- 3-49 Personnel Report Print - PLR700 [M]

Purpose

This guide is intended for technical personnel. It contains diagrams showing the flow of data and the relationship of the programs and files in Infor E Series Human Capital Management (HCM:E).

Organization of This Guide

Naming Standards

This section describes the naming standards for the components in the system to help you interpret the names used on the flow charts.

System Flow Charts

This section contains flow charts showing all executable programs in the system, the program inputs and outputs, and the flow of programs and files throughout the system.

Module Communication

This section contains flow charts showing the subprograms making up the system structure, the hierarchical relationships among subprograms, the communication among subprograms, and the subprogram access to files.

1 Naming Standards

Chapter Contents

1-1	Introduction
1-2	Definition
1-3	Component Values
1-8	Version Codes

Introduction

This chapter describes the naming standards used for the components of Infor E Series Human Capital Management (HCM:E).

Naming standards serve several purposes:

- Distinguish Payroll and Personnel system components from components in other E Series systems
- Provide consistency in identifying the different types of components within the Payroll and Personnel systems.
- Identify relationships between subsystems and logical parts of the Payroll and Personnel systems.

Definition

Each member identifier is composed of the following unique characters:

Character	Description
1	System identification code, for example, P represents the Payroll/Personnel system
2	Type of component, for example, P = Program and W = File
3	Subsystem identifier, for example, P = Employee Master File Maintenance, V = HRMS Tables File
4 - 6	Component identifier, for example, 400 = Transaction Validation members

A complete list of values for each character follows.

Component Values

Character 1

System Identification - All members beginning with **P** are components of the Payroll/Personnel system.

Members beginning with **L**, **M**, or **J** are miscellaneous Payroll/Personnel programs. Members beginning with **A** are Taxing Subsystem programs.

Character 1 and 2

System/Subsystem Identification - Characters 1 and 2 can be combined to identify programs by subsystem.

Characters	Subsystem
AT	Taxing Subsystem
MB	Benefits module
MM	Personnel reports
PM	Labor Distribution subsystem

Character 2

Type of Component - Second character identifiers are functionally grouped:

General

Character	Component
C	Copied working storage, linkage, or special names definitions
D	Copied procedure division code
H	Copied procedure for external access (calling copybook)
L	Load library member
T	Online screen definition and/or input to screen maintenance programs
V	Link edit streams (VSE)
X	Input data
Y	Link edit streams (MVS)
Z	JCL procedures

**I/O Modules
and Files**

Character	Component
A	Record definition in Data Division (external to I/O Modules)
B	Copied FD
E	Copied procedure for external program access (calling copybook)
G	Copied working storage for external I/O module
I	Copied procedure division code for external I/O module
J	Online COBOL-to-COBOL call for dynamic load
K	Online file number
N	External I/O module
O	Copied SELECT clause
W	Work/Master File number

**Application
Programs**

Character	Component
P	Application program source , PROGRAM-ID
S	Sort program source, PROGRAM-ID
1	Miscellaneous Payroll/Personnel utilities

**Inputs and
Outputs**

Character	Component
F	Input forms and cards
R	Report number

Character 3

Subsystem Identifiers - This table shows the third character identifiers:

Character	Component
C	Canadian Reporting
E	Earnings History
H	Life-to-Date History
J	Position Control
K	Check Reversal
L	Labor Distribution
N	Check Reconciliation
O	Online
P	Employee Master Maintenance
Q	Realtime
R	Standard Reporting
S	Special Reporting and I.E. LIMs
T	Realtime Tables File Update or Lost Time module
U	Labor Relations
V	HRMS Tables File
X	Benefits
Z	User modifications
4	Standard Reporting Print Files in PLR400 (Component Types W and M represent Position Control module print files)
5	Labor Distribution reports
7	Standard Reporting Print Files in PLR700 (Component Type W)
9	Audit Programs and Copybooks/Installation Procedures

If characters 1 and 2 = **PL**, then character 3 is one of these values:

Character	Component
1	Load/Edit regulatory
2	Extract regulatory
3	Audit/Exception regulatory
4	Federal W-2 reports/tapes
5	State reports/tape and Canadian tapes and reports

Character 3 and 4

Taxing Subsystem Identifiers - These are the third and fourth character identifiers:

Character	Component
CB	Program
CL	Procedure Division Code
CR	Record Description
CW	Working Storage
IF	FD
IS	Select

Character 4

Component - Fourth character identifiers depend on character 3:

If character 3 is P

Character	Component
2	Transaction Load
4	Transaction Validate
6	Update Master File
7	Payroll Compute

If character 3 is R

Character	Component
1	Payroll Report Generator
2	Personnel Report Generator
3	Time Entry Proof List
4	Payroll Report Print
5	Check Writer
7	Personnel Report Print
9	Employee Master Print

If character 3 is V

Character	Component
1	HRMS Tables File - Create Key
3	HRMS Tables File - Maintain
5	HRMS Tables File - File List

Character 5 and 6

These two characters are subsets of character four in most cases. Character 6 can be different for I/O modules only.

Character 6 for I/O Only

Character	Component
I	Opened I/O
M	Multifunction
O	Multifunction; online access to batch file
Q	Sequential Output Tape
R	Random Read
S	Sequential Read
V	Sequential Write
W	Random Writer
Z	Open I/O
2	Sequential Output Tape

Version Codes

Version codes are used to identify an item as being associated with a specific version of the system. They indicate that an executable program, a subprogram, a file, or an access to a subprogram is present **only** if the associated system component is installed.

Version Code	System Component
C	Canadian Reporting option of Payroll
H	Life-to-Date History module of Superbase
J	Position Control module of Superbase
M	Personnel System
P	Payroll System (both Superbase and Standalone)
T	Lost Time, Health & Safety module
U	Labor Relations module of Superbase
X	Benefits/ERISA module of Superbase
0	All or General (Applies to every version of the Superbase system)
2	Payroll Standalone only
3	Superbase only

On a flow chart, any subprogram, file, or access that is optionally present based on system version is indicated by a version code. The code indicates the circumstances under which the subprogram file or access is present. If a subprogram is version coded and you do not have the associated system component installed, disregard the subprogram.

In documentation and KB articles, the members are always identified using the six-character number. The version code appears in brackets next to the number. For example: PPP400 [0]

2-65	Flow Chart 62 [O] - Online PKO900 File Maintenance
2-66	Flow Chart 63 [O] - Online Edit Program Select
2-67	Flow Chart 64 [O] - Online Report Viewing Maintenance
2-68	Flow Chart 65 [P] - Payroll Online Payment History
2-69	Flow Chart 66 [P] - Payroll Online W-2 Viewing
2-70	Flow Chart 67 [Q] - Generate Audit Trail
2-71	Flow Chart 68 [Q] - Backup/Restore Audit Database
2-72	Flow Chart 69 [Q] - Realtime Tables File Recovery Processing (VSAM only)
2-73	Flow Chart 70 [Q] - Realtime Tables File Audit Processing
2-74	Flow Chart 71 [Q] - Online Check Calculation
2-75	Flow Chart 72 [Q] - Online Check Calculation File Control
2-76	Flow Chart 73 [Q] - Online Check Calculation Print Checks
2-77	Flow Chart 74 [Q] - Online Check Calculation File Maintenance
2-78	Flow Chart 75 [O] - Extended Product Security Update and Print
2-79	Flow Chart 76 [O] - Extended Product Security Audit Processing

Introduction

This chapter contains flow charts for the Payroll/Personnel system, the General Ledger Interface option of Payroll, and the Personnel modules, showing

- All executable programs in the system, the inputs and outputs for these programs, and the flow of programs and files through the system
- The relationships among the executable programs in the system.

Purpose

The purpose of the System Flow section is to

- Help you understand the program flow of the system
- Show program and file interdependencies
- Show the order of execution of Payroll/Personnel programs
- Show where files are created and used.

Format

Each flow chart contains one or more programs, and the flow chart name is descriptive of its contents. The flow charts are numbered consecutively and a version code is assigned to each. If a particular program or file does not correspond to the flow chart version code, that program or file will include the version code in brackets [x] next to the program or file number. See the Naming Standards chapter for a complete list of version codes.

Sort Parameter Values

The following table lists the sort parameters needed to start sort utilities.

Parameter	Field 1	Field 2	Field 3	Field 4	Field 5	Field 6	Field 7	Field 8
D1LEVELS	1, 10, A							
PXCDDKV	1, 11, A	12, 3, D	15, 2, A	15, 2 A				
PXJ01S	2, 5, A	100, 1 A	7, 13, A	101, 5 A	20, 4, A			
PXJ01SV	2, 5, A	100, 1 A	7, 13, A	101, 5 A	20, 4, A			
PXJ02S	1, 117, A							
PXJ02SV	1, 117, A							
PXJ60B	1, 21, D							
PXJ60BV	1, 21, D							
PXJ60F	1, 21, A							
PXJ60FV	1, 21, A							
PXN01S	1, 4, A	6, 18, A	5, 1, A					
PXN01SV	1, 4, A	6, 18, A	5, 1, A					
PXN02S	1, 1, A	4, 4, A	2, 1, A	9, 18, A				
PXN02SV	1, 1, A	4, 4, A	2, 1, A	9, 18, A				
PXN03S	3, 5, A	21, 10, A	33, 9, A					
PXN03SV	3, 5, A	21, 10, A	33, 9, A					
PXN04S	1, 4, A	6, 16, A	5, 1, A					
PXN04SV	1, 4, A	6, 16, A	5, 1, A					
PXO600	73, 6, A	1, 6, A						
PXO600V	73, 6, A	1, 6, A						
PXO610V	1, 14, A							
PXP01S	8, 7, A	15, 2, D						
PXP02S	2, 5, A	140, 1, A	7, 13, A	141, 5, A	20, 4, A	139, 1, A	38, 1, A	153, 7, A
PXP02SV	2, 5, A	140, 1, A	7, 13, A	141, 5, A	20, 4, A	139, 1, A	38, 1, A	153, 7, A
PXP03S	2, 4, A	19, 1, A	140, 12, A	7, 10, A	70, 2, A			
PXP03SV	2, 4, A	19, 1, A	140, 12, A	7, 10, A	70, 2, A			
PXP04S	2, 20, A	99, 1, A	113, 7, A					
PXP04SV	2, 20, A	99, 1, A	113, 7, A					
PXT01S	1, 40, A							
PXT01SV	1, 40, A

Flow Charts - General

The flow charts in this group are programs that apply to all users of the system.

Flow Chart 1 [0] - Subsystem Master File Initialization & Employee Master File Utility

Flow Chart 2 [0] - HRMS Tables File Subsystem

Flow Chart 4 [0] - Transaction Validate and Time Entry Proof

Flow Chart 5 [0] - Update Master File

Flow Chart 6 [0] - Employee Transfer

Flow Chart 7 [0] - Employee Master Copy Services

1 The Employee Master File can be accessed sequentially or randomly. The T00-002 Transaction in the HRMS Tables File is used to select which type of processing you use. In Position 16, select: **R** = Random, **S** = Sequential

Flow Chart 8 [0] - Employee Master Print

1 The input into this program can be either the Employee Master File or the Payroll Reporting Detail File. The T00-001 transaction in the HRMS Tables File is used to select the file. In positions 18-19, **EM** = Employee Master File, **PD** = Payroll Reporting Detail File.

If you are using the Employee Master File, it can be accessed sequentially or randomly. The T00-002 Transaction in the HRMS Tables File is used to select which type of processing you use. In Position 16, select: **R** = Random, **S** = Sequential

Flow Chart 9 [0] - Print Billing Invoices

Flow Charts 10 - 12 are reserved for future use.

Flow Chart 13 [P] - Employees Not Paid

26.15

1 If you are using the Employee Master File, it can be accessed sequentially or randomly. The T00-002 Transaction in the HRMS Tables File is used to select which type of processing you use. In Position 16, select: **R** = Random, **S** = Sequential

Flow Chart 15 [P] - Payroll Report Generator

1 The input into this program can be either the Employee Master File or the Payroll Reporting Detail File. The T00-001 transaction in the HRMS Tables File is used to select the file. In positions 18-19, **EM** = Employee Master File, **PD** = Payroll Reporting Detail File.

If you are using the Employee Master File, it can be accessed sequentially or randomly. The T00-002 Transaction in the HRMS Tables File is used to select which type of processing you use. In Position 16, select: **R** = Random, **S** = Sequential

Flow Chart 55 [J] - Position Control Master Copy Services and Master Utility

Position Control Master Copy Services

Position Control Master Utility

Flow Chart 56 [J] - Position Control Master Print

Flow Chart 57 [O] - Online Release-for-Processing

Flow Chart 58 [O] - Online Screen Generator

[1] - Used for all Online screens. In Realtime, used only for menus.

[2] - This file must be closed to your TP monitor before executing PPO600..

Flow Chart 59 [O] - Online PKO120 DCI Maintenance

LOAD Function

This chart shows the **load** function used to load screen variables and Screen 2 to the PKO120 file.

Member	Used to...	Used when...
PTOINT	Load Payroll/Personnel System 1	During installation
PTOINB	Load Benefits & Labor Relations System 2	During installation

Additional Information

1 This file is not used in the LOAD function. It is used in STRIP only.

Flow Chart 60 [O] - Online PKO120 DCI File Maintenance

**CHANGE Function**

This chart shows the **change** function used to update the PKO120 file.

Member	Used to...	Used when...
PTOCHG	Change	Always
PTO003	Add Alpha & SSN search screen 3 to PKO210 file	During installation
PTQnnn	Add Realtime screens	During installation
	Add/change Realtime screens	Applying update bulletins

Additional Information

- 1 Online Inquiry/Entry screens are not processed in PPO610.
- 2 This file is not used in the CHANGE function. It is used in STRIP only.

Flow Chart 61 [O] - Online PKO120 DCI File Maintenance

STRIP Function

This chart shows the **strip** function used to create the DCI input screen data written to the PWO610 file.

Member	Command	Used to...	Used when...
PXO611(MVS)	STRIP	Strip Payroll/Personnel System 1	During installation or applying update bulletins
PXO611(VSE)	STRIP SYSTEM1	Strip Payroll/Personnel System 1	During installation or applying update bulletins
PXO612(MVS)	STRIP SYSTEM2	Strip Benefits/Labor Relations System 2	During installation or applying update bulletins
PXO612(VSE)	STRIP SYSTEM2	Strip Benefits/Labor Relations System 2	During installation or applying update bulletins

Flow Chart 62 [O] - Online PKO900 File Maintenance

BLDVAR Function

This chart shows the strip function used to create the screen variable data written to the PKO900 file and used for extended product security inquiry only processing:

Command	Used to...	Used when...
BLDVAR	Create the screen variable file from the PKO120 file.	The PKO120 file is updated by PPO600 or PPO610 with the CHANGE function.

Flow Chart 63 [O] - Online Edit Program Select

Introduction

This section contains flow charts for each program structure in the Payroll and Personnel system. These flow charts show

- All programs making up the structure
- The hierarchical relationships among programs
- The communication among programs
- The program access to files.

Purpose

The purpose of the Module Communication section is to show

- Access to and from all programs in a program structure
- The programs that read and write the files used in the structure
- The program hierarchy.

Format

Each page heading shows the name and number of the executable program created by the program structure. When the flow chart of a structure requires multiple pages, the page number is also included in the heading. For example, if a structure requires three pages of flow chart, the headings include 1 of 3, 2 of 3, and 3 of 3.

In a flow chart, any program, file, or access that is optionally present based on system version is indicated by a version code. See the Naming Standards section of this guide for a complete list of version codes.

Employee Master Copy Services - PLP000 [0]
