About this document

This document describes the updates made to Infor Shop Floor.

Intended audience

This document is intended for any VISUAL Shop Floor user.

Related document

You can find the documents in the product documentation section of the Infor Support portal.

Infor VISUAL Shop Floor Installation and Configuration Guide

Contacting Infor

If you have questions about Infor products, go to Infor Concierge at <https://conciierge.infor.com/> and create a support incident.

If we update this document after the product release, we will post the new version on the Infor Support Portal. To access documentation, select **Search > Browse Documentation**. We recommend that you check this portal periodically for updated documentation.

If you have comments about Infor documentation, contact documentation@infor.com.

Prerequisites

To use VISUAL Shop Floor, you must meet these prerequisites:

- Infor VISUAL 10.0.0 Service Pack 4 or higher must be installed.
- Internet Information Services 7.x or higher must be installed.
- ASP .NET 4.6 or higher must be installed.
- Microsoft .NET Framework 4.6.1 or higher must be installed
- The URL Rewrite extension for IIS must be installed.
- A signed certificate that can be used for SSL or TLS.

The Shop Floor apps are compatible with the latest versions of these browsers:

- Firefox
- Google Chrome
- Microsoft Edge
- Safari

Licensing

You must apply a Shop Floor license to access Shop Floor apps. You can no longer license the app through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode.

If you previously licensed Shop Floor through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode, contact Infor to acquire your license key.

Enhancements

Major enhancements have been made to Infor VISUAL Shop Floor.

For more information about how to set up the new enhancements, see the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

For more information about how to use the new enhancements, see the Infor VISUAL Shop Floor online help.

Ability to check invoice age

The **Shipping** form is enhanced with the **Ship Credit Limit Control** setting to check the receivable age limit, while saving a shipment.

Actual Receive Date added

The **Receiving Entry** form now includes a new **Actual Receive Date** field, allowing you to modify the receive date used for the transaction.

Work order receipt threshold

New **Work Order over receipt allowable percent** field is added to the **Material** tab on the **Preferences** form. This field controls the excess quantity allowed for work order receipts. You can specify a percentage of the work order quantity to verify if the specified receipt quantity exceeds the calculated allowable quantity for the work order receipt.

Standard filters added

The standard filters are added to column headers. You can now set the filter for each column on the **Customer Orders** and **Packlists** forms. In addition, paging feature is added. You can set the number of items per page to enhance load performance.

Material availability status icons added

New material availability status icons are added to provide more visibility about the status of the material. The new icons represent these material statuses:

- When there is not enough material on hand, and none has been issued.
- When there is not enough material on hand, and some has been issued.
- When there is enough material on hand; however, none has been issued.
- When there is enough material on hand, and some has been issued.

Material availability status icons are added to these forms:

- Resource Schedule
- Materials
- Material
- Work Order Details
- Operations

New columns added

New **OP Type** and **OP Type Desc** columns are added to the **Resource Schedule** and other forms to display the operation type and operation type description.

Ability to check customer credit limit

The **Shipping** form is enhanced to check the customer credit limit when saving a shipment.

Installing Shop Floor 10.0.0 Service Pack 4

If you are installing Shop Floor for the first time, see “Installing Shop Floor” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor 9.0.5 or later, see “Applying a Shop Floor update” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor that is earlier than version 9.0.5, see “Uninstalling the TD Mobile Shop Floor app” and “Installing Shop Floor” chapters in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

Resolved issues

This table shows the defects that were resolved in this release:

Defect #	Description
782138	Fixed an issue where the submit button is being disabled when performing an overissue for a traceable part.
783746	Fixed issue related to the 'operation not found' error when stopping a job for an operation associated with a shop resource group.
787858	Fixed issue related to the 'invalid attempt to read' error when clocking out of a job where there are no legs present on the work order.
781871	Fixed issue related to the 'transaction creates a negative issue' error message when shipping a customer order and the warehouse location is empty.
775827	Fixed zero cost on issue return transactions when using standard costing.
782770	Fixed being able to enter an inventory transaction with a future date when the period is not defined.
784387	Fixed an issue where the start job screen displayed with the group resource ID from the work order operation instead of the resource ID from the resource schedule.
784827	Fixed the issue with receiving an error message when a column is defined more than once on the label configuration.
786308	Fixed an issue with being unable to assign an existing warehouse location to a part when receiving a purchase order.
