Comments?

We continually review and improve our documentation. Any remarks/requests for information concerning this document or topic are appreciated. Please e-mail your comments to documentation@infor.com.

In your e-mail, refer to the document number and title. More specific information will enable us to process feedback efficiently.

Contacting Infor

If you have questions about Infor products, go to Infor Concierge at <https://concierge.infor.com/> and create a support incident.

If we update this document after the product release, we will post the new version on the Infor Support Portal. To access documentation, select **Search Browse Documentation**. We recommend that you check this portal periodically for updated documentation.

If you have comments about Infor documentation, contact documentation@infor.com.

Chapter 1

Financial Statements Setup

1

Introduction

Each Financial Statement has an account structure defined in accordance with the Portuguese Accounting Official Plan. This structure must be related with the account structure that the company has defined for LN.

After you insert all data listed in tables 2.1, 3.3.1, 3.3.2 and 3.3.3 (in this document), you must define the relation between the account structure and the Financial Statements.

In Appendix A, you can find the relation between the structure of accounts defined in the Financial Statements module and the fields of each report ("Balance Sheet" and "P&L Reports").

It is necessary to set up correctly the accounting chart structure according to the table in this Appendix.

Note

All the accounts defined in this document must be defined in the Chart of Accounts (tfgld0508m000).

Financial statements

The Financial Statements (tffst1500m000) session must be run and data in Table 2.1 must be inserted in it:

Financial Statement	Statement Description
L_ACT	Activo
L_DR	Demonstração de Resultados
L_PAS	Passivo

Table 2.1

Parameters for Portuguese balance and P&L reports

The Balance Statement Parameters (tfgld5120s000) session must be set up as follows:

Parameters for GL Reports (Portugal)		
Financial Statement for Assets	L_ACT	Activo
Financial Statement for Liabilities	L_PAS	Passivo
Financial Statement for P&L	L_DR	Demonstracao de Resultados

Accounts structure for Portuguese statements

To set up the Statements Accounts Structure, complete the following steps:

- Run the Financial Statements (tffst1500m000) session.
- For each of the Portuguese Financial Statements, go to the appropriate menu and select *Statements accounts by Fin. Statement*.
- The Statement Accounts (tffst1520m000) session is displayed and must be filled with the data listed in tables 3.3.1, 3.3.2, and 3.3.3.

Chapter 2

Accounts Structure for Portuguese Statements

Chapter 3

Relation between Accounting Structure and Financial Reports

3

Portuguese reports - overview

This functionality is specific for Portugal.

In Portugal, you must submit a number of legal reports to the authorities when you close the fiscal year.

You must submit the following reports:

- Balance sheet ('Demonstração do Resultados')
- Profit and loss by type ('Demonstração do Resultados por Natureza')
- Profit and loss by function ('Demonstração de Resultados por Funções')

Reports of results

You can use the following sessions to generate the reports:

- **Balance Statement Parameters (tfgld5120s000)**
Use this session to specify the financial statements that you have set up to collect the statement accounts for the reports.
LN displays the financial statements by default in the Print Balance and Profit & Loss Statements (tfgld5420m000) session, which you can use to print the reports.
- **Balance Statements Manual Adjustments (tfgld5521m000)**
Use this session to specify the ledger accounts and dimensions to which the administrative costs and distribution costs are posted.
- **Profit & Loss Statements Manual Adjustments (tfgld5522m000)**
Use this session to manually enter tax amounts and cost amounts that must be included in the Profit and Loss by function ('Demonstração do Resultados por Funções') report and which LN can not retrieve from the General Ledger history.
If you *select* the **Include Manual Costs** check box in the Print Balance and Profit & Loss Statements (tfgld5420m000) session, LN includes the amounts in the Profit and Loss by function ('Demonstração de Resultados por Funções') report.

- **Print Balance and Profit & Loss Statements (tfgld5420m000)**

Use this session to print the legal reports that you must submit to the authorities when you close the financial year.

If you *clear* the **Include Manual Costs** check box, LN calculates the distribution costs and administrative costs based on the ledger accounts and dimensions that you specify in the Balance Statements Manual Adjustments (tfgld5521m000) session, and includes the amounts in the Profit and Loss by function ('Demonstração de Resultados por Funções) report.

- **Print Business Partner Balances (tfgld5423m000)**

Use this session to print a report of the business partner opening balances. The report shows the opening balances that are registered for the business partners on each ledger account during the year end closing procedure. Separate columns show the debit amounts and the credit amounts.

VAT reports

- **Business Partners excluded from VAT Reporting (Portugal) (tfgld6100m000)**

Use this session to specify the business partners for which the transactions must not be included in the VAT reports. For example, transactions with travel agencies can be non-taxable.

- **Transaction Types excluded from VAT Reporting (Portugal) (tfgld6110m000)**

Use this session to specify the transaction types of the transactions that must not be included in the VAT reports. For example, sales corrections and purchase corrections are usually not taxable.

- **Print Summary VAT Report by BP (Portugal) (tfgld6425m000)**

Use this session to print a report of the total purchase amounts or sales amounts including the tax amounts, for a range of business partners. To specify the business partners, you must enter the business partners' tax numbers which you defined in the Tax Numbers by Business Partner (tctax4100m000) session.

Electronic VAT and Sales Listing declaration for Portugal

This functionality is specific for Portugal.

You can set up, prepare, and process the combined electronic VAT and European Sales Listing (ESL) declaration required in Portugal. The result of this procedure is an ASCII declaration file that adheres to the electronic VAT declaration requirements defined by the authorities in Portugal.

Important!

Both the ESL and the VAT must have been finally declared up to and including the period that precedes the first period of the combined declaration. Otherwise, undeclared data from previous periods can be included in the declaration.

For periods for which you generate the combined declaration, you must always select the **Simulate** check box in the Process Intracommunity Listing (tccom7270m000) session. Otherwise, the already processed sales listing data is excluded from the VAT declaration, which results in an incorrect declaration.

Selected VAT declaration lines

If you use the **Select Tax Declaration Lines** command in the Tax Declarations (tfgld1625m000) session to add the VAT declaration lines automatically to the VAT declaration, the status of the selected finalized tax transactions changes to **Selected for Declaration**, and the tax declaration ID is entered in the **Tax Declaration Number** field of the tax transaction in the Tax Analysis (tfgld110) table.

If you submit the VAT declaration in the Tax Declarations (tfgld1625m000) session, the status of the finalized tax transactions that are included in the declaration changes to **Submitted**.

Selected sales listing lines

For simulated as well as final VAT declarations, LN selects the sales listing lines for which the **Processed** check box is cleared in the Sales Listing (tccom7570m000) session.

For sales listing lines that are included in a final VAT declaration, LN selects the **Processed** check box and enters the tax declaration ID in the **Tax Declaration Number** field of the sales listing line in the Sales Listing Data (tccom700) table.

If you reprint the VAT declaration, LN selects the sales listing lines that have the same tax declaration ID as the VAT declaration for which you request the reprint.

To prepare the electronic VAT and European Sales Listing declaration

This functionality is specific for Portugal.

To prepare the combined tax and sales listing declaration, take the following steps:

1. In the Process Intracommunity Listing (tccom7270m000) session, simulate generation of the sales listing. Enter the following details:
 - Select the **Simulate** check box
 - Clear the **Recalculate Amounts with Declarant Exchange Rates** check box
 - Leave the **Description** field empty

You must leave the **Description** field empty because otherwise, LN recalculates the sales listing amounts, which can cause a mismatch with the net amounts declared for intra-community sales in the VAT declaration part. This can result in a blocking error.
2. In the Tax Declaration Master (tfgl1620m000) session, on the appropriate menu, click **Tax Declarations** to start the Tax Declarations (tfgl1625m000) session.
3. On the appropriate menu of the Tax Declarations (tfgl1625m000) session, click **Select Tax Declaration Lines**. LN automatically adds the VAT declaration lines to the VAT declaration.
4. In the Tax Declarations (tfgl1625m000) session, on the appropriate menu, click **Show file** to create a non-final VAT declaration ASCII file. The ASCII file is displayed in a Microsoft Notepad window. Save the file, and then open the same file in the Portuguese VAT declaration HTML application (IVA.html).
5. If the VAT declaration HTML application detects errors in the manually entered fields, you can correct these on the Tax Positions by Tax Declaration Master of the Tax Declaration Master (tfgl1620m000) session. You can correct errors in VAT numbers on the sales listing in the Sales Listing (tccom7570m000) session.
6. Repeat Steps 3 to 5 until the HTML application does not detect any blocking errors.
7. To approve the VAT declaration, in the Tax Declarations (tfgl1625m000) session, on the appropriate menu, click **Approve**.

8. To transfer the VAT declaration, in the Tax Declarations (tfgld1625m000) session, on the appropriate menu, click **Transfer Tax Declaration**.
9. To submit the VAT declaration, in the Tax Declarations (tfgld1625m000) session, on the appropriate menu, click **Submit Tax Declaration**.
10. Submit the created ASCII file to the tax authorities. You must have entered the file name and the path in the tax declaration master header in the Tax Declaration Master (tfgld1620m000) session.
11. To reprint the VAT/ESL declaration without recalculating the declared amounts, in the Tax Declarations (tfgld1625m000) session, on the appropriate menu, click **Show file**.

To set up electronic VAT and European Sales Listing declaration

This functionality is specific for Portugal.

To set up the master data for the tax declaration, take the following steps:

1. In the Tax Declaration Master (tfgld1620m000) session, create the VAT declaration master. Enter the file name and the path of the ASCII file.
2. On the Tax Positions by Tax Declaration Master tab, on the appropriate menu, click **Initialize**. LN creates the declaration layout. For each field to be entered, LN creates a separate line. For some lines, default values are available. In other fields, you must enter a value.
You must especially create tax positions for the VAT declaration amount fields that are applicable to your business. A tax position groups the tax codes that contribute to a specific declaration amount and links the tax codes to the box on the tax declaration.
3. In the Tax Positions (tfgld0120m000) session, create the required tax positions, and the links to the tax codes by country. Next, select the tax positions in the VAT declaration lines on the Tax Positions by Tax Declaration Master tab of the Tax Declaration Master (tfgld1620m000) session.
4. To complete the VAT declaration master, supply the required tag contents. For each VAT declaration master line for which the **User-defined Tag Content** checkbox is selected, you must manually enter a fixed tag content in the Tax Positions by Tax Declaration Master (tfgld1121m000) session.
Leave all other fields in the Tax Positions by Tax Declaration Master (tfgld1121m000) session unchanged, except if other changes are required for changed formats and so on.

Separate ledger accounts for tax amounts

This functionality is specific for Portugal.

In Portugal, the following accounting rules apply:

- Tax on advance payments and receipts must be posted to the same account used for the tax posting when the invoice is created.
- When you assign advance payments or receipts to invoices, the contra posting for the tax amount must be posted to a separate account.
- Tax amounts on credit notes must *not* be posted to the same account as the tax amount on the invoice, but to a separate account.

To create separate sales invoices for credit notes, in the Invoicing Methods (tcmcs0155s000) session, you must clear the **Combine Positive and Negative Order Lines** check box . If you want to post the tax amounts on credit notes to ledger accounts other than the sales tax account, you must clear this check box.

In the Posting Data for Tax Codes (tfgld0171s000) and the Posting Data for Multiple Tax Codes (tfgld0170s000) sessions, you can define ledger accounts for tax amounts on advance payments and receipts and for tax amounts on credit notes.

Appendix A

Glossary

A

appropriate menu

Commands are distributed across the **Views**, **References**, and **Actions** menus, or displayed as buttons. In previous LN and Web UI releases, these commands are located in the *Specific* menu.

financial statement

An account structure that can consist of child statement accounts and parent statement accounts. At the child level, the statement accounts are linked to ledger accounts and dimensions. With a financial statement, you can collect the desired financial values from the General Ledger and Budgeting modules, and use this data for internal and external financial reporting and analysis.
