Chapter 1 Release 11.3.4

This release includes enhancements for Infor Business Vault Release 11.3.4.

Solution enhancements

Infor Business Vault Standard and Enterprise Editions Release 11.3.4 includes these enhancements:

New naming feature for levels in level-based hierarchies

You can now define names for levels in a level-based hierarchy. Level names are applicable for named hierarchies only. Level-based hierarchies, published in a dimension without named hierarchies, use level number names.

What's New widget

If you access Infor Business Vault through Infor Ming.le in a multi-tenant environment, a new widget is available that notifies you of upcoming Infor Business Vault updates. This widget provides highlights of new features and improvements for your products. A link provides access to release documentation on the Infor Support Portal. The What's New widget does not include information for patch releases and emergency updates.

If you are authorized to access the What's New widget, you can add it from the Widget Catalog to a homepage.

See the information about the What's New widget in the Infor Ming.le Cloud Edition Online Help.

Compatibility information

See the Online Compatibility Matrix on Infor Xtreme.
