About this document

This document describes the updates made to Infor Shop Floor.

Intended audience

This document is intended for any VISUAL Shop Floor user.

Related document

You can find the documents in the product documentation section of the Infor Support portal.

Infor VISUAL Shop Floor Installation and Configuration Guide

Contacting Infor

If you have questions about Infor products, go to Infor Concierge at <https://conciierge.infor.com/> and create a support incident.

If we update this document after the product release, we will post the new version on the Infor Support Portal. To access documentation, select **Search > Browse Documentation**. We recommend that you check this portal periodically for updated documentation.

If you have comments about Infor documentation, contact documentation@infor.com.

Prerequisites

To use VISUAL Shop Floor, you must meet these prerequisites:

- Infor VISUAL 10.0.0 Service Pack 3 or higher must be installed.
- Internet Information Services 7.x or higher must be installed.
- ASP .NET 4.6 or higher must be installed.
- Microsoft .NET Framework 4.6.1 or higher must be installed
- The URL Rewrite extension for IIS must be installed.
- A signed certificate that can be used for SSL or TLS.

The Shop Floor apps are compatible with the latest versions of these browsers:

- Firefox
- Google Chrome
- Microsoft Edge
- Safari

Licensing

You must apply a Shop Floor license to access Shop Floor apps. You can no longer license the app through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode.

If you previously licensed Shop Floor through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode, contact Infor to acquire your license key.

Enhancements

Major enhancements have been made to Infor VISUAL Shop Floor.

For more information about how to set up the new enhancements, see the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

For more information about how to use the new enhancements, see the Infor VISUAL Shop Floor online help.

Over Receipt Threshold

An **Edit Qty Complete vs Standard** check box and an **Allowable percentage over standard** field are added to the **Labor** tab in the **Preferences** window. If the **Edit Qty Complete vs Standard** check box is selected and a value is specified in the **Allowable percentage over standard** field, the application calculates the allowable quantity and the excess percentage with the user specified completed quantity. If the completed quantity is more than the calculated allowable quantity, the application prevents the user from submitting the transaction.

The **Allowable percentage over standard** field is enabled only if the **Edit Qty Complete vs Standard** check box is selected.

Process Step Preferences

New **Scan mode prompts** preferences are added to the **Material** tab in the **Preferences** window. You can set these preferences to view the prompts for the reason code and labeling when performing transactions in scan mode.

The **Prompt for description when issuing in scan mode** check box is renamed to **Description on issue** and **Prompt for description when issue returning in scan mode** check box is renamed to **Description on issue return**. These options are now available in the **Scan mode prompts** section.

IQM Integration

Shop Floor mobile application can now be integrated with Infor Quality Management to launch the **Infor Quality Management Product Inspection Plan** and **Product Data Collection** forms.

Part Picture added

The Part Picture column is added to these windows:

- IBT Receipt Entry
- IBT Shipping Entry
- Receiving Entry
- Receipt Return Entry
- Work Order Transaction History.

Standard Filters added

The standard filters are added to column headers. You can now set the filter for each column in these windows:

- Part
- Purchase Order
- Receiver
- Service Dispatch.

Installing Shop Floor 10.0.0 Service Pack 3

If you are installing Shop Floor for the first time, see “Installing Shop Floor” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor 9.0.5 or later, see “Applying a Shop Floor update” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor that is earlier than version 9.0.5, see “Uninstalling the TD Mobile Shop Floor app” and “Installing Shop Floor” chapters in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

Resolved issues

This table shows the defects that were resolved in this release:

Defect #	Description
778098	Fixed an issue where the Shop Floor Mobile application hangs when an employee stops a Job Transaction with QTY Complete in the Average Cost database.
779309	Fixed issue related to the "HTTP Error 404.11 - not found" error message when opening an attached document in the Shop Floor Mobile application.
