## About this document

This document describes the updates made to Infor Shop Floor.

## Intended audience

This document is intended for any VISUAL Shop Floor user.

## Related document

You can find the documents in the product documentation section of the Infor Support portal.

*Infor VISUAL Shop Floor Installation and Configuration Guide*

## Contacting Infor

If you have questions about Infor products, go to Infor Concierge at <https://conciierge.infor.com/> and create a support incident.

If we update this document after the product release, we will post the new version on the Infor Support Portal. To access documentation, select **Search > Browse Documentation**. We recommend that you check this portal periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

## Prerequisites

To use VISUAL Shop Floor, you must meet these prerequisites:

- Infor VISUAL 9.0.8 Service Pack 3 or higher must be installed. Ensure that you have applied all available database patches. See the *Infor VISUAL 9.0.8 SP3 Release Notes*.
- Internet Information Services 7.x or higher must be installed.
- The current version of Asp .NET for your operating system must be installed:
  - Use Asp. NET 4.7.2 for Windows Server 2012-r2
  - Use Asp. NET 4.8 for Windows Server 2016 or Windows 10.
- Microsoft .NET Framework 4.6.1 or higher must be installed
- The URL Rewrite extension for IIS must be installed.
- A signed certificate that can be used for SSL or TLS.

The Shop Floor apps are compatible with the latest versions of these browsers:

- Firefox
- Google Chrome
- Microsoft Edge
- Safari

## Versions

The version of the Infor VISUAL Shop Floor is 9.0.8.38 Service Pack 3.

The version of Vmfg Web API is 9.0.8.38 Service Pack 3.

## Installing Shop Floor 9.0.8 Service Pack 3

If you are installing Shop Floor for the first time, see “Installing Shop Floor” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor 9.0.5 or later, see “Applying a Shop Floor update” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor that is earlier than version 9.0.5, see “Uninstalling the TD Mobile Shop Floor app” and “Installing Shop Floor” chapters in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

## Resolved issues

This table shows the defects that were resolved in this release:

Defect #	Description
710026	The correct operation types are now displayed when changing the site in Preferences.
710507	A divide by zero error is no longer displayed when entering a labor ticket.
711348	Group resources are now displayed when viewing resources by operation type.
713293	An error is no longer displayed when scanning an indirect ID.
713825	Comments are now saved on indirect labor tickets.
717130	Durations are now displayed in local machine time.
717246	The same Clock In time is no longer used for all prorated labor tickets in the My Labor form. To resolve this issue, Act Clock In and Act Clock Out columns were added to the My Labor form. Users who license Shop Floor with a BTS license should use these new columns and hide the existing Clock In and Clock Out columns. Users who license Shop Floor with a Time & Attendance license should hide the Act Clock In and Act Clock Out columns and use the existing Clock In and Clock Out columns.
717418	Hourly cost and actual labor cost information are now saved when using Shop Floor with a site whose parent entity uses average costing.
719333	An error is no longer displayed when the site ID contains an ampersand.
720572	A labor ticket can no longer be created for a work order that has an active ECN.
720774	An invalid path exception is no longer displayed when creating an inventory transaction in a site whose parent entity uses average costing. See the <i>Infor Shop Floor Installation Guide</i> for instructions on how to set up Shop Floor with average costing.
721287	When issuing a piece-tracked part, the dimensions no longer revert to the dimensions that are specified on the work order material requirement. This issue occurred after trace information was specified for the part.
721292	Issues with the Submit button and the # Pieces field not being available when issuing and returning piece tracked parts to work orders have been resolved.

---

Defect #	Description
721298	An error message is no longer displayed, and transactions are no longer duplicated, when creating inventory transactions for piece tracked parts in a site whose parent entity uses average costing.
722212	An over-issue message is no longer displayed multiple times when issuing a traced piece tracked part to a work order.
722559	A location is no longer required to receive a purchase order for a consumable part.
723447	An error message that states, "The trace header quantity does not equal the sum of the detail rows," is no longer displayed when issuing a piece-tracked part to a work order.
