## About this document

This document describes the updates made to Infor Shop Floor.

## Intended audience

This document is intended for any VISUAL Shop Floor user.

## Related document

You can find the documents in the product documentation section of the Infor Support portal.

*Infor VISUAL Shop Floor Installation and Configuration Guide*

## Contacting Infor

If you have questions about Infor products, go to Infor Concierge at <https://conciierge.infor.com/> and create a support incident.

If we update this document after the product release, we will post the new version on the Infor Support Portal. To access documentation, select **Search > Browse Documentation**. We recommend that you check this portal periodically for updated documentation.

If you have comments about Infor documentation, contact [documentation@infor.com](mailto:documentation@infor.com).

## Prerequisites

To use VISUAL Shop Floor, you must meet these prerequisites:

- Infor VISUAL 9.0.8 Service Pack 4 or higher must be installed. Ensure that you have applied all available database patches. See the *Infor VISUAL 9.0.8 SP4 Release Notes*.
- Internet Information Services 7.x or higher must be installed.
- The current version of Asp .NET for your operating system must be installed:
  - Use Asp. NET 4.7.2 for Windows Server 2012-r2
  - Use Asp. NET 4.8 for Windows Server 2016 or Windows 10.
- Microsoft .NET Framework 4.6.1 or higher must be installed
- The URL Rewrite extension for IIS must be installed.
- A signed certificate that can be used for SSL or TLS.

The Shop Floor apps are compatible with the latest versions of these browsers:

- Firefox
- Google Chrome
- Microsoft Edge
- Safari

## Versions

The version of the Infor VISUAL Shop Floor is 9.0.8.42 Service Pack 4.

The version of Vmfg Web API is 9.0.8.42 Service Pack 4.

## Installing Shop Floor 9.0.8 Service Pack 4

If you are installing Shop Floor for the first time, see “Installing Shop Floor” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor 9.0.5 or later, see “Applying a Shop Floor update” in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

If you are updating an installation of Infor VISUAL Shop Floor that is earlier than version 9.0.5, see “Uninstalling the TD Mobile Shop Floor app” and “Installing Shop Floor” chapters in the *Infor VISUAL Shop Floor Installation and Configuration Guide*.

## Resolved issues

This table shows the defects that were resolved in this release:

Defect #	Description
719196	The correct transaction type is now assigned to labor tickets that are created for a task assigned to a project.
723294	Delivery schedule purchase order lines that have already been received are no longer displayed in the Purchase Orders Due form.
726069	In average cost environments, records for material issues for traced parts are now written to the INV_TRANS_AVE table.
726471	The closed date is now populated on the work order after the work order is fully received.
730094	An "invalid column name" error is no longer displayed when receiving a work order for a traced part.
731201	The up and down arrows are no longer displayed when configuring the display of table columns in Issue by Work Order. The columns can be shown or hidden, but they cannot be rearranged.
731336	An "invalid warehouse location ID" message is no longer displayed when changing the default warehouse and location on the Issue by WO form.
731648	An "overlapping labor tickets not allowed" error when lag time is set up in Time & Attendance.
724243	If the Only Trace from Preceding Operation check box is selected in Application Global Maintenance, then trace amounts can be added when receiving a work order.
726782	A "trace required" message is no longer received when submitting an issue return for a piece-tracked part.
720252	Users are now warned when a location will be driven negative by a transaction. The message is displayed when the issue negative check boxes are cleared in Site Maintenance.
724131	When issue returning trace quantities, the quantity is validated against the quantity that was originally issued. Returning a greater quantity than the quantity that was issued is no longer allowed.
