## Chapter 5: Compatibility

### Operating system and database support – server

Component	Supported version
Operating system	Windows 8 (32 bit/64 bit) Windows 10 (32/64 bit) Windows Server 2012 R2 Standard (64 bit) Windows Server 2019 Standard
Database	Microsoft SQL Server 2016 Enterprise Edition SP1 Microsoft SQL Server 2017 Enterprise Edition

### Operating system support – client

Component	Operating system	Supported web browser
Operating system	Windows 8 (32/64 bit) Windows 10 (32/64 bit) macOS Mojave 10.14	Chrome x.x Edge Current State Firefox 20 or later
Database	Microsoft SQL Server 2014 Microsoft SQL Server 2016 Enterprise Edition SP1 Microsoft SQL Server 2017 Enterprise Edition	Internet Explorer 11 Safari 10.x

## Required software components

Software component	Supported version	Comments
Microsoft .Net Framework	4.5 (32/64 bit)	This software component is part of the application package.

## Related software components

Software component	Supported version
Infor ION	12.0 or later 11.1 or later
M3 Business Engine	16.0.0 15.1.4 15.1.3 15.1.2

## Recommended software components

Software component	Supported version	Comments
ReaConverter Pro	7.0	This software component enables the attachment and conversion of various image formats, as well as the retention of the original format of images in the application.
Adobe Illustrator CC	2017.1.0 Release (21.1.0) 2018 Release (22.1.0) 2019 Release (23.0.3)	This software component enables designers to manage graphic contents and its corresponding records in Infor Fashion PLM directly from Adobe Illustrator.

---

Software component	Supported version	Comments
Microsoft SQL Server Management Studio	2014 2016 2017	It is recommended to use Microsoft SQL Server Management Studio (SSMS) in adding and setting up application users in a multiuser mode.

## Chapter 6: Feature changes

### Product development

#### Product Development enhancements

##### Description

##### **Abstract:**

Infor Fashion PLM Product Development contains many processes, features, and functions required in design and development for the fashion industry. In this version of Infor Fashion PLM – Product Development, we expand the capabilities to further support the processes of Style carryover, mass create and mass update. We have added new features to work with especially Style BOM, Style Measurements, and Requests in an even more accurate, efficient, and flexible way. Styles, Material, and Trim information can be more easily and quickly accessed.

##### **Limitation:**

Limitations are stated for the features in the Solution section.

##### **Background:**

Infor Fashion PLM Product Development enhancements were developed to improve and support a customer's way of working.

##### **Solution:**

This version of Infor Fashion PLM – Product Development extends support on various product development processes. These features are introduced in this version:

##### **Changed behavior in Existing Functionality**

- Converted User-Defined Fields UDF1-4 of Style BOM lines to component specific (Style, Material, and Trim) editable dropdown fields.

**Note:** For customers using the UDF fields as free text fields, the fields will be automatically migrated to their respective Generic Look Up tables.

- For multi Size range Styles, there is a possibility to select which Size ranges content should be included in the measurement related reports, both when included in a Style Sample, or Sample with Cost Request, or when generated from Style.

**Note:** For the Requests, only the requested Size range will be included in reports as the default.

---

## Product Development enhancements

---

### New Features

#### Styles

- Possibility to select individual Size ranges to be replaced on Styles of multiple Size ranges in Style Mass Update for Sizes and Measurements.
- Additional information pane details are included in Create Carryover/Variant and Mass Create Carryover/Variant.
- New field Copied From is added to Style to display info of source Style a Style is originating from.
- New supplier specific fields have been added to Main Sourcing Information section in Style Overview, i.e. Quote Date, Valid From Date, and Valid To Date.
- New right-click option Jump To is added in Style grid for direct access to a Style record's different tabs.
- Sequencing of Dictionary items in Style Overview 2 is enabled.
- Hyperlink is added in Style BOM for direct opening of included Style, Material and Trim library records.
- New Copy Grading Row Values function is enabled for POM lines on Graded Increment tab of Master Pages in Style Measurements.
- New Replace POM function is available for POM lines on Summary and Graded Increment tab of Master pages in Style Measurements.
- Approved and Rejected Sample pages in Style Measurements can be reopened for editing.
- A new capability to cascade changes on POMs in Style Measurement Master page to existing Sample pages.
- Increased decimal values display to four (.0000) for numeric fields in Style Costing.
- A new flag "SKU(s) Integrated" is added to Style grid and Style Integration tab, which indicates whether SKUs are integrated or not for a Style.
- New capability for Style Requests of Type "Sample" or "Sample with Cost" to exclude the Sample Excel document attached to email sent for request.
- Style main image is added to header section of the Sample request Excel document attached to email sent for Style Requests of Type "Sample" or "Sample with Cost".

---

## Product Development enhancements

---

### Reports

- Pantone Color code is enabled to be exposed for colors of BOM lines in BOM reports.
- System-defined Style measurement reports; Sample Measurements and Style Measurements, have been enhanced.
- Supplier Information for Material and Trims is included as a new column in BOM lines section in the system-defined Style BOM report.
- New fields are available for use in Material reports; Repeat Height & Repeat Height UOM, Repeat Width & Repeat Width UOM, Free Field 1, and Free Field 2.
- Supplier Item Number and Supplier Item Name are available for use in Material and Trims reports.
- Quote Date, Valid From Date, and Valid To Date are available for use in Style, Material and Trim reports.

### Materials

- User-Defined Field 4 available under Material Information section in Material Overview is now available in Material grid in view mode.
- New supplier specific fields have been added to Additional Sourcing Information section in Material Overview. These are Supplier Item Number, Supplier Item Name, Quote Date, Valid From Date, and Valid To Date.

### Trims

- Columns Purchase Price and Purchase Price Currency are added to Trim Colorways tab and to Trim Colorways In Context pane.
- New supplier specific fields have been added to Additional Sourcing Information section in Trim Overview. These are Supplier Item Number, Supplier Item Name, Quote Date, Valid From Date, and Valid To Date.
- Module Designer is enabled for Trims.

### Requests

- The Contacts windows available beside field Supplier Contact and for the “To...”, “CC...” and “BCC ...” fields in Mail details in Request have been enhanced to show more details.
- The email address fields in Requests now support automatic finding and filling in of email addresses for contacts included in the Sourcing Contacts window of Request.

---

**Product Development enhancements**

---

## Miscellaneous

- Sourcing, the character limit of Phone and Fax fields in Sourcing Details and Other Address grid is extended to 100 characters.
- Add/Edit Roles window in Manage Roles and the Authorities grids within the Role Details tab are made larger to show more Authority records at once, and to fully show the details of these.
- User Authority entities for Module Designer are added for Material and Trim.
- A new Comments widget is available on Infor Fashion PLM Home page, "Latest Comments by Date," enabling the user to view more comments than in existing comments widget and to filter the comments by dates.

## Fashion PLM configuration

- Additional Resize Image Sizes is added in the Resize Photos Settings; XL = 1024 X 768 and XXL = 1900 X 1080.
- New option to use 4 decimal places on price fields for BOM lines is added.

# Partner Collaboration enhancements

## Partner Collaboration enhancements

Description	<p><b>Abstract:</b></p> <p>Communication is an integral part of product development most especially when establishing communication with your partners or suppliers. It is critical to easily and quickly provide information and updates to suppliers and for suppliers to do the same to meet strict deadlines. It is also important to have a central point to hold each communication for transparency and effectiveness.</p> <p>In this version of Infor Fashion PLM – Partner Collaboration, performance has been significantly improved when accessing thousands of styles. In addition, the page print issue when using the web browser's print function has been fixed for Style and Material grids and tabs.</p> <p><b>Limitation:</b></p> <p>See limitation for Page print issue fix in Solution section.</p> <p><b>Background:</b></p> <p>Infor Fashion PLM – Partner Collaboration enhancements were developed to improve and support customer's way of working.</p> <p><b>Solution:</b></p> <p>In this version of Infor Fashion PLM – Partner Collaboration, these enhancements are included:</p> <ul style="list-style-type: none"> <li>• Time for loading shared styles on Style tab in Partner Collaborator has been significantly improved. To load over a thousand styles now takes a few seconds, around 2 seconds in average, and which previously took several minutes.</li> <li>• Page print issue has been fixed for Style and Material grids and tabs, enabling all contents visible on the page to be included in Print Preview and printed when using the web browser's print function.             <ul style="list-style-type: none"> <li>• Limitation: Web browsers' Print Preview function will only display the contents within its 100% width. The width size in Partner Collaboration is different from the width size in Print Preview. If a table has multiple columns that will need scrolling, or has reached the end of the grid container, only the columns within the 100% width will be displayed in Print Preview. Other contents of the table columns will be cutoff.</li> </ul> </li> </ul>
