## About this guide

This release document is for Version 2.0.501 of Infor Distribution Storefront. It contains information about fixed defects and known issues delivered in this release.

**Note:** For those who are migrating from Storefront 1.3.xxx or 1.5.xxx or for those installing Storefront 2.0.501 for the first time, refer to the *Infor Distribution Storefront Installation Guide*.

## Intended audience

This document is intended for Infor Distribution Storefront system administrators and other users who are responsible for system setup, administration, or technical support for end users.

## Related documents

You can find the documents in the product documentation section of the Infor Xtreme Support portal, as described in "Contacting Infor" on page 5.

- *Infor Distribution Storefront Hardware and Software Requirements*
- *Infor Distribution Storefront Installation Guide*
- *Infor Distribution Storefront Administration User Guide*
- *Infor Distribution Storefront Catalog User Guide*
- *Infor Distribution Storefront Integration Guide for CenPOS*
- *Infor Distribution Storefront Configuration Guide for Punchout*

For information about Infor Storefront Commerce, see the online help.

## Contacting Infor

If you have questions about Infor products, go to the Infor Xtreme Support portal.

If we update this document after the product release, we will post the new version on this website. We recommend that you check this website periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

## Chapter 1 Upgrading to release 2.0.501 from a previous version with EasyAsk Studio

If you are upgrading to Storefront 2.0.501 and using EasyAsk 14.0, then you must install the `EasyAsk_14_Config_For_Storefront.zip` file. For additional information, see *Configuring Infor EasyAsk Studio integration components* in the *Infor Distribution Storefront Installation Guide*.

If you are upgrading from an earlier version of Storefront and are not using EasyAsk 14.0, then you can download EasyAsk 14.0 from the download center. For additional information, see *Downloading EasyAsk 14.0* in the *Infor Distribution Storefront Installation Guide*.

## Chapter 2 Improvements

Storefront version 2.0.501 includes these enhancements:

### Performance Improvements

Access to Commerce site and login performance have been improved.

## Chapter 3 Fixed Defects

This table shows the defects fixed in Release 2.0.500:

Issue	Description	Resolution
ESF-4554	On the Paid Invoices screen, you cannot select invoices when using the email button. After you click the email button, this message is generated: "No Invoices selected to Email"	The check boxes are now available to select invoices when using the email button.
ESF-4682	In Storefront Catalog, an error is produced on the Populate Item Master step on backend item import. This is an issue with SX customers, new installs, and migrations to version 2.0.300/301.	This issue has been resolved.
ESF-5147	Navigation issues when using categories with specials character and Attributes.	This issue has been resolved.
ESF-5294	When uploading Microsoft Excel files using the File Utility option, the files are uploaded but not processed or validated.	This issue has been resolved.
ESF-5296	In the Catalog Import Utility, corporate groups are not working properly in the account import.	This issue has been resolved.
ESF-5298	In the Catalog Import Utility, the ship to group is not working properly in the account import.	This issue has been resolved.
ESF-5303	A B2CR user cannot access CenPOS Pay Panel in Storefront Commerce.	This issue has been resolved.
ESF-5307	When creating a B2C account with a customer record that does not already have an account in Storefront Admin, the customer record is created with Null values.	This issue has been resolved.
ESF-5311	If the customer number contains an apostrophe, and is a member of a corporate group, you are unable to select the customer.	This issue has been resolved.

---

ESF-5318	When you create a registered user (B2C-R) in a multi-site environment, the registered user is created with the wrong company and accessing the wrong catalog information.	This issue has been resolved.
ESF-5331	Wish lists are generating an error when exporting.	The wish list page no longer has the Export option.
ESF-5337	Receiving an error when editing the Calculated Browse Search page layout.	This issue has been resolved.
ESF-5355	Storefront Commerce - When sending cart items through the storefront punchout functionality the items sequence is being inverted.	This issue has been resolved.
ESF-5437	If you are using the Alternate quantity message feature, no quantity is displayed in the Commerce application.	This issue has been resolved.
ESF-5438	Getting an error that an item is not found when using the SAYT drop down on the item detail page.	This issue has been resolved.
ESF-5441	When searching for browse page layout, the page detail throws a validation error.	This issue has been resolved.
ESF-5443	UPC numbers are no longer displayed after publishing modified items.	This issue has been resolved.
ESF-5446	When using SAYT (search as you type)., the base price is displayed in error.	The price has been removed from the SAYT results.
ESF-5448	The Clear All button on the open and paid invoices page is not working.	This issue has been resolved.
ESF-5454	When B2B system option is set, a system unavailable message is displayed during login.	This issue has been resolved.
ESF-5460	The no image message appears as a broken file in the SAYT popups on Storefront Commerce page.	This issue has been resolved.
ESF-5462	Search Bread Crumbs are wrong when selecting SAYT suggestion links.	This issue has been resolved.
ESF-5464	An error is generated when you attempt to change the Manufacturer or Alternate Price Message on an item.	This issue has been resolved.

---

ESF-5466	The Storefront Catalog Import Utility is causing a data issue when accessing accounts. The Accept offers field is erroneously set to Null in the database.	The field is now set with a value of 0 (false) on the account table.
ESF-5468	Storefront – new database deployment update issues.	This issue has been resolved.
ESF-5470	When editing the account options for a B2B account, you can specify an account profile name that is more than 30 characters. This generates a hard error when you save the profile.	The user interface now validates the number of characters specified is 30 or less.
ESF-5472	Item Index taking long time to complete when category images are assigned to the items.	Performance improvements have been made to resolve the run times.
ESF-5474	Receiving an item index build error when a UPC number is reassigned to a different item number in A+.	This issue has been resolved.
ESF-5476	An error is generated when accessing page 2 of any page layout assignments.	This issue has been resolved.
ESF-5505	A row was deleted or updated by another user. Errors in the logs.	This issue has been resolved.
ESF-5507	Added protection against Cross Site Request Forgery (CSRF) attacks when editing account information.	This issue has been resolved.
ESF-5512	When viewing categories, the refine categories area is reported as negative 1 for the number of items in the category.	This issue has been resolved.
ESF-5515	Improper input handling.	This issue has been resolved.
ESF-5520	When using Storefront with EasyAsk, there are problems when there is an ampersand (&) in the parent category name.	This issue has been resolved.
ESF-5522	When displaying products in grid mode, the item sort is not working and causing an error.	This issue has been resolved.
ESF-5527	When validating page layouts assigned to a particular layout group, a browser error was encountered when accessing the second page of assigned layouts.	This issue has been resolved.
ESF-5538	Cannot register an email address with a <code>.church</code> domain name.	<code>.church</code> has been added to the valid email domain list.
ESF-5542	When working in a multi-language environment, the item description translations can be seen and toggled between	This issue has been resolved.

Fixed Defects

---

	on the browse results page but not on the item detail page.	
ESF-5562-	PDF files are not created upon order submission and order review if the order contains comment lines on the items.	This issue has been resolved.
ESF-5566	Issue with B2C-A user when storefront commerce is a single site.	This issue has been resolved.
ESF-5581	When the Cart is submitted back to the external application (e Procurement) System, the Punchout order cXML tags are not in order.	This issue has been resolved.
