Known Issues

These are known issues in the Infor Business Vault Base Data Store 10.4.6:

Issue #1:

In Infor Business Vault Base Data Store, there are multiple tables that contain Primary (PRI) and Secondary (SEC) location elements stored in the database. In previous versions of the Infor Business Vault Base Data Store, the correct values for the PRI and SEC element were not being stored in the Base Data Store. The primary location element (PRI) was displayed twice and the secondary location element (SEC) was not available.

In Infor Business Vault Base Data Store version 10.3.7, 10.4, 10.4.1, 10.4.2, and 10.4.3, the shredder XPath paths have been modified to accept two location elements and both location elements are sent properly to the database. However, if you are sending the PRI and SEC location elements to a localized (LC) table, the PRI element appears twice and the SEC element is not populated.

This issue is resolved in Infor Business Vault Version 11.2.

Issue #2:

Duration parsing is failing when a decimal is included in the values for seconds. Decimals should be allowed.

This issue is resolved in Infor Business Vault Version 11.2.1.

Issue #3:

Prior to the Infor Business Vault Base Data Store 10.4.1, the element WorkShiftMaster/WorkShiftDay/StartTime was stored as a datetime2 element in the Base Data Store. In the BOD, this element was not listed as a datetime element, it was a time element. For 10.4.1, we deprecated the datetime2 version and created a new version with column type time.

In testing, it was discovered that if you are using Business Vault version 11.1 or prior, you must send a datetime for WorkShiftDay/StartTime, or you will receive an error and the BOD will not populate in the database. If you are using Business Vault version 11.2, you must send a time for WorkShiftDay/StartTime or you will get an error.

Issue #4:

In Infor Business Vault Base Data Store version 10.4.5, the SHIPMENT_UNIT_ITEM_LOT table was added in error. The table is a duplicate of the elements in the SHIPMENT_UNIT_ITEM table. In Infor

Business Vault Base Data Store version 10.4.6, the SHIPMENT_UNIT_ITEM_S_LOT table has been added to replace the SHIPMENT_UNIT_ITEM_LOT table. The SHIPMENT_UNIT_ITEM_LOT table will be removed in the next release of the Base Data Store.
