Publication Information

Release: Infor CloudSuite Business & Industrial 9.00.30

Publication date: October 30, 2015

Release Notes for 9.00.30

Overview

We created mappings to migrate Infor Fourth Shift data to Infor CloudSuite Business and Industrial using the migration utility. We added a new import rule to be used to set up account numbers and unit codes.

For more information, see the *Infor CloudSuite Business and Industrial Migration Utility User Guide* or the utility's online help.

A predefined set of migration table data is included for use with Infor Fourth Shift version 9.00.00 and Infor CloudSuite version 9.00.30. The migration is not intended to bring all data from Infor Fourth Shift into Infor CloudSuite. It migrates only data that is pertinent to continue business operations in Infor CloudSuite. For more information, see the *Infor CloudSuite Industrial and Business Infor Fourth Shift Migration Example*.

Release Notes for 9.00.20

Overview

Use the Infor CloudSuite Business and Industrial migration utility to map, transform and import data from another application's SQL database tables into Infor CloudSuite database tables in a migration database. From there, the migrated, validated tables can be copied into other Infor CloudSuite databases.

For more information, see the *Infor CloudSuite Business and Industrial Migration Utility User Guide* or the utility's online help.

Requirements

Before installing the Migration Utility Industry Pack, ensure that these requirements are met:

- Infor CloudSuite Business or Infor CloudSuite Industrial version 9.00.20 is installed and completely configured.
- These APARs are downloaded from Infor Xtreme and installed:
 - 187390
 - 190067
 - 191612
 - 192423 (This APAR must be installed on both the source and target site when you use the Copy Site utility.)

Then install this industry pack. For more information about installing industry packs, see the *Industry Packs Installation Guide*.

If you are using this migration utility with Infor VISUAL, you must be on the latest version of VISUAL before you begin the migration.

A predefined set of migration table data is included for use with Infor VISUAL version 7.1.2 and Infor CloudSuite version 9.00.20. The migration is not intended to bring all data from Infor VISUAL into Infor CloudSuite. It migrates only data that is pertinent to continue business operations in Infor CloudSuite. For more information, see the *Infor CloudSuite Industrial and Business Infor VISUAL Migration Example*.
