# Introduction

This document describes the Fixes and Software Corrections made in Sprint 2024.02 of the Pathway ePathway and Pathway Smart Mobile software.

## **Included in this document are the following sections:**

### Online Help

This includes an overview of how to access Pathway Help.

### Modules

Each module that has undergone modifications is included in this documentation. The documentation is now contained in the following documents:

- Infor Pathway Sprint Notes 2024.02 Fixes and Software Corrections.pdf
- Infor Pathway Sprint Notes Summary 2024.02.xlsx

## Online Help

Help documents can be accessed from within the Pathway UX Client by going to My Account >> Help.

This will take you to the Infor Documentation page.

Click on the Title **Infor Pathway UX User and Administration Documentation Library (Cloud and On-Premises)**.

Help is split between Administrator and User Topics. Modules can be accessed from the Administrator and User headings.

## System - Functionality

### Application Parameters

Incident: UX Client	Work Item: 60262 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### CONDITION TYPE SELECTION

Condition Type Selection was not returning the expected results when attempting to add a Condition to a Consent.

### Document Management Product Parameters

Incident: UX Client	Work Item: 57821 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### EDMS MODULE META-DATA MAINTENANCE

Previously for the Property module, this form allowed a Field Name Override and Use in Titling to be switched on for the "Property Formatted Owners" in both the Folders Meta-Data and Document Meta-Data data-grid and this contravened the relevant advice in the GENCON SDK. Changing the parameter maintenance form for the property module now aligns with the SDK and all other modules.

### Workflow

Incident: UX Client	Work Item: 62753 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### EDMS PUBLISHING

A new Workflow action called EDMSPUB is available to all customers who are authorised to use the Document Management Base Functionality authorised function. It is available in all modules that have Workflow and are integrated with GENCON - Generic EDMS.

This is very similar to the existing PUBLISH action with the difference being the data for the business object (e.g. Property, Application etc.) is sent to the EDMS driver nominated in the GENCON parameters instead of a Data Publishing driver.

There is no need to nominate the driver in the user action parameters but there is the ability to include additional user-defined meta-data field values specific to the action if required. There is one additional consideration for this action, the GENCON parameters for the module and business object must have "Folder Creation Required" switched on for this action to be successful.

### Document Management Product Parameters

Incident: ERS 57693 UX Client	Work Item: 55883 KB:	Fix: ERS: 57693
----------------------------------	-------------------------	--------------------

#### ADDITIONAL META-DATA FIELDS NOW AVAILABLE

The following new meta-data fields have been added for Properties to provide details of Rates Assessments on the Property:

- Property Assessment Descriptions
- Property Assessment Keys
- Property Assessment Types

Additional details of these new fields are available in the updated Generic Connector SDK version 1.21 which is available on request.

**NOTE:** If these new fields are implemented in an EDMS or Data Publishing driver that targets V1\_21 of the GENCON SDK then it will require the Pathway environment into which that driver is deployed to be at Sprint release 2024.02 (or later).

## Additional Document Management Product Parameters for optional Names Integration

Incident: UX Client	Work Item: 62835 KB:	Fix: ERS:
------------------------	-------------------------	--------------

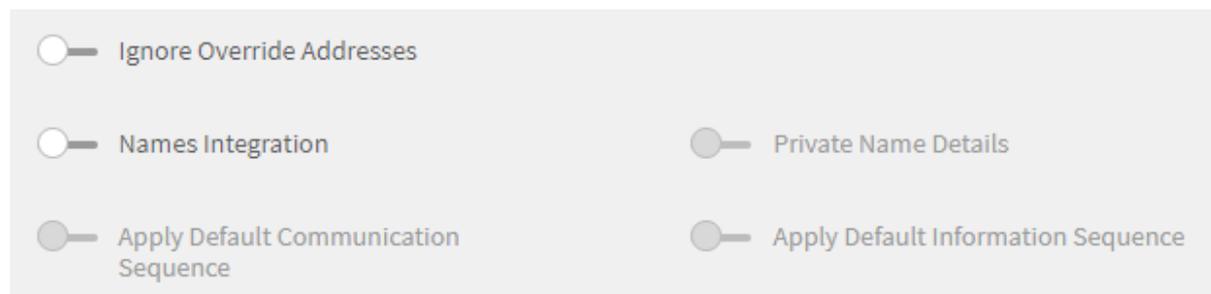

### EDMS PRODUCT PARAMETER MAINTENANCE

Three additional parameter settings have been added to the GENCON EDMS parameters for EDMS Driver Details and Core Data Publishing Driver Details:

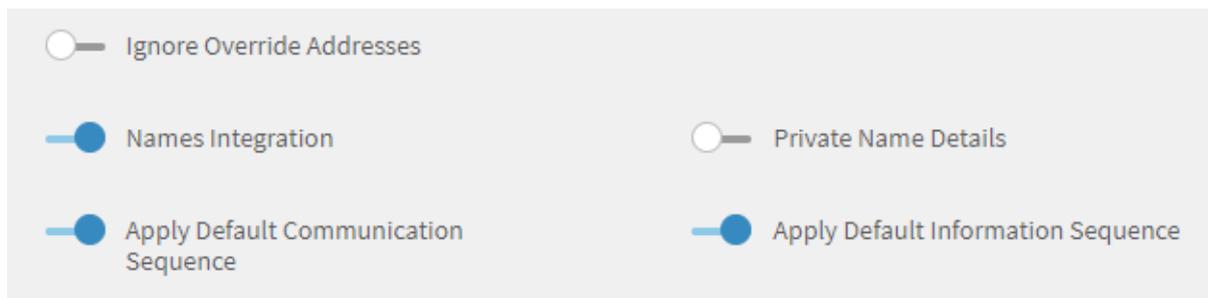

- Ignore Override Addresses
- Apply Default Communication Sequence – for use when a driver implements optional Names Integration
- Apply Default Information Sequence - for use when a driver implements optional Names Integration.

These new parameter settings can be set independently for the EDMS driver and Core Data Publishing driver.

The two new 'Apply Default' settings are disabled when Names Integration is switched off.

When Names Integration is switched on, the two new 'Apply Default' settings are enabled and can be switched on independently if required:

Currently without switching on the new "Ignore Override Addresses" parameter, the external driver receives address details of the role if an override name role address is specified otherwise the default address on the name is used (e.g. a specific address for the name as a Property Owner of a specific Property). If the external system needs to receive only the default address because it does not cater for role override addresses without modification, it is now possible to switch on the new "Ignore Override Addresses" parameter setting and the driver will only ever receive the default address.

When the optional Names Integration feature is on, the new "Apply Default Communication Sequence" parameter is switched off by default to maintain the existing order of Communication Type data received by the driver. The Communication Types are ordered by Communication Type description (e.g. "Mobile Phone Number" comes after "Home Phone Number"). This does not matter to a driver when there is only one recorded on the name. When there are multiple Communication Types recorded on a name the driver will not know which to choose if it needs to record only one of these in the external system. When the new "Apply Default Communication Sequence" parameter is switched on, the Communication Type data received by the driver will be in the default order defined on the name so the driver is able to accept the first one it receives for a given Communication Type as the one it should use because that is the preferred one for the name.

When the optional Names Integration feature is on, the new "Apply Default Information Sequence" parameter works the same way for Information Types defined on a name.

EDMS and Data Publishing drivers are now also able to always access default address details in addition to the existing role address for each name supplied in the meta-data. The drivers can be modified to process the default address or role address as required without any change to Pathway parameter settings.

Details of the changes are available in the updated Generic Connector SDK version 1.21 which is available on request.

**NOTE:** If these new mailing address and information/communication type features are implemented in an EDMS or Data Publishing driver that targets V1\_21 of the GENCON SDK then it will require the Pathway environment into which that driver is deployed to be at Sprint release 2024.02 (or later).

## Menu Maintenance

Incident: UX Client	Work Item: 60904 KB: IPSW 17268593	Fix: ERS:
------------------------	---------------------------------------	--------------

### CLIPBOARD

The clipboard Copy option will no longer clear the item, so the item can be copied multiple times.

# Animal Registration

## Animal Maintenance

Incident:  
UX Client

Work Item: 63047  
KB:

Fix:  
ERS:

### ANIMAL SUMMARY

Previously, the Analyse Results button did not display the Analyse Results form.

## Applications

### Application Maintenance

Incident: MELV 17060812 UX Client	Work Item: 60232 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

#### E-MAIL MESSAGE ENQUIRY

A correction has been made to E-mail Message Enquiry when accessed via the "E-mail History" option on the Application Summary. Previously, incorrect search results were displayed if a default profile had been logged via the unrelated System Administration >> System Parameters >> E-mail Message Enquiry menu option.

### Application Maintenance

Incident: UX Client	Work Item: 62296 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### STATUS HISTORY MAINTENANCE

Previously when a data-grid cell was selected in the To Date column and the Field Properties form option was clicked, an error was displayed in the pop-up form Field Properties. The Field Properties form is now correctly displayed.

### Application Maintenance

Incident: MELB 17879134 UX Client	Work Item: 62417 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

#### APPLICATION SUMMARY

A correction has been made to the Application Summary. Previously, the Property Certificates option was not present.

### Application Maintenance

Incident: SWAN 17837836 UX Client	Work Item: 62418 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

#### GIS

GIS navigation has been corrected from Location Maintenance within the Applications module.

### Application Fees Maintenance

Incident: UX Client	Work Item: 62907 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### FEES MAINTENANCE

The Reset and Reset Paid buttons have been corrected so that they enable correctly for the selected multiple fees. Previously they were only correct for the last selected fee.

## Application Maintenance

Incident: TOOW 18155953 UX Client	Work Item: 63060 KB: 2328212	Fix: ERS:
--------------------------------------	---------------------------------	--------------

### MAJOR DEVELOPMENT CATEGORIES MAINTENANCE

Previously when assigning a Major Development Category, the Category Type and Description in the data grid disappeared.

## Application Maintenance

Incident: LATR 18149364 UX Client	Work Item: 63096 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

### FEE PAYMENT ALLOCATION

Previously an error was occurring when navigating to the Fee Payment Allocation form while transferring a Receipt between Fees on an Application.

# Batch Processing

## Batch Processing

Incident: ACC 17725434  
UX Client

Work Item: 61961  
KB:

Fix:  
ERS:

### JOB STATISTICS

Job statistics are now collected for jobs completed in less than a second.

## Bookings Management

### Booking Class Parameter Maintenance

Incident: IPSW 17175627 UX Client	Work Item: 62464 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

When Booking Class Parameters are initially set up under Bookings Management >> Bookings Management Parameters >> Bookings Management Classes, with the Accounting Method of Cash, only cash options will now appear when further parameters are defined under Bookings Management >> Bookings Management Parameters >> Class Parameters.

### Booking Class Parameter Maintenance

Incident: IPSW 17175627 UX Client	Work Item: 62467 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

When Booking Class Parameters are initially set up under Bookings Management >> Bookings Management Parameters >> Bookings Management Classes, with the Accounting Method of Pathway Debtors, only Debtor options will now appear when further parameters are defined under Bookings Management >> Bookings Management Parameters >> Class Parameters.

### Booking Maintenance

Incident: UX Client	Work Item: 60075 KB:	Fix: ERS: 94039
------------------------	-------------------------	--------------------

#### BOOKING NOTE MAINTENANCE

A correction change has been made to the Note text area to automatically expand in height so that more text can be viewed, reducing the need to scroll.

## Customer Service

### Request Maintenance

Incident: WHIT 13379470,  
MACK 15307180, COGC  
16680554, BALL 17702861  
UX Client

Work Item: 59113

Fix:

KB:

ERS:

#### REQUEST CROSS MODULE SEARCH WITH STREET AND/OR SUBURB

Corrections have been made to the Request cross module search with the Property Administration module to ensure that correct results are returned when Street and/or Suburb profiles are provided.

### Request Maintenance

Incident: MELV 17060812  
UX Client

Work Item: 60232

Fix:

KB:

ERS:

#### E-MAIL MESSAGE ENQUIRY

A correction has been made to E-mail Message Enquiry when accessed via the "E-mail History" option on the Customer Service Summary. Previously, incorrect search results were displayed if a default profile had been logged via the unrelated System Administration >> System Parameters >> E-mail Message Enquiry menu option.

# Debtors

## Debtor Maintenance

Incident: TOOW 17767083  
UX Client

Work Item: 62104  
KB:

Fix:  
ERS:

### DOCUMENT MAINTENANCE

Previously the Document Line Detail form would always display Line 1 for a multi-line Document regardless of the Line that was selected.

## Debtor Maintenance

Incident:  
UX Client

Work Item: 60075  
KB:

Fix:  
ERS: 94039

### ACTIVITY MAINTENANCE

A correction change has been made to the text area displayed below the main grid to automatically expand in height so that more text can be viewed, reducing the need to scroll.

## Electoral Roll

### Election Maintenance

Incident: UX Client	Work Item: 63000 KB:	Fix: ERS:
------------------------	-------------------------	--------------

\*\*\* VICTORIAN SITES ONLY\*\*\*

#### EXTRACT CONTROL

A correction has been made to the Extract function. Previously, the job would fail if it encountered a name role (Owner, Owner Nominee, Occupier or Occupier Nominee) that was either (a) linked to an Identity that was not active, or (b) linked to an Identity that did not exist (i.e. the name role was an orphaned record).

Also, previously the Exception Report title was "Extract Exception Report (WA)" even when the State parameter was set to Victoria. This has been corrected to be "Extract Exception Report".

#### ELECTORAL ROLL OUTPUT CONTROL

A correction has been made to the Electoral Roll Output function. Previously, the job would fail if it encountered a Property Address with a Property Name that consisted of more 50 characters.

### Election Maintenance

Incident: UX Client	Work Item: 63001 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### ELECTOR SEARCH PROFILE

Changes have been made to the Elector Search Profile. Previously, it was not possible to perform a search over all vote details without entering either State Roll Name details or a Reason.

To cater for this situation, the Reason tab has been renamed Vote Details and no longer requires the mandatory selection of a Reason before a search can be performed. This then allows searching over all Vote Details by Vote Status, if desired. The new Vote Details tab has been positioned as the first tab on the screen.

### Victorian Electoral Roll 2024

Incident: Incident: YARA 18034490, MORE 18037536, WHIT 18053256 UX Client	Work Item: 62674 KB:	Fix: ERS:
--	-------------------------	--------------

\*\*\* VICTORIAN SITES ONLY\*\*\*

#### PROPERTY MAINTENANCE - PROPERTY NAMES MAINTENANCE

A corrective change has been made to include an Electoral Roll Reason "Application Received Date" for Property Owners, Owners, Owner Nominees and Occupier Nominees which can be entered when the given name role has a Reason entered. The new date can be used to record the date upon which

the application to be granted the entered Electoral Roll Reason was received. Further details of its use are in the following sections.

Also, previously an error occurred when attempting to save after adding a nominee for an occupier.

#### ELECTORAL ROLE REASON MAINTENANCE

This is accessed using the Role Reason grid buttons on Property Names Maintenance. It has been changed to display the Application Received Date for the Role Reason as an enquiry only field.

#### ELECTION MAINTENANCE - EXTRACT CONTROL

A corrective change has been made so that name roles with a Reason Application Received Date that is later than the given Election's roll close date (Age Entitlement Date) will not be extracted to the roll. Also, corrections have been made to the Extract.

- Previously, the Expiry Date for a name role could be incorrect if the Expiry Date differed between different name roles.
- Previously, Owner Nominees were incorrectly not extracted in some situations.

#### ELECTION MAINTENANCE - ELECTORAL ROLL OUTPUT CONTROL

The Electoral Roll Output has been corrected to include the Reason Application Received Date as one of the fields that can be included in the export file. The new export field is included in RCAPPRCVDAT (Reason Code Application Received Date).

#### LETTER GENERATION CONTROL

The Letter Generation Control is accessed via Property Administration >> Document Processing >> Letter Generation.

A corrective change has been made to include a Reason Application Received Date range, to allow for selection of name roles that have a Reason where the application form was received during the nominated date range.

Also, revisions have been made to the generation:

- Previously, the existing Reason Expiry Date range was not applied when determining the names for which a document would be generated.
- Previously, if the selected Merge Type included an extract type based on Occupier Nominees, the job would fail.

#### PROPERTY EXTRACT TYPES

A corrective change has been made to include a new extract field for the Electoral Roll Reason Application Received Date (Reason\_Appl\_Received\_Date) for Extract Types that are based on the following Extract List Types:

- OWNERS - Property Owners
- OWNERNOM - Owner Nominee
- OCCUPIER - Property Occupiers
- OCCNOM - Occupier Nominee

## ePathway System

### ePathway External Request Broker - Customer Request Lodgement

Incident: MELV 17978118  
UX Client

Work Item: 62970  
KB:

Fix:  
ERS:

#### EPATHWAY EXTERNAL REQUEST BROKER CUSTOMER REQUEST LODGEMENT FOR MULTIPLE PROPERTY ROLES

A problem was recently identified and corrected. When attempting to lodge Customer Service Requests via the External Request Broker (ERB) for a request type setup to allow entry of multiple property module roles.

A similar problem was also found when searching for a property via street name only if the street spanned multiple suburbs (i.e. if the Street/Suburb selection screen was presented via ERB).

### ePathway Menu / Screen Header

Incident:  
UX Client

Work Item: 62184  
KB:

Fix:  
ERS:

#### EPATHWAY SEARCH MENU

The ePathway screens now allow for a new Menu Search field to allow searching for ePathway menu options by typing in a text filter. This is to allow users to find options without having to know where they are on the ePathway menus.

The appearance of the new menu search field is expected to be controlled by CSS styling to be tailored by each council. An example set of styling has been provided which allows the new feature to appear as a search icon (Magnifying glass) which when activated will display the entry field. It should be noted that the initial appearance, location, and behaviour can be configured by an administrator with CSS knowledge.

The following screen in Figure 1 shows how the new option appears on screen (highlighted by the red arrow) using the example CSS provided at the end section of these release notes.

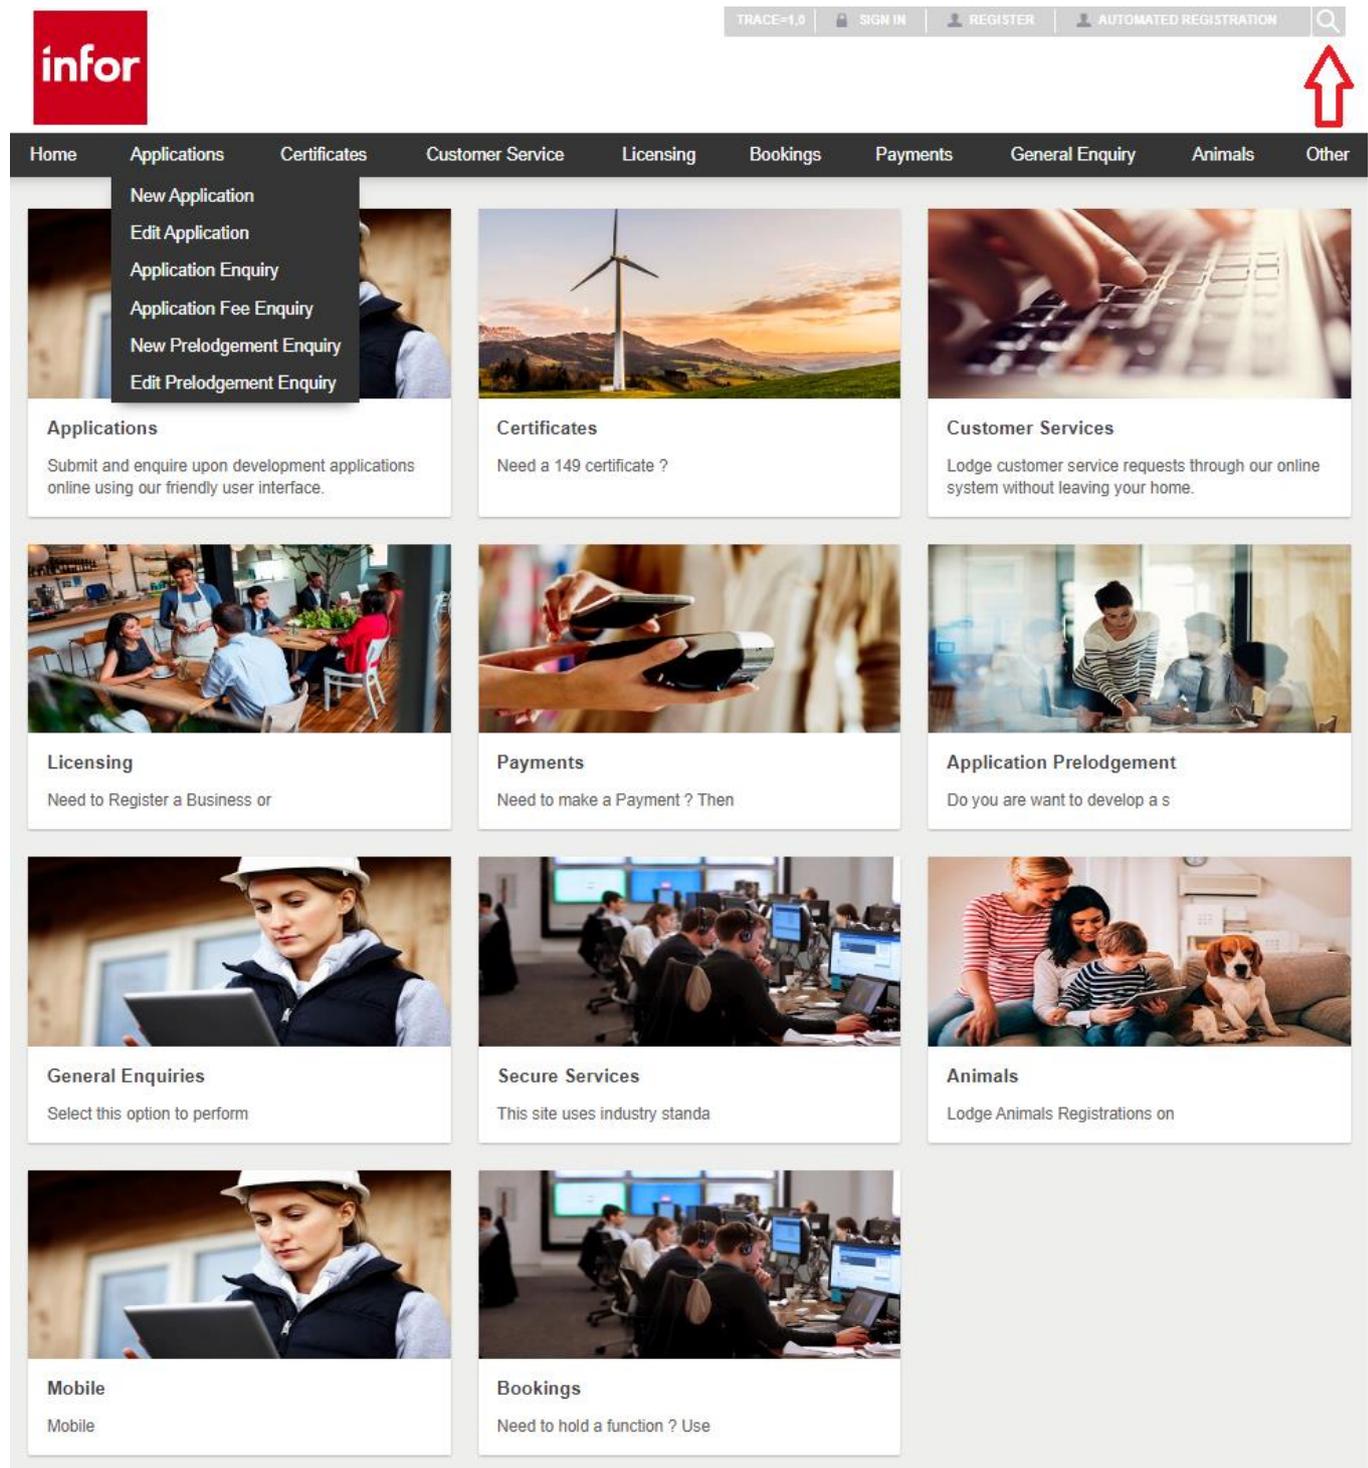

Figure 1: New icon displayed on top right of the screen.

If the user hovers over the icon, then the menu search entry field will display across the top of the screen as shown in Figure 2.

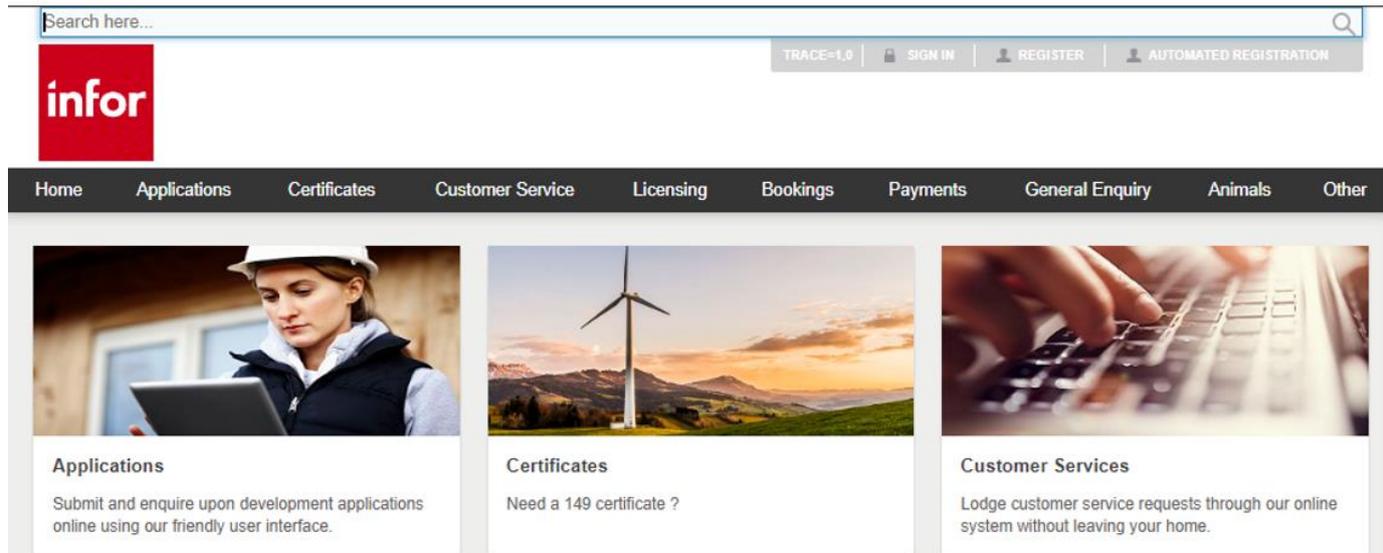

Figure 2: Search activated.

If we then type in a filter (i.e.. Any letters/words contained in a menu items description), any matching menu actions will be displayed and can be activated by clicking on them. In Figure 3 below the user has typed in “pay”, and 3 options are shown. The first two options equate to the options on the Payments menu, and the last is the equivalent to the “Payments” action as shown in the middle of the second row of panels on the main screen.

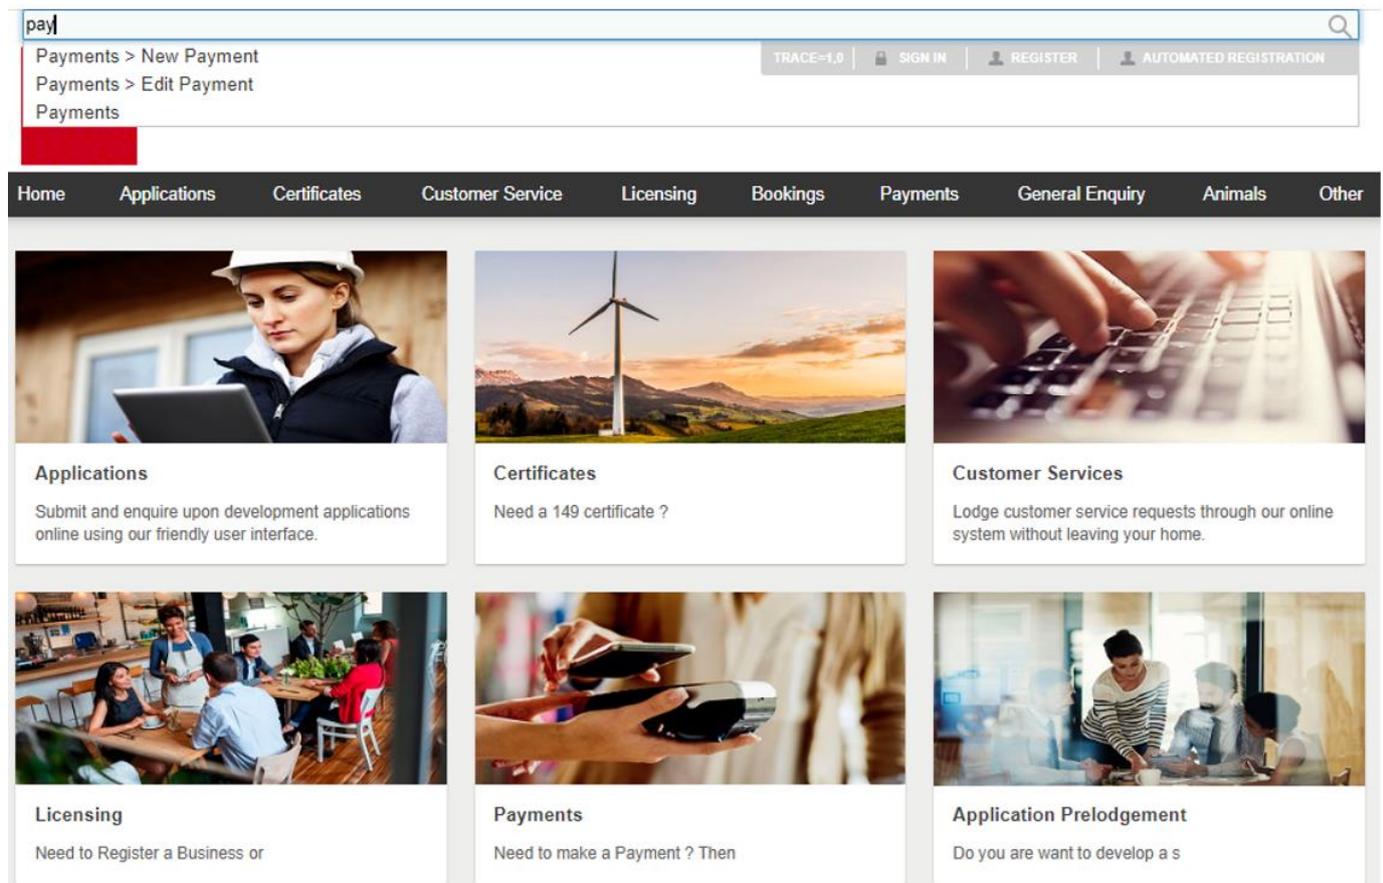

Figure 3: Menu items filtered by entered text.

Similarly, if we are a registered user on the My Home screen, it will filter by the menu items as well as the actions on the main screen. Figure 4 shows the user entered “lodg” on the My Home form. As

well as the lodgement options from the Applications menu it has displayed the “Lodge a development application” action from the “I want to ...” actions on the left panel of the screen.

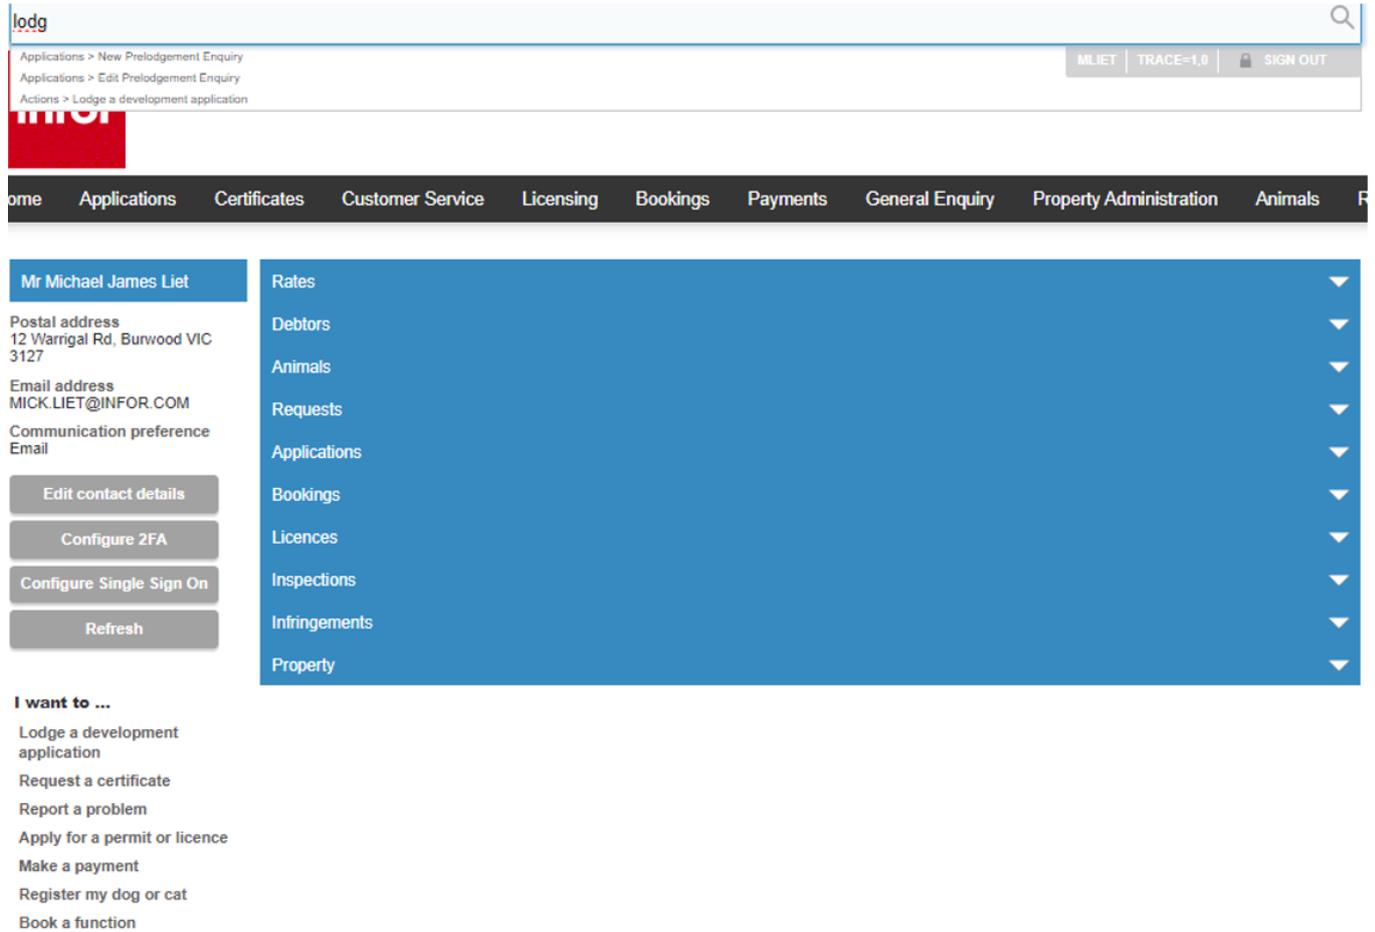

Figure 4: My Home filtering includes the “Profile” and “I want to” on screen actions.

Clicking on any of the filtered responses will activate the action as if it were chosen from the menu or screen action. See the next sections on how to activate the new feature and tailor the appearance.

### PARAMETER SETUP

To enable the new menu search feature, a new “Search.HeaderSearch” System Configuration setting is available.

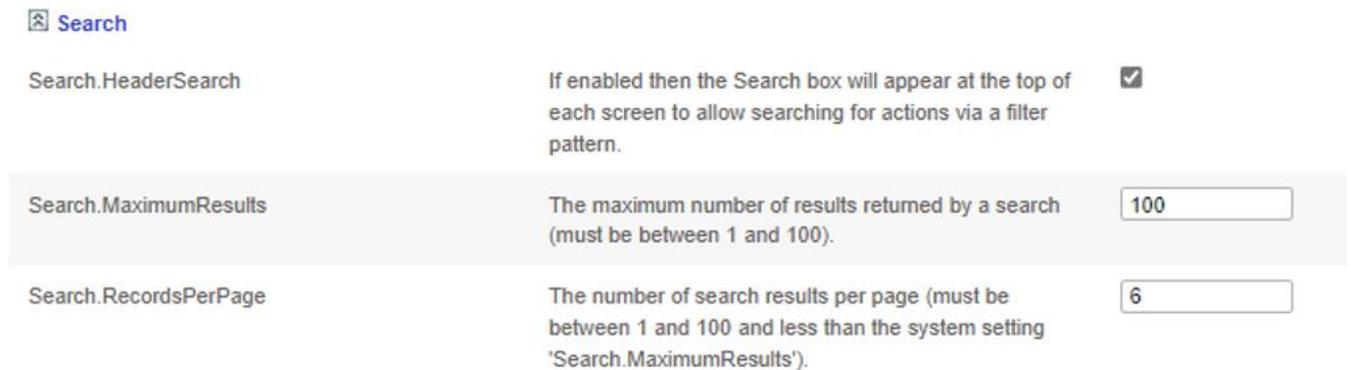

Figure 5: ADMIN >> Configuration >> System Parameters >> Search

If this new setting is not checked then the ePathway screen appearance will be unchanged. If checked, then a new menu search feature (search box and icon) should appear in the header section of all ePathway screens (as defined by CSS styling).

Note also that the label for the new search field can also be tailored via the new text code:

Text Code	Default Value	Tooltip	Description
Navigation.SearchFilter	Search here...	Type in words to filter menu options and other actions	On screen address line label

Table 1: Text Codes - ADMIN >> Layout >> Text >> Module Group >> Navigation

## CSS STYLING

It should first be noted that the new menu search controls are defined within the Header section for ePathway as shown here and consists of a DIV element and TextBox (which becomes an INPUT element when rendered).

```
<div class="HeaderTop">

    <!-- Header -->
    <div class="Header">

        <div ID="mHeaderSearchDiv" class="HeaderSearch HeaderSearchImage"
runat="server">
            <asp:TextBox ID="mHeaderSearchTextBox" placeholder="Search here..."
runat="server" class="HeaderSearchImage"/>
        </div>

        <div class="HeaderLinks">
            <asp:PlaceHolder ID="mPlaceHolder" runat="server" />
        </div>

        <div class="HeaderImage">
            <cc1:HyperLink ID="mHeaderImage" NavigateUrl="~/Default.aspx"
ImageUrl="~/Images/header.gif" Text="Missing header image" EnableViewState="False"
BorderWidth="0px" runat="server" />
        </div>

    </div>
    <uc1:MenuBar ID="Menubar" runat="server" />

    <a id="mobileUserLinksButton" class="accountMenu"></a>

</div>
```

Figure 6 shows the relevant part of the above after ASP.Net has rendered to HTML.

```

▼ <div class="mainBody"> flex
  ▼ <div class="mainBodyHeader">
    ▶ <noscript>...</noscript>
    ▼ <div class="HeaderTop">
      <!-- Header -->
      ▼ <div class="Header">
        ▼ <div id="ctl00_mHeader_mHeaderSearchDiv" class="HeaderSearch HeaderSearchImage"> == $0
          <input name="ctl00$mHeader$mHeaderSearchTextBox" type="text" id="ctl00_mHeader_mHeaderSearchTextBox" title="Type in words to filter menu options and other actions" placeholder="Search here..." class="HeaderSearchImage ui-autocomplete-input" autocomplete="off">
        </div>
        ▶ <div class="HeaderLinks">...</div>
        ▶ <div class="HeaderImage">...</div>
      </div>
      ▶ <div id="ctl00_mHeader_Menubar_menuPanel" class="menupanel">...</div>
      ▶ <script type="text/javascript">...</script>
      ▶ <div id="ctl00_mHeader_Menubar_mobileMenuPanel" class="mobile-controls">...</div>
      <a id="mobileUserLinksButton" class="accountMenu"></a>
    </div>
    ▶ <script type="text/javascript">...</script>
    <!-- End Header -->

```

Figure 6: Rendered HTML

### Styles.Infor.css

This is the CSS common to all Theme styles. It will place new controls as a Magnifying glass icon (common search icon graphic sourced as a SVG image) and placed to the right of the existing header links (E.g. Login, Register, etc)

```
/* Applied to the DIV element that contains the input control to place on top right of screen */
```

```
.HeaderSearch {
  display: block;
  float: right;
  position: relative;
  margin: 4px 11px 0px 11px;
  padding: 0;
  min-width: 30px;
  min-height: 24px;
}
```

```
/* Applied to the DIV element and INPUT control to give the controls the search icon as a background */
```

```
.HeaderSearchImage {
  background-image: url("data:image/svg+xml;utf8,<svg viewBox='0 0 18 18' width='24' xmlns='http://www.w3.org/2000/svg'><path d='M17.707 16.293l-5.108-5.109A6.954 6.954 0 0014 7c0-3.86-3.141-7-7-7S0 3.14 0 7s3.141 7 7 7a6.958 6.958 0 004.185-1.402l5.108 5.109a.997.997 0 001.414 0 .999.999 0 000-1.414zM7 12c-2.757 0-5-2.243-5-5s2.243-5 5-5 2.243 5 5-2.243 5-5 5z' fill='darkgray' fill-rule='nonzero' stroke='none'/></svg>");
  background-repeat: no-repeat;
  background-attachment: local;
  background-position: top right;
  background-position-y: 4px;
  background-size: 30px 20px;
}
```

```

/* Expand INPUT control to fill screen width when it gets focus */
input.HeaderSearchImage:focus {
    width: 100%;
}

/* Expand DIV (parent) control to fill screen width when any control within it gets focus */
.HeaderSearch:focus-within {
    width: 100%;
    z-index: 1002;
    background-image: none;
}

/* Make the INPUT control visible when the parent (DIV) control gets focus */
.HeaderSearch:focus-within > input {
    display: block;
}

/* Expand DIV control to fill screen width when cursor hovers over the search image area */
.HeaderSearch:hover {
    width: 100%;
    z-index: 1002;
    background-image: none;
}

/* Make the INPUT control visible when the cursor hovers over the search image area */
.HeaderSearch:hover > input {
    display: block;
}

/* Set default attributes of the INPUT so it is not initially visible until hover/focus settings above take effect */
.HeaderSearch > input {
    line-height: 24px;
    font-size: 15px;
    position: relative;
    padding-left: 2px;
    width: 100%;
    z-index: 1002;
    display: none;
}

```

### Styles.UX.css

This is the CSS specific to the UX Theme styles. Needs Styles.Infor.css included first and this includes the overrides, so the Magnifying glass icon has same appearance as header links for the UX theme (E.g. Login, Register, etc). I.e.. White on grey background.

```

/* Add to Styles.Infor.css settings so the DIV area blends in with the HeaderLinks
actions.
ie. Grey background, same dimensions with left border/divider, white image/icon
with rounded edges */
.HeaderSearch {
    margin: 0;
    min-width: 30px;
    min-height: 28px;
    background-color: lightgray;
    border-bottom-left-radius: 3px;
    border-bottom-right-radius: 3px;
    color: #fff;
    border-left: solid 1px;
    background-image: url("data:image/svg+xml;utf8,<svg viewBox='0 0 18 18'
width='24' xmlns='http://www.w3.org/2000/svg'><path d='M17.707 16.293l-5.108-

# ePathway Receipting

## ePathway Payments

Incident: CAMP 18063200  
UX Client

Work Item: 62923  
KB:

Fix:  
ERS:

### ANTIFRAUD FEATURE ON NAB TRANSACT

The Antifraud feature on the NAB Transact payment gateway has been implemented for ePathway and CityWatch. This allows NAB's Risk Management features (e.g. blocking by IP Address) to be applied.

## Infringements

### Infringement Maintenance

Incident: MELB 17652380 UX Client	Work Item: 59623 KB:	Fix: ERS: 91917
--------------------------------------	-------------------------	--------------------

The Balance for infringement searches is now displayed in Analyse Results.

### Infringement Maintenance

Incident: MELB 17879377, MELB 17879390 UX Client	Work Item: 62604 KB:	Fix: ERS:
--	-------------------------	--------------

#### OPERATOR ONUS NOMINATION MAINTENANCE

The Date of Birth is now validated against the day of the offence, with the following message displayed when the validation rule fails: Nominated Operator/Owner would be less than 18 years old on the day the offence occurred.

Also, Letter Types specified in the parameter Operator Onus Nomination Withdrawal Assignment are now correctly displayed in the Letter Type Lookup.

### Book Maintenance

Incident: UX Client	Work Item: 62763 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### INFRINGEMENTMENT BOOKS MAINTENANCE

When the Details data-grid button is clicked, an error occurred. The button has been fixed and is only enabled for ticket type Issued, Prepaid or Prepayment Reversed.

### Infringement Maintenance

Incident: ATA 17615302 UX Client	Work Item: 61922 KB:	Fix: ERS: 101898
-------------------------------------	-------------------------	---------------------

#### NZ PARKING INFRINGEMENTS

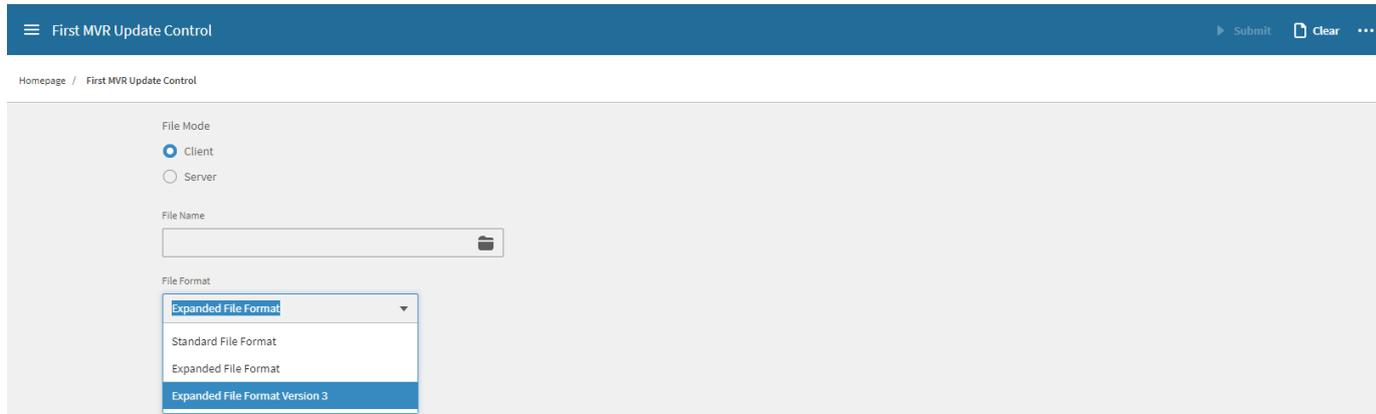

The Meter\_Time\_on extract field is now populated with data for NZ Parking Infringements.

### Cycle Function Selection Interface

Incident: UX Client	Work Item: 62494 KB:	Fix: ERS: 104240
------------------------	-------------------------	---------------------

#### FIRST MVR UPDATE CONTROL

Changes have been made to the MVR Update process to cater for the Queensland CITEC expanded file format Version 3. On the First MVR Update Control, the check box 'Expanded File Format' has been replaced with a dropdown called 'File Format'.

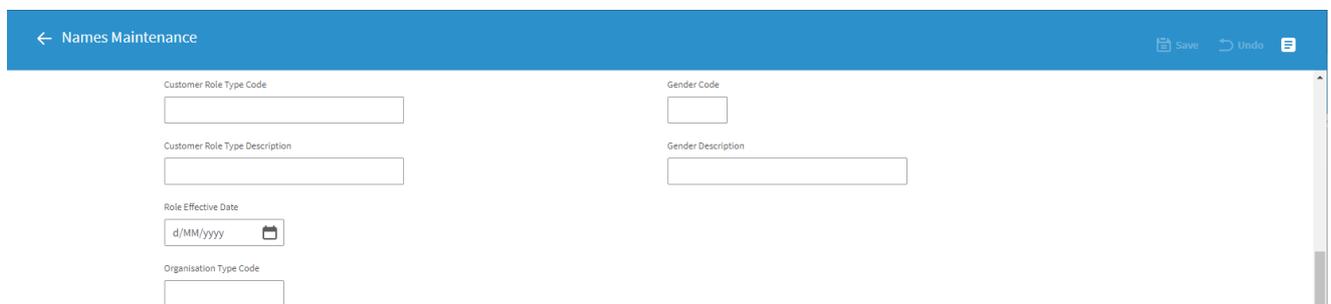

The screenshot shows the 'First MVR Update Control' form. At the top, there is a blue header with a menu icon, the text 'First MVR Update Control', and buttons for 'Submit', 'Clear', and a three-dot menu. Below the header, the breadcrumb 'Homepage / First MVR Update Control' is visible. The form contains several fields: 'File Mode' with radio buttons for 'Client' (selected) and 'Server'; 'File Name' with a text input and a file upload icon; and 'File Format' with a dropdown menu. The dropdown menu is open, showing three options: 'Expanded File Format' (highlighted in blue), 'Standard File Format', and 'Expanded File Format Version 3'.

The File Format dropdown has the following values:

- Standard File Format
- Expanded File Format
- Expanded File Format Version 3

The File Format dropdown is only applicable when the State Code is set to Queensland. The File Format selected should match the format of the file being updated.

A new field called 'Role Effective Date' has been added to the Names Maintenance form to hold the value of the data element with the same name that this is now provided by the CITEC expanded file format Version 3 within the primary, secondary and third customer details.

The screenshot shows the 'Names Maintenance' form. At the top, there is a blue header with a back arrow, the text 'Names Maintenance', and buttons for 'Save', 'Undo', and a three-dot menu. The form contains several fields: 'Customer Role Type Code' (text input), 'Customer Role Type Description' (text input), 'Role Effective Date' (date input with a calendar icon and the format 'd/MM/yyyy'), and 'Organisation Type Code' (text input). On the right side, there are two fields: 'Gender Code' (text input) and 'Gender Description' (text input).

# Inspections

## Inspections Schedule Maintenance

Incident:  
UX Client

Work Item: 62261  
KB:

Fix:  
ERS:

### INSPECTIONS SCHEDULE MAINTENANCE

The screenshot displays the 'Inspections Schedule Maintenance' application. At the top, there is a search bar with three fields: 'Inspection Identifier' (containing 'c'), 'Areas' (set to '(none)'), and 'Users'. Below the search bar is a calendar for February 2024. The calendar has a legend on the left with 'Block Time' checked. The calendar grid shows dates from 28 to 2. A legend at the bottom indicates 'Weekend' (teal), 'Public Holiday' (purple), and 'Other' (grey).

The following corrective changes have been made to Inspection Schedule Maintenance.

- When an Inspection Identifier has been selected, only Authorised Users defined within the selected module/class will be available for selection within the Users dropdown list.
- While inactive users associated with an area will continue to be displayed, they will be preceded with the text '(Inactive)' to highlight the inactive status of the user.
- The details panel on the right side of the form has been removed to allow the scheduler to better utilise the space.
- When hovering over an inspection or blocked time, significantly more details are displayed.
- Previously after removing an area(s) or user(s), associated inspections and blocked times would continue to be displayed within the scheduler.
- Inspections can now be added when in Week or Day view.
- When in Week or Day View, the hours displayed have been extended to show the full day.
- The calendar for a user can be displayed by right clicking on the name within the legend and selecting 'Open Calendar'.

## Analyse Results

Incident: UX Client	Work Item: 62737 KB:	Fix: ERS:
------------------------	-------------------------	--------------

Special data fields are now hidden within analyse results.

# Licensing

## Licensing Maintenance

Incident: SYDN 16991523 UX Client	Work Item: 60112 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

### DOCUMENT REQUEST MAINTENANCE

A correction has been made to the FEETRAN (Licence Fee Transaction) extract list type when an accounting method of Accrual, Cash or Pathway Debtors was used. Previously, the fields Invoice\_Number and Transaction\_Date were not being populated.

## Licensing Maintenance

Incident: MELV 17060812 UX Client	Work Item: 60232 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

### E-MAIL MESSAGE ENQUIRY

A correction has been made to E-mail Message Enquiry when accessed via the "E-mail History" option on the Licence Summary. Previously, incorrect search results were displayed if a default profile had been logged via the unrelated System Administration >> System Parameters >> E-mail Message Enquiry menu option.

## Licensing Maintenance

Incident: SWAN 17834127 UX Client	Work Item: 62255 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

### LICENSING DATA MAINTENANCE

Print Cover Sheet has been restored under Options in the Application and Licensing Modules.

## Name and Address

### Property Maintenance

Incident: PARA 17830728  
UX Client

Work Item: 62622  
KB:

Fix:  
ERS:

#### DEFAULT ADDRESS MAINTENANCE

The Automatic Default Address Lookup error has been corrected.

# Property Administration

## Property Maintenance

Incident: UX Client	Work Item: 57176 KB:	Fix: ERS:
------------------------	-------------------------	--------------

### PROPERTY NAMES MAINTENANCE

The following corrections have been made for sites that use the Electoral Roll module:

- Previously, the Reason Expired column and Role Reason button were missing from the Name Details and Nominee Details grids (applicable for Victorian and Western Australian sites only).
- Previously, the Reason column on the Name Details grid was available for name roles that were not Property Owners or Occupiers when it should not have been.

The following corrections have been made for sites that do not use the Electoral Roll module:

- Previously, the Reason column was shown in the Name Details and Nominee Details grids when it should not have been.

## Property Maintenance

Incident: UX Client	Work Item: 61265 KB:	Fix: ERS:
------------------------	-------------------------	--------------

### LAND USE

The Land Use option will always display the Land Use Selection for parent properties.  
The sub-property filter, on the parent property, displays the land use for the entire property structure.

## Division Maintenance

Incident: MELB 17437400 UX Client	Work Item: 61942 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

### DIVISION MAINTENANCE

The Land Indicator on Sub-Properties were incorrectly being set ON when they were not part of the Division being accepted.

## Property Maintenance

Incident: RAND 16130315, MNSH 16160735, KING 17600351, RAND 17704472, CENT 17801101, HORN 17815929, LAKE 18077899 UX Client	Work Item: 62048 KB:	Fix: ERS:
--	-------------------------	--------------

### CERTIFICATE ENTRY

A correction has been made to Certificate Entry. Previously, the amount extracted for the Total\_Balance merge field was sometimes incorrect, particularly when generating multiple Certificates in turn for different Properties.

## Property Maintenance

Incident: MELV 18008370, LATR 18096042 UX Client	Work Item: 62731 KB: 2325807	Fix: ERS:
--	---------------------------------	--------------

### CERTIFICATE ENTRY

A correction has been made to the Property Certificate Entry to ensure that various flags, such as "Allow Editing", "Retain After Final Print" etc. are set correctly when the Merge Type Code is typed.

## Property Maintenance

Incident: UX Client	Work Item: 62972 KB:	Fix: ERS:
------------------------	-------------------------	--------------

### PROPERTY NAMES MAINTENANCE

Corrections have been made to Property Names Maintenance. Previously, the following occurred:

- If a Nominee for an Occupier was added the Save would fail with an error.
- Nominees for the active Name would not be shown if the first Name had no Nominees.

## Transfer of Ownership Maintenance

Incident: UX Client	Work Item: 60075 KB:	Fix: ERS: 94039
------------------------	-------------------------	--------------------

### TRANSFER OF OWNERSHIP MAINTENANCE

The Comments text area has been modified to automatically expand in height so that more text can be viewed, reducing the need to scroll.

## Rates Accounting

### Rebate Group Maintenance

Incident: UX Client	Work Item: 58976 KB:	Fix: ERS: 89548
------------------------	-------------------------	--------------------

#### REBATE GROUP MAINTENANCE

The Rebate Group Maintenance forms have been updated to use Pathway UX user interface standards.

### Name and Address Maintenance

Incident: UX Client	Work Item: 62637 KB:	Fix: ERS:
------------------------	-------------------------	--------------

#### NAMES MAINTENANCE

Previously when maintaining Names linked to an Assessment, it wasn't possible to navigate back to the Assessment Summary form due to an error.

### Bulk Assessment Creation

Incident: LOGA 17816246 UX Client	Work Item: 62819 KB:	Fix: ERS:
--------------------------------------	-------------------------	--------------

#### BULK ASSESSMENT CREATION CONTROL

Corrective changes have been made to allow control over which order the selected properties are added to the Property grid. This has been achieved by changing the Add button on the Property grid to have two options: 1) Property Address Order and 2) Search Result Order:

- When the Property Address Order mode is selected, the properties that are searched for and selected are added to the Property grid in Property Address order.
- When the Search Result Order mode is selected, the properties that are searched for and selected are added to the Property grid in the order that they are shown in the search form used.

The properties are added to the Property grid as described regardless of what search form is used. For example: Say the Search Result Order is used, and the Parcel Search Profile (Property Selection) form is used to search for a Plan. This would result in the properties found being shown in parcel description order. When those parcels are selected, the properties for those parcels will be added to the Property grid in the same order that they were shown in the search form.

### Assessment Maintenance

Incident: UX Client	Work Item: 60075 KB:	Fix: ERS: 94039
------------------------	-------------------------	--------------------

#### ACTIVITY MAINTENANCE AND RATE TYPE MAINTENANCE

The text areas displayed below the main grids have been amended to automatically expand in height so that more text can be viewed, reducing the need to scroll.

# Receipting

## External Receipting Import

Incident: WAIK 17717848  
UX Client

Work Item: 62047  
KB:

Fix:  
ERS:

### EXTERNAL RECEIPTING IMPORT

The duplicate file check has been corrected when importing a new file from the server.

## Receipt Maintenance

Incident:  
UX Client

Work Item: 62671  
KB:

Fix:  
ERS:

### RECEIPT PRINTING

Receipt printing to the Browser has now been corrected.

# Registers

## Register Entry Maintenance

Incident: SWAN 17834349  
UX Client

Work Item: 62474  
KB:

Fix:  
ERS:

### REGISTER ENTRY SEARCH PROFILE

Single quotation marks used in Field Names for Register Fields were causing errors in Register Entry Maintenance.

## Smart Mobile Core

### ION Parameters

Incident: MELV 17060812	Work Item: 60232	Fix:
UX Client	KB:	ERS:

#### E-MAIL MESSAGE ENQUIRY

A correction has been made to E-mail Message Enquiry when accessed via the E-mail History option on the ION Inbox Item Enquiry and ION Outbox Item Enquiry forms. Previously, incorrect search results would be returned if a default profile had been logged via the unrelated System Administration >> System Parameters >> E-mail Message Enquiry menu option.

### Result List View

Incident:	Work Item: 61931	Fix:
UX Client	KB:	ERS:

The Result List View has been modified so that the detail form does not reload for an item that is already loaded when the item is selected from the result list or when Select All button is clicked.

### Debtor Maintenance

Incident: ADEL 17819798	Work Item: 62297	Fix:
UX Client	KB:	ERS:

#### DOCUMENT LINE APPORTIONMENT ENQUIRY

Previously the Document Line Apportionment Enquiry and Manual Apportionment Maintenance forms would display Line 1 for a multi-line Document regardless of the Line that was selected.

### Pathway Email Attachment Link

Incident: MELV 17707066	Work Item: 62436	Fix:
UX Client	KB:	ERS:

#### PATHWAY EMAIL ATTACHMENT LINK

A correction has been made to ensure that opening a Pathway email attachment link (.pth file) that navigates to a search will load the correct data in Pathway. Previously, opening this file was loading the default search profile instead of the records specified in the file.

### Cached Items

Incident: TOOW 17946921	Work Item: 62602	Fix:
UX Client	KB:	ERS:

A size limit has been added to the Pathway UX server cache, that will limit the number of cached items and memory usage.

The Pathway UX server caches items within memory to reduce loading time. The cached items expire and are removed from the cache if they are not used for a period of time, or if the new cache size limit is reached.

The cache limit can be altered by changing the cacheSizeLimit value in the ApplicationSettings section of the web.config.

## DataGrid

Incident: UX Client	Work Item: 63008 KB:	Fix: ERS:
------------------------	-------------------------	--------------

Previously an "Invalid Date" message was incorrectly displayed within a Date cell field when an empty value was present.

## Analyse Results

Incident: UX Client	Work Item: 62662 KB:	Fix: ERS:
------------------------	-------------------------	--------------

Previously it was possible to perform Bulk maintenance from the Summary form using records filtered in Analyse Results. The Bulk function has been extended to enable Bulk maintenance inside Analyse Results.

The Bulk button in the record Summary, Image 1.

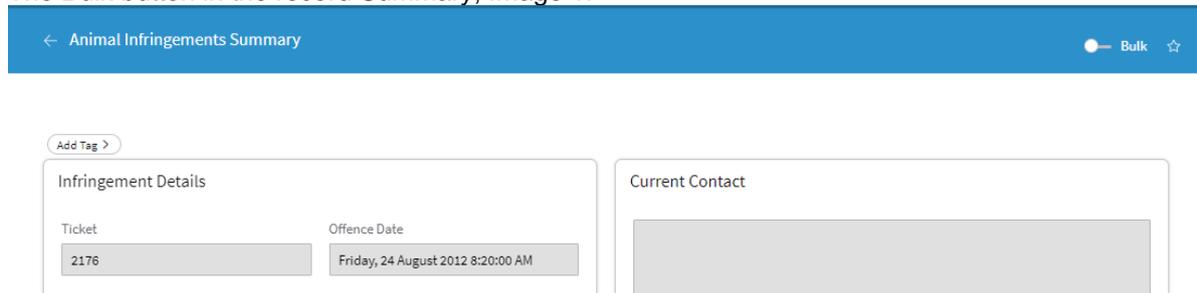

Image 1

The Bulk button in Analyse Results, Image 2.

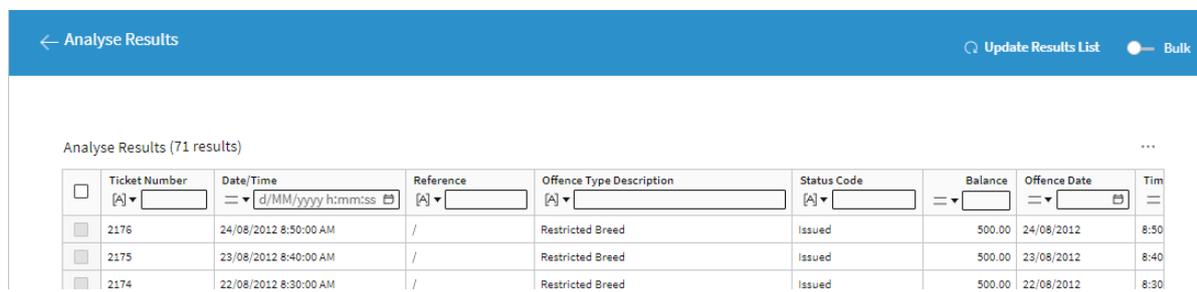

Image 2

The Bulk button within Analyse Results enables records to be filtered and individually selected for Bulk maintenance.

e.g. filtered by Offence Type Description and then five infringements individually selected, Image 3.
