About this document

This document describes the updates made to Infor Shop Floor.

Intended audience

This document is intended for any VISUAL Shop Floor user.

Related document

You can find the documents in the product documentation section of the Infor Customer Portal. *Infor VISUAL Shop Floor Installation and Configuration Guide*

Contacting Support

If you have questions about Infor products, go to the Infor Customer Portal at <https://customerportal.infor.com/csmcore/>

If we update this document after the product release, we will post the new version on this Web site. We recommend that you check this Web site periodically for updated documentation.

If you have comments about Infor documentation, contact <https://docs.infor.com/en-us>.

Prerequisites

To use VISUAL Shop Floor, you must meet these prerequisites:

- Infor VISUAL 11.0.0 or higher must be installed.
- Internet Information Services 10.x or higher must be installed
- ASP .NET 4.8 or higher must be installed.
- Microsoft .NET Framework 4.6.1 or higher must be installed
- ASP.NET Core Runtime 7.0.18 Hosting Bundle must be installed
- .NET Desktop Runtime 7.0.18 x64 must be installed
- The URL Rewrite extension for IIS must be installed.
- A signed certificate that can be used for SSL or TLS.

The Shop Floor apps are compatible with the latest versions of these browsers:

- Firefox
- Google Chrome
- Microsoft Edge
- Safari

Licensing

You must apply a Shop Floor license to access Shop Floor apps. You can no longer license the app through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode.

If you previously licensed Shop Floor through VISUAL Time & Attendance or VISUAL BTS/Wedge Barcode, contact Infor to acquire your license key.

Enhancements

Major enhancements have been made to Infor VISUAL Shop Floor.

For more information about how to set up the new enhancements, see the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

For more information about how to use the new enhancements, see the Infor VISUAL Shop Floor online help.

Re-sequence scheduling form columns

Users can now configure the column sequence in the Resource Schedule grid.

Schedule started work orders first

A new **Display started operations first** checkbox has been added to the **Schedule** tab in **Preferences**. You can now choose to display started work orders at the top of the **Resource Schedule** list after any dispatched operations.

Camera for scanning

New buttons have been added for some fields to allow using the device's built-in camera to scan QR codes.

Display What-If operations in the Resource Schedule

A new **Include projections** check box has been added to the **Resource Schedule** view. This check box allows you to choose to include “What If” projected work order operations in the resource schedule.

Operation priority and freeze functionality

New **Freeze OP** and **Unfreeze OP** buttons have been added to the **Resource Schedule** view. The new buttons allow you to manually freeze and unfreeze operations, as well as specify the freeze date and shop resource.

Limit dispatch setting to selected rows

You may now select which items in the **Resource Schedule** view to dispatch.

Close operation(s) outside of reporting labor

A new **Close OPs** button has been added to the **Resource Schedule** view. This new button allows you to manually close selected operations.

Export to Excel

A new **Export** dropdown menu has been added to several views. This new menu allows you to export the contents of the related grid to **Excel** or **CSV** format.

Add Global Rank to resource schedule

You may now view the work order **Priority (Rank)** in the **Resource Schedule** view.

Add database name to help about

You may now view the VISUAL Enterprise Database Name in the **Help>About** screen.

Implement Soho UI Components

Shop Floor now uses the Infor Design System (Soho) Angular Components.

Transition to new Web API

The Shop Floor web API has been re-written to now use ASP .Net 7.0 for its primary web APIs.

Installing Shop Floor 11.0.0

If you are installing Shop Floor for the first time, see “Installing Shop Floor” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor 9.0.5 or later, see “Applying a Shop Floor update” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor that is earlier than version 9.0.5, see “Uninstalling the TD Mobile Shop Floor app” and “Installing Shop Floor” chapters in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

Resolved issues

This table shows the defects that were resolved in this release:

KB	Defect #	Description
KB-2333311	JR-6847345	Cannot find column [xxxxxx], when shipping in Shop Floor Mobile
KB-2331810	JR-6827685	PNG Pictures in Part Maintenance not displaying in Shop Floor Mobile.
KB-2329780	JR-6788333	Unable to use specific user id (JR1216) in Shop Floor Mobile.
KB-2328182	JR-6764321	Resource ID can be changed in Shop Floor labor ticket entry.
KB-2328204	JR-6759774	Move Request from Stop Job causes quantity on hand to show in both target and source locations.
KB-2326356	JR-6738259	The 'Set Up/Run Complete?' field in Labor/Stop Job is not restricted to the tick box only.
KB-2322684	JR-6657405	Shop Floor Mobile allows labor entry to a closed or locked accounting period.
KB-2322708	JR-6649849	Getting "Error Code: Out of Memory" when selecting Receivers or Purchase Orders.
KB-2265881	JR-3387813	Dispatching and changing the order of Work Order Operations does not update dispatch sequence for certain Resources.
