## **Important Notices**

The material contained in this publication (including any supplementary information) constitutes and contains confidential and proprietary information of Infor.

By gaining access to the attached, you acknowledge and agree that the material (including any modification, translation or adaptation of the material) and all copyright, trade secrets and all other right, title and interest therein, are the sole property of Infor and that you shall not gain right, title or interest in the material (including any modification, translation or adaptation of the material) by virtue of your review thereof other than the non-exclusive right to use the material solely in connection with and the furtherance of your license and use of software made available to your company from Infor pursuant to a separate agreement, the terms of which separate agreement shall govern your use of this material and all supplemental related materials ("Purpose").

In addition, by accessing the enclosed material, you acknowledge and agree that you are required to maintain such material in strict confidence and that your use of such material is limited to the Purpose described above. Although Infor has taken due care to ensure that the material included in this publication is accurate and complete, Infor cannot warrant that the information contained in this publication is complete, does not contain typographical or other errors, or will meet your specific requirements. As such, Infor does not assume and hereby disclaims all liability, consequential or otherwise, for any loss or damage to any person or entity which is caused by or relates to errors or omissions in this publication (including any supplementary information), whether such errors or omissions result from negligence, accident or any other cause.

Without limitation, U.S. export control laws and other applicable export and import laws govern your use of this material and you will neither export or re-export, directly or indirectly, this material nor any related materials or supplemental information in violation of such laws, or use such materials for any purpose prohibited by such laws.

## **Trademark Acknowledgements**

The word and design marks set forth herein are trademarks and/or registered trademarks of Infor and/or related affiliates and subsidiaries. All rights reserved. All other company, product, trade or service names referenced may be registered trademarks or trademarks of their respective owners.

## About this document

This document provides information about the enhancements and changes in Infor Business Vault Standard and Enterprise Editions. See the Resolved Issues document for the list of fixed issues that are also included in this release.

The Business Vault application provides features to store data in a data repository and to map data from the repository into relational data stores for reporting and analytics.

Infor Business Vault Enterprise Edition provides analytic modeling features to define multi-dimensional cubes, dimensions, and hierarchies. The models are published to analysis applications and target databases.

## Contacting Infor

If you have questions about Infor products, contact Infor [www.infor.com/inforxtreme](http://www.infor.com/inforxtreme).

If we update this document after the product release, we will post the new version on this website. We recommend that you check this website periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

## About this release

This release includes enhancements for Infor Business Vault Version 11.3.3.

# Solution enhancements

Infor Business Vault Standard and Enterprise Editions Version 11.3.3 includes these enhancements:

## New features

### Partial cube fact loads

You can select to load recent data such as the past 6 months or the past 3 months. Cubes can be loaded faster and data can be retained while updating the cube.

### Publication dependencies

You can select one or more publications to run after another publication ends successfully.

### Cube string measures

You can define measure values as strings and publish cubes using string measure values.

### UK date format

You can now view dates in the UK format (dd/mm/yyyy).

## Product improvements

### Performance improvements for time dimension publishing

Improvements have been made to the time dimension publishing process for shorter publishing.

## Integration improvements

### Data Warehouse Designer (DWD) Extract Transform & Load (ETL)

You can automatically start cube and dimension processing in analytic modeling after the DWD ETL process is complete
