M3 Issue Fixes

The following is the list of Fixes included in the FT M3 Service Pack 6.01.01 release:

APAR	KB Link	Affected Transactions	Description
224010	1887419	All	FT uses only the section that is before the first comma for an item number, separated by commas. This is applicable to all transactions in M3.
224018	1887470	Receive	Auto confirm input field Packaging Parameter remains unaffected, if the Suggest data for input field Packaging Parameter is set to *SYS in receive transaction,
224012	1887456	Warehouse Move	The lines that are in same order must be added to the existing order number in warehouse move transaction.
224923	1894684	All	“Exception message” is displayed as the error message, when selecting pick list for the Pick and Pack transaction.
226232	1907868	Confirm Putaway	Quantity field is automatically updated in the Report Screen Auto Confirm Parameter when the putaway task is reported in Confirm Putaway transaction.
226555	1906013	Menu	The application displays error if any transaction inputs is specified on the Submenu Finished goods transaction.
226346	1900451	All	When a GS1 barcode scan is performed for a field with no logic to split the identifiers, the input is wrongly accepted as a successful scan.
224949	1893646	All	The Swedish translation setup shows error for all the transactions. The strings are fixed to avoid the error.
229965	1917729	Count	The Physical Inventory user is unable to process the transaction as the screen does not allow to navigate to the next screen. The buttons are now enabled before displaying the “No Match found” message.
231265	1925621	Stock Enquiry	Balance ID status must be selected using the browse functionality for these In-house/Stock Enquiry/Reclassify screens in Stock transaction.
