# Contacting Infor

If you have questions about Infor products, go to the Infor Xtreme Support portal.

If we update this document after the product release, we will post the new version on this website. We recommend that you check this website periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

---

## Where to look for information

# 1

Throughout these release notes, references to specific documents and Knowledge Base articles may be provided to help you locate more detailed information.

Product documentation is available on the Infor Xtreme portal.

- You can find documentation posted to the product records on the Download Products page. Look here first for installation guides and release notes.
- You can browse or search for product documentation on the Documentation page.

For questions or feedback, email [documentation@infor.com](mailto:documentation@infor.com).

## Related documents

You can find these documents in the Infor Xtreme Support portal:

- *Infor M3 Report Manager Installation Guide*
- *Infor M3 Report Manager User Guide*

### Scope of this release

Infor M3 Report Manager 10.1.3.0 is a minor release that includes new features and corrections.

### Restrictions

The platform combination RHEL 6.5.x with PostgreSQL+AS 9.3.x is not supported in this release.

See "Known limitations" on page 19 for the list of preconfigured reports and restrictions when running M3 BE 15.1.1 or earlier versions.

### Upgrade paths

The release is a full installation and cannot update any previous M3 Report Manager installation.

## Language availability

Online help and documents are all in US English. Languages below only refer to software-integrated text in panels. For contracting details on languages, refer to the license agreement on Business Engine Country Versions or Business Engine Additional Languages.

| Available languages | Comments         |
|---------------------|------------------|
| English (US)        | Default language |
| Chinese–Simplified  |                  |
| Czech               |                  |
| Danish              |                  |
| Dutch               |                  |
| Finnish             |                  |
| French              |                  |
| German              |                  |
| Hungarian           |                  |
| Italian             |                  |
| Japanese            |                  |
| Lithuanian          |                  |

|                    | 10.1.x<br>10.0.5.x |  |

## Enhancements for Report Manager

|             |  |
|-------------|--|
| Description | <p>The main focus of this release is to improve error-handling in the runtime environment, to increase performance with larger reports, and to add support for Java 8.</p> <p>Background:<br/>Enhancements are made based on customer feedback.</p> <p>Solution:<br/>These enhancements are made to Report Manager:</p> <ul style="list-style-type: none"><li>• User interface<br/>The Report layout field is added as a key in the configuration, making it possible to have different configurations for different report layouts. The Report layout field enables the addition of more dummy and space fields when a report is configured.</li><li>• Runtime environment<ul style="list-style-type: none"><li>• This version of Report Manager comes with several services that are able to balance load and switch if one service is occupied by a failing report.</li><li>• The runtime log is changed to show a more descriptive explanation of what is happening in the process of generating a report. The log file can be opened to show the entire log report.</li><li>• A new open-source library is added to help with faster generation of reports.</li><li>• Support for Java 8 is added.</li></ul></li><li>• Reports<ul style="list-style-type: none"><li>• All selection fields are included in Excel printout.</li><li>• Report can be exported or imported to transfer documents between environments or to distribute reports between different customers.</li><li>• The issues on decimal and thousand separators are fixed.</li></ul></li></ul> |
|-------------|--|

## Feature changes

---

|                   |  |
|-------------------|--|

For the rest of the reports, the final configuration must be done by using the Administration tool in Report Manager.

## M3 BE versions prior to M3 15.1.2

When running M3 BE 14.1.2 or 15.1.1, these restrictions apply:

- The Modification field in MNS212 is used instead of the Report field type for output type selection.
- The Ad Hoc reports are not automatically imported to the menu in Report Manager. Reports must be run from the M3 BE Ad Hoc Report program.
- The Report configuration group is not be automatically imported from M3 BE. The setting must be maintained manually in Report Manager.
