# Solution enhancements

Infor Global Financial Controller 10.4.6.0 contains these features and improvements:

### GDPR compliance requirements for cloud

IGFC cloud tools configuration is now GDPR compliant.

### GDPR compliance: Purge feature for XML files

Provides a feature for scheduled cleanup of XML(BOD) files from the IGFC database. Meanwhile, ION record tables in IGFC are automatically purged once consumed.

### Rule script editor value dropdown shortcut

This feature provides the user the ability to select from a list of IGFC rule script syntax, expressions, and the BOD names and attribute used to build the rule script.

### Clone and refresh feature for cloud

Clone and refresh is a process used to migrate tenants across different or same cloud environments. These features allow duplication of tenant data into another tenant or a new tenant. Even files are included in the process of copy or backup.

### BOD schema version 2.13.6 support

Added support for this BOD schema version affecting over 80 nouns.

### Updated warning message for 253

Warning message updated to include the rule name applicable.

### On premise support upgrade from any 10.4 version to IGFC 10.4.6.0

Provide on premise deployments with latest IGFC features and fixes.

### Flexible DocumentDateTime and DocumentId/ID field setting for non-SSJE output

Allows user to configure document creation date time and document ID fields instead of using default values assigned by IGFC.

# Compatibility information

10.4.6.0 applies to IGFC MT and on-premise.

# Language availability

This release is only available in English.

# Previous updates
