. The suspense account for the matching range is used to post the rejected dollar amount.	HIGH_GLACCT_NBR	05	N	9(015)	5	19
FSA-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		20	43
FSA-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	20	24
FSA-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	25	29
FSA-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	30	37

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSA-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	38	43
FSA-GRP-DATA Group Level.	GRP_DATA	03	G		44	176
FSA-LOW-GLACCT-NBR Low Account Number. Beginning range of accounts used to match rejected transaction account numbers. The suspense account for the matching range is used to post the rejected dollar amount.	LOW_GLACCT_NBR	05	N	9(015)	44	58
FSA-SUSP-DESC Suspense Description. Description of the suspense account definition.	SUSP_DESC	05	C	X(050)	59	108
FSA-SUSP-GLACCT-NBR Suspense Account Number. Account number of the suspense account used for items rejected during posting. The rejected transaction account number is matched against the low and high account number ranges. The suspense account for the matching range is used to post the rejected dollar amount.	SUSP_GLACCT_NBR	05	N	9(015)	109	123
FSA-SUSP-COST-CNTR Suspense Cost Center ID. If suspense processing is used and a dollar transaction rejects, an attempt is made to post it to a suspense account with its original cost center ID. If that attempt fails, this cost center is substituted for the original center and another attempt is made.	SUSP_COST_CNTR	05	N	9(015)	124	138
FSA-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	139	146
FSA-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(030)	147	176

FSB-RECORD (FSB) – Subledger Account Detail Amount Set Record

This record contains an amount field for each accounting period (up to 12). These records are similar in use to the account detail amount set.

Record Statistics

Record ID	FSB	
Primary Key Length	0058	
Record Name	Library Name	Record Length
FSB-RECORD	FSSFSTBK	0199 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Amount Set Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSB-RECORD Group Level.		01	R		1	199
FSB-GRP-KEY Group Level.	GRP_KEY	03	G		1	58
FSB-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FSB-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5	6
00 No subledger.						
01 Payment to vendor.						
02 Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.						
03 Payment to employee for expense.						
04 Teller over/short.						
05 Subledger-5.						
06 Subledger-6.						
07 Subledger-7.						
08 Subledger-8.						
09 Subledger-9.						

Field Name	Token Name	Level	Mode	Picture	Displacement
FSB-SUBL-ACCT-NBR Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.	SUBL_ACCT_NBR	05	N	9(015)	7 21
FSB-SUBL-ACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	SUBL_ACCT_LVL	05	N	9(002)	22 23
FSB-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	24 38
FSB-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	39 53
FSB-AMT-TYPE Dollar Amount Type. The type of amount represented in the corresponding periods. Valid entries are: CYACT Current year actual. CYAVG Current year average daily balance. H1ACT Last year actual. H1AVG Last year average daily balance. H2ACT Two years ago actual. H2AVG Two years ago average daily balance. H3ACT Three years ago actual. H3AVG Three years ago average daily balance. H4ACT Four years ago actual. H4AVG Four years ago average daily balance. H5ACT Five years ago actual. H5AVG Five years ago average daily balance.	AMT_TYPE	05	C	X(005)	54 58
FSB-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		59 82
FSB-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	59 63
FSB-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	64 68
FSB-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	69 76
FSB-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	77 82

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSB-GRP-DATA Group Level.	GRP_DATA	03	G		83	199
FSB-PERIOD-01-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_01_AMT	05	PS	S9(15)V9(2)	83	91
FSB-PERIOD-02-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_02_AMT	05	PS	S9(15)V9(2)	92	100
FSB-PERIOD-03-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_03_AMT	05	PS	S9(15)V9(2)	101	109
FSB-PERIOD-04-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_04_AMT	05	PS	S9(15)V9(2)	110	118
FSB-PERIOD-05-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_05_AMT	05	PS	S9(15)V9(2)	119	127
FSB-PERIOD-06-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_06_AMT	05	PS	S9(15)V9(2)	128	136
FSB-PERIOD-07-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_07_AMT	05	PS	S9(15)V9(2)	137	145
FSB-PERIOD-08-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_08_AMT	05	PS	S9(15)V9(2)	146	154
FSB-PERIOD-09-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_09_AMT	05	PS	S9(15)V9(2)	155	163
FSB-PERIOD-10-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_10_AMT	05	PS	S9(15)V9(2)	164	172
FSB-PERIOD-11-AMT Subledger Period Amount. The total dollar amount posted to the corresponding subledger period.	PERIOD_11_AMT	05	PS	S9(15)V9(2)	173	181
FSB-PERIOD-12-AMT Subledger Period Amount. Total dollar amount posted to the corresponding subledger period.	PERIOD_12_AMT	05	PS	S9(15)V9(2)	182	190
FSB-PERIOD-13-AMT Subledger Period Amount. Total dollar amount posted to the corresponding subledger period.	PERIOD_13_AMT	05	PS	S9(15)V9(2)	191	199

FSJ-RECORD (FSJ) – Standard Journal Entry Transaction Record

This record contains information used to create debit or credit transactions based on a frequency code. This record is read on the first posting cycle run and dollar transaction create accordingly.

Record Statistics

Record ID	FSJ	
Primary Key Length	0045	
Record Name	Library Name	Record Length
FSJ-RECORD	FSSFSJTK	0224 bytes

Record Description

The following record description shows the format of the Standard Journal Entry Transaction Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSJ-RECORD Group Level.		01	R		1 224
FSJ-GRP-KEY Group Level.	GRP_KEY	03	G		1 45
FSJ-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSJ-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FSJ-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FSJ-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FSJ-UNIQUE-SEQ-NBR Unique Sequence Number. Sequential number used to make the record key unique when multiple SJE's exist for the same General Ledger account and cost center. The sequence number is used to find the record for a change or delete.	UNIQUE_SEQ_NBR	05	N	9(009)	37 45
FSJ-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		46 69

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSJ-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	46	50
FSJ-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	51	55
FSJ-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	56	63
FSJ-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	64	69
FSJ-GRP-DATA Group Level.	GRP_DATA	03	G		70	224
FSJ-TRAN-CODE Dollar Transaction Code. Identifies the type of dollar transaction. Valid entries are: 01 Regular debit. 02 Regular credit.	TRAN_CODE	05	N	9(002)	70	71
FSJ-SJE-FREQ Generating Frequency. Indicates frequency of transactions generated by this transaction. Valid entries are: 01 Daily – processing day. 02 Daily – calendar day. 03 Daily – 30-day month. 04 Weekly on a specified day of the week. 05 Monthly – first day of month. 06 Monthly – last day of month. 07 Monthly on a specified day of the month.	SJE_FREQ	05	N	9(002)	72	73
FSJ-SJE-START-DATE Start Date. Date system starts generating transactions from the SJE source record.	SJE_START_DATE	05	N	9(008)	74	81
FSJ-SJE-END-DATE Stop Date. Date on which automatic generation of transactions from this source record are terminated. The final transaction is generated on the specified date and the source record is dropped from the file during the next posting cycle. If this date is left blank, the SJE continues indefinitely.	SJE_END_DATE	05	N	9(008)	82	89

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSJ-DAY-WEEK-MTH	DAY_WEEK_MTH	05	N	9(002)	90	91
Day of Week or Month. If Generating Frequency is '4' or '7', this field specifies the day of the week or month. If weekly, values are 1 – 7 (1 = Monday, 2 = Tuesday, etc.). If monthly, values are 1 – 40 (1 = first day in processing month, 2 = second day in processing month, etc.). Since the day of month refers to processing month rather than calendar month, care should be taken in assigning values. (If January's processing ends on 1/28, the first day in the February processing month is 1/29.) If a monthly day is specified, all processing months must have at least the number of days specified. If, for example, 30 is the specified day and February has only 29 days, that month is skipped.						
FSJ-OFFS-IND	OFFS_IND	05	C	X(001)	92	92
Offset Generate Indicator. Determines whether an offset transaction is generated each time an SJE is created from this source record. Valid entries are:						
0 Do not generate an offset.						
1 Generate an offset.						
FSJ-OFFS-GLACCT-NBR	OFFS_GLACCT_NBR	05	N	9(015)	93	107
Offset Account Number. Account number to which offset is generated. This field must be blank if Offset Generate Indicator is zero.						
FSJ-OFFS-COST-CNTR	OFFS_COST_CNTR	05	N	9(015)	108	122
Offset Cost Center. Cost center to which offset is generated. This field must be blank if Offset Generate Indicator is zero.						
FSJ-DOC-NBR	DOC_NBR	05	C	X(015)	123	137
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FSJ-TRAN-AMT	TRAN_AMT	05	PS	S9(15)V9(2)	138	146
SJE Transaction Amount. Dollar amount of transactions generated from this source record.						
FSJ-TRAN-DESC	TRAN_DESC	05	C	X(050)	147	196
SJE Description. Description used when generating transactions from this source record.						
FSJ-CA-FILLER	CA_FILLER	05	C	X(028)	197	224
Reserved for system use.						

FSL-RECORD (FSL) – Subledger Account Detail Record

This record contains the open and close date for a subledger account. The current balance is updated according to the transaction processed.

Record Statistics

Record ID	FSL	
Primary Key Length	0053	
Record Name	Library Name	Record Length
FSL-RECORD	FSSFSLTK	0224 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSL-RECORD Group Level.		01	R		1 224
FSL-GRP-KEY Group Level.	GRP_KEY	03	G		1 53
FSL-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSL-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5 6
00	No subledger.				
01	Payment to vendor.				
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.				
03	Payment to employee for expense.				
04	Teller over/short.				
05	Subledger-5.				
06	Subledger-6.				
07	Subledger-7.				
08	Subledger-8.				
09	Subledger-9.				

Field Name	Token Name	Level	Mode	Picture	Displacement
FSL-SUBL-ACCT-NBR Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.	SUBL_ACCT_NBR	05	N	9(015)	7 21
FSL-SUBL-ACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	SUBL_ACCT_LVL	05	N	9(002)	22 23
FSL-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	24 38
FSL-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	39 53
FSL-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		54 77
FSL-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	54 58
FSL-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	59 63
FSL-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	64 71
FSL-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	72 77
FSL-GRP-DATA Group Level.	GRP_DATA	03	G		78 224
FSL-RECORD-STATUS Account Status. Status of account. Valid entries are: 0 Record is open. 1 Record is closed.	RECORD_STATUS	05	C	X(001)	78 78
FSL-OPEN-DATE Open Date. Date on which the cost center was added to FCS or the date on which it was last changed from dormant to active status.	OPEN_DATE	05	N	9(008)	79 86
FSL-CLOSE-DATE Close Date. Date on which the cost center was last changed from active to dormant status.	CLOSE_DATE	05	N	9(008)	87 94

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSL-RECORD-ATTR Record Attributes. User-defined data associated with this account.	RECORD_ATTR	05	C	X(008)	95	102
FSL-GLACCT-TYPE Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid FCS entries are:	GLACCT_TYPE	05	C	X(002)	103	104
01 Assets.						
05 Liabilities.						
10 Capital.						
20 Income.						
25 Expense.						
30 Taxes.						
35 Nonoperating income.						
40 Nonoperating expense.						
90 Memo – balance account.						
95 Memo – activity account.						
FSL-SUBL-DESC Subledger Description. Description used on reports for the corresponding subledger number.	SUBL_DESC	05	C	X(050)	105	154
FSL-CURR-BAL Subledger Current Balance. Year-to-date effect of transactions and maintenance posted to this subledger account.	CURR_BAL	05	PS	S9(15)V9(2)	155	163
FSL-OVER-COUNT Number of Times Over. This field is the total number of times the subledger account was short year-to-date. It is incremented by 1 when a debit over/short transaction is processed.	OVER_COUNT	05	PS	S9(07)	164	167
FSL-SHORT-COUNT Number of Times Short. This field is the total number of times the subledger account was over year-to-date. It is incremented by 1 when a credit over/short transaction is processed.	SHORT_COUNT	05	PS	S9(07)	168	171
FSL-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(023)	172	194
FSL-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	195	224

FSP-RECORD (FSP) – Suspense Profile Record

This record defines a profile that can be used for suspense posting. This record can be defined at the institution level or can be used by multiple institutions as a profile.

Record Statistics

Record ID	FSP	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FSP-RECORD	FSSFSP TK	0112 bytes

Record Description

The following record description shows the format of the Suspense Profile Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSP-RECORD Group Level.		01	R		1 112
FSP-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FSP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSP-PROFILE-ID Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).	PROFILE_ID	05	C	X(008)	5 12
Suspense profiles are used in three different areas of the system. The preprocessor application suspense profile ID determines the accounts used when an account control record does not exist for an input account number. The institution suspense profile ID is used during the posting cycle to determine the suspense account for posting rejected dollar amounts. The third use of the suspense profile is to force balance a batch of dollar transactions.					
The preprocessor and posting cycle match against the profile beginning and ending account range to determine the suspense account numbers. Dollar batch force balancing always uses the very first range defined for the suspense profile (FSP).					
FSP-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSP-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13	17
FSP-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18	22
FSP-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30
FSP-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FSP-GRP-DATA Group Level.	GRP_DATA	03	G		37	112
FSP-PROFILE-NAME Suspense Profile Name. Name assigned to this suspense profile.	PROFILE_NAME	05	C	X(050)	37	86
FSP-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(026)	87	112

FSS-RECORD (FSS) – Suspense to Suspense Account Record

This record is used to retrieve a suspense account through a suspense profile during the posting cycle.
This record is a key only record.

Record Statistics

Record ID	FSS	
Primary Key Length	0027	
Record Name	Library Name	Record Length
FSS-RECORD	FSSFSSTK	0078 bytes

Record Description

The following record description shows the format of the Suspense to Suspense Account Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSS-RECORD Group Level.		01	R		1 78
FSS-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
FSS-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSS-PROFILE-ID Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).	PROFILE_ID	05	C	X(008)	5 12
FSS-HIGH-GLACCT-NBR High Account Number. Ending range of accounts used to match rejected transaction account numbers. The suspense account for the matching range is used to post the rejected dollar amount.	HIGH_GLACCT_NBR	05	N	9(015)	13 27
FSS-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		28 51
FSS-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	28 32
FSS-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	33 37

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSS-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	38	45
FSS-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	46	51
FSS-GRP-AIX1 Group Level.	GRP_AIX1	03	G		52	78
FSS-AIX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	AIX_INST_NBR	05	N	9(004)	52	55
FSS-AIX-HIGH-GLACCT High Account Number. Ending range of accounts used to match rejected transaction account numbers. The suspense account for the matching range is used to post the rejected dollar amount.	AIX_HIGH_GLACCT	05	N	9(015)	56	70
FSS-AIX-PROFILE-ID Suspense Profile ID. Identification number assigned to the suspense account profile. This ID is in the key of the Suspense Profile Record (FSP).	AIX_PROFILE_ID	05	C	X(008)	71	78

FST-RECORD (FST) – Posted Transactions History Record

This record contains posting transactions information, which is used for inquiry purposes. The volume of transactions in this record is determined by the number of days transactions are maintained by an institution.

Record Statistics

Record ID	FST	
Primary Key Length	0053	
Record Name	Library Name	Record Length
FST-RECORD	FSSFSTTK	0400 bytes

Record Description

The following record description shows the format of the Posted Transactions History Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-RECORD Group Level.		01	R		1	400
FST-GRP-KEY Group Level.	GRP_KEY	03	G		1	53
FST-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FST-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5	19
FST-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20	21
FST-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22	36
FST-EFFECTIVE-DATE Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.	EFFECTIVE_DATE	05	N	9(008)	37	44
FST-UNIQUE-SEQ-NBR Unique Sequence Number. Sequential number used to make the record key unique when multiple reconciliation open items exist for the same General Ledger account, cost center and document number.	UNIQUE_SEQ_NBR	05	N	9(009)	45	53

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		54	77
FST-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	54	58
FST-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	59	63
FST-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	64	71
FST-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	72	77
FST-GRP-DATA Group Level.	GRP_DATA	03	G		78	400
FST-TRAN-CODE Dollar Transaction Code. Identifies the type of dollar transaction. Valid entries are: 01 Regular debit. 02 Regular credit. 05 Amount replaced. 06 Amount adjusted. 11 Accrual debit. 12 Accrual credit. 21 Retroactive debit. 22 Retroactive credit. 31 Future debit. 32 Future credit.	TRAN_CODE	05	N	9(002)	78	79
FST-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are: 00 No subledger. 01 Payment to vendor. 02 Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered. 03 Payment to employee for expense. 04 Teller over/short. 05 Subledger-5. 06 Subledger-6. 07 Subledger-7. 08 Subledger-8. 09 Subledger-9.	SUBL_NBR	05	N	9(002)	80	81

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-TRAN-DATE	TRAN_DATE	05	N	9(008)	82	89
Transaction Date. Date associated with a transaction that was entered by the operator.						
FST-POST-DATE	POST_DATE	05	N	9(008)	90	97
Transaction Post Date. Identifies the month, day, and year that this transaction was posted. This date matches the transaction current processing date for regular debits and credits.						
FST-SUBL-ACCT-NBR-1	SUBL_ACCT_NBR_1	05	N	9(015)	98	112
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FST-SUBL-ACCT-NBR-2	SUBL_ACCT_NBR_2	05	N	9(015)	113	127
Subledger Account Number. Identifies a subledger account number maintained on the subledger balances file.						
FST-TRAN-AMT	TRAN_AMT	05	PS	S9(15)V9(2)	128	136
Dollar Transaction Amount. Identifies the dollar amount posted to the General Ledger Master File for this transaction.						
FST-TRAN-DESC	TRAN_DESC	05	C	X(050)	137	186
Transaction Description. Description of the transaction being posted.						
FST-DOC-NBR	DOC_NBR	05	C	X(015)	187	201
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FST-GEN-DOC-NBR	GEN_DOC_NBR	05	C	X(015)	202	216
Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.						
FST-ORIG-GLACCT-NBR	ORIG_GLACCT_NBR	05	N	9(015)	217	231
Account Number. Identifies a General Ledger Master File account number.						
FST-ORIG-COST-CNTR	ORIG_COST_CNTR	05	N	9(015)	232	246
Cost Center. Unique number for each accounting unit and each function in the organization.						
FST-SUSP-GLACCT-NBR	SUSP_GLACCT_NBR	05	N	9(015)	247	261
Suspense Account Number. Account number of the suspense account used for items rejected during posting. The rejected transaction account number is matched against the low and high account number ranges. The suspense account for the matching range is used to post the rejected dollar amount.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-SUSP-COST-CNTR	SUSP_COST_CNTR	05	N	9(015)	262	276
Suspense Cost Center ID. If suspense processing is used and a dollar transaction rejects, an attempt is made to post it to a suspense account with its original cost center ID. If that attempt fails, this cost center is substituted for the original center and another attempt is made.						
FST-TRAN-SRCE	TRAN_SRCE	05	C	X(008)	277	284
Transaction Source. Documents the source of each dollar transaction. It is especially useful for audit and transaction tracing.						
GEN-CLOS	Generated by closing program.					
GEN-FRCE	Generated by posting entry – force batch balance.					
GEN-POST	Generated by the main post – undivided profits.					
GEN-SUSP	Generated by suspense post – undivided profits.					
GEN-VRFY	Generated by posting entry – batch verification.					
I/C-nnnn	Intercompany transaction from institution nnnn.					
INPUT	Input to or generated by posting entry.					
ONLINE	Input from online system or spreadsheet upload.					
PENDING	Release from a pending batch.					
SJE	Generated standard journal entry.					
FST-APPL-NBR	APPL_NBR	05	N	9(004)	285	288
Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are:						
0000	Global Application. Rules are applied to all applications. Not valid on Batch Headers.					
0001 – 0099	FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.)					
0100	Deposits application.					
0150	Exception Administrator application.					
0200	Time Investment application.					
0300	Account Analysis application.					
0500	Commercial Loans application.					
0550	Installment Loans application.					
0600	Teller application.					
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FST-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	289	296
Operator ID. Online user sign-on key.						
FST-PRODUCT-CODE	PRODUCT_CODE	05	C	X(010)	297	306
Product Code. Documents the product code associated with a dollar transaction. It is optional and user-defined.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-CURN-EXCH-AMT Reserved for future use.	CURN_EXCH_AMT	05	PS	S9(15)V9(2)	307	315
FST-CURN-EXCH-RATE Reserved for future use.	CURN_EXCH_RATE	05	PS	S9(03)V9(4)	316	319
FST-CURN-EXCH-DATE Reserved for future use.	CURN_EXCH_DATE	05	N	9(008)	320	327
FST-CURN-EXCH-TBL Reserved for future use.	CURN_EXCH_TBL	05	C	X(008)	328	335
FST-CURN-EXCH-QLFY Reserved for future use.	CURN_EXCH_QLFY	05	C	X(003)	336	338
FST-HIST-CTOF-IND History Cutoff Indicator. Valid entries are:	HIST_CTOF_IND	05	C	X(001)	339	339
<ul style="list-style-type: none"> b Item has not been extracted to a cutoff file. D Item has been extracted to a cutoff file and has existed in the online database for a period of time that exceeds the number of days to retain history for online viewing. The item will be deleted during the next database reorganization. (DB2 environment only) E Item has been extracted to a cutoff file and has existed in the online database for a period of time that has not yet exceeded the number of days to retain history for online viewing. 						
FST-BATCH-NBR	BATCH_NBR	05	N	9(004)	340	343
Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:						
9000 – 9099 FCS institution recycle batches.						
9100 – 9149 Deposits application.						
9150 – 9199 Exception Administrator application.						
9200 – 9299 Time Investment application.						
9300 – 9399 Account Analysis application.						
9500 – 9549 Commercial Loans application.						
9550 – 9599 Installment Loans application.						
9700 – 9799 Accounts Payable application.						
9800 – 9849 Automated Clearing House application.						
9850 – 9899 MICR application.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FST-BATCH-TYPE Batch Type. Indicates the type of batch. Valid entries are: CF Control File batch. GL General Ledger batch. RR Reject Recycle batch. RW Report Writer batch. SR Suspense Recycle batch.	BATCH_TYPE	05	C	X(002)	344	345
FST-BATCH-DATE Batch Date. Date on which the batch of transactions was added to the warehouse.	BATCH_DATE	05	N	9(008)	346	353
FST-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(017)	354	370
FST-USER-FILLER User-defined.	USER_FILLER	05	C	X(030)	371	400

FSV-RECORD (FSV) – Subledger Account Detail Level Record

This record defines which subledger accounts are valid for subledger processing. This record is equivalent to the account detail records used to define 8-level accounts.

Record Statistics

Record ID	FSV	
Primary Key Length	0023	
Record Name	Library Name	Record Length
FSV-RECORD	FSSFSVTK	0192 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Level Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSV-RECORD Group Level.		01	R		1 192
FSV-GRP-KEY Group Level.	GRP_KEY	03	G		1 23
FSV-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSV-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5 6
00	No subledger.				
01	Payment to vendor.				
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.				
03	Payment to employee for expense.				
04	Teller over/short.				
05	Subledger-5.				
06	Subledger-6.				
07	Subledger-7.				
08	Subledger-8.				
09	Subledger-9.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSV-SUBL-ACCT-NBR Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.	SUBL_ACCT_NBR	05	N	9(015)	7	21
FSV-SUBL-ACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	SUBL_ACCT_LVL	05	N	9(002)	22	23
FSV-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		24	47
FSV-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	24	28
FSV-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	29	33
FSV-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	34	41
FSV-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	42	47
FSV-GRP-DATA Group Level.	GRP_DATA	03	G		48	192
FSV-RECORD-STATUS Account Status. Status of account. Valid entries are: 0 Record is open. 1 Record is closed.	RECORD_STATUS	05	C	X(001)	48	48
FSV-OPEN-DATE Open Date. Date on which the cost center was added to FCS or the date on which it was last changed from dormant to active status.	OPEN_DATE	05	N	9(008)	49	56
FSV-CLOSE-DATE Close Date. Date on which the cost center was last changed from active to dormant status.	CLOSE_DATE	05	N	9(008)	57	64
FSV-RECORD-ATTR Record Attributes. User-defined data associated with this account.	RECORD_ATTR	05	C	X(008)	65	72

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSV-GLACCT-TYPE	GLACCT_TYPE	05	C	X(002)	73	74
Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid FCS entries are:						
01	Assets.					
05	Liabilities.					
10	Capital.					
20	Income.					
25	Expense.					
30	Taxes.					
35	Nonoperating income.					
40	Nonoperating expense.					
90	Memo – balance account.					
95	Memo – activity account.					
FSV-RESP-PERSON-ID	RESP_PERSON_ID	05	C	X(008)	75	82
Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).						
FSV-SUBL-DESC	SUBL_DESC	05	C	X(050)	83	132
Subledger Description. Description used on reports for the corresponding subledger number.						
FSV-CA-FILLER	CA_FILLER	05	C	X(030)	133	162
Reserved for system use.						
FSV-USER-FILLER	USER_FILLER	05	C	X(030)	163	192
User-defined.						

FSW-RECORD (FSW) – Posted Transaction Center Index Record

This record is an index record in cost center sequence that can be used to read the FST record in cost center sequence.

Record Statistics

Record ID	FSW	
Primary Key Length	0042	
Record Name	Library Name	Record Length
FSW-RECORD	FSSFSWTK	0042 bytes

Record Description

The following record description shows the format of the Posted Transaction Center Index Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSW-RECORD Group Level.		01	R		1	42
FSW-GRP-KEY Group Level.	GRP_KEY	03	G		1	42
FSW-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST-NBR	05	N	9(004)	1	4
FSW-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	5	19
FSW-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	20	34
FSW-EFFECTIVE-DATE Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.	EFFECTIVE_DATE	05	N	9(008)	35	42

FSX-RECORD (FSX) – Posted Transaction Effective Date Index Record

This record is an index record in effective date sequence that can be used to read the FST record in effective date sequence.

Record Statistics

Record ID	FSX	
Primary Key Length	0042	
Record Name	Library Name	Record Length
FSX-RECORD	FSSFSXTK	0042 bytes

Record Description

The following record description shows the format of the Posted Transaction Effective Date Index Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSX-RECORD Group Level.		01	R		1 42
FSX-GRP-KEY Group Level.	GRP_KEY	03	G		1 42
FSX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST-NBR	05	N	9(004)	1 4
FSX-EFFECTIVE-DATE Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.	EFFECTIVE_DATE	05	N	9(008)	5 12
FSX-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	13 27
FSX-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	28 42

FSY-RECORD (FSY) – Posted Transaction Document Index Record

This record is an index record in document sequence that can be used to read the FST record in document sequence.

Record Statistics

Record ID	FSY	
Primary Key Length	0057	
Record Name	Library Name	Record Length
FSY-RECORD	FSSFSYTK	0057 bytes

Record Description

The following record description shows the format of the Posted Transaction Document Index Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FSY-RECORD Group Level.		01	R		1	57
FSY-GRP-KEY Group Level.	GRP_KEY	03	G		1	57
FSY-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the new institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FSY-DOC-NBR Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.	DOC_NBR	05	C	X(015)	5	19
FSY-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	20	34
FSY-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	35	49
FSY-EFFECTIVE-DATE Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.	EFFECTIVE_DATE	05	N	9(008)	50	57

FSZ-RECORD (FSZ) – Posted Transaction Operator Index Record

This record is an index record in operator sequence that can be used to read the FST record in operator sequence.

Record Statistics

Record ID	FSZ	
Primary Key Length	0050	
Record Name	Library Name	Record Length
FSZ-RECORD	FSSFSZTK	0050 bytes

Record Description

The following record description shows the format of the Posted Transaction Operator Index Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FSZ-RECORD Group Level.		01	R		1 50
FSZ-GRP-KEY Group Level.	GRP_KEY	03	G		1 50
FSZ-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FSZ-OPERATOR-ID Operator ID.	OPERATOR_ID	05	C	X(008)	5 12
FSZ-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	13 27
FSZ-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	28 42
FSZ-EFFECTIVE-DATE Transaction Effective Date. Identifies the month, day, and year that a retroactive transaction was effective. This date matches the current processing date for regular debits and credits.	EFFECTIVE_DATE	05	N	9(008)	43 50

FTN-RECORD (FTN) – Cost Center Record

This record, in conjunction with the FAD Record, sets up the account cost center level 8 accounts. In addition, the information in this record is used by cost center reporting.

Record Statistics

Record ID	FTN	
Primary Key Length	0019	
Record Name	Library Name	Record Length
FTN-RECORD	FSSFTNTK	0168 bytes

Record Description

The following record description shows the format of the Cost Center Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FTN-RECORD Group Level.		01	R		1 168
FTN-GRP-KEY Group Level.	GRP_KEY	03	G		1 19
FTN-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FTN-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	5 19
FTN-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		20 43
FTN-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	20 24
FTN-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	25 29
FTN-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	30 37
FTN-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	38 43

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTN-GRP-DATA Group Level.	GRP_DATA	03	G		44	168
FTN-CNTR-STATUS Cost Center Status. Indicates whether the cost center is active or dormant. Changing an active cost center to dormant status prevents new GL account/cost center combinations from being created for that cost center. It does not prevent dollar postings to existing GL accounts open to that center. The only way to prevent postings is to close the GL account/cost center. A closed GL account/cost center cannot be reopened if the cost center is dormant. Valid entries are: 0 Active center. 1 Dormant center.	CNTR_STATUS	05	C	X(001)	44	44
FTN-RPT-PROFILE-ID Cost Center Reports Profile ID. Identification number for the cost center reports profile. This ID is in the key of the Cost Center Reports Option Record (FTR).	RPT_PROFILE_ID	05	C	X(008)	45	52
FTN-OPEN-DATE Open Date. Date on which the cost center was added to FCS or the date on which it was last changed from dormant to active status.	OPEN_DATE	05	N	9(008)	53	60
FTN-CLOSE-DATE Close Date. Date on which the cost center was last changed from active to dormant status.	CLOSE_DATE	05	N	9(008)	61	68
FTN-RECORD-ATTR Record Attributes. User-defined data associated with this cost center.	RECORD_ATTR	05	C	X(008)	69	76
FTN-COST-CNTR-NAME Cost Center Name. Name of the organization unit represented by this cost center.	COST_CNTR_NAME	05	C	X(050)	77	126
FTN-RESP-PERSON-ID Responsible Person ID. Identification number assigned to the responsible person. This ID is in the key of the Responsible Person Record (FRP).	RESP_PERSON_ID	05	C	X(008)	127	134
FTN-DIST-CODE Distribution Code. Designates receiving location for reports printed in remote or local data centers. A distribution code can be stored in the institution, cost center, and hierarchy records. This is in the key of the Distribution Profile Record (FDP).	DIST_CODE	05	C	X(010)	135	144
FTN-CA-FILLER Reserved for system use.	CA_FILLER	05	C	X(024)	145	168

FTR-RECORD (FTR) – Cost Center Reports Option Record

This record contains the report options and modes associated with cost center reports. This record can be set up as a profile or at an institution level.

Record Statistics

Record Description

The following record description shows the format of the Cost Center Reports Option Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTR-RECORD Group Level.		01	R		1	144
FTR-GRP-KEY Group Level.	GRP_KEY	03	G		1	12
FTR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FTR-RPT-PROFILE-ID Cost Center Reports Profile ID. Identification number for the cost center reports profile. This ID is in the key of the Cost Center Reports Option Record (FTR).	RPT_PROFILE_ID	05	C	X(008)	5	12
FTR-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13	36
FTR-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13	17
FTR-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18	22
FTR-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTR-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FTR-GRP-DATA Group Level.	GRP_DATA	03	G		37	144
FTR-PROFILE-NAME Cost Center Reports Profile Name. Name assigned to the cost center reports profile.	PROFILE_NAME	05	C	X(050)	37	86
FTR-POST-JRNL-MODE Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	POST_JRNL_MODE	05	C	X(001)	87	87
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						
FTR-POST-JRNL-OPT Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:	POST_JRNL_OPT	05	C	X(001)	88	88
<ul style="list-style-type: none"> 0 Do not print. 1 Print report. 						
FTR-EXCP-MODE Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:	EXCP_MODE	05	C	X(001)	89	89
<ul style="list-style-type: none"> 0 Do not output the report. 1 Printer output. 2 Tape output without distribution code. 3 Tape output with distribution code from cost center record. 4 Tape output with distribution code from institution record. 5 – 6 Other. A – G Same as 0 – 6, respectively, but with direct (immediate) online output. K – Q Same as 0 – 6, respectively, but with deferred online output. 						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTR-EXCP-OPT	EXCP_OPT	05	C	X(001)	90	90
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0 Do not print.						
1 Print report.						
FTR-REJ-MODE	REJ_MODE	05	C	X(001)	91	91
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0 Do not output the report.						
1 Printer output.						
2 Tape output without distribution code.						
3 Tape output with distribution code from cost center record.						
4 Tape output with distribution code from institution record.						
5 – 6 Other.						
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.						
K – Q Same as 0 – 6, respectively, but with deferred online output.						
FTR-REJ-OPT	REJ_OPT	05	C	X(001)	92	92
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0 Do not print.						
1 Print report.						
FTR-SJE-MODE	SJE_MODE	05	C	X(001)	93	93
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0 Do not output the report.						
1 Printer output.						
2 Tape output without distribution code.						
3 Tape output with distribution code from cost center record.						
4 Tape output with distribution code from institution record.						
5 – 6 Other.						
A – G Same as 0 – 6, respectively, but with direct (immediate) online output.						
K – Q Same as 0 – 6, respectively, but with deferred online output.						
FTR-SJE-OPT	SJE_OPT	05	C	X(001)	94	94
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0 Do not print.						
1 Print report.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTR-SUSP-MODE	SUSP_MODE	05	C	X(001)	95	95
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FTR-SUSP-OPT	SUSP_OPT	05	C	X(001)	96	96
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					
FTR-RETRO-TRAN-MODE	RETRO_TRAN_MODE	05	C	X(001)	97	97
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FTR-RETRO-TRAN-OPT	RETRO_TRAN_OPT	05	C	X(001)	98	98
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FTR-ANLY-MODE	ANLY_MODE	05	C	X(001)	99 99
---------------	-----------	----	---	--------	-------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FTR-ANLY-OPT	ANLY_OPT	05	C	X(001)	100 100
--------------	----------	----	---	--------	---------

Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print report.

FTR-SUBL-1-MODE	SUBL_1_MODE	05	C	X(001)	101 101
-----------------	-------------	----	---	--------	---------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FTR-SUBL-1-OPT	SUBL_1_OPT	05	C	X(001)	102 102
----------------	------------	----	---	--------	---------

Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print report.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FTR-SUBL-2-MODE	SUBL_2_MODE	05	C	X(001)	103	103
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FTR-SUBL-2-OPT	SUBL_2_OPT	05	C	X(001)	104	104
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					
FTR-SUBL-3-MODE	SUBL_3_MODE	05	C	X(001)	105	105
Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:						
0	Do not output the report.					
1	Printer output.					
2	Tape output without distribution code.					
3	Tape output with distribution code from cost center record.					
4	Tape output with distribution code from institution record.					
5 – 6	Other.					
A – G	Same as 0 – 6, respectively, but with direct (immediate) online output.					
K – Q	Same as 0 – 6, respectively, but with deferred online output.					
FTR-SUBL-3-OPT	SUBL_3_OPT	05	C	X(001)	106	106
Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:						
0	Do not print.					
1	Print report.					

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FTR-SUBL-4-MODE	SUBL_4_MODE	05	C	X(001)	107 107
-----------------	-------------	----	---	--------	---------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FTR-SUBL-4-OPT	SUBL_4_OPT	05	C	X(001)	108 108
----------------	------------	----	---	--------	---------

Cost Center Report Option. Determines whether the related report is produced for the organization unit. The option selected does not affect other units or other reports for this unit. Valid entries are:

- 0 Do not print.
- 1 Print report.

FTR-SUBL-5-MODE	SUBL_5_MODE	05	C	X(001)	109 109
-----------------	-------------	----	---	--------	---------

Report Output Mode. Directs the report to an output tape, printer, and/or online reports file. You can print selected (low volume) reports online while other (high volume) reports are spooled for later printing. Valid entries are:

- 0 Do not output the report.
- 1 Printer output.
- 2 Tape output without distribution code.
- 3 Tape output with distribution code from cost center record.
- 4 Tape output with distribution code from institution record.
- 5 – 6 Other.
- A – G Same as 0 – 6, respectively, but with direct (immediate) online output.
- K – Q Same as 0 – 6, respectively, but with deferred online output.

FTR-SUBL-5-OPT	SUBL_5_OPT	05	C	X(001)	110 110

FVA-RECORD (FVA) – Account Detail Comments Record

This record has 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVA	
Primary Key Length	0040	
Record Name	Library Name	Record Length
FVA-RECORD	FSSFVATK	0596 bytes

Record Description

The following record description shows the format of the Account Detail Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVA-RECORD Group Level.		01	R		1 596
FVA-GRP-KEY Group Level.	GRP_KEY	03	G		1 40
FVA-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVA-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FVA-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FVA-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FVA-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	37 40
FVA-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		41 64
FVA-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	41 45

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVA-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	46	50
FVA-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	51	58
FVA-AUDIT-ORG Audit Organization. The DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	59	64
FVA-GRP-DATA Group Level.	GRP_DATA	03	G		65	596
FVA-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	65	72
FVA-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	73	80
FVA-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	81	88
FVA-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	89	96
FVA-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	97	146
FVA-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	147	196
FVA-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	197	246
FVA-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	247	296

FVB-RECORD (FVB) – Account Detail Level Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVB	
Primary Key Length	0025	
Record Name	Library Name	Record Length
FVB-RECORD	FSSFVBTK	0581 bytes

Record Description

The following record description shows the format of the Account Detail Level Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVB-RECORD Group Level.		01	R		1 581
FVB-GRP-KEY Group Level.	GRP_KEY	03	G		1 25
FVB-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVB-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FVB-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FVB-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	22 25
FVB-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		26 49
FVB-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	26 30
FVB-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	31 35

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVB-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	36	43
FVB-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	44	49
FVB-GRP-DATA Group Level.	GRP_DATA	03	G		50	581
FVB-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	50	57
FVB-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	58	65
FVB-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	66	73
FVB-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	74	81
FVB-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	82	131
FVB-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	132	181
FVB-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	182	231
FVB-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	232	281
FVB-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	282	331
FVB-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	332	381
FVB-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	382	431

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVB-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	432	481
FVB-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	482	531
FVB-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	532	581

FVC-RECORD (FVC) – Account Header Level Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVC	
Primary Key Length	0029	
Record Name	Library Name	Record Length
FVC-RECORD	FSSFVCTK	0585 bytes

Record Description

The following record description shows the format of the Account Header Level Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVC-RECORD Group Level.		01	R		1 585
FVC-GRP-KEY Group Level.	GRP_KEY	03	G		1 29
FVC-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVC-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts. Each chart number can be defined with a different header level rollup structure. Valid entries are 0001 – 9999 .	CHART_NBR	05	N	9(004)	5 8
FVC-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	9 23
FVC-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	24 25
FVC-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	26 29
FVC-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		30 53
FVC-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	30 34

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVC-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	35	39
FVC-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	40	47
FVC-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	48	53
FVC-GRP-DATA Group Level.	GRP_DATA	03	G		54	585
FVC-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	54	61
FVC-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	62	69
FVC-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	70	77
FVC-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	78	85
FVC-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	86	135
FVC-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	136	185
FVC-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	186	235
FVC-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	236	285
FVC-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	286	335
FVC-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	336	385

FVD-RECORD (FVD) – Account Reconciliation Item Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVD	
Primary Key Length	0064	
Record Name	Library Name	Record Length
FVD-RECORD	FSSFVDTK	0620 bytes

Record Description

The following record description shows the format of the Account Reconciliation Item Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVD-RECORD Group Level.		01	R		1 620
FVD-GRP-KEY Group Level.	GRP_KEY	03	G		1 64
FVD-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVD-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FVD-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FVD-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FVD-DOC-NBR Document Number. Identifies the document number associated with this transaction. The external document number is defined and entered by the user. The internal document number is automatically assigned by the system based upon the institution's document number generation option. These numbers are used for audit and tracking purposes. Also, the external document number is used to match and clear account reconciliation open items.	DOC_NBR	05	C	X(015)	37 51

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVD-UNIQUE-SEQ-NBR Unique Sequence Number. Sequential number used to make the record key unique when multiple reconciliation open items exist for the same General Ledger account, cost center, and document number.	UNIQUE_SEQ_NBR	05	N	9(009)	52	60
FVD-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	61	64
FVD-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		65	88
FVD-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	65	69
FVD-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	70	74
FVD-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	75	82
FVD-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	83	88
FVD-GRP-DATA Group Level.	GRP_DATA	03	G		89	620
FVD-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	89	96
FVD-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	97	104
FVD-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	105	112
FVD-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	113	120
FVD-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	121	170

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVD-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	171	220
FVD-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	221	270
FVD-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	271	320
FVD-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	321	370
FVD-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	371	420
FVD-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	421	470
FVD-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	471	520
FVD-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	521	570
FVD-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	571	620

FVE-RECORD (FVE) – Account Type Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVE	
Primary Key Length	0010	
Record Name	Library Name	Record Length
FVE-RECORD	FSSFVETK	0566 bytes

Record Description

The following record description shows the format of the Account Type Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVE-RECORD Group Level.		01	R		1 566
FVE-GRP-KEY Group Level.	GRP_KEY	03	G		1 10
FVE-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVE-GLACCT-TYPE Account Type. Identifies the type of account. User-defined account types are defined in the account type record. Valid FCS entries are: 01 Assets. 05 Liabilities. 10 Capital. 20 Income. 25 Expense. 30 Taxes. 35 Nonoperating income. 40 Nonoperating expense. 90 Memo – balance account. 95 Memo – activity account.	GLACCT_TYPE	05	C	X(002)	5 6
FVE-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	7 10

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVE-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		11	34
FVE-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	11	15
FVE-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	16	20
FVE-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	21	28
FVE-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	29	34
FVE-GRP-DATA Group Level.	GRP_DATA	03	G		35	566
FVE-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	35	42
FVE-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	43	50
FVE-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	51	58
FVE-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	59	66

FVF-RECORD (FVF) – Batch Header Comments Record

This record maintains 10 individual comment lines about a batch of transactions by institution. Each comment number allows additional sets of 10 comments for the same batch and institution.

Record Statistics

Record ID	FVF	
Primary Key Length	0025	
Record Name	Library Name	Record Length
FVF-RECORD	FSSFVFTK	0581 bytes

Record Description

The following record description shows the format of the Batch Header Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
------------	------------	-------	------	---------	--------------

FVF-RECORD Group Level.		01	R		1 581
----------------------------	--	----	---	--	-------

FVF-GRP-KEY Group Level.	GRP_KEY	03	G		1 25
-----------------------------	---------	----	---	--	------

FVF-INST-NBR	INST_NBR	05	N	9(004)	1 4
--------------	----------	----	---	--------	-----

Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.

FVF-BATCH-NBR	BATCH_NBR	05	N	9(004)	5 8
---------------	-----------	----	---	--------	-----

Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are:

9000 – 9099	FCS institution recycle batches.
9100 – 9149	Deposits application.
9150 – 9199	Exception Administrator application.
9200 – 9299	Time Investment application.
9300 – 9399	Account Analysis application.
9500 – 9549	Commercial Loans application.
9550 – 9599	Installment Loans application.
9700 – 9799	Accounts Payable application.
9800 – 9849	Automated Clearing House application.
9850 – 9899	MICR application.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVF-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FVF-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FVF-RPT-NBR	RPT_NBR	05	N	9(003)	19	21
Report Number. User-defined number to identify a report. Must be a numeric value greater than zero. It is recommended that a 600 series report number be used for Report Writer reports.						
FVF-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	22	25
Comment Item Number. Unique sequence number within the comment key.						
FVF-AUDIT-GRP	AUDIT_GRP	03	G		26	49
Group Level.						
FVF-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	26	30
Audit Date. Date the record was last updated.						
FVF-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	31	35
Audit Time. Time the record was last updated.						
FVF-AUDIT-USER	AUDIT_USER	05	C	X(008)	36	43
Audit User. Last user (operator or program ID) that updated the record.						
FVF-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	44	49
Audit Organization. DBS organization associated with this record.						
FVF-GRP-DATA	GRP_DATA	03	G		50	581
Group Level.						
FVF-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	50	57
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVF-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	58	65
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVF-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	66	73
FVF-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	74	81

FVG-RECORD (FVG) – Chart of Accounts Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVG	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FVG-RECORD	FSSFVGTK	0568 bytes

Record Description

The following record description shows the format of the Chart of Accounts Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVG-RECORD Group Level.		01	R		1 568
FVG-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FVG-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVG-CHART-NBR Chart of Accounts Chart Number. User-defined number that identifies a General Ledger chart of accounts.	CHART_NBR	05	N	9(004)	5 8
FVG-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	9 12
FVG-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36
FVG-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13 17
FVG-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18 22
FVG-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23 30

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVG-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FVG-GRP-DATA Group Level.	GRP_DATA	03	G		37	568
FVG-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	37	44
FVG-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	45	52
FVG-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	53	60
FVG-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	61	68
FVG-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	69	118
FVG-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	119	168
FVG-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	169	218
FVG-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	219	268
FVG-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	269	318
FVG-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	319	368
FVG-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	369	418
FVG-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	419	468

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVG-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	469	518
FVG-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	519	568

FVH-RECORD (FVH) – Cost Center Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVH	
Primary Key Length	0023	
Record Name	Library Name	Record Length
FVH-RECORD	FSSFVHTK	0579 bytes

Record Description

The following record description shows the format of the Cost Center Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVH-RECORD Group Level.		01	R		1	579
FVH-GRP-KEY Group Level.	GRP_KEY	03	G		1	23
FVH-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FVH-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	5	19
FVH-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	20	23
FVH-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		24	47
FVH-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	24	28
FVH-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	29	33
FVH-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	34	41

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVH-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	42	47
FVH-GRP-DATA Group Level.	GRP_DATA	03	G		48	579
FVH-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	48	55
FVH-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	56	63
FVH-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	64	71
FVH-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	72	79
FVH-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	80	129
FVH-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	130	179
FVH-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	180	229
FVH-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	230	279
FVH-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	280	329
FVH-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	330	379
FVH-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	380	429
FVH-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	430	479

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVH-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	480	529
FVH-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	530	579

FVI-RECORD (FVI) – Distribution Profile Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVI	
Primary Key Length	0018	
Record Name	Library Name	Record Length
FVI-RECORD	FSSFVITK	0574 bytes

Record Description

The following record description shows the format of the Distribution Profile Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVI-RECORD Group Level.		01	R		1 574
FVI-GRP-KEY Group Level.	GRP_KEY	03	G		1 18
FVI-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVI-DIST-CODE Distribution Code. Designates receiving location for reports printed in remote or local data centers. A distribution code can be stored in the institution, cost center, and hierarchy records. This is in the key of the Distribution Profile Record (FDP).	DIST_CODE	05	C	X(010)	5 14
FVI-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	15 18
FVI-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		19 42
FVI-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	19 23
FVI-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	24 28

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVI-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	29	36
FVI-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	37	42
FVI-GRP-DATA Group Level.	GRP_DATA	03	G		43	574
FVI-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	43	50
FVI-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	51	58
FVI-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	59	66
FVI-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	67	74
FVI-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	75	124
FVI-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	125	174
FVI-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	175	224
FVI-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	225	274
FVI-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	275	324
FVI-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	325	374
FVI-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	375	424

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVI-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	425	474
FVI-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	475	524
FVI-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	525	574

FVJ-RECORD (FVJ) – Hierarchy Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVJ	
Primary Key Length	0012	
Record Name	Library Name	Record Length
FVJ-RECORD	FSSFVJTK	0568 bytes

Record Description

The following record description shows the format of the Hierarchy Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVJ-RECORD Group Level.		01	R		1 568
FVJ-GRP-KEY Group Level.	GRP_KEY	03	G		1 12
FVJ-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVJ-HIER-NBR Hierarchy Structure Number. Number of the organization structure that is used in responsibility reporting. The system allows up to 9999 structures to coexist for the same institution; this field indicates which one should be used for reporting. Valid entries are 0001 – 9999.	HIER_NBR	05	N	9(004)	5 8
FVJ-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	9 12
FVJ-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		13 36
FVJ-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	13 17
FVJ-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	18 22

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVJ-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	23	30
FVJ-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	31	36
FVJ-GRP-DATA Group Level.	GRP_DATA	03	G		37	568
FVJ-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	37	44
FVJ-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	45	52
FVJ-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	53	60
FVJ-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	61	68
FVJ-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	69	118
FVJ-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	119	168
FVJ-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	169	218
FVJ-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	219	268
FVJ-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	269	318
FVJ-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	319	368
FVJ-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	369	418

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVJ-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	419	468
FVJ-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	469	518
FVJ-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	519	568

FVK-RECORD (FVK) – Hierarchy Entry Comments Record

This record contains 10 fields used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVK	
Primary Key Length	0028	
Record Name	Library Name	Record Length
FVK-RECORD	FSSFVKTK	0584 bytes

Record Description

The following record description shows the format of the Hierarchy Entry Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVK-RECORD Group Level.		01	R		1 584
FVK-GRP-KEY Group Level.	GRP_KEY	03	G		1 28
FVK-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVK-HIER-ENTRY Hierarchy Entry. Alphanumeric field used to identify a reporting unit of the institution. It can be associated with many different organization roll-up structures.	HIER_ENTRY	05	C	X(020)	5 24
FVK-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	25 28
FVK-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		29 52
FVK-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	29 33
FVK-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	34 38
FVK-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	39 46

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVK-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	47	52
FVK-GRP-DATA Group Level.	GRP_DATA	03	G		53	584
FVK-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	53	60
FVK-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	61	68
FVK-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	69	76
FVK-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	77	84
FVK-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	85	134
FVK-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	135	184
FVK-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	185	234
FVK-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	235	284
FVK-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	285	334

FVM-RECORD (FVM) – Preprocessor Account Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVM	
Primary Key Length	0042	
Record Name	Library Name	Record Length
FVM-RECORD	FSSFVMTK	0598 bytes

Record Description

The following record description shows the format of the Preprocessor Account Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVM-RECORD Group Level.		01	R		1 598
FVM-GRP-KEY Group Level.	GRP_KEY	03	G		1 42
FVM-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVM-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FVM-SRCE-GLACCT-NBR	SRCE_GLACCT_NBR	05	C	X(015)	9	23
Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FVM-SRCE-BRCH-DEPT	SRCE_BRCH_DEPT	05	C	X(015)	24	38
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FVM-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	39	42
Comment Item Number. Unique sequence number within the comment key.						
FVM-AUDIT-GRP	AUDIT_GRP	03	G		43	66
Group Level.						
FVM-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	43	47
Audit Date. Date the record was last updated.						
FVM-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	48	52
Audit Time. Time the record was last updated.						
FVM-AUDIT-USER	AUDIT_USER	05	C	X(008)	53	60
Audit User. Last user (operator or program ID) that updated the record.						
FVM-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	61	66
Audit Organization. DBS organization associated with this record.						
FVM-GRP-DATA	GRP_DATA	03	G		67	598
Group Level.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVM-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	67	74
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVM-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	75	82
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FVM-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	83	90
Operator ID. Online user sign-on key.

FVN-RECORD (FVN) – Preprocessor Account Subledger Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVN	
Primary Key Length	0029	
Record Name	Library Name	Record Length
FVN-RECORD	FSSFVNTK	0585 bytes

Record Description

The following record description shows the format of the Preprocessor Account Subledger Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVN-RECORD Group Level.		01	R		1 585
FVN-GRP-KEY Group Level.	GRP_KEY	03	G		1 29
FVN-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVN-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FVN-SUBL-NBR	SUBL_NBR	05	N	9(002)	9	10
Source Subledger Number. Numeric field identifying an input subledger number converted by the preprocessor.						
FVN-SRCE-SUBL	SRCE_SUBL	05	C	X(015)	11	25
Source Account Number. Indicates the source account input to the preprocessor. The account control records convert the source account number to an FCS General Ledger account number by application using the parameters provided by you. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FVN-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	26	29
Comment Item Number. Unique sequence number within the comment key.						
FVN-AUDIT-GRP	AUDIT_GRP	03	G		30	53
Group Level.						
FVN-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	30	34
Audit Date. Date the record was last updated.						
FVN-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	35	39
Audit Time. Time the record was last updated.						
FVN-AUDIT-USER	AUDIT_USER	05	C	X(008)	40	47
Audit User. Last user (operator or program ID) that updated the record.						
FVN-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	48	53
Audit Organization. DBS organization associated with this record.						
FVN-GRP-DATA	GRP_DATA	03	G		54	585
Group Level.						
FVN-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	54	61
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVN-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	62	69
FVN-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	70	77
FVN-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	78	85
FVN-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	86	135
FVN-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	136	185
FVN-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	186	235
FVN-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	236	285
FVN-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	286	335
FVN-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	336	385
FVN-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	386	435

FVP-RECORD (FVP) – Preprocessor Branch Department Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVP	
Primary Key Length	0027	
Record Name	Library Name	Record Length
FVP-RECORD	FSSFVPTK	0583 bytes

Record Description

The following record description shows the format of the Preprocessor Branch Department Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVP-RECORD Group Level.		01	R		1 583
FVP-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
FVP-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVP-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0500 Commercial Loans application. 0300 Account Analysis application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FVP-SRCE-BRCH-DEPT	SRCE_BRCH_DEPT	05	C	X(015)	9	23
Source Branch/Department Number. Identifies the accounting unit related to this transaction as input to the preprocessor. The system automatically determines the type and field format. If the field is numeric after performing right justification and zero fill, it is assumed numeric in the database. If the field is not numeric after right justification and zero fill, the field is considered a character and is stored in the database as entered. This causes bb 123, b 123 b , and 123 bb to be the same numeric value (00123). However, bb ABC, b ABC b , and ABC bb are 3 separate unique character values.						
FVP-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	24	27
Comment Item Number. Unique sequence number within the comment key.						
FVP-AUDIT-GRP	AUDIT_GRP	03	G		28	51
Group Level.						
FVP-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	28	32
Audit Date. Date the record was last updated.						
FVP-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	33	37
Audit Time. Time the record was last updated.						
FVP-AUDIT-USER	AUDIT_USER	05	C	X(008)	38	45
Audit User. Last user (operator or program ID) that updated the record.						
FVP-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	46	51
Audit Organization. DBS organization associated with this record.						
FVP-GRP-DATA	GRP_DATA	03	G		52	583
Group Level.						
FVP-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	52	59
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVP-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	60	67
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						

Field Name	Token Name	Level	Mode	Picture	Displacement

FVR-RECORD (FVR) – Preprocessor Transaction Code Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVR	
Primary Key Length	0020	
Record Name	Library Name	Record Length
FVR-RECORD	FSSFVRTK	0576 bytes

Record Description

The following record description shows the format of the Preprocessor Transaction Code Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVR-RECORD Group Level.		01	R		1 576
FVR-GRP-KEY Group Level.	GRP_KEY	03	G		1 20
FVR-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVR-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FVR-SRCE-TRAN-CODE	SRCE_TRAN_CODE	05	C	X(008)	9	16
Source Transaction Code. Identifies an input transaction code converted by the preprocessor.						
FVR-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	17	20
Comment Item Number. Unique sequence number within the comment key.						
FVR-AUDIT-GRP	AUDIT_GRP	03	G		21	44
Group Level.						
FVR-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	21	25
Audit Date. Date the record was last updated.						
FVR-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	26	30
Audit Time. Time the record was last updated.						
FVR-AUDIT-USER	AUDIT_USER	05	C	X(008)	31	38
Audit User. Last user (operator or program ID) that updated the record.						
FVR-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	39	44
Audit Organization. DBS organization associated with this record.						
FVR-GRP-DATA	GRP_DATA	03	G		45	576
Group Level.						
FVR-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	45	52
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVR-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	53	60
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FVR-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	61	68
Operator ID. Online user sign-on key.						
FVR-AUTHRTY-ID	AUTHRTY_ID	05	C	X(008)	69	76
Reserved for future use.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVR-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	77	126
FVR-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	127	176
FVR-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	177	226
FVR-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	227	276

FVS-RECORD (FVS) – Preprocessor Transaction Type Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVS	
Primary Key Length	0020	
Record Name	Library Name	Record Length
FVS-RECORD	FSSFVSTK	0576 bytes

Record Description

The following record description shows the format of the Preprocessor Transaction Type Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVS-RECORD Group Level.		01	R		1 576
FVS-GRP-KEY Group Level.	GRP_KEY	03	G		1 20
FVS-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVS-APPL-NBR Application Number. Identifies the application that generated the transaction. All functions of the preprocessor, except institution number conversion, are application dependent. Reserved values are: 0000 Global Application. Rules are applied to all applications. Not valid on Batch Headers. 0001 – 0099 FCS user-defined applications. (Codes 0040 – 0049 are not combined by the preprocessor.) 0100 Deposits application. 0150 Exception Administrator application. 0200 Time Investment application. 0300 Account Analysis application. 0500 Commercial Loans application. 0550 Installment Loans application. 0600 Teller application.	APPL_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
0700	Accounts Payable application.					
0800	Automated Clearing House application.					
0850	MICR application.					
0900	FCS online application.					
0901	FCS batch application.					
FVS-SRCE-TRAN-TYPE	SRCE_TRAN_TYPE	05	C	X(008)	9	16
Source Transaction Type. Identifies an input transaction type converted by the preprocessor.						
FVS-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	17	20
Comment Item Number. Unique sequence number within the comment key.						
FVS-AUDIT-GRP	AUDIT_GRP	03	G		21	44
Group Level.						
FVS-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	21	25
Audit Date. Date the record was last updated.						
FVS-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	26	30
Audit Time. Time the record was last updated.						
FVS-AUDIT-USER	AUDIT_USER	05	C	X(008)	31	38
Audit User. Last user (operator or program ID) that updated the record.						
FVS-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	39	44
Audit Organization. DBS organization associated with this record.						
FVS-GRP-DATA	GRP_DATA	03	G		45	576
Group Level.						
FVS-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	45	52
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVS-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	53	60
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						
FVS-OPERATOR-ID	OPERATOR_ID	05	C	X(008)	61	68
Operator ID. Online user sign-on key.						
FVS-AUTHRTY-ID	AUTHRTY_ID	05	C	X(008)	69	76
Reserved for future use.

FVT-RECORD (FVT) – Related Function Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVT	
Primary Key Length	0023	
Record Name	Library Name	Record Length
FVT-RECORD	FSSFVTTK	0579 bytes

Record Description

The following record description shows the format of the Related Function Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVT-RECORD Group Level.		01	R		1	579
FVT-GRP-KEY Group Level.	GRP_KEY	03	G		1	23
FVT-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1	4
FVT-FUNC-CODE Related Function Code. Relates an account to a specific function and can be substituted for the cost center during cost allocation processing. It is used to redefine account relationships previously established by means of the cost center.	FUNC_CODE	05	N	9(015)	5	19
FVT-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	20	23
FVT-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		24	47
FVT-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	24	28
FVT-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	29	33

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVT-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	34	41
FVT-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	42	47
FVT-GRP-DATA Group Level.	GRP_DATA	03	G		48	579
FVT-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	48	55
FVT-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	56	63
FVT-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	64	71
FVT-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	72	79
FVT-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	80	129
FVT-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	130	179
FVT-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	180	229
FVT-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	230	279
FVT-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	280	329
FVT-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	330	379
FVT-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	380	429

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVT-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	430	479
FVT-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	480	529

FVU-RECORD (FVU) – SJE Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVU	
Primary Key Length	0049	
Record Name	Library Name	Record Length
FVU-RECORD	FSSFVUTK	0605 bytes

Record Description

The following record description shows the format of the SJE Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVU-RECORD Group Level.		01	R		1 605
FVU-GRP-KEY Group Level.	GRP_KEY	03	G		1 49
FVU-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVU-GLACCT-NBR Account Number. Identifies a General Ledger Master File account number.	GLACCT_NBR	05	N	9(015)	5 19
FVU-GLACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	GLACCT_LVL	05	N	9(002)	20 21
FVU-COST-CNTR Cost Center. Unique number for each accounting unit and each function in the organization.	COST_CNTR	05	N	9(015)	22 36
FVU-UNIQUE-SEQ-NBR Unique Sequence Number. Sequential number used to make the record key unique when multiple SJE's exist for the same General Ledger account and cost center.	UNIQUE_SEQ_NBR	05	N	9(009)	37 45
FVU-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	46 49
FVU-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		50 73

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVU-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	50	54
FVU-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	55	59
FVU-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	60	67
FVU-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	68	73
FVU-GRP-DATA Group Level.	GRP_DATA	03	G		74	605
FVU-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	74	81
FVU-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	82	89
FVU-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	90	97
FVU-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	98	105
FVU-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	106	155
FVU-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	156	205
FVU-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	206	255
FVU-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	256	305
FVU-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	306	355

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVU-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	356	405
FVU-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	406	455
FVU-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	456	505
FVU-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	506	555

FVV-RECORD (FVV) – Transaction Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVV	
Primary Key Length	0031	
Record Name	Library Name	Record Length
FVV-RECORD	FSSFVVK	0587 bytes

Record Description

The following record description shows the format of the Transaction Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVV-RECORD Group Level.		01	R		1 587
FVV-GRP-KEY Group Level.	GRP_KEY	03	G		1 31
FVV-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVV-BATCH-NBR Batch Number. Unique number assigned by the user or automatically assigned by the system to identify a batch of transactions. The same batch number can be used across different institutions and across different batch dates. The next available batch number defined in the institution record is automatically assigned when a duplicate is detected for a given institution/batch date. These batch numbers are reserved for internal use and for interfaces from other applications. Reserved values are: 9000 – 9099 FCS institution recycle batches. 9100 – 9149 Deposits application. 9150 – 9199 Exception Administrator application. 9200 – 9299 Time Investment application. 9300 – 9399 Account Analysis application. 9500 – 9549 Commercial Loans application. 9550 – 9599 Installment Loans application. 9700 – 9799 Accounts Payable application. 9800 – 9849 Automated Clearing House application. 9850 – 9899 MICR application.	BATCH_NBR	05	N	9(004)	5 8

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVV-BATCH-TYPE	BATCH_TYPE	05	C	X(002)	9	10
Batch Type. Indicates the type of batch. Valid entries are:						
CF	Control File batch.					
GL	General Ledger batch.					
RR	Reject Recycle batch.					
RW	Report Writer batch.					
SR	Suspense Recycle batch.					
FVV-BATCH-DATE	BATCH_DATE	05	N	9(008)	11	18
Batch Date. Date on which the batch of transactions was added to the warehouse.						
FVV-ITEM-NBR	ITEM_NBR	05	N	9(009)	19	27
Batch Item Number. Sequential item number of a transaction within a batch. The next item in a batch is displayed if the requested item is not found. The first item is displayed if the requested item is greater than the last item. Batch item number zero is used for batch header records.						
FVV-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	28	31
Comment Item Number. Unique sequence number within the comment key.						
FVV-AUDIT-GRP	AUDIT_GRP	03	G		32	55
Group Level.						
FVV-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	32	36
Audit Date. Date the record was last updated.						
FVV-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	37	41
Audit Time. Time the record was last updated.						
FVV-AUDIT-USER	AUDIT_USER	05	C	X(008)	42	49
Audit User. Last user (operator or program ID) that updated the record.						
FVV-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	50	55
Audit Organization. DBS organization associated with this record.						
FVV-GRP-DATA	GRP_DATA	03	G		56	587
Group Level.						
FVV-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	56	63
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVV-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	64	71
FVV-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	72	79
FVV-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	80	87
FVV-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	88	137
FVV-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	138	187
FVV-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	188	237
FVV-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	238	287
FVV-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	288	337
FVV-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	338	387
FVV-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	388	437
FVV-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	438	487
FVV-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	488	537
FVV-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	538	587

FVW-RECORD (FVW) – Subledger Account Detail Level Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVW	
Primary Key Length	0027	
Record Name	Library Name	Record Length
FVW-RECORD	FSSFVWTK	0583 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Level Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVW-RECORD Group Level.		01	R		1 583
FVW-GRP-KEY Group Level.	GRP_KEY	03	G		1 27
FVW-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVW-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5 6
00	No subledger.				
01	Payment to vendor.				
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.				
03	Payment to employee for expense.				
04	Teller over/short.				
05	Subledger-5.				
06	Subledger-6.				
07	Subledger-7.				
08	Subledger-8.				
09	Subledger-9.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVW-SUBL-ACCT-NBR Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.	SUBL_ACCT_NBR	05	N	9(015)	7	21
FVW-SUBL-ACCT-LVL Account Level. Identifies the account header level. Valid entries are 01 – 08 .	SUBL_ACCT_LVL	05	N	9(002)	22	23
FVW-COMMENT-NBR Comment Item Number. Unique sequence number within the comment key.	COMMENT_NBR	05	N	9(004)	24	27
FVW-AUDIT-GRP Group Level.	AUDIT_GRP	03	G		28	51
FVW-AUDIT-DATE Audit Date. Date the record was last updated.	AUDIT_DATE	05	PS	S9(09)	28	32
FVW-AUDIT-TIME Audit Time. Time the record was last updated.	AUDIT_TIME	05	PS	S9(09)	33	37
FVW-AUDIT-USER Audit User. Last user (operator or program ID) that updated the record.	AUDIT_USER	05	C	X(008)	38	45
FVW-AUDIT-ORG Audit Organization. DBS organization associated with this record.	AUDIT_ORG	05	C	X(006)	46	51
FVW-GRP-DATA Group Level.	GRP_DATA	03	G		52	583
FVW-EFFECTIVE-DATE Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.	EFFECTIVE_DATE	05	N	9(008)	52	59
FVW-EXPIRE-DATE Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.	EXPIRE_DATE	05	N	9(008)	60	67
FVW-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	68	75

FVX-RECORD (FVX) – Subledger Account Detail Comments Record

This record has 10 fields that can be used to maintain notes. It will be used in a future release.

Record Statistics

Record ID	FVX	
Primary Key Length	0057	
Record Name	Library Name	Record Length
FVX-RECORD	FSSFVXTK	0613 bytes

Record Description

The following record description shows the format of the Subledger Account Detail Comments Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FVX-RECORD Group Level.		01	R		1 613
FVX-GRP-KEY Group Level.	GRP_KEY	03	G		1 57
FVX-INST-NBR Institution Number. Number of the institution for which an inquiry or update is being performed. If the institution is altered, an automatic change bank (CHNG) is invoked and the operator is signed on to the new institution.	INST_NBR	05	N	9(004)	1 4
FVX-SUBL-NBR Subledger Number. Identifies the subledger for which balances have been stored. Valid entries are:	SUBL_NBR	05	N	9(002)	5 6
00	No subledger.				
01	Payment to vendor.				
02	Payment to vendor on behalf of employee if only one subledger account is entered. Generates a transaction to Subledger-1 and Subledger-3 if both subledger accounts are entered.				
03	Payment to employee for expense.				
04	Teller over/short.				
05	Subledger-5.				
06	Subledger-6.				
07	Subledger-7.				
08	Subledger-8.				
09	Subledger-9.				

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVX-SUBL-ACCT-NBR	SUBL_ACCT_NBR	05	N	9(015)	7	21
Subledger Account Number. Identifies the user-assigned number that uniquely identifies a subledger account. It is used in the subledger balances file to identify records, in the input transactions to cause the transaction to be associated with a subledger account, and in reporting.						
FVX-SUBL-ACCT-LVL	SUBL_ACCT_LVL	05	N	9(002)	22	23
Account Level. Identifies the account header level. Valid entries are 01 – 08 .						
FVX-GLACCT-NBR	GLACCT_NBR	05	N	9(015)	24	38
Account Number. Identifies a General Ledger Master File account number.						
FVX-COST-CNTR	COST_CNTR	05	N	9(015)	39	53
Cost Center. Unique number for each accounting unit and each function in the organization.						
FVX-COMMENT-NBR	COMMENT_NBR	05	N	9(004)	54	57
Comment Item Number. Unique sequence number within the comment key.						
FVX-AUDIT-GRP	AUDIT_GRP	03	G		58	81
Group Level.						
FVX-AUDIT-DATE	AUDIT_DATE	05	PS	S9(09)	58	62
Audit Date. Date the record was last updated.						
FVX-AUDIT-TIME	AUDIT_TIME	05	PS	S9(09)	63	67
Audit Time. Time the record was last updated.						
FVX-AUDIT-USER	AUDIT_USER	05	C	X(008)	68	75
Audit User. Last user (operator or program ID) that updated the record.						
FVX-AUDIT-ORG	AUDIT_ORG	05	C	X(006)	76	81
Audit Organization. DBS organization associated with this record.						
FVX-GRP-DATA	GRP_DATA	03	G		82	613
Group Level.						
FVX-EFFECTIVE-DATE	EFFECTIVE_DATE	05	N	9(008)	82	89
Record Effective Date. Indicates the date on which the record becomes active in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing until this date is reached. If the date is left blank, the record is effective immediately.						
FVX-EXPIRE-DATE	EXPIRE_DATE	05	N	9(008)	90	97
Record Expiration Date. Indicates the date on which the record becomes inactive in FCS. The current effective processing date for the institution is compared against this date. The record is ignored in all processing after this date is reached. If the date is left blank, the record never expires.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FVX-OPERATOR-ID Operator ID. Online user sign-on key.	OPERATOR_ID	05	C	X(008)	98	105
FVX-AUTHRTY-ID Reserved for future use.	AUTHRTY_ID	05	C	X(008)	106	113
FVX-COMMENT-01 Comment Line. Line of comment text.	COMMENT_01	05	C	X(050)	114	163
FVX-COMMENT-02 Comment Line. Line of comment text.	COMMENT_02	05	C	X(050)	164	213
FVX-COMMENT-03 Comment Line. Line of comment text.	COMMENT_03	05	C	X(050)	214	263
FVX-COMMENT-04 Comment Line. Line of comment text.	COMMENT_04	05	C	X(050)	264	313
FVX-COMMENT-05 Comment Line. Line of comment text.	COMMENT_05	05	C	X(050)	314	363
FVX-COMMENT-06 Comment Line. Line of comment text.	COMMENT_06	05	C	X(050)	364	413
FVX-COMMENT-07 Comment Line. Line of comment text.	COMMENT_07	05	C	X(050)	414	463
FVX-COMMENT-08 Comment Line. Line of comment text.	COMMENT_08	05	C	X(050)	464	513
FVX-COMMENT-09 Comment Line. Line of comment text.	COMMENT_09	05	C	X(050)	514	563
FVX-COMMENT-10 Comment Line. Line of comment text.	COMMENT_10	05	C	X(050)	564	613

FXL-RECORD (FXL) – Log Record

The log record is used for file recovery and audit reporting. The area that contains the application record is made up of separate 512-byte segments. If the application record is greater than 512 bytes, as many segments as needed are used to contain the record. The Runtime Log Server must be used to write and read these records. The server disassembles the application record when writing and reassembles it when reading.

Record Statistics

Record ID	FXL	
Primary Key Length	0038	
Record Name	Library Name	Record Length
FXL-RECORD	FSSFXTLK	0592 bytes

Record Description

The following record description shows the format of the Log Record.

Field Name	Token Name	Level	Mode	Picture	Displacement
FXL-RECORD Group Level.		01	R		1 592
FXL-GRP-KEY Group Level.	GRP_KEY	03	G		1 38
FXL-ZERO-NBR Zero-Number. This field always has a value of zero.	INST_NBR	05	N	9(004)	1 4
FXL-AUDIT-DATE-KEY Audit Date. Date the record being logged was last updated.	AUDIT_DATE_KEY	05	N	9(009)	5 13
FXL-AUDIT-TIME-KEY Audit Time. Time that the record being logged was last updated. This is the first 7 digits of the audit time from the record being logged.	AUDIT_TIME_KEY	05	N	9(007)	14 20
FXL-UNIQUE-CODE Unique Code. For records written under CICS, the last 3 positions of the CICS task are put in the first 3 positions of the unique code. The last position of unique code starts at zero. Then, in the event that there is more than 1 duplicate log key within the same task and sub-second, the unique ID can be incremented by 1. After 9 duplicates, it rolls into the next task 10's position. For records written in batch mode, the unique code is a sequential number starting at zero and incremented by 1 for each duplicate key.	UNIQUE_CODE	05	N	9(004)	21 24
FXL-AUDIT-TIME-SUBS Audit Time Sub-second. The last 2 digits of the audit time from the record being logged.	AUDIT_TIME_SUBS	05	N	9(200)	25 26

Field Name	Token Name	Level	Mode	Picture	Displacement	
FXL-REC-ID	REC_ID	05	C	X(003)	27	29
Record Identification Code. The record identification code, as defined in the Runtime BNKBIPD1 TYPE=RECORD label field, that identifies the data in the logged record area.						
FXL-INST-NBR	INST_NBR	05	N	9(004)	30	33
Institution Number.						
FXL-FORMAT-ID	FORMAT_ID	05	C	X(001)	34	34
Record Format Identification. Used by the Runtime Log Primitive as a transition identifier to distinguish log records of this format from the previous release format. Once the previous release formatted log records have been purged, all new records contain a 'Z', indicating the Log record has this format or 'b', indicating the Log record has the previous release format.						
FXL-LOG-CODE	LOG_CODE	05	C	X(001)	35	35
Logged Record Type Code. Indicates if the Log Record is before a change/delete or after a change/add of the database record. There is only a before, an after, or both depending on the function code.						
Value 1 = before a record change or delete.						
Value 2 = after a record or add.						
FXL-SEGM-ID	SEGM_ID	05	N	9(003)	36	38
Segment ID. Used to create additional segments for application records that exceed 512 bytes. There is always a record with a value of '999'. The '999' indicates the last record or the only record. When the application record exceeds 512 bytes, there are values starting at '001' for each additional 512 byte segment of application record data.						
FXL-GRP-AREA	GRP_AREA	03	G		39	80
Group Level.						
FXL-FUNC-CODE	FUNC_CODE	05	C	X(001)	39	39
Function Code. Indicates a file operation of add, change, or deletion of the database record. Valid entries are:						
A Record was added. There is only an after (Log Record Type 2) image.						
D Record was deleted. There is only a before (Log Record Type 1) image.						
M Record was changed. There is both a before (Log Record Type 1) and an after (Log Record Type 2) image.						
FXL-AUDIT-USER	AUDIT_USER	05	C	X(008)	40	47
Audit User. Last user (operator or program ID) that updated the record.						
FXL-RECORD-LENGTH	RECORD_LENGTH	05	B	9(004)	48	49
Record Length. Indicates the log record length.						
FXL-TERMINAL-ID	TERMINAL_ID	05	C	X(008)	50	57
Terminal ID. CICS terminal identification. For batch logging, this field contains spaces.						

Field Name	Token Name	Level	Mode	Picture	Displacement	
FXL-WORK-ID	WORK_ID	05	C	X(008)	58	65
Work Identification. The name of the work unit being used. When a work unit is not being used, this field contains spaces.						
FXL-PANEL-ID	PANEL_ID	05	C	X(008)	66	73
Panel Identification. Panel name being used. For batch, this field contains spaces.						
FXL-TRANS-BEGIN	TRANS_BEGIN	05	PS	S9(07)	74	77
Transaction Start Time. Time the transaction was initiated. If work unit processing was not involved, this field contains the time the panel program is initiated. For batch logging, this field contains zeros.						
FXL-APPLIC-SEQ	APPLIC_SEQ	05	PS	S9(05)	78	80
Application Sequence. Used for application-specific reporting requirements.						
FXL-GRP-DATA-AREA	GRP_DATA_AREA	05	G		81	592
Logged Record Data. This is the actual data from the application record being logged. If the application record exceeds 512 bytes, there are additional log records to hold the remaining bytes. Additional data beyond the actual length of the application record may also be appended. This appended information is most commonly used for reporting.						
FXL-DATA-1	DATA_1	10	C	X(250)	81	330
Record Image Area One. First 250 bytes.						
FXL-DATA-2	DATA_2	10	C	X(250)	331	580
Record Image Area Two. Bytes 251 – 500.						
FXL-DATA-3	DATA_3	10	C	X(012)	581	592
Record Image Area Three. Bytes 501 – 512.						

FXR-RECORD (FXR) – Commit/Restart Control Record

This record is used to store information required when a job step restart is performed after an abend. Program working storage information is restored to the last commit point when a restart is performed.

Record Statistics

Record ID	FXR	
Primary Key Length	0032	
Record Name	Library Name	Record Length
FXR-RECORD	FSSFRTK	0320

Record Description

The following record description shows the format of the Log Record.

Field Name	Token Name	Level	Mode	Picture	Displacement	
FXR-RECORD Group Level.		01	R		1	320
