Introduction

This document describes enhancements and new functionality made available in Release 3.10.014 of the Pathway software.

This Release Notes document is also available for viewing from the Release Notes menu option included in the Help Menu.

Included in this document are the following sections:

User Guides and Online Help

This includes an overview of how to access Pathway Help (both online and in printable format), as well as a listing of all the Modules included.

Modules

Each module that has undergone modifications is included in this documentation. The documentation is now contained in three separate documents as follows:

- Infor Pathway Release Notes 3.10.014 Enhancements.pdf
- Infor Pathway Release Notes 3.10.014 Fixes and Software Corrections.pdf
- Infor Pathway Release Notes Summary 3.10.014.xlsx

If there are no details under any of these headings for a particular module, then that module will be omitted entirely.

InforXtreme Incident Index

This includes a listing of the InforXtreme Incidents addressed in this release of software, in alphabetical order with their associated page number.

DRN Index

This includes a listing of the Development Requests (DRNs) addressed in this release of software, in numerical order with their associated page number.

KB Index

This includes a listing of the Knowledge Base Articles (KBs) addressed in this release of software, in numerical order with their associated page number.

.

User Guides and Online Help

All Pathway modules are supported by on-line help text which is accessed by pressing the F1 key within any field on a form. In addition, help text for all modules is also available from the Contents option within the Help Menu. This can be accessed from any form within Pathway.

Complete User Guides based on the Help Text may also be printed in hard copy for each module. To access the PDF versions of the User Guides, the following steps should be performed:

- ❑ The User Guides are stored in PDF format and therefore require that Adobe Reader be available to access them.
- ❑ The User Guide can be viewed or printed, but cannot be modified.
- ❑ Check with your system administrator for instructions on where to find these documents on your system.

The User Guide documents are stored in the following directory path in the following format e.g. ACR.pdf:

e.g.
XXX \ hlp\ABK.pdf

ABK	(Bookings Management)	CSY	(System)
ACR	(Customer Service)	CTX	(Tax)
CAR	(Accounts Receivable)	CWF	(Workflow)
CAU	(Auditing)	CWP	(Word Processing)
CBT	(Batch Processing)	CWS	(WorkSmart)
CCL	(Calendar)	ESY	(ePathway)
CCP	(Customer Profile)	HowtoUse	(How To Use)
CDC	(PaperClip Attachments)	LAN	(Animals)
CEM	(e-mailing)	LAP	(Applications)
CFI	(General Ledger)	LCN	(Conditions)
CIF	(Core Interface)	LDR	(Debtors)
CIM	(InfoMart)	LER	(Electoral Roll)
CMN	(Menu System)	LIF	(Infringements)
CMO	(Memo)	LIN	(Inspections)
CNA	(Name and Address)	LLC	(Licensing)
COR	(Responsibility)	LPA	(Property Accounting)
CQY	(Query)	LRA	(Rates)
CRC	(Receipting)	LTW	(Trade Waste)
CRF	(References)	LVL	(Valuations)
CRG	(Registers)	LWB	(Water Billing)

Applications

Enhancements

Application Parameters

InforXtreme Incident: MARO 13380029; SMART AND THICK CLIENT;	DRN: 31300 KB:	Fix:
--	-------------------	------

LETTER EXTRACT TYPE

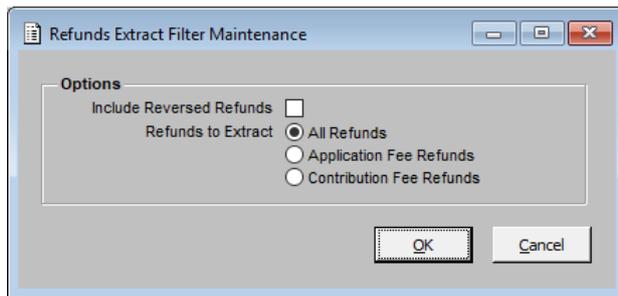

A new Refunds extract list type has been added to allow the extraction of refunds for an Application.

The screenshot shows the 'Extract Type Maintenance' dialog box. The 'Extract List Type' dropdown is set to 'REFUNDS' and the 'Refunds' text box is highlighted with a red rectangle. The 'Associated Extract Types' dropdown is empty. The 'Filter Options' section includes Status (none), Application Class, Consent Code, and Memo type. The 'Document Options' section includes Include List (checked), List Template, Include Yes/No documents (unchecked), Yes Document, No Document, and Include Static Text Document (unchecked).

The Refunds extract list type allows the following details to be extracted for each refund attached to an Application:

- Refund Date
- Refund Amount
- Refund Name
- Refund Address
- Refund Narrative
- Reversal Date
- Reversal Narrative

Pressing the Additional Filter button on the Refunds extract list type will display the Refunds Extract Filter Maintenance form.

The Refunds Extract Filter Maintenance form has the following options:

- Include Reversed Refunds – Determines whether refunds that have been reversed are extracted or ignored.
- Refunds to Extract – Allows application and contribution fee refunds to be extracted or application fee refunds only or contribution fee refunds only.

NSW Building Professionals Report Extract

InforXtreme Incident:
SMART CLIENT;

DRN: 30957
KB:

Fix: 03107292;

NSW BUILDING PROFESSIONALS BOARD EXTRACT

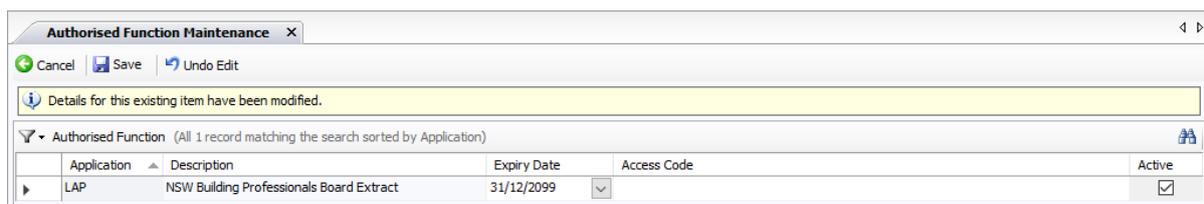

A new batch function has been created to generate an export file for the Building Professionals Board of NSW.

The function generates a single zip file containing the following 13 delimited text files:

- BuildingWork.txt
- DevelopmentApplication.txt
- ComplyingDevelopmentCertificate.txt
- BuildingClassification.txt
- TitleReference.txt
- PerformanceSolutions.txt
- PrincipalCertifyingAuthority.txt
- ConstructionCertificate.txt
- Modification.txt
- Notice.txt
- CriticalStageInspection.txt
- InterimOccupationCertificate.txt
- FinalOccupationCertificate.txt

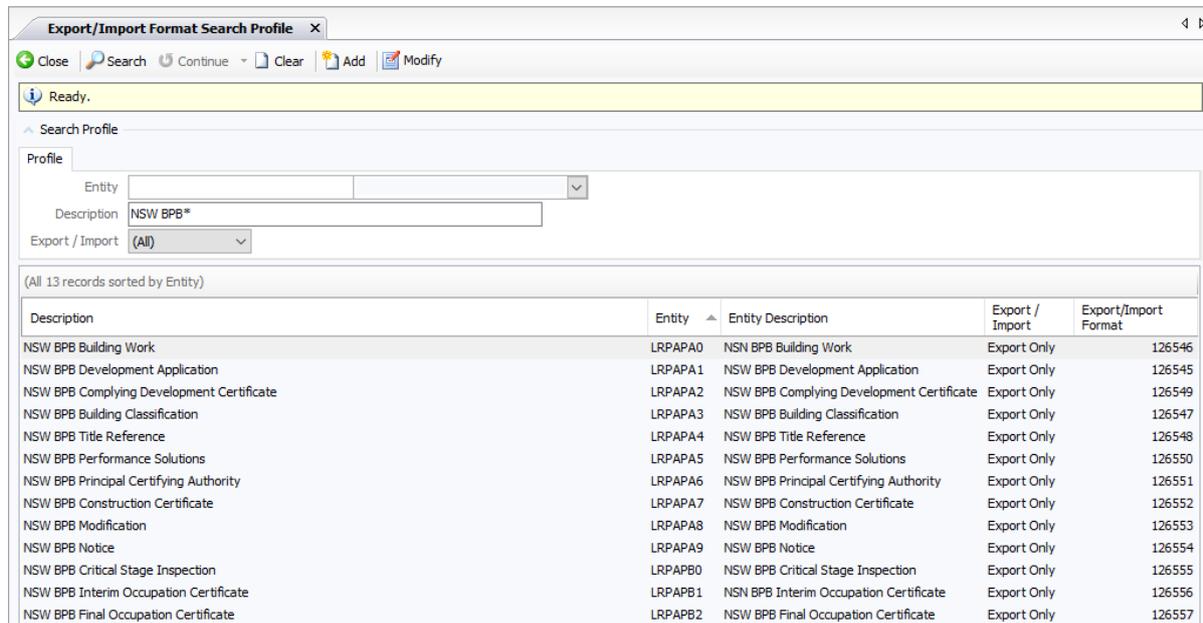

Authorised Function

Access to the new batch function is controlled by the NSW Building Professionals Board Extract authorised function.

Export/Import Formats

Each of the 13 delimited text files requires its own export format to be defined using the appropriate export entity.

Export/Import Format Search Profile

Ready.

Search Profile

Profile

Entity: []

Description: NSW BPB*

Export / Import: (All)

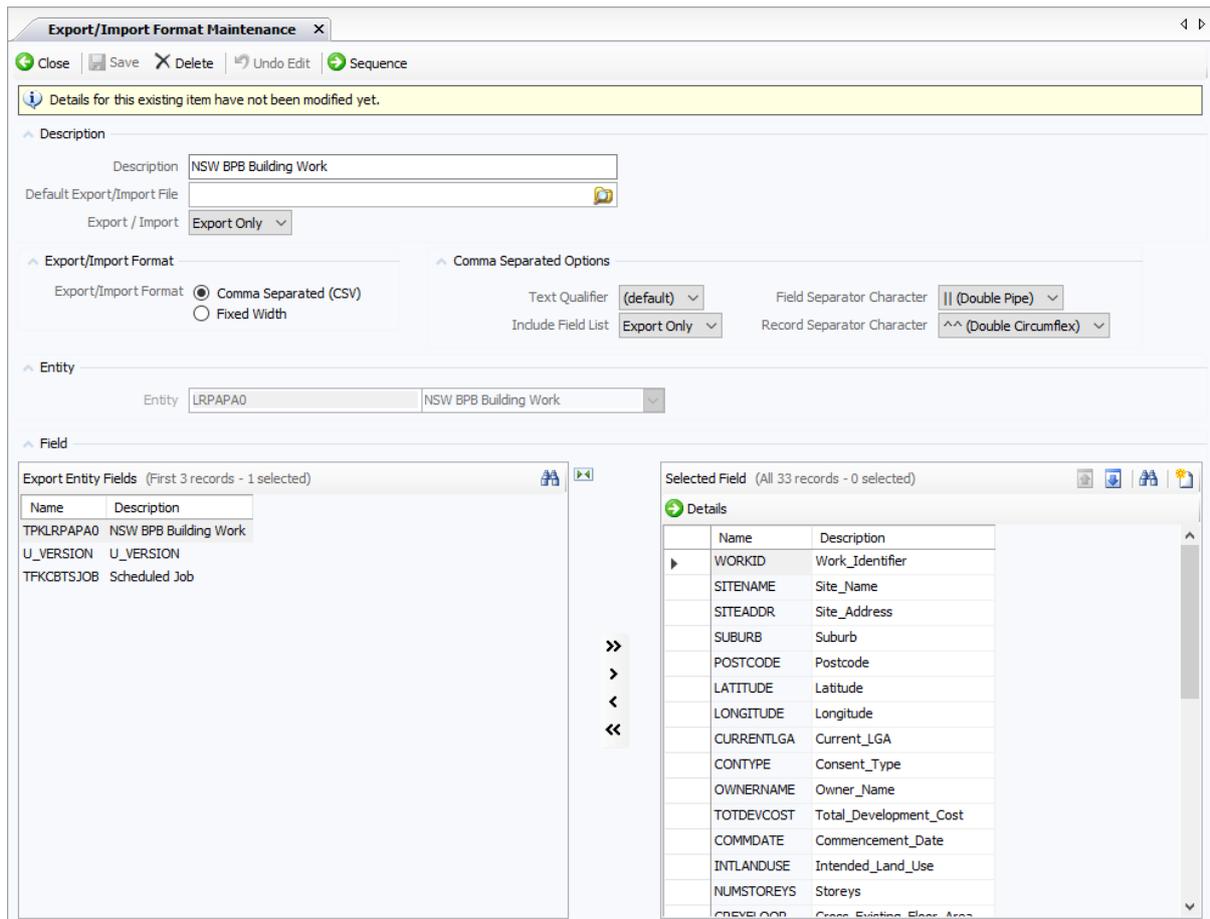

(All 13 records sorted by Entity)

Description	Entity	Entity Description	Export / Import	Export/Import Format
NSW BPB Building Work	LRPAPA0	NSW BPB Building Work	Export Only	126546
NSW BPB Development Application	LRPAPA1	NSW BPB Development Application	Export Only	126545
NSW BPB Complying Development Certificate	LRPAPA2	NSW BPB Complying Development Certificate	Export Only	126549
NSW BPB Building Classification	LRPAPA3	NSW BPB Building Classification	Export Only	126547
NSW BPB Title Reference	LRPAPA4	NSW BPB Title Reference	Export Only	126548

NSW BPB Critical Stage Inspection	LRPAPB0	NSW BPB Critical Stage Inspection	Export Only	126555
NSW BPB Interim Occupation Certificate	LRPAPB1	NSW BPB Interim Occupation Certificate	Export Only	126556
NSW BPB Final Occupation Certificate	LRPAPB2	NSW BPB Final Occupation Certificate	Export Only	126557

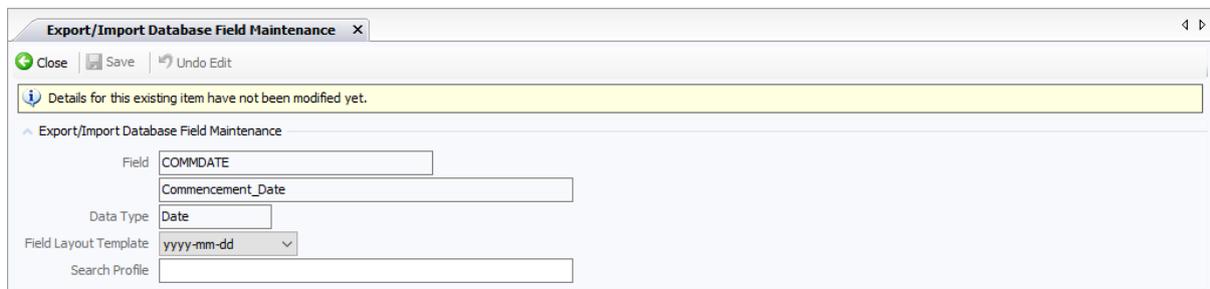

- LRPAPA0 – NSW BPB Building Work
- LRPAPA1 – NSW BPB Development Application
- LRPAPA2 – NSW BPB Complying Development Certificate
- LRPAPA3 – NSW BPB Building Classification
- LRPAPA4 – NSW BPB Title Reference
- LRPAPA5 – NSW BPB Performance Solutions
- LRPAPA6 – NSW BPB Principal Certifying Authority
- LRPAPA7 – NSW BPB Construction Certificate
- LRPAPA8 – NSW BPB Modification
- LRPAPA9 – NSW BPB Notice
- LRPAPB0 – NSW BPB Critical Stage Inspection
- LRPAPB1 – NSW BPB Interim Occupation Certificate
- LRPAPB2 – NSW BPB Final Occupation Certificate

The Field Separator Character should be set to “|| (Double Pipe)”.

A new Record Separator Character option has been added to the Export/Import Format Maintenance form. The Record Separator Character should be set to “^^ (Double Circumflex)”.

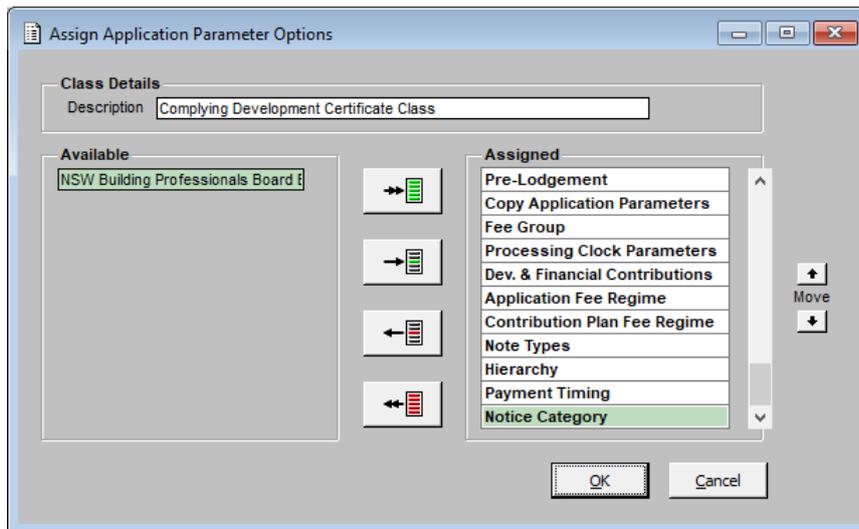

Date fields should have the Field Layout Template set to “yyyy-mm-dd”.

NSW Building Professionals Board Extract Parameters

A new parameter options has been added to the Applications class for the NSW Building Professionals Board Extract.

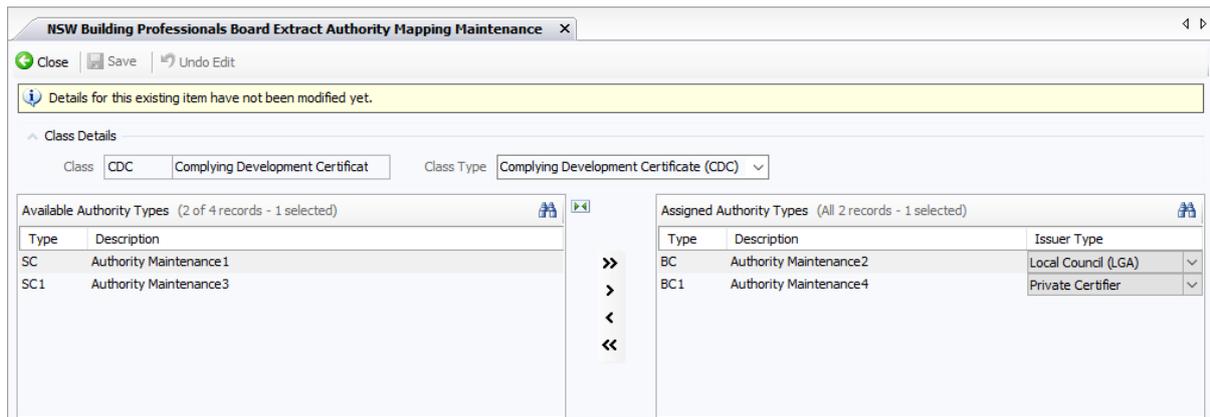

Three sets of NSW Building Professionals Board Extract Parameters must be set up. One for Construction Certificates (CC's), one for Complying Development Certificates (CDC's) and one for Development Applications (DA's). The parameters can be set up within the same Application classes or different Application classes.

The NSW Building Professionals Board Extract Parameter has three options, Authority Mapping, Inspection Mapping and Merge Type Mapping.

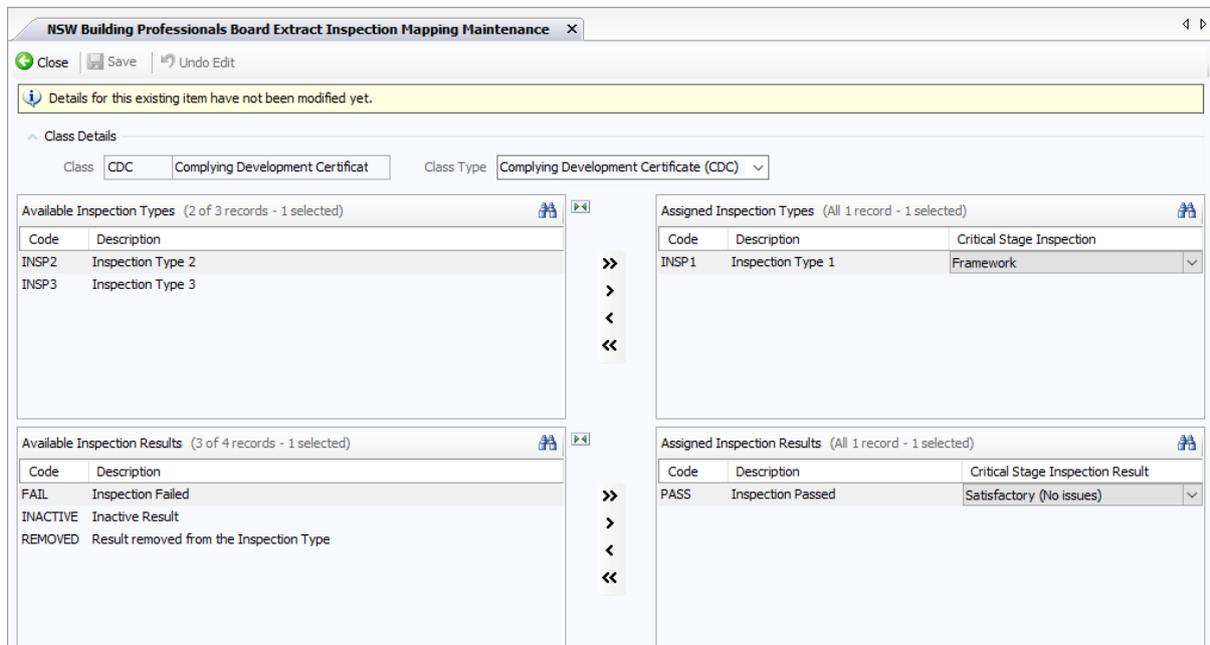

NSW Building Professionals Board Extract Authority Mapping Maintenance

The Authority Mapping parameter is used to assign a BPB Issuer Type to a Pathway Authority specified against a decision.

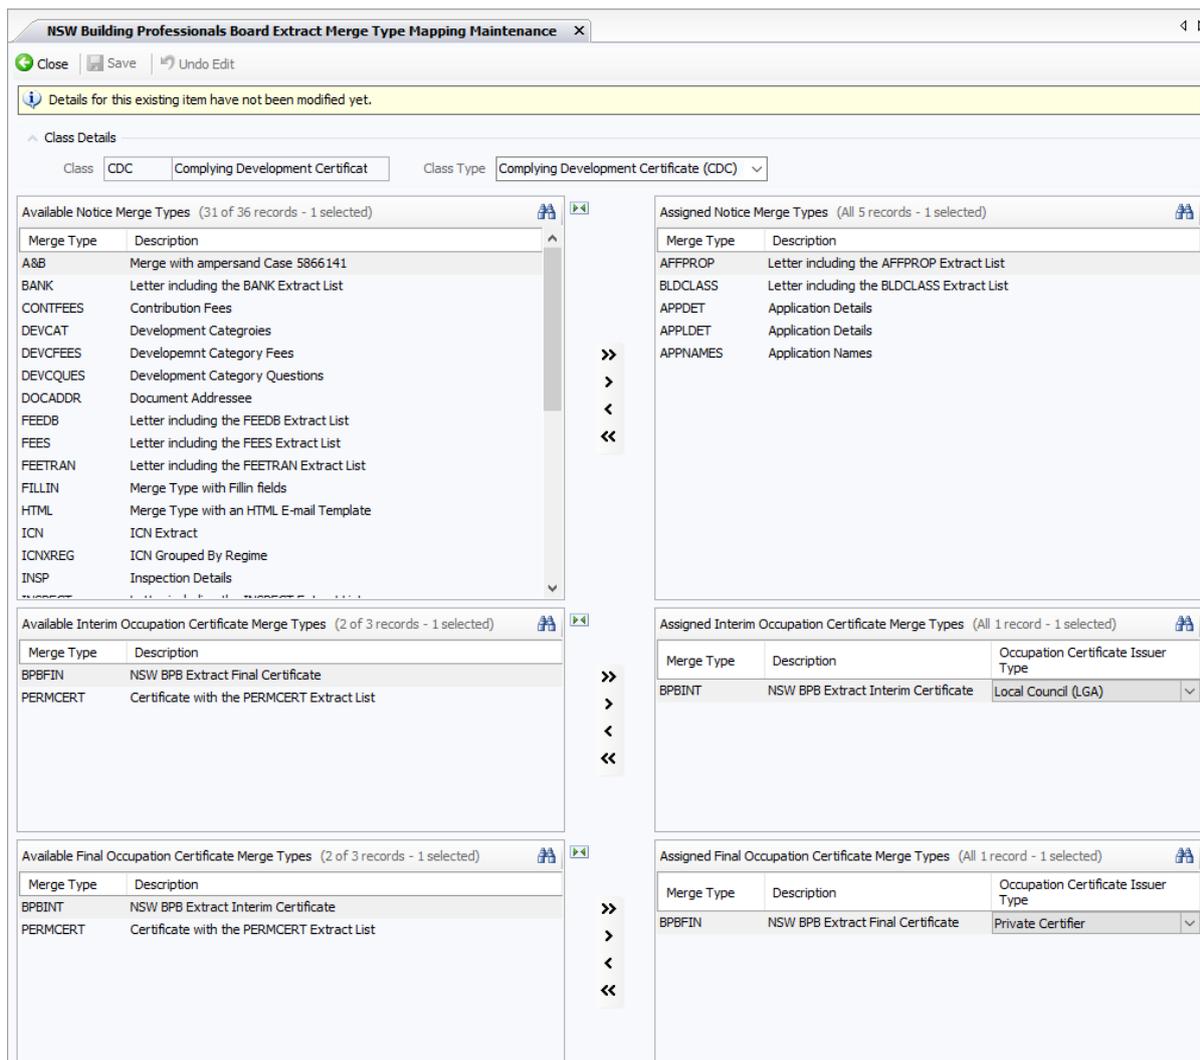

NSW Building Professionals Board Extract Inspection Mapping Maintenance

The Inspection Mapping parameter is used to assign a BPB Critical Stage Inspection and BPB Critical Stage Inspection Result to a Pathway Inspection Type and Pathway Inspection Result respectively. Only inspections with an assigned Inspection Type and Inspection Result will be processed.

NSW Building Professionals Board Extract Merge Type Mapping Maintenance

The Merge Type Mapping is used to determine which letters and certificates will be extracted.

Letters with a merge type matching the assigned notice merge types will be extracted to the Notice.txt file.

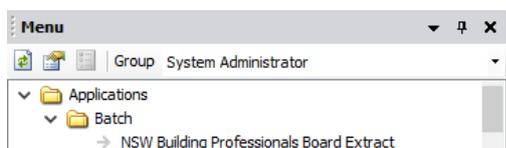

Permits and Certificates with a merge type matching the assigned interim occupation certificate merge types will be extracted to the InterimOccupationCertificate.txt file.

Permits and Certificates with a merge type matching the final interim occupation certificate merge types will be extracted to the FinalOccupationCertificate.txt file.

A BPB Occupation Certificate Issuer Type must be selected for the assigned interim and final occupation certificate merge types.

Building Professionals Board Extract Control

A new batch menu option has been added to Applications for the NSW Building Professionals Board Extract.

SFTP Folder Name should be populated with the sftp folder that has assigned as your delivery folder. The SFTP Folder Name will be used when constructing the name for the zip file. The zip file will be named using the following format:

BC_sftpfoldername_yyyyMMddHHmss.zip

The Building Professionals Board Extract will produce an exception report detailing any invalid data encountered.

Form: LAPR7780	Development Environment	Page: 1
User: JSCOT	NSW Building Professionals Board Extract Exception Report	29-Mar-2019 11:42:27
Reprint: 01-Apr-2019 08:56:18	NSW BPB Test	

Application	Type	Error
33/2010/AT1/1	CC	Plan Number not found. CC application 33/2010/AT1/1 not extracted.
33/2010/AT1/1	CC	Surveyor not found. CC application 33/2010/AT1/1 not extracted.
33/2010/AT1/1	CC	Surveyor Accreditation Number not found. CC application 33/2010/AT1/1 not extracted.
33/2010/AT1/1	CC	Surveyor Accreditation Category not found. CC application 33/2010/AT1/1 not extracted.
Total: 4		

--- End of Report ---

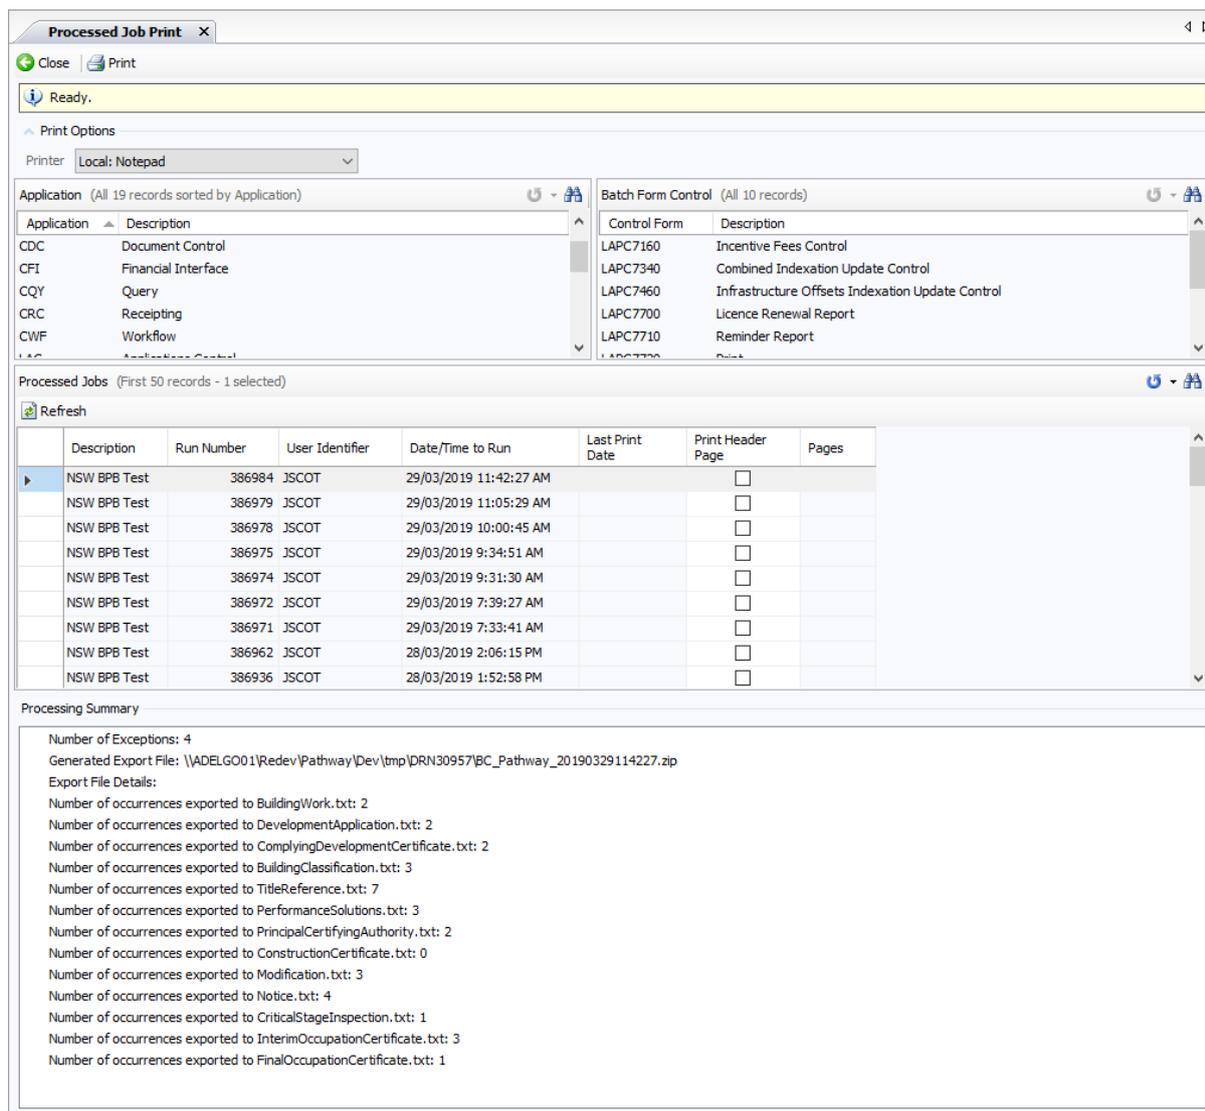

An extract report is also produced detailing the CC and CDC applications extracted.

User: JSCOT	NSW Building Professionals Board Extract Report	29-Mar-2019 11:42:27
Reprint: 01-Apr-2019 08:56:17	NSW BPB Test	

Application	Type	Message
580/2017/JLS/0	CDC	Extracted. CDC application 580/2017/JLS/0 not extracted.
584/2017/JLS/0	CDC	Extracted. CDC application 584/2017/JLS/0 not extracted.
Total: 2		

--- End of Report ---

The processing summary of each batch job run lists the number of records exported to each file.

LRPAPA0 – NSW BPB Building Work

Output file: BuildingWork.txt

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
SITENAME	Site_Name	A name for the building work. This can be a formal name, a nickname, or reference number.	Formatted Application Number
SITEADDR	Site_Address	Site Address	Formatted Primary Location
SUBURB	Suburb	Site Address Suburb	Suburb from Primary Location
POSTCODE	Postcode	Postcode from the Site Address	Postcode from Primary Location
LATITUDE	Latitude	Latitude of the Site	No data captured against this field.
LONGITUDE	Longitude	Longitude of the Site	No data captured against this field.
CURRENTLGA	Current_LGA	Current responsible local government area.	Description field from Municipality Code selected in the parameters for the Application Class.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CONTYPE	Consent_Type	Type of development consent (DA or CDC pathway)	If the Application Class is CDC then "Complying Development Certificate (CDC) Else Development Application (DA).
OWNERNAME	Owner_Name	Full name of the owner of the land/property/premises.	Formatted name from the first owner name recorded on the Application Names form. IF the name has the "Private" then "PRIVATE NAME" is output.
TOTDEVCOST	Total_Development_Cost	Total estimated, or actual, cost of building work (dollar amount)	Nominated Application Dimension Type selected in the parameters for the Application Class.
COMMDATE	Commencement_Date	Building work commencement date	Work Commenced Date sourced from the Application Data maintenance form.
INTLANDUSE	Intended_Land_Use	e.g. Residential, Non-Residential, Mixed Use	Data held in an Answer record. Question is selected in the parameters for the Application Class. This Question must be of a Type of Values. The Answer Description will be selected to appear on the report. E.g. R Residential NR Non-residential MLU Mixed Land Use
NUMSTOREYS	Storeys	Number of storeys both above and below ground.	The number of stories from the first listed Building Classification and its first listed Building Type.
GREXFLOOR	Gross_Existing_Floor_Area	The total floor area of the existing building measured in m2	Extract the Dimension value against the first listed Building Classification. The Dimension Type will be nominated in the parameters for the Application Class.
GRNEWFLOOR	Gross_New_Floor_Area	The total floor area of the new building measured in m2	Populated with the total of the field Floor Area for all Building Classifications and Building Types.
GRSITEAREA	Gross_Site_Area_Metres	The total size of the block of land the new building will be situated on in m2	Total Area of all Current Properties that are linked to the Application. If the Area is not found on the Properties, then the Area will be summed from the Parcels.

The following fields are only populated where the "Intended_Land_Use" is either "Residential" or "Mixed Land Use"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
EXISTDWELL	Pre_Existing_Dwellings	The number of existing dwellings on the site prior to commencement of work	Populated from the existing field Pre-existing Dwellings on the Building Classification and Building Type Maintenance form for the first Building Classification and Building Type on the application.
DEMDWELL	To_Be_Demolished_Dwellings	The number of existing dwellings to be demolished on the site prior to commencement of work	Populated from the Demolish Dwellings field on the Building Classification and Building Type Maintenance form for the first Building Classification and Building Type on the application.
NEWDWELL	New_Dwellings	The number of new dwellings to be created	Populated from the Number of Units field on the Building Classification and Building Type Maintenance form for the first Building Classification and Building Type on the application.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
DETACHSTAT	Detached_Status	Is the residential building attached , detached (i.e. free standing) or semi-detached?	<p>Populated from the field ABS Detached Status on the Building Classification and Building Type Maintenance form for the first Building Classification and Building Type on the application.</p> <p>** IMPORTANT **</p> <p>Currently the Reference Data from BPB states that the following are allowed.</p> <p>Attachment Status</p> <p>Attached Detached (Free standing) Semi-Detached</p> <p>To cater for ABS requirements only the following values are allowed: A – Attached D – Detached</p> <p>Only these values will be used. No changes required to cater for Sem-Detached. If the value returned is D then output "Detached (Free standing).</p>
OCCUPYSTAT	Occupancy_Status	Is it a single or dual occupancy residential building	<p>Populated from the field Dual Occupancy on the Building Classification and Building Type Maintenance form for the first Building Classification and Building Type on the application</p> <p>If the flag is checked ON then the value is Dual. If the flag is checked OFF then the value is Single.</p>
BUILDERTYP	Builder_Type	Type of party undertaking the work.	<p>Compares all current Owner Names to the first listed Builder Name. If there is a match, then the Builder_Type = Owner-Builder</p> <p>Otherwise: Selects the 'first' listed name under the Principal Contractor Name Role. If there is an Information Type existing for the "Principal Contractor Licence Number" then the Builder_Type = Principal Contractor – Licensed ELSE Builder_Type = Principal Contractor - Unlicensed</p>
CONTLICNUM	Contractor_Licence_Number		<p>If Builder_Type = Owner-Builder then extract the 'first' name against the Builder Name Role. Locate the Information Type nominated in the parameters for Builder Licence Number.</p> <p>----- If Builder_Type = Principal Contractor – Licensed the extract locate the 'first' name against the Principal Contractor Name Role. Then... Locate the Information Type nominated in the parameters for Principal Contractor Licence Number.</p>
CONTLICNAM	Contractor_Licencee_Name		No data captured against this field.
CONTCOMNAM	Contractor_Company_Name		No data captured against this field.
CONTABN	Contractor_ABN		No data captured against this field.

The following fields are only populated where the Builder_Type is Principal Contractor – Unlicensed.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CONTFULNAM	Contractor_Full_Name	Principal contractor's Full Name	Formatted Name from the first name against the Contractor Name Role.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CONTEMAIL	Contractor_Email	Principal contractor's e-mail address	The first E-mail address for the Communication Type selected in the parameters for the Application Class. If there is no data, then 'unknown@example.com'.
CONTPHONE	Contractor_Phone	Principal contractor's phone number.	The first Phone Number for the Communication Type selected in the parameters for the Application Class. If there is no data, then 999999999.
CONTSUBURB	Contractor_Suburb	Suburb of the Principal contractor's place of business.	Suburb from the Mailing Address of the first name against the Principal Contractor Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CONTPOSTCD	Contractor_Postcode	Postcode of the principal contractor's place of business	Postcode from the Mailing Address of the first name against the Principal Contractor Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'

LRPAPA1 – NSW BPB Development Application

Output file: DevelopmentApplication.txt

This table will be populated from the related applications against and CC or CDC Applications where the Application Type matches one of those selected in the NSW Building Professional Board Extract Parameters with a Class Type = Development Application (DA).

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
APPNNUMB	Number	Development application number	Formatted Application Number of the DA
ISSUEDATE	Issue_Date	Date when the DA was issued	Decision Date from the latest Decision, Decision Type nominated in the parameters for the Application Class.
ISSUERTYPE	Issuer_Type	The Type of Authority that issued the DA.	Authority Type mapped from the latest Decision, Decision Type nominated in the parameters for the Application Class.
ISSUINGLGA	Issuing_LGA	The name of the LGA that issued the DA	Description field from Municipality Code selected in the parameters for the Application Class.

LRPAPA2 – NSW BPB Complying Development Certificate

Output file: ComplyingDevelopmentCertificate.txt

This table is applicable where the Class Type = Complying Development Certificate (CDC) and the Application Type matches one of those selected in the NSW Building Professional Board Extract Parameters.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
APPNNUMB	Number	Development application number	Formatted Application Number
ISSUEDATE	Issue_Date	Date that the CDC was issued	Decision Date from the latest Decision, Decision Type nominated in the parameters for the Application Class.
APNTTYPE	Applicant_Type	The type of party that applied for the CDC (i.e. Owner or Owner's Agent)	Compares all current Owner Names to the first listed Applicant Name. If there is a name match, then Applicant_Type = Owner ELSE Owner's Agent

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
APNTNAME	Applicant_Name	The name of the party that applied for the CDC. Either the name of the owner, or the name of the owner's agent (i.e. the party acting on the owner's behalf)	Formatted Name from the first current Applicant Name.

The following fields are only populated where the Applicant_Type is "Owner's Agent".

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
APNTORG	Applicant_Organisation	If the owner's agent is a company, the name of the company	No data captured against this field.
APNTORGABN	Applicant_Organisation_ABN	If the owner's agent is a company, the ABN of the company	No data captured against this field.
ISSUERTYPE	Issuer_Type	The type of authority that issued the CDC	Authority Type mapped from the latest Decision, Decision Type nominated in the parameters for the Application Class.
ISSUERNAME	Issuer_Name	The name of the Authority that issued the CDC	Description field from Municipality Code selected in the parameters for the Application Class.

The following fields are only populated where the Issuer_Type is "Private Certifier"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for Private Certifier Accreditation Number. If no value, then output 'unknown'
CERTEMPLOY	Certifier_Employer	Name of the employer of the private certifier that issued CDC	The Formatted Name of the first listed Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPABN	Certifier_Employer_ABN	ABN of the employer of the private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for the Principal Certifying Employer ABN. If no value, then output 'unknown'
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of the employer of the private certifier that issued CDC	Suburb from the Mailing Address of the first name against the Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of the employer of the private certifier that issued CDC	The Postcode of the Mailing Address for the first name against the Principal Certifying Authority Name Role. If no value, then output 'unknown'

LRPAPA3 – NSW BPB Building Classification

Output file: Comp BuildingClassification.txt

This table is populated with ALL Building Classifications recorded against each Application.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
BUILDCLASS	BuildingClassification	An applicable building classification	Populated with the Building Classification Code.

LRPAPA4 – NSW BPB Title Reference

Output file: TitleReference.txt

This table is populated with ALL Parcels linked to the Application. Data will be repeated for each Parcel linked.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
DPNUMBER	DP_Number	DP Number	Plan Number for each current Parcel linked to the Application. If the Property is linked to the Application, then we will 'drill down' to the Parcel details.
LOTNUMBER	Lot_Number	Lot Number	Parcel Number for each current Parcel linked to the Application. If the Property is linked to the Application, then we will 'drill down' to the Parcel details.
SECTNUMBER	Section_Number	Section Number	Section Number for each current Parcel linked to the Application. If the Property is linked to the Application, then we will 'drill down' to the Parcel details.

LRPAPA5 – NSW BPB Performance Solutions

Output file: PerformanceSolutions.txt

This table will capture records relating to the National Construction Code.

These are recorded in a Questionnaire against the Major Development Category selected in the NSW Building Professional Board Extract Parameters. Multiple Values may be provided, and all will be reported.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
NATCONCODE	NCC_Code	Performance solution code (NOTE: It's only the Code that is required; not the Volume and/or Description)	Answer extracted from the Major Development Category Question matching the National Construction Code question selected in the parameters for the Application Class.

LRPAPA6 – NSW BPB Principal Certifying Authority

Output file: PrincipalCertifyingAuthority.txt

Details of the Principal Certifying Authority associated with a building work.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
FULLNAME	Full_Name	Full name of the certifier (surveyor) acting as the principal certifying authority, e.g. "Mark Smith"	The Given Names and Surname of the first name against the Surveyor Name Role selected in the parameters for the Application Class. Extracts Given Names and Surname. NOT the Formatted Name.
ACCREDNUM	Accreditation_Number	Certifier's accreditation number from the Business Professionals Board	The contents of the first listed Information Type that has been nominated in the parameters for the Surveyor Accreditation Number.
ACCREDCAT	Accreditation_Category	The highest accreditation category held by the certifier	The contents of the first listed Information Type that has been nominated in the parameters for the Surveyor Accreditation Category. Valid Values: A1, A2, A3

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
ACCREDEXP	Accreditation_Expiry	Expiry Date of the certifier's accreditation	No data captured against this field.
EMAILADDR	Email_Address	Certifiers E-mail Address	No data captured against this field.
EMPLOYNAME	Employer_Name	Name of the employer of the certifier. This can be a private company or the name of a council.	No data captured against this field.
EMPLOYABN	Employer_ABN	ABN of the employer of the certifier	No data captured against this field.
EMPLOYSUB	Employer_Suburb	Suburb of the place of business of the certifier's employer	No data captured against this field.
EMPLOYPOS	Employer_Postcode	postcode of the place of business of the certifier's employer	No data captured against this field.
APPMNTDATE	Appointment_Date	Date when PCA was appointed	No data captured against this field.
REPMNTDATE	Replacement_Date	Date when PCA was replaced i.e. when the PCA stopped work (if applicable)	No data captured against this field.

LRPAPA7 – NSW BPB Construction Certificate

Output file: ConstructionCertificate.txt

This table is applicable where the Class Type = Construction Certificate (CC) and the Application Type matches one of those selected in the NSW Building Professional Board Extract Parameters.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
APPNUMB	Site_Name	A name for the building work.	Formatted Application Number
DATEISSUED	Date	Latest Decision Date	Decision Date from the latest Decision, Decision Type nominated in the parameters for the Application Class.
APNTTYPE	Applicant_Type	The type of party that applied for the CC (i.e. Owner or Owner's Agent)	Compare all current Owner Names to the first listed Applicant Name. If there is a name match, then Applicant_Type = Owner ELSE Owner's Agent
APNTNAME	Applicant_Name	The name of the party that applied for the CC. Either the name of the owner, or the name of the owner's agent (i.e. the party acting on the owner's behalf)	Formatted Name from the first current Applicant Name.
APNTORG	Applicant_Organisation	If the owner's agent is a company, the name of the company	No data captured against this field.
APNTORGABN	Applicant_Organisation_ABN	If the owner's agent is a company, the ABN of the company	No data captured against this field.
ISSUERTYPE	Issuer_Type	The type of authority that issued the CC	Authority Type mapped from the latest Decision, Decision Type nominated in the parameters for the Application Class.
ISSUEDBY	Issued_By		Description field from Municipality Code selected on the Application.

The following fields are only populated where the Issuer_Type is "Private Certifier"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for Private Certifier Accreditation Number. If no value, then output 'unknown'
CERTEMPNAM	Certifier_Employer	Name of the employer of the private certifier that issued CDC	The Formatted Name of the first listed Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPABN	Certifier_Employer_ABN	ABN of the employer of the private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for the Principal Certifying Employer ABN. If no value, then output 'unknown'
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of the employer of the private certifier that issued CDC	Suburb from the Mailing Address of the first name against the Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of the employer of the private certifier that issued CDC	The Postcode of the Mailing Address for the first name against the Principal Certifying Authority Name Role. If no value, then output 'unknown'

LRPAPA8 – NSW BPB Modification

Output file: Modification.txt

This tab will be populated with data from “Amended” DA and CDC Applications only. i.e. where the Amendment component of the Application Number contains a letter.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
APPNUMB	Number	The Modification number... Modified Development Application (DA) number or Modified Complying Development Certificate (CDC) number	Formatted Application Number (including the Amendment letter)
DATEISSUED	Date_Issued	Date when the modification was issued.	Decision Date from the latest Decision, Decision Type nominated in the parameters for the Application Class.
APNTTYPE	Applicant_Type	The type of party that applied for the Modification (i.e. Owner or Owner's Agent)	Compare all current Owner Names to the first listed Applicant Name. If there is a name match then Applicant_Type = Owner ELSE Owner's Agent
APNTNAME	Applicant_Name	The name of the party that applied for the modification. Either the name of the owner, or the name of the owner's agent (i.e. the party acting on the owner's behalf)	Formatted Name from the first current Applicant Name.

The following fields are only populated where the Applicant_Type is "Owner's Agent"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
APNTORG	Applicant_Organisation	If the owner's agent is a company, the name of the company	No data captured against this field.
APNTORGABN	Applicant_Organisation_ABN	If the owner's agent is a company, the ABN of the company	No data captured against this field.
ISSUERTYPE	Issuer_Type	The type of authority that issued the modification. Must use the appropriate authority types for the consent authority of the building work.	Authority Type mapped from the latest Decision, Decision Type nominated in the parameters for the Application Class.
ISSUEDBY	Issued_By	The name of the Authority that issued the Modification	Description field from Municipality Code selected on the Application.

The following fields are only populated where the Issuer_Type is "Private Certifier"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for Private Certifier Accreditation Number. If no value, then output 'unknown'
CERTEMPNAM	Certifier_Employer	Name of the employer of the private certifier that issued CDC	The Formatted Name of the first listed Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPABN	Certifier_Employer_ABN	ABN of the employer of the private certifier that issued CDC	The contents of the first listed Information Type that has been nominated in the parameters for the Principal Certifying Employer ABN. If no value, then output 'unknown'
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of the employer of the private certifier that issued CDC	Suburb from the Mailing Address of the first name against the Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of the employer of the private certifier that issued CDC	The Postcode of the Mailing Address for the first name against the Principal Certifying Authority Name Role. If no value, then output 'unknown'

LRPAPA9 – NSW BPB Notice

Output file: Notice.txt

Each instance of an issued document will be reported.

Only Letters matching a Merge Types selected in the parameters for the Application Class will be processed. Letters must also have been issued, i.e. letters must have been printed or e-mailed.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
SERVEDON	Served_On	Identifies the name of person on whom the notice was served	Consider the first Name linked to the document. IF The name is an Owner AND a Builder then "Owner-Builder" IF The name is an Owner and NOT a Builder then "Owner" IF The name is recorded as a Principal Contractor Name Role (as defined in the Control Form) AND If there is an Information Type existing for the "Principal Contractor Licence Number" then "Principal Contractor – Licensed" IF The name is recorded as a Principal Contractor Name Role (as defined in the Control Form) AND If there is NO Information Type existing for the "Principal Contractor Licence Number" then "Principal Contractor – Unlicensed"
DATEISSUED	Date_Issued	The date the notice was issued.	The date the document was printed or e-mailed, whichever is greater.

LRPAPB0 – NSW BPB Critical Stage Inspection

Output file: CriticalStageInspection.txt

Each instance of an inspection will be reported.

Only Inspections matching one of the Inspection Types and Inspection Results selected in the parameters for the Application Class will be processed.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
INSPSTAGE	Stage	At which critical stage was this inspection performed?	Critical Stage Inspection mapped to the Inspection Type selected in the parameters for the Application Class.
INSPDATE	Inspection_Date		Inspection Date
INSPRESULT	Result	Result of the Inspection	Critical Stage Inspection Result mapped to the Inspection Result selected in the parameters for the Application Class.
CERTNAME	Certifier_Name	Name of the certifier who performed the inspection	Employee User Name from the user linked to the Inspection.
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of the certifier that performed the inspection	User must be set up in NAR. The contents of the first listed Information Type that has been nominated in the parameters for the Employee Accreditation.
CERTEMPNAM	Certifier_Employer_Name	Employer of issuing certifier (i.e. Company/Council Name)	No data captured against this field.
CERTEMPABN	Certifier_Employer_ABN	ABN of employer of issuing certifier (i.e. Company/Council ABN)	No data captured against this field.
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of place of business of employer of inspecting certifier	No data captured against this field.
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of place of business of employer of inspecting certifier	No data captured against this field.

LRPAPB1 – NSW BPB Interim Occupation Certificate

Output file: InterimOccupationCertificate.txt

Each instance of an issued permit and certificate will be reported.

Only permit and certificate with a document matching an Interim Occupation Certificate Merge Types selected in the parameters for the Application Class will be processed.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
CERTNUMBER	Certificate_Number	Interim occupation certificate number	The Certificate Number from the Permit & Certificate record on the Application. Number and Year E.g. 4/2012
DATEISSUED	Date_Issued	When was the interim occupation certificate issued?	IF The issuer type is Local Council (LGA) then use the date the document was printed or e-mailed, whichever is greater. ELSE IF the issuer type is Private Certifier then use the Date Issued on the Permit & Certificate record.
APPLDATE	Application_Date	When was the occupation certificate application received?	No data to be captured against this field.
APPLTYPE	Applicant_Type	Who applied for the interim occupation certificate	Consider the first Name linked to the document. IF The name is an Owner on the Application then "Owner" Else IF not Owner OR no document exists then "Owner's Agent"
APNTNAME	Applicant_Name	The name of the party that applied for the interim occupation certificate. Either the name of the owner, or the name of the owner's agent (i.e. the party acting on the owner's behalf)	No data to be captured against this field.
APNTORG	Applicant_Organisation	If the owner's agent is a company, the name of the company	No data to be captured against this field.
APNTORGABN	Applicant_Organisation_ABN	If the owner's agent is a company, the ABN of the company	No data to be captured against this field.
ISSUERTYPE	Issuer_Type	The type of party that issued the interim occupation certificate	Occupation Certificate Issuer Type mapped to the Interim Occupation Certificate Merge Type in the Application Class.
ISSUEDBY	Issued_By	Current LGA name	Description field from Municipality Code selected on the Application.

The following fields are only populated where the Issuer_Type is "Private Certifier"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of private certifier that issued the interim occupancy certificate	The contents of the first listed Information Type that has been nominated in the parameters for Private Certifier Accreditation Number. If no value, then output 'unknown'
CERTNAME	Certifier_Name	The Full Name of the issuing certifier	Same as Certifier_Employer_Name.
CERTEMPABN	Certifier_Employer_ABN	ABN of employer of issuing certifier (i.e. Company/Council ABN)	The contents of the first listed Information Type that has been nominated in the parameters for the Principal Certifying Employer ABN. If no value, then output 'unknown'

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTEMPNAM	Certifier_Employer_Name	Employer of issuing certifier (i.e. Company/Council Name)	The Formatted Name of the first listed Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of the employer of the private certifier that issued CDC	Output the Suburb of the Mailing Address for the 'first' listed Interim Occupation Certificate Certifier Employer
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of the employer of the private certifier that issued CDC	Output the Postcode of the Mailing Address for the 'first' listed Interim Occupation Certificate Certifier Employer.

LRPAPB2 – NSW BPB Interim Occupation Certificate

Output file: InterimOccupationCertificate.txt

Only the first Instance of an issued permit and certificate will be reported.

Only permit and certificate with a document matching a Final Occupation Certificate Merge Types selected in the parameters for the Application Class will be processed.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
WORKID	Work_Identifier	Unique identifier for each Application.	ABS code + Underscore + formatted application number. The ABS Code from the Municipality Code record selected in the parameters for the Application Class.
CERTNUMBER	Certificate_Number	Interim occupation certificate number	The Certificate Number from the Permit & Certificate record on the Application. Number and Year E.g. 4/2012
DATEISSUED	Date_Issued	When was the final occupation certificate issued?	IF The issuer type is Local Council (LGA) then use the date the document was printed or e-mailed, whichever is greater. ELSE IF the issuer type is Private Certifier then use the Date Issued on the Permit & Certificate record.
APPLDATE	Application_Date	When was the occupation certificate application received?	No data to be captured against this field.
APPLTYPE	Applicant_Type	Who applied for the final occupation certificate	Consider the first Name linked to the document. IF The name is an Owner on the Application then "Owner" Else IF not Owner OR no document exists then "Owner's Agent"
APNTNAME	Applicant_Name	The name of the party that applied for the final occupation certificate. Either the name of the owner, or the name of the owner's agent (i.e. the party acting on the owner's behalf)	No data to be captured against this field.
APNTORG	Applicant_Organisation	If the owner's agent is a company, the name of the company	No data to be captured against this field.
APNTORGABN	Applicant_Organisation_ABN	If the owner's agent is a company, the ABN of the company	No data to be captured against this field.

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
ISSUERTYPE	Issuer_Type	The type of party that issued the interim occupation certificate	Occupation Certificate Issuer Type mapped to the Final Occupation Certificate Merge Type in the Application Class.
ISSUEDBY	Issued_By	Current LGA name	Description field from Municipality Code selected on the Application.

The following fields are only populated where the Issuer_Type is "Private Certifier"

FIELD NAME	BPB FIELD NAME	DESCRIPTION	DATA SOURCE & PROCESSING RULES
CERTACCNUM	Certifier_Accreditation_Number	Accreditation number of private certifier that issued the final occupancy certificate	The contents of the first listed Information Type that has been nominated in the parameters for Private Certifier Accreditation Number. If no value, then output 'unknown'
CERTNAME	Certifier_Name	The Full Name of the issuing certifier	Same as Certifier_Employer_Name.
CERTEMPABN	Certifier_Employer_ABN	ABN of employer of issuing certifier (i.e. Company/Council ABN)	The contents of the first listed Information Type that has been nominated in the parameters for the Principal Certifying Employer ABN. If no value, then output 'unknown'
CERTEMPNAM	Certifier_Employer_Name	Employer of issuing certifier (i.e. Company/Council Name)	The Formatted Name of the first listed Principal Certifying Authority Name Role selected in the parameters for the Application Class. If no value, then output 'unknown'
CERTEMPSUB	Certifier_Employer_Suburb	Suburb of the employer of the private certifier that issued CDC	Output the Suburb of the Mailing Address for the 'first' listed Final Occupation Certificate Certifier Employer
CERTEMPPOS	Certifier_Employer_Postcode	Postcode of the employer of the private certifier that issued CDC	Output the Postcode of the Mailing Address for the 'first' listed Final Occupation Certificate Certifier Employer.

Statement Print

InforXtreme Incident: COGC 11613577; THICK CLIENT;	DRN: 30988 KB:	Fix:
--	-------------------	------

STATEMENT PRINT CONTROL

An enhancement has been made to the Statement Print. It is now possible to produce a 'Statements Printed Report' which lists Statements that were printed (or that were extracted for export). This new report will be produced if the new 'Statements Printed Report' check box on the control form is turned on. The new report is in the same format as the existing 'Statements not Printed Report'.

ePathway System

Enhancements

Property Search

InforXtreme Incident: COGC 11060178; SMART AND THICK CLIENT;	DRN: 30726 KB:	Fix:
--	-------------------	------

PROPERTY SEARCH GRID HEADER TEXT

It is now possible to set the column headers for some of the previously unconfigurable header columns for the Property Search results grid data shown when selecting property/addresses via the various ePathway lodgement forms (E.g. When lodging an Application).

By default their values will remain blank, but sites wanting to define the column headers can do so by logging into the ePathway application as Admin and setting the value of the following text codes via the Layout >> Text menu:

- PropertySearch.SummaryLinkHeader
- PropertySearch.GISLinkHeader
- PropertySearch.Selection1Header
- PropertySearch.Selection2Header

Reconciliation Report

InforXtreme Incident: PARA 11578778;	DRN: 31229 KB:	Fix:
---	-------------------	------

RECONCILIATION REPORT FORMATTING

The emailed Reconciliation Report is now formatted in a more readable way.

Payments

InforXtreme Incident: COGC 12763022;	DRN: 31271 KB:	Fix:
---	-------------------	------

ADVAM WEBBANK TIMEOUT PARAMETER

Advam have introduced a Timeout parameter which can be used to limit the time their payment page will remain open. This should eliminate payment failures caused by a user taking too long and the Session timing out.

BYLAWS – HARBOURMASTER FORMAT

A new BL3 infringement format has been created to allow the management of infringements issued by the Harbourmaster on the waters of Auckland.

Changes for the new format have been made to the following areas within Pathway:

- Infringement Type Parameters
- Infringement Entry
- Infringement Maintenance
- Hand Held Data Upload
- Word Processing

Infringement Type Parameters

Offence Type Parameter

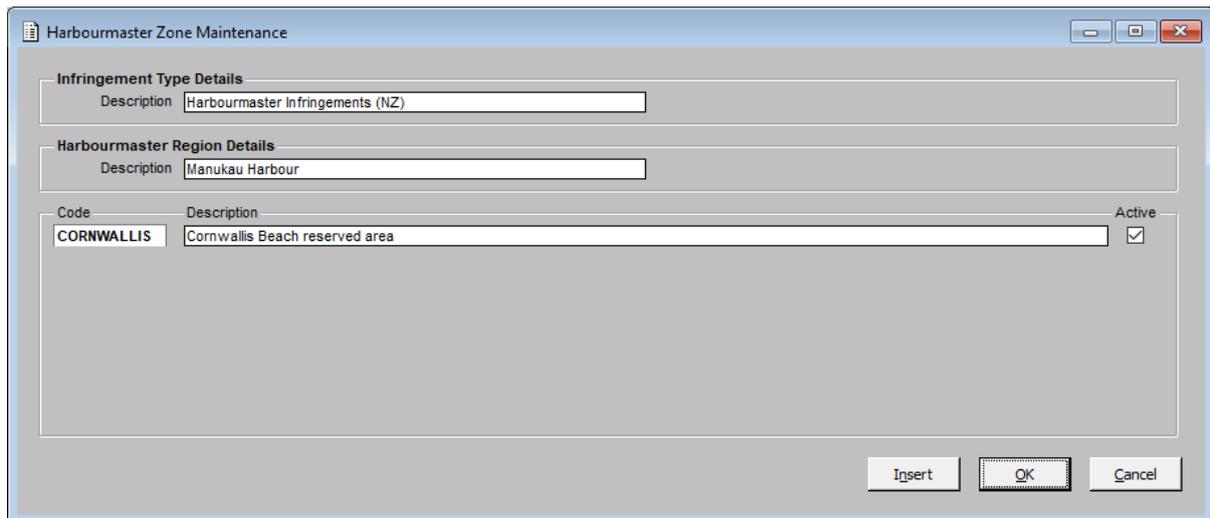

The following changes have been made to the Offence Type Maintenance form:

- The length of the description field has been increased from 50 to 100 characters.
- A new Provision field has been added for the BL3 Infringement format.
- A new Provision Description field has been added for the BL3 Infringement format.
- A new Additional Text 2 field has been added for the BL3 Infringement format.

Harbourmaster Region Parameter

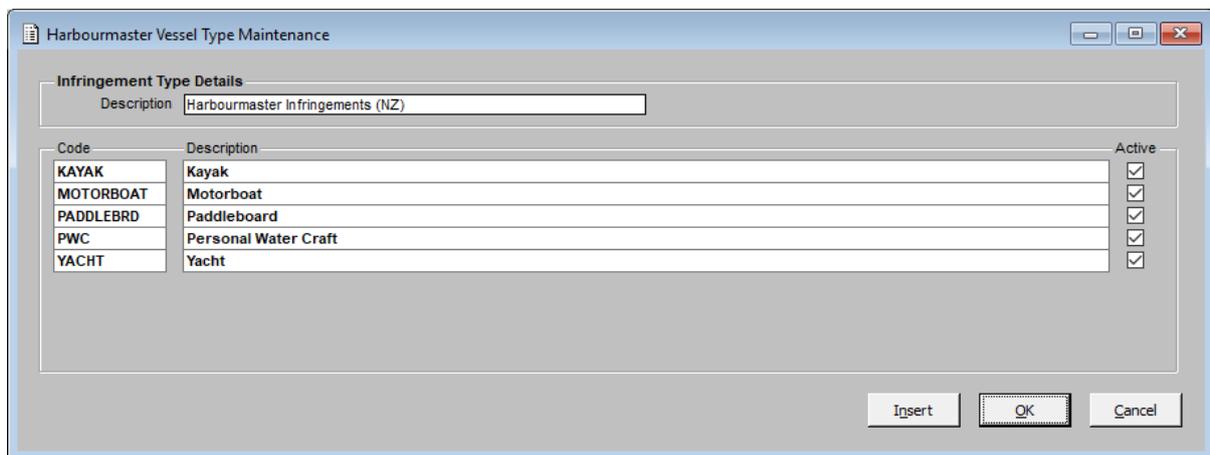

A new parameter has been added to allow the harbourmaster regions to be defined.

For each Harbourmaster Region, zones can be defined.

Harbourmaster Vessel Type Parameter

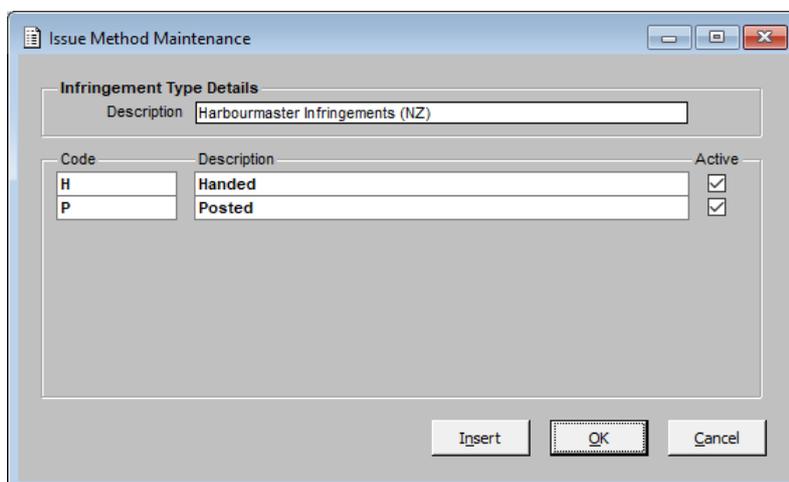

A new parameter has been added to allow vessel types to be defined.

A vessel type with the code 'PWC' must be created here and selected on the Infringement Entry/Maintenance form before the PWC Registration field can be maintained.

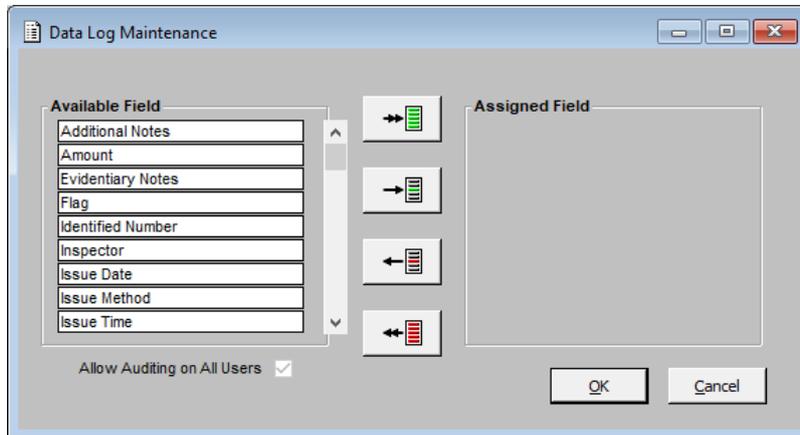

Issue Method Parameter

A new parameter has been added to allow infringement issue methods to be defined.

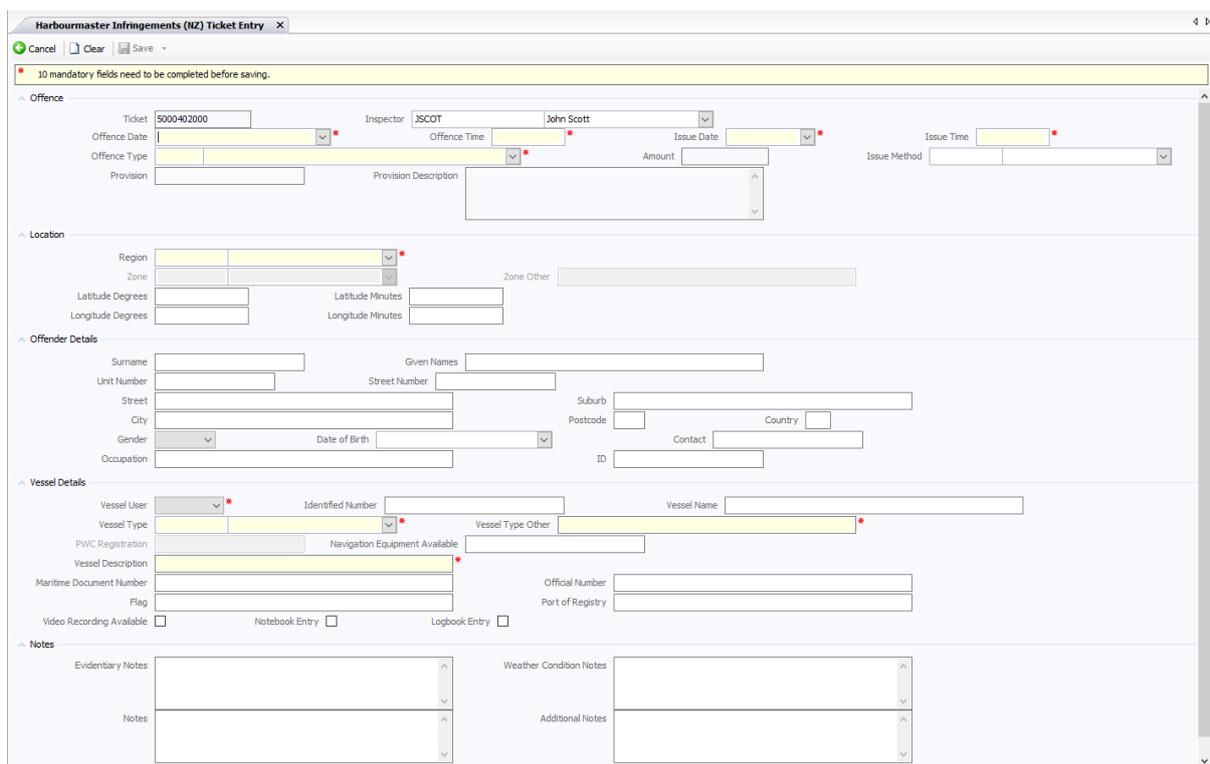

Data Logging Parameter

Data logging fields have been added for each field on the new Harbourmaster Infringement Maintenance form. These fields can be selected to log changes made on Harbourmaster Infringement Maintenance form, each change will be recorded within the Infringement History.

Infringement Entry

A new Infringement Entry form has been created for the new BL3 infringement format.

Zone and Zone Other

Once a region is entered, Zone and Zone Other becomes available.

Although both are highlighted as mandatory, only a Zone

Region: MANUKAU Manukau Harbour
 Zone: CORNWALLIS Cornwallis Beach reserved area
 Zone Other:

or Zone Other is required.

Region: MANUKAU Manukau Harbour

LETTER EXTRACT TYPE

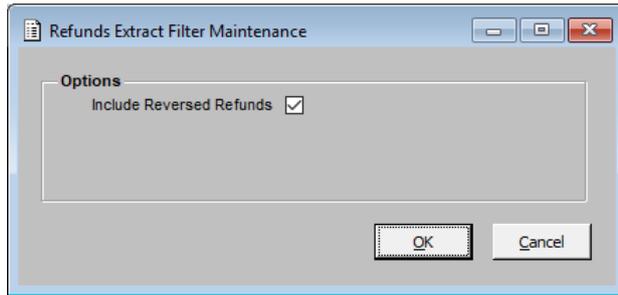

A new Refunds extract list type has been added to allow the extraction of refunds for a Licence.

The screenshot shows the 'Extract Type Maintenance' dialog box. The 'Extract List Type' field is highlighted with a red box and contains the text 'REFUNDS'. The 'Associated Extract Types' field contains the text 'Refunds'. The 'Filter Options' section includes a dropdown for 'Status' set to '(none)', and three fields for 'Application Class', 'Consent Code', and 'Memo type'. The 'Document Options' section includes three checkboxes: 'Include List' (checked), 'Include Yes/No documents' (unchecked), and 'Include Static Text Document' (unchecked). Each checkbox has associated input fields and buttons.

The Refunds extract list type allows the following details to be extracted for each refund attached to a Licence:

- Refund Date
- Refund Amount
- Refund Name
- Refund Address
- Refund Narrative
- Reversal Date
- Reversal Narrative

Pressing the Additional Filter button on the Refunds extract list type will display the Refunds Extract Filter Maintenance form.

The Refunds Extract Filter Maintenance form has the following options:

- Include Reversed Refunds – Determines whether refunds that have been reversed are extracted or ignored.

Rates Accounting

Enhancements

Rates Generation Selection

InforXtreme Incident: COGC 13371214; SMART AND THICK CLIENT;	DRN: 31291 KB:	Fix: 03107303;
--	-------------------	----------------

RATES GENERATION UPDATE CONTROL

A modification has been made to the Rates Generation Update. Previously, if the Posting Period Allocation Method (in the Rates System Parameters) was set to 'Generation Run Notice Date and Transaction Effective Date' the date that the transaction was posted was used to determine the Ledger Posting Period for any Actual Discount transactions created by the Rates Generation Update. This has now been corrected so that the Generation Run Notice Date is used instead.

Note that the Rates Generation Update only creates Actual Discount in the situation where an Assessment already has a large enough credit balance present prior to the generation of rates.

New Payment

InforXtreme Incident: COGC 12474750;	DRN: 31060 KB:	Fix:
---	-------------------	------

PAYMENT MINIMUM AMOUNT

In order to enforce a minimum payment amount (by payment type) in CityWatch councils may insert the following code into the..\\Web\Mobility\CityWatch\User.Pathway.MobileComputing.CityWatch.js file:

```
//-----
$(document).on('pageinit', '#findPaymentPage', function (e, data) {
    $('#findPaymentPage #amount').blur(function () {
        //If current payment type is an infringement, set minimum payment amount to $60
        if ($('#findPaymentPage #receiptingModuleCode').val() == 'IF') {
            var amt = $(this).val();
            if ($.isNumeric(amt)) {
                if (amt < 60) {
                    showPopup('Invalid Amount', 'Please provide an amount greater than $60');
                    $('#findPaymentPage #amount').val("");
                }
            }
        }
    });
});
//-----
```

Note: The above example will allow a council to enforce Infringements payments to be at least \$60.

Customising CityWatch Popup Messages

The text on CityWatch Popup messages can now be customised. This can be achieved by following the instructions below.

1. Copy the code below into your user.js file – this can be used as a template for your customisations:

```
// Customer can overwrite these messages by copying the following array declaration to
// their User.js file and making any changes they want
// Format: Title, Message, UniqueId
customMessages = new Array(
    // Applications.js
    ["No Results", "There were no applications returned for this search.", 1000],
    ["No Addresses", "The Map can not display as no addresses are recorded on the
applications", 1001],
    // Bookings.js
```

```
["Required Fields", "Not all the required fields are selected.", 2000],
["Booking", "At least one time must be booked to continue.", 2001],
["Unavailable", "The Booking Class selected is Debtors only and can only be booked
by registered users.\n", 2002],
["Required Fields", "Not all the required fields are completed.", 2003],
["No Facilities", "There are no facilities found.", 2004],
["No Addresses", "The Map can not display as no addresses are recorded on the
facilities", 2005],
["Error", "Unable to determine method of payment. Please contact council for
booking this facility.", 2006],
["No Addresses", "The Map can not display as no addresses are recorded on the
bookings", 2007],
["Connection", "Unable to connect to the server to store payment information",
2008],
["Error", "Error Saving image data", 2009],
// Camera.js
["Error", "The file is empty.", 3000],
["Error", "The file type is not supported.", 3001],
// Common.js

```

Please Note: This list is current as of the 3.10.014 Release. The CityWatch.js file will contain the latest version of this dataset at any given time. However, it is not necessary to copy the latest version to your user.js file unless there is a new message which you wish to customise (if CityWatch cannot find a match, it will continue to use the default text).

1. Make the necessary changes to the text in your user.js file (format= Title, Message, UniqueId)
2. Save the file

CityWatch popup messages should now display these new titles/messages.

Displaying HTML in PopUp messages

There is a new configurable option in the CityWatch Config.js file which when toggled ON, allows HTML to be displayed in CityWatch popup messages:

```
allowHTMLInPopups: false, // Allow HTML to be embedded in Popup messages
```

The customised messages (outlined above) can then include HTML and have it rendered on the popup message (for example, hyperlinks can now be used)

Licensing Enquiry

InforXtreme Incident: COGC 12535742; SMART AND THICK CLIENT;	DRN: 31160 KB:	Fix:
--	-------------------	------

LODGEMENT DATE NOW INCLUDED ON LICENSING ENQUIRIES

The Lodgement Date field is now available for selection on the CityWatch Preferences Maintenance screen under the 'Licensing' tab - on the Licences Enquiry Page, Licence Enquiry Page, My Licences page and My Licence page.

Payments

InforXtreme Incident: COGC 12544061;	DRN: 31161 KB:	Fix:
---	-------------------	------

UNDER/OVER PAYMENTS MESSAGE

When an under/over payment is made in CityWatch a message is now displayed if it has not been flagged to allow such payments.

Change Password

InforXtreme Incident: COGC 12714844;	DRN: 31167 KB:	Fix:
---	-------------------	------

NEW PASSWORD CANNOT BE SAME AS OLD ONE

On the CityWatch Change Password form it was previously allowing users to change their password to their current password.

Forgotten Password

InforXtreme Incident: COGC 11487305;	DRN: 31205	Fix:
---	------------	------

KB:

MORE COMPLEX FORGOTTEN PASSWORD

The password generated in the event of a forgotten password in CityWatch has been made more complex for security reasons.

Bookings

InforXtreme Incident: COGC

DRN: 31225

Fix:

KB:

CLEAR PASSWORD FIELDS

The fields on the Change Password form were not cleared when the form was closed.

Requests

InforXtreme Incident: COGC
12608522;
SMART AND THICK CLIENT;

DRN: 31255

Fix:

KB:

MODULE SOURCE FOR MOBILE REQUESTS

In some instances Requests generated as a result of actions performed in CityWatch were stamped with ePathway as the source module instead of Mobility.

E.g. When creating a new registered user.

The system has now been changed to ensure requests are now stamped with the source module as 'Mobile' when generated by an action initiated by CityWatch.

Similarly, Bookings created via CityWatch now have the source field value of 'Mobile' instead of 'ePathway'.

Valuations

Enhancements

Valuation Averaging calculation enhancements

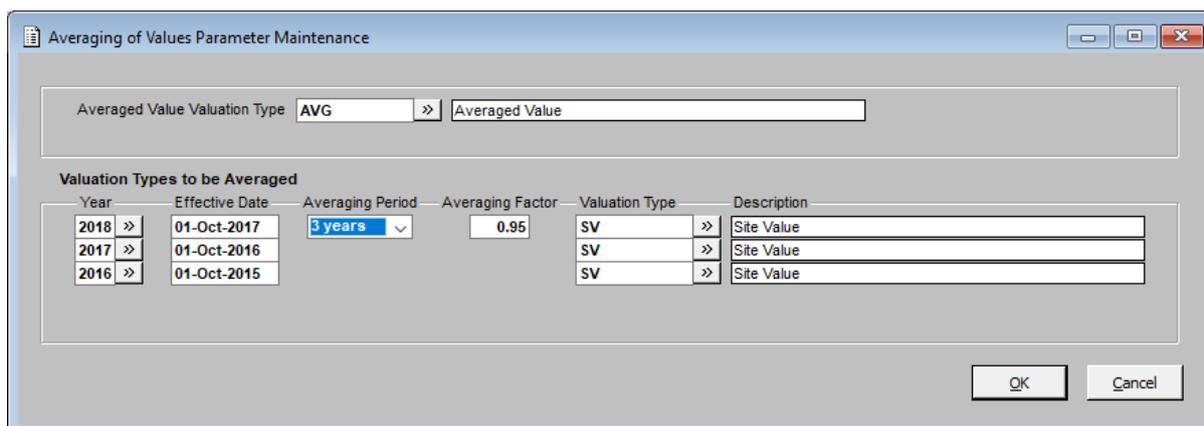

InforXtreme Incident: COGC DRN: 30870 Fix:
 11379772;
 SMART AND THICK CLIENT; KB:

Enhancements have been made to the Valuations module to allow the Averaging Period and the Averaging Factor to be nominated for each relevant Valuation Year.

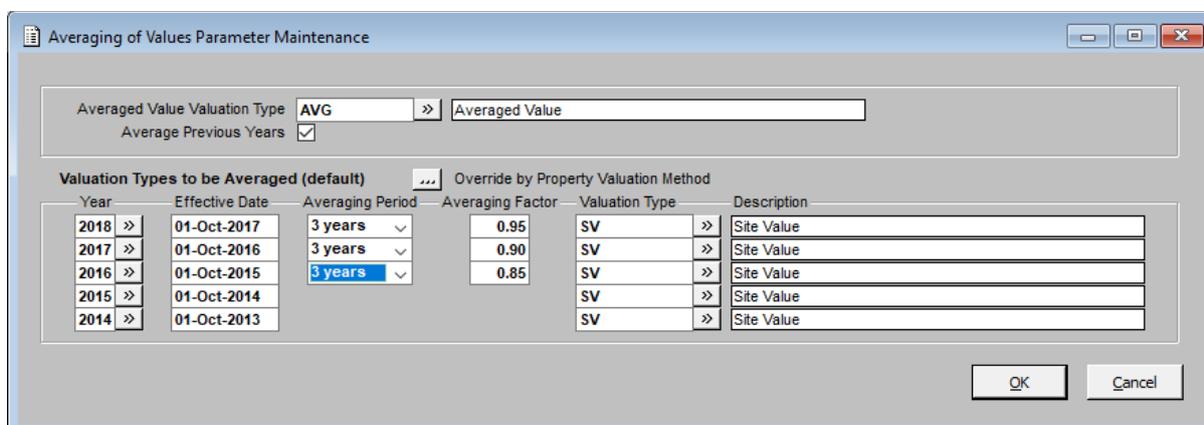

AVERAGING OF VALUES PARAMETER MAINTENANCE

This form is accessed from the Valuations>> Maintain System Parameters menu option, and then pressing the Averaging button.

For most sites the enhancements mean that the Averaging Period and Averaging Factor fields are shown against the latest Valuation Year as follows:

However, for Queensland sites that have the Average Previous Years parameter checked, Averaging Period and Averaging Factor fields are shown against the latest three Valuation Years as follows:

The value nominated for the third latest year dictates what subsequent years are shown. For example, if '2 years' are nominated then only one extra year row is shown:

Pressing the Override by Property Valuation Method button presents the Averaging Valuation Types Override Maintenance form which, likewise, only shows the relevant years.

VALUATION MAINTENANCE

Changes have been made to the Smart Client Valuation Maintenance function. When the Valuation Maintenance form is shown for a VG Number the Averaging Factor Applied column is shown if Value Averaging is being used. If a Valuation Type has been nominated in the Averaged Value Valuation Type field on the Averaging of Values Parameter Maintenance form then the Averaging Factor Applied column is shown, otherwise it is not shown. Previously the nomination of an Averaging Factor governed this.

VG NUMBER UPDATE

Changes have been made to this function, when it determines the values to be used when creating or updating a Supplementary Entry, to use the Averaging Periods and Averaging Factors that are now nominated against Valuation Years.

This change will only affect Gold Coast Council.
